Interested persons are invited to submit their views on the foregoing questions in writing at any time. Written submissions should be made in triplicate to George Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549. Such communications should refer to File No. S7–693.

This public rulemaking proceeding has been ordered by the Commission pursuant to Sections 14(a), 21(a), 22 and 23(a) of the Securities Exchange Act of 1934 and Rule 4(b) of the Commission's Rules of Practice.

(Secs. 14(a), 21(a), 22, 23(a), 48 Stat. 895, 899, 901; sec. 203(a), 49 Stat. 704; sec. 8, 49 Stat. 1379; sec. 5, 78 Stat. 569, 570; sec. 18, 89 Stat. 155; 15 U.S.C. 78n(a), 78n(a), 78v, 78w (a).)

By the Commission.

AUGUST 29, 1977.

GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #1361]

IDAHO

Declaration of Disaster Loan Area

Adams County and adjacent counties within the State of Idaho, constitute a disaster area as a result of drought. The survey reflected damage to wells and severe crop losses during the 1976 crop year and continuing into the 1977 crop year. Eligible persons, firms and organizations may file applications for loans for physical damage until the close of business on October 24, 1977, and for economic injury until the close of business on May 22, 1978, at:

Small Business Administration, District Office, 1005 Main St., Boise, Idaho 83702.

or other locally announced locations.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: August 23, 1977.

A. VERNON WEAVER,
Administrator.

[Declaration of Disaster Loan Area #1365]

IOWA

Declaration of Disaster Loan Area

The following 51 counties and adjacent Counties within the State of Iowa, constitute a disaster area as a result of drought which caused severe crop losses during the 1976 crop year, and continuing into the 1977 crop year:

Adair	Lucas
Adams	Madison
Appanoose	Mahaska
Audubon	Marion
Benton	Marshall
Boone	Mills
Calhoun	Monroe
Carroll	Montgomery
Cass	Page
Clarke	Polk
Crawford	Pottawattamie
Dallas	Poweshiek
Davis	Ringgold
Decatur	Shelby
Fremont	Story
Greene	Tama
Guthrie	Taylor
Hamilton	Union
Hardin	Van Buren
Henry	Wapello
Iowa	Warren
Jasper	Washington
Jefferson	Wayne
Keokuk	Webster
Lee	Wright
Linn	

Eligible persons, firms and organizations may file applications for loans for physical damage until the close of business on October 24, 1977, and for economic injury until the close of business on May 22, 1978, at:

Small Business Administration, District Office, 210 Walnut St., Des Moines, Iowa 50309.

or other locally announced locations.

INTERSTATE COMMERCE COMMISSION

[No. 473]

ASSIGNMENT OF HEARINGS

SEPTEMBER 1, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but increased parties should take appropriate steps to insure that they are notified

V 42 173 SEP 7 77 UMI

of cancellation or postponements of hearings in which they are interested.

MC 142978 W. L. Davis, Inc., now being assigned November 8, 1977 (1 day) for hearing at Omaha, Nebr., in a hearing room to be later designated.

MC 124211 Sub No. 284 Hilt Truck Line, Inc., now being assigned November 9, 1977 (3 days) for hearing at Omaha, Nebr., in a hearing room to be later designated.

MC 107012 Sub No. 232 North American Van Lines, Inc., now being assigned November 14, 1977 (1 week) for hearing in Omaha, Nebr., in a hearing room to be later designated.

MC 102567 Sub 194, McNair Transport, Inc., MC116077 Sub No. 382, Robertson Tank Lines, Inc. and MC 121496 Sub No. 3, Caugo Corp. now being assigned November 28, 1977 (9 days) at Houston, Tex., in a hearing room to be later designated.

MC 125808 (Sub-No. 1), AAACON, Auto Transport, Inc.—Petition Seeking Modification of Permit (Certification), now assigned September 26, 1977, at New York, N.Y., will be held in the Tax Court, Room A-238, 26 Federal Plaza.

No. 36583, Oklahoma Intrastate Freight Rates and Charges—1977, now assigned October 12, 1977, at Oklahoma City, Okla., will be held at the Bankruptcy Court, Room 4214, Federal Building, 215 NW. 4th St.

MC 134035 (Sub-No. 18), Douglas Trucking Co., now assigned October 17, 1977, at Dallas, Tex., will be held in Room 5A15–17, Federal Building, 1100 Commerce St.

MC 119988 (Sub-No. 106), Great Western Trucking Co., Inc., now assigned October 18, 1977, at Dallas, Tex., will be held in Room 5A15–17, Federal Building, 1100 Commerce St.

MC 126421 (Sub-No. 7), Gypsum Transport, Inc., now assigned October 19, 1977, at Dallas, Tex., will be held in Room 5A15–17, Federal Building, 1100 Commerce St.

MC 83835 (Sub-No. 140), Wales Transportation, Inc., now assigned October 20, 1977, at Dallas, Tex., will be held in Room 5A15–17, Federal Building, 1100 Commerce St.

MC 128273 (Sub-No. 263), Midwestern Distribution, Inc., now assigned October 21, 1977, at Dallas, Tex., will be held in Room 5A15–17, Federal Building, 1100 Commerce St.

MC–F–13116 Gra-Bell Truck Line, Inc.—Purchase (Portion)—Great Lakes Express Co., MC–F–13096 Herriott Trucking Co., Inc.—Purchase—(Portion)—Great Lakes Express Co., MC–F–13100 The Cleveland, Columbus & Cincinnati Highway, Inc.—Purchase (Portion)—Great Lakes Express Co., MC–F–13101 Red Star Express Lines of Auburn, Inc., d.b.a. Red Star Express Lines—Purchase (Portion)—Great Lakes Express Co., MC–F–13102 Maiers Motor Freight Co.—Purchase (Portion)—Great Lakes Express Co., MC–F–13103 United Trucking Service, Inc.—Purchase—(Portion)—Great Lakes Express Co., MC–F–13106 Branch Motor Express Co.—Control—Great Lakes Express Co., MC–F–13233 Arkansas Best Freight—Purchase (Portion)—Great Lakes Express Co., now being assigned October 11, 1977 for prehearing conference at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 98052 (Sub-No. 39), General Transfer Co., now assigned September 20, 1977, at Springfield, Ill., will be held at the Leland Building, 527 East Capitol.

MC–F–12718 Flamingo Transportation, Inc.—Control—Tarpon Transportation, Inc. is postponed indefinitely.

MC 142532 Sub 1, Sunshine Cartage Corp., now being assigned November 28, 1977 (1 week) at Miami, Fla., in a hearing room to be later designated.

MC 127810 (Sub-No. 3), Sherman & Boddie, Inc., now assigned September 15, 1977, at Washington, D.C., is canceled and application dismissed.

MC 100666 (Sub-No. 341), Melton Truck Lines, Inc., now assigned September 12, 1977, at Memphis, Tenn., is canceled and application dismissed.

MC 58923 Sub No. 45 Georgia Highway Express, Inc., now being assigned November 29, 1977 (9 days) for hearing in Atlanta, Ga., in a hearing room to be later designated

H. G. Homme, Jr.,
Acting Secretary.

EASTERN RAILROAD "YO-YO" FILINGS

September 1, 1977.

On August 31, 1977, the Eastern Railroads filed with the Interstate Commerce Commission tariffs proposing to increase by 7 percent the rates on various commodities. The railroads have notified the Commission of their desire that the increases be considered pursuant to sections 15(8) (b) and 15(8) (c) of the Interstate Commerce Act. Sections 15(8) (b) and 15(8) (c), commonly referred to as the "Yo-Yo" provisions, allow the railroads, under certain conditions, to increase by 7 percent or decrease by 7 percent their rates on selective commodities. The text of these sections is set forth as an appendix. The docket numbers assigned to the proposals and the commodities involved in the proposed adjustment are as follows:

No. 36670—Glass Containers—Eastern, Territory—7 Percent Yo-Yo, Increase, 1977.
No. 36671—Metal Closures—Eastern Territory—7 Percent Yo-Yo Increase, 1977.
No. 36672—Fresh Meat, Packing House Products—Eastern Territory—7 Percent Yo-Yo Increase, 1977.
No. 36673—Sewer Pipe Joint Compounds—Eastern Territory—7 Percent Yo-Yo Increase, 1977.
No. 36674—Moisture or Condensation Pipe Line Coating—Eastern Territory—7 Percent, Yo-Yo Increase, 1977.
No. 36675—Floor Sweeping Compounds-Eastern Territory-7 Percent Yo-Yo Increase, 1977.
No. 36676—Coal or Coal Briquettes-Eastern Territory-7 Percent Yo-Yo Increase, 1977.
No. 36677—Wood Chips-Eastern Territory-7 Percent Yo-Yo Increase, 1977.
No. 36678—Asphalt Additive, Paving and Paving Joint Compounds-Eastern Territory-7 Percent Yo-Yo Increase, 1977.
No. 36679—Pulpwood-Eastern Territory-7 Percent Yo-Yo Increase, 1977.
No. 36680—Butter Fat, Butter Grease-Eastern Territory-7 Percent Yo-Yo Increase, 1977.
No. 36681—Carpets-Eastern Territory-7 Percent Yo-Yo Increase, 1977.

Copies of the railroads' justification statements in support of each of the proposed increases may be obtained from the carriers by writing directly to:

Mr. Charles L. Smith, Chairman, TEA-Eastern Railroads, Two Pennsylvania Plaza, New York, N.Y. 10001.

For convenience of the public, copies of the justification statements may be examined at the following locations in the Interstate Commerce Commission Building at 12th and Constitution Avenue, NW., Washington, D.C. 20423:

Public Docket Room, Room 1221.
Section of Tariffs, Room 4331.
Public Information Office, Room 1211.

Appendix

SECTION 15(8) (b)
SECTION 15(8) (c)

"(b) Pending a hearing pursuant to subdivision (a), the schedule may be suspended, pursuant to subdivision (d), for 7 months beyond the time when it would otherwise go into effect, or for 10 months if the Commission makes a report to Congress pursuant to subdivision (a), except under the following conditions:

"(i) In the case of a rate increase a rate may not be suspended on the ground that it exceeds a just and reasonable level if the rate is within a limit specified in subdivision (c), except that such a rate change may be suspended under any provision of section 2, 3, or 4 of this part or, following promulgation of standards and procedures under section 1 (5) (d) of this part, if the carrier is found to have market dominance, within the meaning of section 1(5) (c) (1) of this part, over the service to which such rate increase applies; or

"(ii) In the case of a rate decrease, a rate may not be suspended on the ground that it is below a just and reasonable level if the rate is within a limit specified in subdivision (c), except that such a rate change may be suspended under any provision of section 2, 3, or 4 of this part, or for the purposes of investigating such rate change upon a complaint that such rate change constitutes a competitive practice which is unfair, destructive, predatory or otherwise undermines competition which is necessary in the public interest.

"(c) The limitations upon the Commission's power to suspend rate changes set forth in subdivisions (b) (i) and (ii) apply only to rate changes which are not of general applicability to all or substantially all classes of traffic and only if—

"(i) the rate increase or decrease is filed within 2 years after the date of enactment of this subdivision;

"(ii) the common carrier by railroad notifies the Commission that it wishes to have the rate considered pursuant to this subdivision;

"(iii) the aggregate of increases or decreases in any rate filed pursuant to clauses (i) and (ii) of this subdivision within the first 365 days following such date of enactment is not more than 7 per centum of the rate in effect on January 1, 1976; and

"(iv) the aggregate of the increases or decreases for any rate filed pursuant to clauses (i) and (ii) of this subdivision within the second 365-day period following such date of enactment is not more than 7 per centum of the rate in effect on January 1, 1977.

Verified complaints by concerned persons, to be considered by the Commission in evaluating the "Yo-Yo" filings, must be filed on or before September 19, 1977. The verified complaint should make reference to the "Yo-Yo" Filing and be addressed to:

Suspension and Fourth Section Board, Room 4336, Interstate Commerce Commission, 12th & Constitution Avenue NW., Washington, D.C. 20423

H. G. Homme, Jr.,
Acting Secretary.

[FR Doc.77-25980 Filed 9-6-77;8:45 am]

FOURTH SECTION APPLICATIONS FOR RELIEF

September 1, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1100.40) and filed on or before September 22, 1977.

FSA No. 43422—*Anhydrous Ammonia from Rose Bluff, La.* Filed by Southwestern Freight Bureau, Agent (No. B–702), for interested rail carriers. Rates on anhydrous ammonia, in tank car loads, as described in the application, from Rose Bluff, La., to Sheffield, Ala., Rexburg, Miss., Memphis, Tenn., and points in Florida.

Grounds for relief—Market competition.

Tariff—Supplement 93 to Southwestern Freight Bureau, Agent, tariff 273–G, I.C.C. No. 5188. Rates are published to become effective on October 1, 1977.

Aggregate-of-Intermediates

FSA No. 43423—*Anhydrous Ammonia from Rose Bluff, La.* Filed by Southwestern Freight Bureau, Agent (No. B–703), for interested rail carriers. Rates on anhydrous ammonia, in tank car loads, as described in the application, from Rose Bluff, La., to Rexburg, Miss., and Memphis, Tenn.

Grounds for relief—Maintenance of depressed rates published to meet market competition without use of such rates as factors in constructing combination rates.

Tariff—Supplement 93 to Southwestern Freight Bureau, Agent, tariff 273–D, I.C.C. No. 5188. Rates are published to become effective on October 1, 1977.

By the Commission.

H. G. Homme, Jr.,
Acting Secretary.

REVISION OF RAILROAD COST METHODOLOGY

Public Meetings

August 30, 1977.

Section 307 of the Regulatory Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94–210; 90 Stat. 55) amends section 20(3) of the Interstate Commerce Act (49 U.S.C. 20(3)) to require the prescription of a new uniform cost and revenue accounting and reporting system for railroads. The required regulations and procedures were issued by the Commission on June 24, 1977, in No. 36367, Revision to the Uniform System of Accounts for Railroads. Published at 42 FR, July 7, 1977, page 35016.

In addition, amended section 20(3) (b) indicates that the prescribed cost accounts are to be used in determining fixed and variable costs and in assigning such costs to various functions, services or activities. To aid in such use, the Bureau of Accounts is revising its methodology for finding the costs of railroad services.

Professional consultants (Haskins & Sells, and Peat, Marwick, Mitchell & Co.) have been hired to provide recommendations to the Bureau on this subject. They published an interim draft report of their conclusions on August 29, 1977. The Bureau will hold informal meetings concerning this report on September 15 and 16, 1977. Copies of the report may be obtained from the Bureau's Section of Cost and Valuation by persons who will attend the meetings.

The meeting on September 15 will be held in Room 6381 of the Interstate Commerce Commission Building, Washington, D.C., beginning at 9 a.m. This meeting will be an all-day work session dealing with technical questions concerning the use of statistical analysis in the proposed rail cost methodology. The emphasis will be on determining variable and constant costs and on the feasibility of assigning expenses to services by the use of regression analysis.

The meeting on September 16 will be held in Room 6373 beginning at 9 a.m. and is also expected to continue all day. It will include an explanation of the cost methodology concept, a status report on work accomplished, and a report on work in progress.

Both sessions are open to all interested persons. In order that adequate seating accommodations can be assured, those expecting to attend are requested to notify, Walter D. Vliet, 202–275–6175 on or before September 12, 1977.

Notice of these informal meetings shall be given to the general public by the deposit of a copy of this Notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by the delivery of a copy of the Notice to the Director, Office of the Federal Register, for publication in the Federal Register.

Bryan Brown, Jr.,
Acting Director.

9

FEDERAL RESERVE SYSTEM.

AGENCY HOLDING THE MEETING: Board of Governors of the Federal Reserve System.

TIME AND DATE: 10 a.m., Tuesday, September 13, 1977.

PLACE: 20th Street and Constitution Ave., NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Proposed salary structure adjustments at the Federal Reserve Banks of Boston, Atlanta, and Kansas City.

2. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board: (202) 452-3204.

Dated: September 2, 1977.

[S-1248-77 Filed 9-2-77;11:18 am]

10

NATIONAL TRANSPORTATION SAFETY BOARD.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 44110, September 1, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: September 8, 1977, 9:30 a.m. (NM-77-27).

CHANGE IN THE MEETING: The following agenda item, to be considered in closed session, has been added:

Discussion.—Proposed organization redesignation in the Bureau of Accident Investigation.

[S-1242-77 Filed 9-2-77;9:15 am]

11

POSTAL SERVICE.

The Committee on Postal Rates of the Board of Governors of the United States Postal Service, pursuant to the Bylaws of the Board (39 CFR 5.2, 7.5 (as amended, 42 FR 12862, 12863)) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice that it intends to hold a meeting at 8:30 a.m. on Friday, September 9, 1977, in the Benjamin Franklin Room, 11th Floor, Postal Service Headquarters, 475 L'Enfant Plaza SW., Washington, D.C. 20260. The meeting is open to the public. Requests for information about the meeting should be addressed to the Secretary of the Board, Louis A. Cox, at 202-245-4632.

The Committee will discuss the Recommended Decision of the Postal Rate Commission, No. MC77-2, concerning Postponement of the Effectiveness of Section 002.1 of the Domestic Mail Classification Schedule. This Committee meeting is to be held in anticipation of a meeting of the Board of Governors which is scheduled to commence at 9 a.m. on the same day. The Commission's Recommended Decision is on the agenda for the Board meeting.

ROGER P. CRAIG,
Assistant Secretary.

[S-1240-77 Filed 9-1-77;2:35 pm]

12

POSTAL SERVICE

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR 7.5 (as amended, 42 F.R. 12863)) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice that it intends to hold a meeting at 9 a.m. on Friday, September 9, 1977, in the Benjamin Franklin Room, 11th Floor, Postal Service Headquarters, 475 L'Enfant Plaza SW., Washington, D.C. 20260. The meeting is open to the public. The Board expects to discuss the matters stated in the Agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, Louis A. Cox, at 202-245-4632.

AGENDA

1. Minutes of the Previous Meeting.
2. Remarks of the Postmaster General.

(In keeping with its consistent practice, the Board's agenda provides this opportunity for the Postmaster General to inform the members of miscellaneous current developments concerning the Postal Service. He might report, for example, the occurence of a recent Congressional hearing, the appointment or assignment of a key official, or the effect on postal operations of unusual weather or a major strike in the transportation industry. Nothing that requires a decision by the Board is brought up under this item.)

3. Status Report on Rate and Classification Matters. (Mr. McCaffrey, Assistant Postmaster Postmaster General for Rates and Classification Department, will present a review of the current status of the postal rate and mail classification proceedings that are pending before the Postal Rate Commission.)

4. Status Report on Five-year Plan. (Mr. Biglin, Senior Assistant Postmaster General, Finance Group, will present this report.)

5. Postal Rate Commission Budget for Fiscal Year 1978. (Under the Postal Reorganization Act, the Postal Rate Commission periodically prepares and submits to the Postal Service a budget of the Commission's expenses. The budget is to be considered approved as submitted if the Governors of the Postal Service do not act to adjust it by unanimous written decision. This matter is included on the agenda to give the Governors an opportunity to act on the Commission's budget.)

6. Recommended Decision of the Postal Rate Commission on Postponement of the Effectiveness of Section 002.1 of the Domestic Mail Classification Schedule. (Mr. Cox, General Counsel, will present the Recommended Decision on Postponement of the Effectiveness of Section 002.1 of the Domestic Mail Classification Schedule.)

ROGER P. CRAIG,
Assistant Secretary.

TENNESSEE VALLEY AUTHORITY.

TIME AND DATE: 10:30 a.m., Thursday, September 8, 1977.

PLACE: Conference Room B-32, West Tower, 400 Commerce Avenue, Knoxville, Tenn.

STATUS: Open.

MATTERS TO BE CONSIDERED:

A—PERSONNEL ACTIONS

1. Change of Status—James P. Darling from Assistant Director to Director of Power Resource Planning, Chattanooga, Tenn.

B—CONSULTING AND PERSONAL SERVICE CONTRACTS

1. Renewal of consulting contract with Mine Reclamation Consultants, Inc., Laramie, Wyoming—Division of Forestry, Fisheries, and Wildlife Development.

2. Renewal of personal service contract with Teledyne Engineering Services (formerly Teledyne Materials Research), Waltham, Mass.—Office of Engineering Design and Construction.

3. Renewal of consulting contract with National Economic Research Associates, New York, N.Y.—Office of Power.

C—PURCHASE AWARDS

1. Req. No. 143789—Reheater and superheater outlet pendant assemblies for Gallatin Steam Plant.

2. Amendment to Contracts 66P-76-T1 and 67P-76-T2 with General Electric for nuclear fuel for Browns Ferry Nuclear Plant.

3. Req. No. 144096—Steam chests and accessories for Widows Creek Steam Plant.

4. Amendment to Contract 76K38-86163-1 and -3 with Atwood and Morrill Company, Incorporated, and BIF, A Unit of General Signal Corp., for motor-operated and manual valves for Bellefonte Nuclear Plant.

5. Amendment to Contracts 73P65-12293 and 75P65-6087-1 with General Electric Company, for nuclear fuel for Hartsville and proposed Phipps Bend Nuclear Plants.

6. Req. No. 821085—Partial reissue for condenser cooling water conduits for proposed Phipps Bend Nuclear Plant.

7. Req. No. 821984—Butterfly valves and operators for Hartsville and proposed Phipps Bend Nuclear Plants.

8. Req. No. 547378—Revised partial reissue—Indefinite quantity term contract for diesel fuel oil for various TVA projects and warehouses.

V 42 173 SEP 7 77 UMI

9. Req. No. 821105 Reissue—125-ton polar cranes for Hartsville and proposed Phipps Bend Nuclear Plants.

10. Req. No. 820721—Partial reissue—Gate valves for Hartsville and proposed Phipps Bend Nuclear Plants.

11. Req. No. 822170—Water chilling equipment for Hartsville and proposed Phipps Bend Nuclear Plants.

D—Project Authorizations

1. No. 3270—Replacement of boiler roof tubes at Gallatin Steam Plant Units 1 and 2.

E—Fertilizer Items

None.

F—Power Items

1. New power contract with Union Carbide Corp., Sheffield, Ala.

2. New power contract with American Enka Co.

3. Lease and amendatory agreement with Warren Rural Electric Cooperative Corporation—Caneyville and Rosine substations.

4. Lease and amendatory agreement with Electric Plant Board of the city of Princeton, Ky.—Princeton substation.

5. Agreement with Southwest Tennessee Electric Membership Corporation—establishment of 13-kV delivery point at TVA's proposed Mason substation.

6. Agreement with Upper Cumberland Electric Membership Corp.—establishment of 13-kV delivery point at TVA's proposed Algood substation.

7. Agreement with Cherokee Electric Cooperative—transfer of delivery point.

G—Real Property Transactions

1. Resolution relating to grant of permanent road easement to Robert L. Livingston, et al., affecting a portion of Union Mississippi substation land in Union County, Miss.—tract XUNMSS–1E.

2. Resolution relating to grant of permanent easement to the city of Sheffield, Ala., affecting approximately 44 acres of Muscle Shoals reservation land—tract XT2NPT–8E.

3. Resolution relating to abandonment of easement rights affecting 0.7 acre of Norris Reservoir land in Campbell County, Tenn.—tract XNR–62.

4. Contract with Hawkins County, Tenn., for highway adjustments in the proposed Phipps Bend Nuclear Plant area.

5. Contract with Trousdale County, Tenn., for highway adjustments in the Hartsville Nuclear Plant area.

6. Supplemental agreement between TVA and Tennessee Pulp and Paper Company—diversion of water impounded by Pickwick Dam.

7. Grant of permit and right of way to Amoco Pipeline Co. affecting approximately 23.3 acres of Wheeler Reservoir land in Limestone and Morgan Counties, Ala.—tracts XCSPD–1P, XWR–610P, and XWR–612P.

8. Filing of condemnation suits.

H—Unclassified

1. Agreement with Electric Power Research Institute for concurrent scrubber project.

2. Resolution relating to payments in lieu of taxes to states and counties, as provided under section 13 of the TVA Act, as amended.

3. Supplement to contract among Tennessee Valley Authority, South Cumberland Area Recreation Commission, and State of Tennessee, covering arrangements for land purchases in the Savage Gulf Wilderness Natural Area.

CONTACT PERSON FOR MORE INFORMATION:

John Van Mol, Director of Information, or a member of his staff can respond to requests for information about this meeting. Call 615–632–3257, Knoxville, Tenn. Information is also available at TVA's Washington Office 202–343–4537.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-3257]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Town of Gordo, Ala.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Gordo, Ala. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Town Hall, Gordo, Ala.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Dave Housel, Town Hall, P.O. Drawer P. Gordo, Ala. 35466.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Gordo, Ala., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Little Bear Creek	U.S. Highway 82	247
	Old U.S. Highway 82	249
	Illinois Central Gulf RR.	249
	1st Ave.	251
Long Branch	Illinois Central Gulf RR.	218
	1st Ave.	255

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 11, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Village of Hacienda, Fla.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Village of Hacienda, Fl. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Village Office, 3841 State Road 84, Fort Lauderdale, Fla. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Sherman F. Crise, Village Office, 3841 State Road 84, Fort Lauderdale, Fla. 33312.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Hacienda, Fla., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
North New River Canal.	Entire city	7

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 11, 1977.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Town of Auburn, Mass.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Auburn, Mass.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Town Hall, 104 Central St., Auburn, Mass.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. John Wheeler, Executive Secretary, Town of Auburn, Board of Selectmen, Town Hall, 104 Central Street, Auburn, Mass. 01507.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh St., SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Auburn, Mass., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Kettle Brook	Rockland St.	467
	Sword St.[1]	488
Dark Brook (from Kettle Brook to Auburn Pond).	Southbridge Street Bridge[1].	498
	Auburn Street Bridge[1]	493
Dark Brook (Auburn Pond to Central St.).	Church Street Bridge	516
	Auburn Mall	504
Stone Brook (Swanson Rd. to Washington St.).	Mill Terrace Bridge	510
	Central Street-Massachusetts Turnpike I-90.	503
Stone Brook (Pondville Pond to South St.).	South Street Bridge[2]	545
	Elm Street Bridge[1]	519
Unnamed tributary from Rockland St. to Leesville Pond.	Sword St	496
Dark Brook (Stoneville Pond to Leicester Street Bridge).	Leicester Street Bridge	607
	Inwood Street Bridge[1].	560
	Rochdale Street Bridge[1]	521

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Township of Chesterfield, Macomb County, Mich.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Township of Chesterfield, Macomb County, Mich.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review on the Display Table, in the Lobby of the Township Hall, 501 77 North Grothiot, Mount Clemens, Mich.

Any person having knowledge, information, or wishing to make comment on these proposed elevations should immediately notify Mr. Otis Dean Smith, Township Supervisor, Township Hall, 501 77 North Grothiot, Mount Clemens, Mich. 48043.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh St., SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Township of Chesterfield, Macomb County, Mich. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by §1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Salt River	Jefferson Ave.	578.5
	Callens Rd.	578.5
	23 Mile Rd.	580.0

NATIONAL FLOOD INSURANCE PROGRAM

Revision of Proposed Flood Elevation Determinations for Town of Ellisburg, Jefferson County, N.Y.

AGENCY: Federal Insurance Administration.

ACTION: Proposed rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his proposed determinations of flood elevations for the town of Ellisburg, Jefferson County, N.Y., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (sec. 1917.4(a)).

Due to recent engineering analysis, this notice revises the proposed determinations of base flood elevations published in 42 FR 18235 on April 5, 1977, and in the Jefferson County Journal published on March 23, 1977, and March 30, 1977, and hence supersedes those notices.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at the Town Hall, Ellisburg, N.Y.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. William Fulkerson, Town Supervisor, Town Hall, Ellisburg, N.Y. 13636.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: These base flood elevations are the basis for the flood plain managementmeasures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Sandy Creek	State Route 193	301
	State Route 289	442
	Mathers Mills Rd.	485
Bear Creek	Milk Plant Rd.	564
	Church Rd.	616
	Wardwell Settlement Rd.	617
	Route 11 (upstream side).	621
	Queens Farm Reservoir Dam.	665
	Upstream corporate limits.	700
Skinner Creek	South corporate limits.	249
Lake Ontario	Northwest corporate limits.	251
	Jefferson Park Rd.	251
	Montario Rd.	251
	Renshaw Bay Rd.	249

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

Issued: August 11, 1977.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Town of Mentz, Cayuga County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the town of Mentz, Cayuga County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Town Clerk's Office, 11 Pine Street, Port Byron, N.Y.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Herbert Marshall, Supervisor of Mentz, Baptist Hill Road, R.D. No. 1, Port Byron, N.Y. 13140.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the town of Mentz, Cayuga County, N.Y., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

[24 CFR Part 1917]

[Docket No. FI-3271]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Town of Wendell, N.C.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Wendell, N.C.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Town Hall, Corner 4th and Pine Streets, Wendell, N.C.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor June Perry, Town Hall, Corner 4th and Pine Streets, Wendell, N.C. 27591.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Wendell, N.C., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be use to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Hominy Branch	North Carolina State Rd. 2329.	273
Little River	Southern Ry.	226
	U.S. 64	227
Lizard Lick Creek	U.S. 64	231
	North Carolina State Rd. 2353.	257
Buffalo Branch	do	272
Buffalo Creek	North Carolina State Rd. 2358.	262
	North Carolina State Rd. 1007.	267
	Southern Ry.	270

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 11, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Unincorporated Areas of Trumbull County, Ohio

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the unincorporated areas of Trumbull County, Ohio.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Trumbull County Office, Warren, Ohio.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Chairman Anthony Bernard, 160 High Street, N.W., Warren, Ohio 44481.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the unincorporated areas of Trumbull County Ohio, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The Community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Borough of Chambersburg, Franklin County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Borough of Chambersburg, Franklin County, Pa.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the first floor of the Borough Office, 100 South 2nd Street, Chambersburg, Pa.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Honorable William Stover, Mayor of Chambersburg, 70 West King Street, Chambersburg, Pa. 17201.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Borough of Chambersburg, Franklin County, Pa. in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-40128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Conococheague Creek.	Honeywell Ave.	564
	Dam, 1st one upstream of corporate limits.	577
	Near Irva Dr.	586

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Borough of Walnutport, Northampton County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Borough of Walnutport, Northampton County, Pa. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Walnutport Borough Hall, Lincoln Avenue, Walnutport, Pa.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Henry Kline, President of Walnutport Borough Supervisors. Walnutport Borough Hall, Lincoln Avenue, Walnutport, Pa. 18088.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Borough of Walnutport, Northampton County, Pennsylvania in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Lehigh River.	Downstream corporate limits.	357
	Foot of Gap St.	358
	South end of Lehigh St.	360
	300 ft downstream of Main St.	362
	100 ft upstream of Main St.	363
	At U.S.G.S. gaging station.	365
	At upstream corporate limits.	366

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Chairman of the Board of Selectmen of the Town of Barre, Wendell Pelkey, Websterville, Vt. 05678.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Barre, Washington County, Vt., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Stevens Branch	South of city of Barre	665
	Upstream of Snowbridge Rd.	728
	Southern corporate limits.	741
Jail Branch	East of city of Barre	717
	Upstream of Waterman St. (Vermont Route 110).	1,077

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 11, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for City of Pomeroy, Garfield County, Wash.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Pomeroy, Garfield County, Wash.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the bulletin board in the City Hall, Pomeroy, Wash.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable Hal Partlow, Mayor of Pomeroy, P.O. Box 370, Pomeroy, Wash. 99347.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh St. SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Pomeroy, Garfield County, Wash., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Pataha Creek	Upstream corporate limits.	1,932
	Columbia St.	1,896
	18th St.	1,886
	15th St.	1,878
	12th St.	1,864
	9th St.	1,853
	7th St.	1,846
	4th St.	1,830
	1st St. (extended)	1,819
	Downstream corporate limits.	1,763

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Village of Waunakee, Wis.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base elevations (100-year flood) listed below for selected locations in the Village of Waunakee, Wis. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Village Hall, 204 West Third Street, Waunakee, Wis.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Ms. Ann Helt, Village President, Village of Waunakee, Village Hall, 204 West Third Street, Waunakee, Wis. 53597.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Waunakee, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 .

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also

V 42 173 SEP 7 77 UMI

be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Six Mile Creek	State Trunk Highway 113.	915
	Madison St	911
	State Trunk Highway 19 and State Trunk Highway 113.	907
	Division Creek	897

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for City of Gillette, Wyo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed Rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the city of Gillette, Wyo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 400 South Gillette Avenue, Gillette, Wyo.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Michael B. Enzi, City Hall, P.O. Box 540, 400 S. Gillette Avenue, Gillette, Wyo. 82716.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the city of Gillette, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980 which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Stone Isle Creek	Highway bridge	4,576
	Railroad bridge	4,563
	do	4,537
	Interstate 90	4,505
East branch	Upstream limit	4,533
	Downstream limit	4,528
West branch	Upstream limit	4,574
	Downstream limit	4,559
Donkey Creek tributary	36-in concrete pipe	4,540
	Twin 48-in concrete pipe	4,525
	do	4,524
	do	4,523
	do	4,522
	do	4,521

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 82, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Natrona County, Wyo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in Natrona County, Wyo. These base flood elevation are the basis for the flood plain management measures that the community is required to their adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City-County Building, Casper, Wyo. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. John P. Burke, Chairman, Board of Commissioners of Natrona County, City-County Building, Casper, Wyo. 82601.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations 100-year flood) for Natrona County, Wyo., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities.

These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
North Platte River	Burlington Northern RR.	5,070
	New Mystery Rd	5,074
	Pipeline Bridge	5,080
Casper Creek	New Yellowstone Rd	5,126
	Old Yellowstone Rd	5,129
	Highway 20	5,152
Squaw Creek	State Highway 220	5,198
Wolf Creek	do	5,177
Garden Creek	Outer Dr	5,422
	Garden Creek Rd	5,618
Sage Creek	15th St	5,224

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 26, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Uinta County, Wyo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selection locations in Uinta County, Wyo.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Uinta County Courthouse, Evanston, Wyo.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Judge C. Stuart Brown, Box 1, Kemmerer, Wyo. 83101.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for Uinta County, Wyo., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year-flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Blacks Fork	Highway bridge	6,645
	Bridge	6,627
Groshon Creek	Highway Box Culvert.	6,665
Little Black Fork	Highway bridge	6,659

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 11, 1977.

SURFACE MINING RECLAMATION AND ENFORCEMENT PROVISIONS

Proposed Rules

AGENCY: Office of Surface Mining Reclamation and Enforcement, Department of the Interior.

ACTION: Proposed rules.

SUMMARY: The regulations in this chapter set out the Department of the Interior's Surface Mining Reclamation and Enforcement program as required by the Surface Mining Control and Reclamation Act of 1977 (Act). These regulations require the Secretary of the Interior to publish initial environmental protection regulations that are applicable to all coal mining operations regulated by the States until a State has an approved regulatory program or a Federal regulatory program is implemented in that State.

DATES: Comments must be received by October 7, 1977. Public hearings will be held starting at 1 p.m. on September 20, 1977, and continuing if necessary at 9 a.m. on September 21, and 22, 1977.

ADDRESSES: Office of Surface Mining Reclamation and Enforcement, Department of the Interior, Washington, D.C. 20240. Public hearings will be held at the Department of the Interior Auditorium, 18th and C Streets NW., Washington, D.C.; Kiel Auditorium, 1416 Market Street, St. Louis, Mo.; Public Library Auditorium, 1347 Broadway, Denver, Colo.; and Morris Harvey College, Riggleman Hall, 2300 McCorkle Avenue, Charleston, W. Va.

FOR FURTHER INFORMATION CONTACT:

Paul Reeves, Office of Surface Mining Reclamation and Enforcement, 202–343–4237.

SUPPLEMENTARY INFORMATION: The Surface Mining Control and Reclamation Act of 1977 (the Act), Pub. L. 95–87, requires the Secretary of the Interior to publish initial environmental protection regulations that are applicable to all coal mining operations regulated by the States until a State has an approved regulatory program or a Federal regulatory program is implemented in that State. These regulations, especially dealing with water quality, were developed in consultation with the Environmental Protection Agency. The Act also requires the Secretary to implement a Federal enforcement program by February 3, 1978, which lasts for the duration of the initial program in each State. Regulations for Federal financial assistance to States for reimbursement of incremental enforcement costs during the initial regulatory program and for development, administration and enforcement of permanent State regulatory programs for the control of surface coal mining and reclamation operations are also required by the Act.

The public is urged to comment on these proposed regulations. The Department of the Interior believes that full public participation in the rulemaking process will improve the quality of its regulatory program and to this end has already held informal public information meetings in Washington, D.C. (42 FR 39491, August 4, 1977) and has already established a continuing liaison with State regulatory authorities.

In light of the volume of comments expected on the regulations proposed and the short time available to meet the statutory deadline for final regulations, we request that, wherever possible, comments be identified by the pertinent section number of the regulations in the left hand margin, and presented section-by-section on separate pages. We also request that wherever possible, people making written and oral presentations at the public hearings preface their comments on individual sections by identifying that section by number. Individuals making oral statements at the public hearing are requested to limit their statements to 15 minutes. A brief discussion of the major parts in the proposed regulations follows.

Part 700 is a general statement of the scope, objectives and applicability of these regulations. It also states the responsibilities of the Secretary, the Director and the States and defines terms used throughout the chapter. The authority of the Secretary, the Director of the Office of Surface Mining Reclamation and Enforcement and other governmental bodies is described, their responsibilities distinguished and the Federal-State delegation of duties described.

Part 710 introduces the initial regulatory program. Initial performance standards which will apply to private and public lands before a permanent State program is approved by the Secretary are included.

Part 715 contains the general initial performance standards and includes regulations governing the operator's general obligation to comply with the initial standards requiring restoration of disturbed areas to suitable post mining use, backfilling and grading, disposal of spoil and waste materials in other areas, topsoil handling, protection of the hydrologic system, construction, inspection and maintenance of dams, use of explosives, and revegetation.

Part 716 contains the special initial performance standards and includes regulations governing steep slope mining, prime farmlands, mountaintop removal, special bituminous coal mines, anthracite coal mines, Alaska coal mining operations and underground mines.

Part 717 contains procedures for adoption of State laws and regulations when they prescribe more stringent standards of performance than the general or special performance standards of this chapter provide.

Part 720 sets forth the regulations governing enforcement activities to be carried out by the States during the initial regulatory program.

Part 721 provides for Federal inspections on the basis of (1) at least two consecutive State inspection reports indicating a violation; (2) information provided by a State or person indicating a violation; (3) random inspections of each operation at least once each six months; and (4) the Secretary's own initiative.

Part 722 sets out the general procedures governing issuance by Federal inspectors of orders of cessation, notices of violation and orders to show cause.

Part 723 contains the regulations governing the assessment of civil penalties and prescribes the use of a mandatory point system in determining the amount of the penalty.

Part 725 sets forth the policies and procedures for reimbursements to States for the incremental costs of enforcing performance standards during the initial regulatory program.

Part 740 sets forth the policies and procedures for grants to States to develop, administer and enforce approved State programs for the control of surface coal mining and reclamation.

Part 795 provides for financial and other assistance to eligible small coal mine operators in determining the hydrologic consequences of mining and reclamation. The analyses are to be performed by qualified public and private laboratories and paid for by the regulatory authority.

Part 830 provides a procedure for dealing with acts of job discrimination due to exercise of rights under the Act.

General

Part 700 is intended to reiterate the purposes and objectives of the Act and familiarize the public with the various programs and procedures the new Office of Surface Mining will be implementing.

The authority and responsibility sections describe the chain of authority in general terms from the Secretary to the Director of the Office to the various Federal and State authorities. The Assistant Secretary, Energy and Minerals, although not mentioned in the Act, will perform key Secretarial duties under the Act and has general Secretarial responsibility for the program.

Definitions are either taken directly from the Act or derived from generally accepted sources. These definitions are applicable to all parts of the regulations, except where stated otherwise in a particular part or section.

For the purpose of these regulations, the term "permit" includes a mining plan approved under 30 CFR Part 211 held by a lessee of Federal or Indian lands; "State regulatory authority" includes the State agency during the initial program as well as the permanent regulatory program; and "surface coal mining and reclamation operations" includes all surface and underground coal mining operations. These broader definitions are required to fully implement the Congressional intent expressed in the Act and legislative history.

The regulations in § 700.12 describe how interested persons can obtain consideration of rulemaking proposals regarding matters within the authority of the Office. The regulations contain public notice requirements and provide for an opportunity to request hearings. They have been designed to encourage public participation in the policymaking process of the Office.

Part 710, Initial Regulatory Program, includes the rules and procedures applicable during the initial period between promulgation of these rules and the implementation of a permanent Federal or State program. Dates and deadlines are set out in this part which affect Federal, State, and private lands. Proposed rules for Indian lands are being published separately as 25 CFR 177, Subpart B.

Section 710.11 states who is covered by the provisions of the Act and regulations. Surface and underground coal mining operations in States regulating coal mining are covered by these regulations during the initial regulatory program.

SMALL OPERATOR EXEMPTION

Under section 502 of the Act, the initial performance standards will apply to virtually all operators on private lands where coal mining operations are regulated by a State, nine months from the date of enactment. However, certain small operators with permits may be exempted for a period of up to seven months to January 1, 1979, from complying with the performance standards, except the standard governing the handling of spoil in § 716.2 of the proposed regulations.

The proposed regulations in § 710.12 establish procedures for obtaining this exemption. They require submission of information and documents essential to determine an applicant's right to the exemption. Although consideration was given to a simple affidavit under oath as a means of establishing eligibility, the virtue of simplicity is more than outweighed by the need to strictly enforce the tonnage restrictions on eligibility. In determining total annual production, the Secretary will attribute to each person production from operations in which that person has a substantial interest.

The procedure for processing each application calls for a recommendation to the Director by the State regulatory authority and an opportunity for public comment. In accordance within the legislative history, the proposed regulations provide the States the opportunity to play a significant role while saving for the Secretary the authority to make the final decision and residual authority to process an appliaction completely in the event that a State fails to make a timely recommendation.

DRAFTING INFORMATION

The principal authors of the proposed regulations in Parts 700 and 710 are: Michael Bradley, Office of Surface Mining Task Force, Edward Clair, Office of the Solicitor, and Neil Strauss, Office of Hearing and Appeals, Department of the Interior.

General Performance Standards

Parts 715, General Performance Standards, and 716, Special Performance Standards, propose standards of performance for coal mining operations. The Congress has defined "surface coal mining operations" in the Act to include "surface impacts incident to an underground coal mine". The Department is preparing these initial regulations to control the more serious adverse environmental impacts of mining, both deep and surface. The regulations recognize the distinct difference between surface coal mining and underground coal mining by referencing those standards for underground mining which differ from surface mining in a separate section of the regulations.

The Department's intention is to promulgate enforceable standards that are understood by the operator and the regulatory authority. This intention is reflected by relatively detailed development of most standards. However, the Department solicits technical information that will improve the clarity of the regulations while meeting the intent of the Act to protect society and the environment from the adverse effects of coal mining.

Section 715.12, *Signs and markers*, deals with signs throughout the permit area. The marking of permit areas, blasting areas and other special activity areas where caution must be exercised by the operator and other personnel is common practice in many States. While minimum spacing requirements are proposed, the specific dimensions and lettering requirements are expected to be regulated by the State regulatory authority during the initial regulatory program.

Section 715.13, *Postmining use of land*, proposes criteria and procedures to determine the postmining use of the land which serves as a reference point for other performance standards of the Act. It has been suggested that the Act is not a land use Act and the Department agrees that land planning activities are limited to those relating to coal mining operations. The Department considers the identification of an achievable postmining land use within a permit area to be essential to achieving the purposes of the Act. It is necessary to provide criteria for the regulatory authority to judge proposals as reasonably achievable and compatible with land use in the surrounding area. The regulations are not intended to create, but rather to support existing land planning capabilities.

Section 715.14, *Backfilling and grading*, implements the requirement to establish a postmining land surface configuration which closely resembles the general configuration of the land surrounding the mine. The section contains backfilling, compaction and grading requirements to ensure that highwalls, regular ridges, inappropriate piles of spoil, and unapproved depressions are eliminated to meet the appropriate original contour. The section provides a means for quantifying pre- and postmining slopes in a manner intended to preclude creation of unstable slopes.

Section 715.15, *Disposal of spoil and waste materials in areas other than the mine working or excavations*, requires two general methods of excess spoil placement, one on moderate sloping areas where no stream channels are to be blocked and the other, the more complex situation involving head-of-hollow fills. The Department has evaluated a number of alternatives regarding the amount of detail contained in the head-of-hollow fill section of the regulations. It believes that the regulations proposed are necessary and appropriate to ensure that spoils placed in unmined areas are constructed to remain as stable as the surrounding natural slopes. The regulations contain standards that are currently complied with by many operators and which do not prohibit the construction of head-of-hollow fills where safe and necessary. The Department feels it important to have regulatory authorities direct operators in the specifics of construction of fills. To leave all design and construction procedures to the operator without detailed analysis of such designs and specific approval of actual construction methods is not considered adequate protection of the environment or of society.

Section 715.16, *Topsoil handling*, spells out requirements for removal, replacement and stockpiling of topsoil. The section recognizes the extreme importance of the A-horizon of certain soils as a seed source and growth medium. Operators are encouraged to remove and replace the A-horizon separately where it is thick enough to be mechanically separated from the underlying horizons. This procedure is practiced with success at a number of mines. The section is also designed to allow the use of other materials as topsoil when the existing topsoil is of insufficient quantity or of poorer quality than the other strata. In order to show that the alternative strata are acceptable, soil analyses, field trials or greenhouse data are required. The Department believes that situations involving areas previously mined and not reclaimed where the original topsoil was buried would be adequately handled under the alternate strata section where material suitable for plant growth would be evaluated.

Section 715.17, *Protection of the hydrologic system*, incorporates the effluent limitations promulgated by the Environmental Protection Agency and, following the directives of the Act, also covers the quality of waters flowing from the permit area after active mining and regrading (during revegetation). The Department has proposed two modifications to existing effluent limitations and especially solicits public comment regarding the proposals. The first modification is related to coal mines in the interior western United States and specifies more stringent effluent limitations for total suspended solids which are generally equal to those permit conditions recommended by EPA regional offices in that geographic area. This modification "re-

V 42 I 173 SEP 7 77 UMI

gionalizes" the regulations in order to control, to the maximum practical extent, soil erosion in an area where soil is critical to revegetation success and water is essential.

The second modification requires that discharges from the permit area caused by precipitation events equal to or less than the 25-year, 24-hour event meet the effluent limitations. Since emphasis of the Act is on the protection of the water resource, the Department determined that its was necessary to specify a precipitation event likely to occur during mining operations. Other measures of precipitation events considered were (1) a 10-year, 24-hour event and (2) a 24-hour event occuring during the life of the mine. Public comment regarding design criteria is invited. Such comments should, wherever possible, be supported by data showing size of precipitation events, impoundments, and water quality.

The regulations stress protection and reestablishment of the essential elements of the hydrologic balance in alluvial valley floors. The Department believes that Congress was resolved to protect alluvial valley floors at an early date and, while coal exchange provisions are still under development, new operations are required to perform detailed surveys and provide representative baseline data (such data are presently characterized in the paper titled "Subirrigated Alluvial Valley Floors", prepared by the Environmental Protection Agency, Region VIII —Table 4, 1860 Lincoln Street, Denver, Colo. 80295) prior to consideration for approval of mining plans and permits.

Section 715.18, *Dams constructed of refuse materials*, provides for control of impoundments constructed of refuse materials. This compliments the authority of the Mining Enforcement and Safety Administration (MESA), which has jurisdiction over such structures from the standpoint of employee health and safety. The Office jurisdiction will extend to the areas of public safety and protection of the environment. The Congress specified that regulations covering design, construction, operation, maintenance, modification, abandonment, and removel of structures be promulgated by the Secretary in cooperation with the Chief of Engineers, U.S. Army. The proposed regulations reflect initial coordination between the three agencies and provide minimum design criteria consistent with criteria governing similar structures built by the Corps of Engineers.

Section 715.19, *Use of explosives*, requires that explosives be used only in accordance with State and Federal law and regulations promulgated by the regulatory authority. Technical studies of damage to structures indicate that amplitude and frequency of the vibration level govern the given damage evaluation of structures.

The blasting standards are based on the premise that the maximum peak particle velocity of ground motion should not exceed 2 inches per second at any public building, dwelling, or commercial structure. Although this criterion is widely used by regulatory agencies, the Department recognizes that many people advocate a lower particle velocity. Technical data on a standard of 0.5 inches per second is being assembled and the Department will specifically consider the more stringent standard before final rules are promulgated. Public comment is specifically invited on this important question.

The proposed standards also provide a delay time of 8 milliseconds between subcharges and a 5 second interval between charges. Standard tables are presented relating weight of explosive and distance to maximum particle velocity. If blasting is done in accordance with the standard tables, it will be presumed that the particle velocity criteria are met. When blasting is not done in accordance with the standard tables, seismograph records will be required on every shot.

Section 715.20, *Revegetation*, provides two measures of reclamation success, both of which are "regionalized" for various climates characterized by annual precipitation amounts. The Department has chosen to be relatively specific by establishing quantitative measures of productivity and stabilizing ability of vegetation. One measure is an absolute measure of vegetative growth on reclaimed lands. The other is a measure of growth on lands reclaimed to hayland, pasture, wildlife, habitat, or rangeland relative to ungrazed or otherwise protected areas ("exclosures") in the surrounding lands. A number of experts assisted with the development of the two tables and the Department believes the requirements are reasonable. Any additional measurements or observations supporting or affecting these standards are solicited.

Special Performance Standards

Part 716 provides environmental protection performance standards applying to special coal mining situations including mining on steep slopes, mountaintop removal, special bituminous coal mines, anthracite coal mines, coal mines located in Alaska, prime farmland, and underground mining for coal. It should be made clear that no coal operation, other than those anthracite operations to which § 716.5 applies, may rely entirely on the guidance given in the Special Performance Standards to regulate the entire coal mining and reclamation operations. Rather, operations will be guided by a combination of these special and the general performance standards.

Section 716.2, *Steep-slope mining*, closely resembles the Act (Section 515 (d)).

Section 716.3, *Mountaintop removal*, treats the backfilling and grading requirements of mountaintop removal activities. The Department is proposing to specify maximum slopes of regraded land on the mined mountaintop in a manner that allows retention of the maximum amount of spoil on that area compatible with longterm stability, water quality and use of the land.

Section 716.4, *Special bituminous coal mines*, implements the special exemption provided by Congress in section 527 of the Act. The Department is not aware of any special bituminous coal mines that meet the criteria of the Act other than those located in Wyoming. It has, in consultation with that State, adopted the portions of Wyoming's regulations pertaining to the backfilling and grading of such mine pits.

Section 716.5, *Anthracite coal mines*, implements the special provisions for anthracite coal mines authorized by Congress in section 529 of the Act.

Section 716.6, *Coal mines in Alaska*, implements the authority of the Secretary to suspend performance standards of Part 715 for Alaska mining in section 708 of the Act.

Section 716.7, *Prime farmland*, proposes standards of performance for coal mining operations conducted on land that is considered prime farmland. Such farmlands must meet criteria prescribed by the Secretary of Agriculture.

On the basis of the legislative history and the intent of the Act, the Department proposes to issue prime farmland performance standards as a part of the initial program to apply to any permit issued on or after August 3, 1977. The basis for this decision is section 510(d)(1) of the Act which states that prime farmland provisions shall "apply to all permits issued after the date of enactment of this Act." In addition, the conferees agreed that the protection for prime farmland should apply to all permits issued after enactment and expected the Secretary to issue regulations to implement the prime farmland provisions as soon as possible (July 12, 1977, Congressional Record, H6968).

The prime farmland provisions do not apply to land that has been used for the production of cultivated crops for less than 5 years out of the 20 years preceding the date of the permit application. The 20 year requirement is based upon farm real estate financing. Such financing is predicated on the ability of the farmer receiving a loan to repay the loan over a period of time.

Section 716.8, *Surface effects of underground mines*, contains performance standards for the surface effects of underground mining. It references the performance standards in Part 715 that apply to underground coal mining operations. The Department intends to have the standards of Part 715 apply to surface impacts of underground mining such as access and haul roads, repair areas, storage areas, processing areas, shipping areas, and areas on which structures, facilities, or materials are sited. Activities associated with underground coal mining are to be governed by those particular performance standards of Part 715 reference in § 716.8 in a manner which recognizes the distinct differences between surface and underground mining.

The Department tried the alternative of repeating those sections of Part 715 now referenced in § 716.8 but found the resulting material to add unnecessarily to the length of the regulations. The

Department will consider all recommendations regarding mechanisms to insure that underground coal mining operations meet the appropriate standards while keeping the regulations concise and understandable.

Adoption of State Standards

Part 717 carries out the intention of sections 201 and 501, of the Act to allow for the future adoption of State performance standards that are more stringent than the Federal standards. Each State may request the Secretary to review its standards in relation to the Federal standards to determine which is more stringent and whether the State's standards may be adopted by the Secretary.

Drafting Information

The principal authors of the proposed regulations in Parts 715 and 716 and 717 are George Davis and John Hardaway, Environmental Protection Agency, under the general supervision of Paul Reeves, Office of Surface Mining Task Force, and Jack Martin, Office of the Solicitor, Department of the Interior.

State Enforcement Activities

The proposed regulations in Part 720 reflect the expectation of Congress that the States will enforce the federal performance standards during the initial period and will issue permits based on these standards. The regulations contain mandatory reporting requirements as required by the Act. Each State must supply the Office with copies of State permits issued on or after February 4, 1978, and with copies of their inspection reports relating to the federal initial performance standards. Where States have divided regulation of blasting from water quality inspections and other surface mining inspections, reports relating to each area of the initial performance standards will be required.

Federal Inspection

The proposed regulations provide in Part 721 for Federal inspections on the basis of at least two consecutive state inspection reports indicating a violation, or from information provided by any person which gives rise to a reasonable belief that a violation had or was occurring, or on a random basis. Since the Act contemplates active citizen involvement in the reporting of violations to the regulatory authorities, the Office is required to inspect if it receives information and has a reasonable belief that a violation is or may have occurred.

The proposed regulations further specify that Federal enforcement actions may not be nullified simply because it was later determined that there was insufficient information to create a reasonable belief. Such a provision is deemed necessary to avoid the incongruous result of invalidating enforcement actions because of subtle, delicate judgments concerning the quality and quantity of information received. The proposed regulations are believed to be in accord with the Congressional mandate to have Federal inspections in response to any reasonable evidence of a violation to help achieve maximum compliance with the initial standards.

The concept of "significant, imminent environmental harm to land, air or water resources" is approached in the proposed regulations by first defining environmental harm, then defining an imminent environmental harm and finally dealing with the concept of "significant" as it relates to environmental harm. An environmental harm is defined in the proposed regulations as any adverse impact on land, air or water resources, including plant and animal life. An environmental harm is considered "imminent" if the harm can reasonably be expected to cause such harm if the condition or practice is not abated within a reasonable time. Such definition of imminent is consonant with the concept of imminent danger which is defined in the Act. As in the case of imminent danger, a finding of imminent environmental harm must take into account the time it will reasonably take to abate the condition or practice and whether the significant environmental harm may reasonably be expected to occur during that time. If so, then a cessation order under section 521(a)(2) of the Act would be appropriate.

An environmental harm may be "significant" even if not irreparable so long as it is appreciable and not readily reparable. Such a concept takes into account situations where measurable damage to the environment can reasonably be expected to occur but which cannot be repaired without difficulty.

The proposed regulations also deal with procedures for revoking or suspending a permit when it is determined that a pattern of violations exists or existed if those violations were either caused by the unwarranted failure of the permittee to comply with the Act, regulations or permit, or were willfully caused.

In seeking a regulatory scheme for determining when an operator has a pattern of violations, the option was considered of having an automatic finding of a pattern after a certain number of the same or related types of violations had occurred regardless of the circumstances. This would clearly define for all parties the exact conduct which would occasion the suspension or revocation of a permit. Such a scheme, however, was considered inappropriate because of the lack of flexibility and latitude in its application. It was considered more desirable to base the issuance of show cause orders upon a consideration of the circumstances surrounding the alleged pattern.

The regulations provide that a pattern exists if the operator violates unrelated provisions of the Act more than 50% above the national norm. The national norm will be determined by the Office as the enforcement data is obtained during the initial regulatory program.

Civil Penalties

Four statutory criteria are considered: History of previous violations at the particular mine; seriousness; negligence; and demonstrated good faith in achieving rapid abatement after notification of the violation. The Office must notify the person to be assessed of the amount of the proposed assessment within 30 days of the issuance of the notice of violation or cessation order. The person to be assessed has a right to administrative review and appeal to the courts.

The Office considered various methods for governing the determination of whether to assess a penalty. First, the Office considered adopting no regulations governing civil penalty assessments and considering each order and notice on a case-by-case basis using only the language of section 518 of the Act to guide the determination of an assessment. The Department believes such an approach would be inefficient in dealing with a substantial volume of notices and orders, would provide minimum guidance to the mining industry, the States and the public about the calculations of civil penalties and might reduce uniformity.

Second, the Office considered using a test of seriousness for the determination of whether to assess a penalty and using a schedule of proposed assessments with six levels. Such an approach may limit flexibility in determining which violations are assessed and may be less sensitive than the proposed point system in weighing and balancing the four statutory criteria.

Third, the Office considered the present proposal in various forms in which a point system is used both to make the determination of whether to assess and how much to assess.

This proposed system contains a threshold number above which penalties will be set. The Department believes that the proposed system provides reasonable specificity without eliminating flexibility to adjust the number and characteristics of violations for which civil penalties are assessed. The Department is still considering each of the above alternatives and solicits comments regarding the system which should be adopted.

The proposed regulations provide for mandatory assessment for each day a cessation order is unabated if the cessation order was issued for failure to timely abate a prior notice of violation. Other multiple day assessments are discretionary except all continuing violations that are assigned more than 70 points must be assessed separtely for at least two days.

The present proposal affords the person against whom an assessment is proposed the opportunity for a conference with a representative of the Office to discuss the facts and circumstances surrounding the violation and the proposed penalty assessment. The proposed penalty may be adjusted for errors of fact and law but issues of collectibility and conflicting evidence cannot be resolved by the conference officer. Any adjustments proposed by the conference officer must be documented in the record and are subject to management review. All conferences are open to the public.

V 42 I 173 SEP 7 77 V UMI

In arriving at the proposed regulations, the Office considered not providing for a conference but merely allowing for the submission of written information. This proposal would be less effective in achieving early and efficient adjustments of mistaken assessment.

DRAFTING INFORMATION

The principal authors of the proposed regulations in Parts 720, 721, 722 and 723 are: Richard Hall, Office of Surface Mining Task Force, Marcus McGraw, Office of the Solicitor, and Neil Strauss, Office of Hearings and Appeals, Department of the Interior.

REIMBURSEMENT TO STATES

The Act places primary responsibility for enforcement of the initial regulations on the States. Initial performance standards must be applied to new operations for which a permit is issued on or after six months from enactment and to existing operations nine months after enactment. As a consequence, States will need to incorporate the performance standards into all new permits issued on and after February 4, 1978. Existing permits will need to be revised or modified effective May 4, 1978. Enforcement of the initial standards will then be included as part of the States' ongoing inspection and enforcement program. A Federal enforcement program will provide oversight and backup to the State programs. This State-Federal enforcement program will continue until a permanent State regulatory program is approved by the Secretary and implemented by the State, or until June 4, 1980, whichever occurs first.

PROGRAM DEVELOPMENT GRANTS

The Act authorizes the Secretary to make annual grants for the development, administration, and enforcement of State regulatory programs. Program development grants are awarded independently of the administration and enforcement grants. However, the development of an approved State regulatory program, with or without Federal assistance, is a necessary prerequisite for administration and enforcement grants. Development grants may be made to assist each State in the development of those components of a State regulatory program acceptable to the Secretary. Administration and enforcement grants will be available to assist the States in carrying out the functions necessary to maintain an approved State program.

DRAFTING INFORMATION

The principal author of the proposed regulations in Parts 725 and 740 is: Carl Close, Office of Surface Mining Task Force, Department of the Interior.

SMALL OPERATOR ASSISTANCE PROGRAM

Part 795 of the proposed regulations establishes procedures for providing assistance to eligible small operators to obtain data which will be required for permit applications under permanent program regulations. The proposed procedures are published at this time since it is assumed that assistance must start, in some cases, a full year before the permit application is filed. Under the proposed regulations, assistance may be started up to 6 months before the State submits a proposed regulatory program for the Secretary to approve.

The procedures are designed to require the operator to establish eligibility for assistance, including a showing that his production and production which can be attributed to him will be less than 100,000 tons per year. The assistance available includes laboratory services to determine the probable hydrologic consequencies and to prepare a statement of the results of test borings or core sample analysis. Assistance does not include the cost for actual core or test borings.

The proposed regulations provide for development of a national list of qualified laboratories to provide authorized assistance. State regulatory authorities could designate, under approved State programs, additional laboratories. Comments on this process and the option of designating laboratories on a case-by-case basis are solicited.

DRAFTING INFORMATION

The principal author of the proposed regulations in Part 795 is: Donald Willen, Office of Surface Mining Task Force, Department of the Interior.

The regulations in Part 830 make it possible for employees to freely cooperate in the administration and enforcement of the Act, and discourage persons from discriminating against them for doing so. Section 703 of the Act prohibits persons from discriminating against or discharging employees or representatives of employees because the employee or representative exercised their statutory rights under the Act. Statutory rights of employees under the Act include but are not limited to the right to file a proceeding under the Act, the right to institute or cause to be instituted a proceeding under the Act and the right to testify in any proceeding resulting from the administration or enforcement of the provisions of the Act.

Regulations provide for an informal conference with the person making the complaint, the alleged discriminating official and the Regional Director, upon conclusion of an investigation by the Office. The intent of the conference is to attempt to resolve problems informally without going to formal administrative proceedings.

There are two important reasons why the Informal Conference was provided. First, it will save all parties time and money. Second, it permits conciliation efforts to take place in a less formal atmosphere with all parties participating voluntarily in a good faith effort to resolve the complaint. The resolution arrived at would be a concensus rather than an imposed resolution.

The regulations also commit the Office to file a proceeding on behalf of an employee when an investigation indicates the complaint has reasonable cause. This provision was placed in the regulations to assure that non-union as well as union employees would receive the maximum protection under the Act, even when the employee might not be able to obtain the legal counsel necessary to institute a proceeding.

Regulations that would require the employee to file his own proceedings or that would require the Office to participate only as a friend of the court were rejected as not fulfilling the intent of the Act.

DRAFTING REGULATION

The principal author of the proposed regulations in Part 830 is: Jesse Jackson, Office of Surface Mining Task Force, Department of the Interior.

Interested persons may submit written comments on the proposed regulations to the Director, Office of Surface Mining Reclamation and Enforcement, Department of the Interior, Washington, D.C. 20240, no later than October 7, 1977.

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: September 2, 1977, 9:00 a.m.

LEO M. KRULITZ,
Acting Secretary of the Interior.

It is proposed to add Parts 700, 710, 715, 716, 717, 720, 721, 722, 723, 740, 795, and 830 to Title 30, Chapter VII to read as follows:

PART 700—GENERAL

Sec.

700.1 Scope.
700.2 Objectives.
700.3 Authority.
700.4 Responsibilities under the Act.
700.5 Definitions.
700.11 Applicability.
700.12 Petitions to initiate rulemaking.
700.13 Prior notice of citizen suits.
700.14 Requests for records.

AUTHORITY: Secs. 201 and 501, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201).

§ 700.1 Scope.

(a) This chapter sets forth the rules and procedures through which the Secretary of the Interior will implement the Surface Mining Control and Reclamation Act of 1977 (Pub. L. 95-87). The Act requires the Secretary to establish procedures for development and approval of programs for the regulation of surface coal mining and surface effects of underground coal mining in each State. The Act also requires the Secretary to establish an initial regulatory program which applies limited environmental performance standards to State, Federal, Indian, and private lands until the implementation of a permanent regulatory program.

(b) Regulations authorized under the Act and contained in this chapter include but are not limited to—

(1) Environmental performance standards for surface coal mining and reclamation operations during the initial and permanent regulatory programs;

(2) Inspection and enforcement procedures during the initial and permanent regulatory programs, including the assessment of civil penalties;

(3) Assistance to small operators in meeting permit application requirements of the permanent regulatory programs;

(4) Requirements and approval procedures for State programs;

(5) Requirements for surface coal mining and reclamation operations on Federal lands;

(6) Procedures for State and Federal designation of areas unsuitable for surface coal mining operations and lands unsuitable for non-coal mining;

(7) Conflict of interest standards for State and Federal employees;

(8) Requirements and procedures for approval of State mining permits during the permanent regulatory program;

(9) Requirements for posting, release, and forfeiture of performance bonds;

(10) Standards prohibiting discrimination against employees for reporting violations of the Act and regulations;

(11) Procedures for administering the Abandoned Mine Reclamation Fund, including approval of State plans and programs, procedures for implementing Federal programs; and

(12) Procedure for grants for State mining and mineral research institutes.

§ 700.2 Objectives.

The objectives of the regulations are to—

(a) Establish a nationwide regulatory program to protect society and the environment from adverse effects of surface coal mining and surface impacts of underground coal mining.

(b) Establish environmental, enforcement and administrative standards for regulatory programs;

(c) Create a program for the reclamation of previously mined and inadequately reclaimed lands; and

(d) Establish procedures for public review of the administrative and enforcement programs through access to data, hearings, inspections, and standing to sue for damages for non-compliance with the Act.

§ 700.3 Authority.

(a) The Secretary is authorized to administer the programs required by the Act, except—

(1) Provisions of the Act authorizing the Secretary of Agriculture to establish programs for the reclamation of rural lands, identification of prime agricultural lands and other responsibilities described in the Act. Regulations promulgated by the Secretary of Agriculture are in Title 7 of the Code of Federal Regulations.

(2) Other provisions of the Act for which responsibility is specifically assigned to other Federal agencies including the Environmental Protection Agency, Corps of Engineers, Council on Environmental Quality, and the Energy Research and Development Administration.

(3) Authority retained by the States to enforce State laws or regulations which are not inconsistent with the Act or these regulations.

§ 700.4 Responsibilities under the Act.

(a) The Director of the Office of Surface Mining Reclamation and Enforcement, under the general direction of the Assistant Secretary, Energy and Minerals, is responsible for exercising the authority of the Secretary except for—

(1) Initial approval or disapproval of State regulatory programs under section 503 of the Act; and

(2) Designation of Federal lands as unsuitable for mining under sections 522 and 601 of the Act.

(b) The States are responsible for the regulation of surface coal mining and reclamation operations and the reclamation of abandoned mine lands in accordance with procedures in this chapter.

(c) The Secretary may delegate to a State certain authority for regulating coal mining on Federal lands through a cooperative agreement.

§ 700.5 Definitions.

As used throughout the regulations of this chapter, except where otherwise indicated—

Act means the Surface Mining Control and Reclamation Act of 1977, (Pub. L. 95-87).

Auger mining means a method of mining coal at a cliff or highwall by drilling holes laterally into an exposed coal seam from the highwall and transporting the coal along an auger bit to the surface.

Coal means combustible carbonaceous rock, classified as anthracite, bituminous, subbituminous, or lignite by A.S.T.M. designation 0-388-66.

Director means the Director, Office of Surface Mining Reclamation and Enforcement or his representative.

Federal lands means any land, including mineral interests, owned by the United States without regard to how the United States acquired ownership of the land and without regard to the agency having responsibility for management thereof, except Indian lands: *Provided*, That for the purposes of this Act lands or mineral interests east of the one hundredth meridian west longitude owned by the United States and entrusted to or managed by the Tennessee Valley Authority shall not be subject to sections 714 (Surface Owner Protection) and 715 (Federal Lessee Protection) of the Act.

Federal lands program means a program established by the Secretary pursuant to section 523 of the Act to regulate surface coal mining and reclamation operations on Federal lands.

Federal program means a program established by the Secretary pursuant to section 504 of the Act to regulate surface coal mining and reclamation operations on lands within a State in accordance with the requirements of the Act.

Fund means the Abandoned Mine Reclamation Fund established pursuant to section 401 of the Act.

Imminent danger to the health and safety of the public means the existence of any conditions or practice, or any violation of a permit or other requirement of the Act in a surface coal mining and reclamation operation, which condition, practice, or violation could reasonably be expected to cause substantial physical harm to persons outside the permit area before such conditions, practice, or violation can be abated. A reasonable expectation of death or serious injury before abatement exists if a rational person, subjected to the same conditions or practices giving rise to the peril, would not expose himself to the danger during the time necessary for abatement.

Indian lands means all lands, including mineral interests, within the exterior boundaries of any Federal Indian reservation, notwithstanding the issuance of any patent, and including rights-of-way, and all lands including mineral interests held in trust for or supervised by an Indian tribe.

Indian tribe means any Indian tribe, band, group, or community having a governing body recognized by the Secretary.

Office means the Office of Surface Mining Reclamation and Enforcement established under Title II of the Act.

Operator means any person, partnership or corporation engaged in coal mining who removes or intends to remove more than 250 tons of coal from the earth by coal mining within 12 consecutive calendar months in any one location.

Permit, except as used in references to permits during the initial regulatory program, means a permit to conduct surface coal mining and reclamation operations issued by the State regulatory authority pursuant to a State program or by the Secretary pursuant to a Federal program. During the initial regulatory program, permit means a permit to conduct surface coal mining and reclamation operations issued by a State under State law. During the initial regulatory program, permit also means a mining plan approved pursuant to Part 211 of this Title held by a lessee of Federal lands during the initial program.

Person, means an individual, partnership, association, society, joint stock company, firm, company, corporation, or other business organization.

Regulatory authority means the State regulatory authority where the State is administering the Act under an approved State program or the Secretary where the Secretary is administering the Act.

Secretary means the Secretary of the Interior or his representative.

Significant, imminent environmental harm to land, air, or water resources is determined as follows:

(a) An environmental harm is any adverse impact on land, air, or water resources, including plant and animal life.

(b) An environmental harm is imminent if a condition or practice exists which is causing or may reasonably be expected to cause such environmental harm if the condition or practice is not abated within a reasonable time.

V 42 I 173 SEP 7 77 UMI

(c) An environmental harm may be significant even if it is reparable. An environmental harm is significant if that harm is appreciable and not readily reparable.

State lands means all lands including private lands within a State except Federal or Indian lands.

State program means a program established by a State pursuant to section 503 to regulate surface coal mining and reclamation operations on lands within such State in accord with the requirements of the Act and regulations issued by the Secretary under the Act.

State regulatory authority means the department or agency in each State which has primary responsibility at the State level for administering the Act under both the initial and permanent regulatory programs.

Surface Coal Mining Operations means: (a) Activities conducted on the surface of lands in connection with a surface coal mine or subject to the requirements of section 516 surface operations and surface impacts incident to an underground coal mine, the products of which enter commerce or the operations of which directly or indirectly affect interstate commerce. Such activities include excavation for the purpose of obtaining coal including such common methods as contour, strip, auger, mountaintop removal, box cut, open pit, and area mining, the uses of explosives and blasting, and in situ distillation or retorting, leaching or other chemical or physical processing, and the cleaning, concentrating, or other processing or preparation, loading of coal for interstate commerce at or near the mine site: *Provided, however,* that such activities do not include the extraction of coal incidental to the extraction of other minerals where coal does not exceed 16⅔ percentum of the tonnage of minerals removed for purposes of commercial use or sale or coal exploration subject to section 512 of the Act; and (b) the areas upon which such activities occur or where such activities disturb the natural land surface. Such areas shall also include any adjacent land, the use of which is incidental to any such activities, all lands affected by the construction of new roads or the improvement or use of existing roads to gain access to the site of such activities and for haulage, and excavations, workings, impoundments, dams, ventilation shafts, entryways, refuse banks, dumps, stockpiles, overburden piles, spoil banks, culm banks, tailings, holes or depressions, repair areas, storage areas, processing areas, shipping areas, and other areas upon which are sited structures, facilities, or other property or materials on the surface, resulting from or incident to such activities.

Surface coal mining and reclamation operations and all activities necessary and incident to the reclamation of such operations. This term includes the term "surface coal mining operations."

§ 700.11 Applicability.

The regulations in this chapter apply to all surface coal mining and reclamation operations except—

(a) The extraction of coal by a landowner for his own noncommercial use from land owned or leased by him;

(b) The extraction of coal for commercial purposes by surface mining which affects two acres or less;

(c) The extraction of coal as an incidential and non-commercial part of Federal, State, or local government-financed highway or other construction;

(d) The extraction of coal incidental to the extraction of other minerals where coal does not exceed 16⅔ percent of the mineral tonnage removed for commercial use or sale; and

(e) The extraction of coal on Indian lands which are covered by 25 CFR 177, Subpart B.

§ 700.12 Petitions to initiate rulemaking.

(a) Any person or State may petition the Director to initiate a proceeding for the issuance, amendment, or repeal of any regulation issued under the Act. The petition shall be filed in the Office of the Director, Office of Surface Mining Reclamation and Enforcement, United States Department of the Interior, Washington, D.C. 20240.

(b) The petition shall set forth a concise statement of the facts and law which require issuance, amendment, or repeal of a regulation under the Act and shall indicate whether the petitioner desires a public hearing.

(c) Upon receipt of a petition, the Director shall publish a notice in the FEDERAL REGISTER seeking comments from the public on the proposed change, and may hold a public hearing, may conduct an investigation or take other actions to determine whether or not the petition should be granted.

(d) Within 90 days from the date of receipt, the Director shall issue a written decision either granting or denying the petition. If the petition is granted the Director shall commence a rulemaking proceeding. If the petition is denied, the Director shall notify the petitioner in writing setting forth the reasons for denial.

§ 700.13 Prior notice of citizen suits.

A person who intends to commence a civil action on his own behalf under section 520 of the Act shall give notice of intent to do so in accordance with the regulations of this section.

(a) Notification shall be given by certified mail to the Secretary and the Director in all cases and to the head of the State regulatory authority if the complaint involves or relates to a specific State. A copy of the notification shall be provided by first class mail to the Regional Director of the Office if the complaint involves or relates to a specific region.

(b) Notification shall be given by certified mail to the alleged violator if the complaint alleges a violation of the Act, or of any regulation, order, or permit issued under the Act.

(c) Service of a notice under this section is complete upon mailing to the last known address of the person being notified.

(d) A person giving notice regarding an alleged violation of the Act or any regulation, order, or permit issued under the Act shall state, to the extent known—

(1) Sufficient information to enable the recipient to identify the provision of the Act, rule, regulation, order, or permit allegedly violated;

(2) The action or omission alleged to constitute a violation;

(3) The person or persons responsible for the alleged violation;

(4) The dates or dates of the alleged violation;

(5) The name, address, and telephone number of the person giving notice; and

(6) The name, address, and telephone number of legal counsel, if any.

(e) A person giving notice regarding an alleged failure by the Secretary of a State regulatory authority to perform a mandatory act or duty under the Act shall state, to the extent known—

(1) The provision or provisions of the Act containing the mandatory act or duty allegedly not performed;

(2) Sufficient information to enable the recipient to identify the omission alleged to constitute the failure to perform a mandatory act or duty under the Act;

(3) The name, address, and telephone number of the person giving notice; and

(4) The name, address, and telephone number of legal counsel, if any.

§ 700.14 Request for records.

(a) Records required to be made available locally to the public under the Act shall be located at the office having jurisdiction over the area involved.

(b) Other records or documents may be requested under 43 CFR Part 2, which implements the Freedom of Information Act and the Privacy Act.

PART 710—INITIAL REGULATORY PROGRAM

Sec.

710.1 Scope.
710.2 Objectives.
710.3 Authority.
710.4 Responsibility.
710.5 Definitions.
710.11 Applicability.
710.12 Special exemption for small operators on State lands.

AUTHORITY: Secs. 201, 501 and 502, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201)

§ 710.1 Scope.

(a) This part provides general introductory and applicability material for the initial regulatory program required by section 502 or other sections of the Act which require early implementation of the Act for surface coal mining and reclamation operations. The initial regulatory program is effective until permanent regulatory programs are approved in accordance with sections 503, 504 or 523 of the Act.

(b) The initial regulatory program which this part introduces includes:

(1) General performance standards of Part 715 of this chapter;

(2) Special performance standards of Part 716 of this chapter;

(3) Adoption of State standards of Part 717 of this chapter;

(4) Inspection and enforcement procedures of Parts 720–723 of this chapter; and

(5) Reimbursements to States of Part 725 of this chapter.

§ 710.2 Objectives.

(a) The objectives of the initial regulatory program are to—

(1) Protect the health and safety of the public and minimize the damage to the environment resulting from surface coal mining and the surface effects of underground coal mining during the interval between enactment of the Act and adoption of a permanent State or Federal regulatory program; and

(2) Coordinate the State and Federal regulatory programs to accomplish the purposes of the Act.

§ 710.3 Authority.

(a) The Secretary is directed to implement an initial regulatory program within six months after the date of enactment of the Act in each State which regulates surface coal mining until a State program has been approved or until a Federal program has been implemented.

(b) The Secretary is also authorized to regulate surface coal mining operations on Federal lands by the Mineral Leasing Act of February 25, 1920, as amended, (30 U.S.C. 181–287) and the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351–359) and on Indian lands by various Indian Lands Act. Additional regulations under these Acts are in 30 CFR Part 211, 43 CFR Part 3040 and 25 CFR Part 177.

§ 710.4 Responsibility.

(a) Under the general direction of the Assistant Secretary, Energy and Minerals the Director is responsible for administering the initial regulatory program established by the Secretary.

(b) The States are responsible for issuing permits and inspection and enforcement on State lands to insure compliance with the initial performance standards in Parts 715–716 of this chapter. States are required to file copies of inspection reports with the Office. States are also responsible for assuring that permits are not issued which would be in conflict with the prohibitions against mining found in section 510 of the Act, particularly in regard to alluvial valley floors and prime farm lands.

§ 710.5 Definitions.

As used throughout the initial regulatory program the following terms have the specified meanings unless otherwise indicated:

Acid drainage means water with a pH of less than 6.0 discharged from active or abandoned mines and from areas affected by coal mining operations.

Acid-forming materials means earth materials that contain sulfide mineral or other materials which, if exposed to air, water, or weathering processes, will cause acids that may create acid drainage.

Alluvial valley floors means unconsolidated stream-laid deposits holding streams where water availability is sufficient for subirrigation or flood irrigation agricultural activities but does not include upland areas which are generally overlain by a thin veneer of colluvial deposits composed chiefly of debris from sheet erosion, deposits by unconcentrated runoff or slope wash, together with talus, other mass movement accumulation and windblown deposits.

Approximate original contour means that surface configuration achieved by backfilling and grading of the mined area so that the reclaimed area, including any terracing or access roads, closely resembles the general surface configuration of the land prior to mining and blends into and complements the drainage pattern of the surrounding terrain, with all highwalls and spoil piles eliminated; water impoundments may be permitted where the regulatory authority determines that they are in compliance with § 715.7 of this chapter.

Aquifer. A zone, stratum, or group of strata that can store and transmit water in sufficient quantities for a specific use.

Combustible material means organic material that is capable of burning either by fire or through a chemical process (oxidation) accompanied by the evolution of heat.

Compaction means the reduction of pore spaces among the particles of soil or rock, generally done by running heavy equipment over the earth materials.

Disturbed area means those lands that have been affected by surface coal mining and reclamation operations.

Diversion means a channel constructed for the purpose of transporting water from areas where it is in excess to areas where it can be used or disposed of safely.

Downslope means the land surface between a valley floor and the outcrop of the lowest coalbed being mined along each highwall.

Embankment means an artificial deposit of materials that is raised above the natural surface of the land and used to contain, divert, or store water, support roads or railways, or for other similar purposes.

Ground water means subsurface water that fills available openings in rock or soil materials such that they may be considered water-saturated.

Highwall means the face of an exposed overburden and coal in an open cut of a surface or underground coal mine.

Hydrologic balance means an accounting of the quality and quantity of inflow to, outflow from, and storage in a hydrologic unit such as a drainage basin, aquifer, soil zone, lake, or reservoir. It encompasses the relationship between precipitation, runoff, evaporation, and the change in ground- and surface-water storage and is usually expressed by a hydrologic equation.

Hydrologic regime means the entire state of water movement in a given area. It is a function of the climate, and includes the phenomena by which water first occurs as atmospheric water vapor, passes into a liquid or solid form and falls as precipitation, moves thence along or into the ground surface, and returns to the atmosphere as vapor by means of evaporation and transpiration.

Impoundment means a closed basin formed naturally or artificially built, which is dammed or excavated for the retention of water, sediment or waste.

Intermittent or perennial stream means a stream or part of a stream that flows continuously during all (perennial) or for at least one month (intermittent) of the calendar year as a result of ground-water discharge or surface runoff. The term does not include an ephemeral stream which is one that flows for less than one month of a calendar year and only in direct response to precipitation in the immediate watershed and whose channel bottom is always above the local water table.

Leachate means a liquid that has percolated through soil, rock or waste and has extracted dissolved or suspended materials.

Noxious plants means species that have been included on official State lists of noxious plants for the State in which the operation occurs.

Overburden means material of any nature, consolidated or unconsolidated, that overlies a coal deposit, excluding topsoil which overlies the coal to be mined.

Outslope means the exposed area sloping away from a bench or terrace being constructed as a part of a surface coal mining and reclamation operation.

Premining land use means the highest and best use of the land which could have been achieved, taking into account the locally accepted best land management practices, prior to any mining.

Productivity means the vegetative yield produced by a unit area for a unit of time.

Recharge capacity means the ability of the soils and underlying materials to allow precipitation and runoff to infiltrate and reach the zone of saturation.

Roads means access and haul roads constructed, used, reconstructed, improved or maintained for use in surface coal mining and reclamation operations, including use by coal-hauling vehicles leading to transfer, processing or storage areas. The term includes any such road used and not graded to approximate original contour within 45 days of construction other than temporary roads used for topsoil removal and coal haulage roads within the pit area. Roads maintained with public funds such as all Federal, State and county roads are excluded.

Recurrence interval means the precipitation event expected to occur, on the average, once in a specified interval. For example, the 25-year 24-hour precipita-

V 42 173 SEP 7 77 UMI

tion event would be that 24-hour precipitation event expected to be exceeded on the average once in 25 years. Magnitude of such events are as defined by the National Weather Service and Technical Paper No. 40, "Rainfall Frequency Atlas of the U.S.," May 1961, and subsequent amendments or equivalent regional or rainfall probability information developed therefrom.

Runnoff water means precipitation that flows along the land surface before it enters a defined stream channel and becomes concentrated streamflow.

Sediment means undissolved organic and inorganic material transported or deposited by water.

Settling pond means any natural or artificial structure or depression used to remove sediment from water and store sediment or other debris.

Slope means average inclination of a surface, measured from the horizontal. Normally expressed as a unit of vertical distance to a given number of units of horizontal distance (e.g., 1*v* to 5*h*=20 percent=11.6 degrees).

Soil horizons means a soil profile that consists of two or more layers lying one below the other and parallel to the land surface. The layers are known as horizons and are differentiated on the basis of field characteristics and laboratory data. The three major soil horizons are—

(a) *A horizon.* The uppermost layer in the soil profile often called the surface soil. It is the part of the soil in which organic matter is most abundant, and where leaching of soluble or suspended particles is the greatest.

(b) *B horizon.* The layer immediately beneath the A horizon and often called the subsoil. This middle layer commonly contains more clay, iron or aluminum than the A or C horizons.

(c) *C horizon.* The deepest layer of the soil profile. It consists of loose material or weathered rock that is relatively unaffected by biologic activity.

Spoil means overburden that has been removed during surface mining.

Stabilize means any method used to prevent movement of soil, spoil piles or areas of disturbed earth and includes increasing bearing capacity, increasing shear strength, draining, compacting or revegetating.

Surface water means water, either flowing or standing, on the surface of the earth.

Suspended solids means organic or inorganic materials carried or held in suspension in water that will remain on a 0.45 micron filter as differentiated from dissolved solids. Dissolved solids are solids that pass into solution.

Topsoil means the A soil horizon and underlying unconsolidated materials including those portions of the B and C soil horizons that have properties capable of producing desirable vegetation.

Toxic-forming materials means earth materials or wastes which, if acted upon by air, water or weathering processes, may produce chemical or physical conditions in soils or water that are detrimental to biota or uses of water.

Toxic-mine drainage means water that is discharged from active or abandoned mines and from other areas affected by coal mining operations and which contain a substance which through chemical action or physical effects is likely to kill, injure or impair an organism.

Watercourse means a natural stream course that heads in a given drainage basin and has a channel with a well-defined bed between visible banks or through a definite depression in the land and has a permanent or periodic supply of water.

Water table means upper surface of a zone of saturation, where the body of ground water is not confined by an overlying impermeable zone.

§ 710.11 Applicability.

(a) *Operations on State lands.* (1) The requirements of the initial regulatory program do not apply to surface coal mining and reclamation operations which occur on lands within a State which does not regulate such operations.

(2) General obligations. (i) A person conducting coal mining operations shall have a permit if required by the State in which he is mining and shall comply with State laws and regulations that are not inconsistent with this chapter.

(ii) A person conducting coal mining operations shall not engage in any operations which result in a condition or constitute a practice that creates an imminent danger to the health or safety of the public.

(iii) A person conducting coal mining operations shall not engage in any operations which result in a condition or constitute a practice that causes or can reasonably be expected to cause significant, imminent environmental harm to land, air or water resources.

(3) Performance Standards Obligations. (i) A person who conducts any coal mining operations under an initial permit issued by a State on or after February 3, 1978, shall comply with the requirements of the initial regulatory program. Such permits shall contain terms that comply with the relevant performance standards of the initial regulatory program.

(ii) On and after May 3, 1978, any person conducting coal mining operations shall comply with the initial regulatory program, except as provided in § 710.12.

(iii) A person shall comply with the obligations of this section until he has received a permit to operate under a permanent State or Federal regulatory program.

(b) *Operations on Indian Lands.* On or after December 16, 1977, a person conducting coal mining operations on Indian lands shall comply with the General Performance Standards of Parts 715 and 716 of this chapter insofar as they are incorporated in Part 177, Subpart B, of Title 25 of the Code of Federal Regulations.

(c) *Operations on Federal Lands.* (1) A person conducting coal mining operations on Federal lands that commence operations on or after February 3, 1978, shall comply with the General Performance Standards of Part 715 of this chapter and the Special Performance Standards of Part 716 of this chapter.

(2) Any person conducting coal mining operations on Federal lands on and after May 3, 1978 shall comply with the General Performance Standards of Part 715 of this chapter and the Special Performance Standards of Part 716 of this chapter.

(d) *Operations on all lands.* (1) The requirements of this chapter apply to operations conducted after the effective date of these regulations on lands from which the coal has not yet been removed and to any other lands used, disturbed or redisturbed in connection with or to facilitate mining or to comply with the requirements of the Act or these regulations.

(2) Any pre-existing, nonconforming structure or facility which is used in connection with or to facilitate mining after the effective date of these regulations shall comply with the requirements of the regulations, unless—

(i) It is physically impossible to bring the structure or facility into compliance by the effective date.

(ii) The permittee or operator submits to the regulatory authority by February 3, 1978, a plan designed by a professional engineer for the reconstruction of the structure or facility.

(iii) The regulatory authority approves the plan and

(iv) Reconstruction is started and completed as soon as possible. No plan shall be approved unless construction is to begin by May 4, 1978, and is to be completed by November 4, 1978, at the latest.

§ 710.12 Special exemption for small operators on State lands.

(a) As used in this section—

(1) *Permittee* means a person holding a permit under State law and to whom the permit was originally issued.

(2) *Renewed permit* means any extension of the original area or duration of a permit.

(b) If a person is an eligible permittee under paragraph (c) of this section and intends to conduct surface coal mining operations on or after May 3, 1978, that permittee may receive from the Director a limited exemption from the General Performance Standards of Part 715 of this chapter and the Special Performance Standards of Part 716 of this chapter. The exemption shall not—

(1) Include the Special Performance Standard of § 716.2(a)(1) of this chapter regarding the handling of spoil;

(2) Apply to surface coal mining operations to be conducted under a permit or renewed permit issued on or after August 3, 1977;

(3) Include any general or special performance standard to which a permittee is required to comply by a State;

(4) Relieve the permittee of the general obligations imposed by § 710.11(a) of this part regarding conditions or practices creating imminent danger or causing significant, imminent environmental harm; and

(5) Relieve the permittee of any obligations under State law, regulation or permit.

(c) A permittee is eligible for an exemption under this section—

(1) If the actual and attributed production of that permittee is estimated by the Director not to exceed 1,000,000 tons of coal during the year ending on December 31, 1978; and

(2) If that permittee—

(i) Was in existence on July 31, 1976, and during the year ending on July 31, 1977, the actual and attributed production of that permittee was 100,000 tons of coal or less from all surface and underground coal mining operations; or

(ii) Came into existence after July 31, 1976, and prior to May 2, 1977, and the actual and attributed production from all surface and underground coal mining operations of that permittee in the average calendar month was an amount of coal which when multiplied by 12 yields a product of 100,000 tons or less.

(d) Applications for an exemption under this section shall be submitted to the Regional Director of the Office with a copy to the State regulatory authority.

(e) The request for exemption shall include—

(1) The name and address of the permittee and of persons who control the permittee by reason of stock ownership or otherwise.

(2) The name, location, Mining and Enforcement and Safety Administration identification numbers and permit numbers of the surface coal mining operations for which exemption is sought, including a statement of the dates each permit was issued or renewed and will expire.

(3) The date and method by which the permittee was created if the permittee is not an individual.

(4) A listing of all surface and underground coal mining operations showing—

(i) Actual production for the year ending July 31, 1977, attributed to the permittee and the inclusive dates of operation.

(ii) Estimated production for the year ending December 31, 1978, attributed to the permittee and the anticipated dates of operation.

(5) A copy of coal severence tax returns for coal produced during the year ending on July 31, 1977.

(6) A copy of a notice the permittee has published in a local newspaper of general circulation once a week for two weeks stating—

(i) That an application for a small operator exemption will be filed;

(ii) The name and address of the permittee;

(iii) The location of the surface coal mining operations to which the exemption will apply; and

(iv) That public comments may be submitted to the Director, Office of Surface Mining Reclamation and Enforcement at the appropriate regional office address.

(f) Production from the following operations shall be attributed to the permittee—

(1) All coal produced by operations benefically owned entirely by the permittee.

(2) The pro rata share, based upon percentage of beneficial ownership, of coal produced by operations in which the permittee owns more than a 5-percent interest.

(3) All coal produced by persons who directly or indirectly control the permittee by reason of stock ownership direction of the management or in any other manner whatsoever.

(4) The pro rata share of coal produced by operations so controlled by the person who controls the permittee.

(g) The Director shall grant the request for an exemption if, upon the basis of the request and any State regulatory authority of public comments, he finds that—

(1) The permittee has satisfied his burden of proof by demonstrating eligibility for the exemption; and

(2) The exemption will not be inconsistent with State law, regulation or permit terms.

(h) Any person aggrieved by the decision of the Director under this section may appeal within 20 days from receipt of that decision to the Office of Hearings and Appeals under 43 CFR Part 4; The Office of Hearing and Appeals and the Secretary shall have the authority to stay the exemption during the pending of the appeal.

(i) The exemption shall be effective on the date approved. It shall remain in effect until expiration or renewal of the State permit to which it applies, December 31, 1978, or until reversed, whichever is earlier.

PART 715—GENERAL PERFORMANCE STANDARDS

Sec.

715.11 General obligations.
715.12 Signs and markers.
715.13 Postmining use of land.
715.14 Backfilling and grading.
715.15 Disposal of spoil and waste materials in areas other than the mine workings or excavations.
715.16 Topsoil handling.
715.17 Protection of the hydrologic system.
715.18 Dams constructed of refuse materials, general.
715.19 Use of explosives.
715.20 Revegetation.

AUTHORITY: Secs. 201 and 501, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201).

§ 715.11 General obligations.

(a) *Compliance.* All surface coal mining and reclamation operations conducted on lands where any element of the operations is regulated by a State shall comply with the initial performance standards of this part according to the time schedule specified in § 710.11 of this chapter. Special Initial Performance Standards are established by Part 716 of this chapter for—

(1) Surface coal mining operations on steep slopes.

(2) Surface coal mining operations involving mountain-top removal.

(3) Special bituminous coal mines.

(4) Anthracite surface coal mining operations.

(5) Surface coal mining operations in Alaska.

(6) Surface coal mining operations on prime farmlands.

(7) Surface effects of underground coal mines.

Where State environmental protection standards are adopted for a specific State because they are more stringent than the standards of this part, they will be published in Part 717 of this chapter.

(b) *Authorizations to operate.* A copy of all current permits, licenses, approved plans or other authorizations to operate the mine shall be available for inspection at or near the mine site.

(c) *Mine Maps.* Any person conducting surface coal mining and reclamation operations on and after May 3, 1978, shall submit two copies of accurate maps of the mine and permit area at a scale not to exceed 1:1000, certified by a surveyor or engineer. The maps shall show as of May 3, 1978 the lands from which coal has not yet been removed, lands and structures which have been used or disturbed to facilitate mining. One copy of the mine map shall be submitted to the State regulatory authority and one copy shall be submitted to the Regional Director, OSM, before June 3, 1978.

§ 715.12 Signs and markers.

(a) *Specifications.* All signs required to be posted shall be of a standard design that can be seen and read easily from a distance of 100 feet and they shall be made of durable material. The signs and other markers required by paragraphs (b), (c), and (d) of this section shall be maintained during all operations and until release of all bonds for the permit area. All signs and markers shall be displayed conspicuously within the permit area and conform to local ordinances and codes.

(b) *Mine and permit identification signs.* Signs identifying the mine area shall be displayed at all points of access to the mine property from public highways. Signs shall show the name, business address, and telephone number of the permittee or operator and identification numbers of mining and reclamation permits or other authorizations to operate.

(c) *Perimeter markers.* The perimeter of the mine property shall be clearly marked by durable markers that extend at least 3 feet above the ground. Permit numbers must be permanently affixed to the markers. On mine areas of 10 acres or more, the markers shall be spaced a maximum of 400 feet apart; on mine areas of less than 10 acres, the markers shall be spaced a maximum of 200 feet apart. Within the perimeter of the mine property, identification markers shall be established showing the boundary of coal which has not been removed prior to May 3, 1978. Temporary markers may be used during coal removal operations

V 42 173 SEP 7 77 UMI

but the boundary shall be re-established by permanent markers after final surface configuration in an area is established.

(d) *Buffer zone markers.* Buffer zones as defined in § 715.17 shall be marked at not more than 200-foot intervals along the interior boundary of the buffer zone. The signs shall read "Buffer Zone—Limited Access" and be placed so as to be seen by all persons employed on the mine property.

(e) *Blasting signs.* If blasting is necessary to conduct surface coal mining operations, signs reading "Blasting Area" shall be displayed conspicuously at the edge of blasting areas along access and haul roads within the mine property. Signs reading "Blasting Area" and explaining the blasting warning and all-clear signals shall be posted at all entrances to the mine property.

(f) *Topsoil markers.* Where topsoil or other vegetation supporting material is segregated and stockpiled according to § 715.16(c), the stockpiled material shall be marked with signs that read "Topsoil." These signs shall remain in place until the material is removed.

§ 715.13 Postmining use of land.

(a) *General.* All disturbed areas shall promptly be restored (1) to conditions that are capable of supporting the uses which they were capable of supporting before any mining, or (2) to higher or better uses approved under criteria and procedures of paragraph (d) of this section.

(b) *Criteria for establishing premining use of land.* Criteria for establishing the premining use of the land shall be those uses which the lands have previously or were capable of supporting within the mine property, areas surrounding the mine property, or areas located in similar terrain and climate within the region that have been managed using methods considered practicable for the region. The appropriateness of postmining land use plans shall not be judged on the basis of lands that (1) were previously mined and not reclaimed to meet the standards of this part, (2) were badly eroded or overgrazed so as to change the vegetation community to one unsuitable for grazing, or (3) are otherwise determined by the regulatory authority to have been poorly managed. However, if the lands within the mine property were previously mined and not reclaimed to the standards of this part, the postmining use of the land shall be evaluated against the highest possible use compatible with surrounding unmined lands. If the premining use of the land was changed within five years of the beginning of mining, the comparison of post mining use to premining use shall include a comparison to the historic use of the land as well as its use immediately preceding mining.

(c) *Land-use categories.* Proposed land uses will be considered subject to this section when they change from one to another of the land-use categories identified in this paragraph. The regulatory authority shall consider the following categories, at a minimum, to represent differing land uses. When an alternative postmining use is proposed the permittee or operator shall meet the requirements of paragraph (d) of this section and all other applicable environmental protection performance standards of this part and Parts 716 and 717 of this chapter.

(1) *Heavy industry.* Manufacturing facilities, powerplants, airports or similar facilities.

(2) *Light industry and commercial services.* Office buildings, stores, parking facilities, apartment houses, motels, hotels or similar facilities.

(3) *Public services.* Schools, hospitals, churches, libraries, water-treatment facilities, solid-waste disposal facilities, public parks and recreation facilities, major transmission lines, major pipelines, highways, roads, underground and surface utilities and other servicing structures and appurtenances.

(4) *Residential.* Single- and multiple-family housing (other than apartment houses over three stories) with necessary support facilities. Support facilities may include commercial services incorporated in and comprising less than 5 percent of the total area of housing capacity, associated open space, and minor parking and recreation facilities supporting the housing.

(5) *Agricultural.* (i) Cropland. Land used primarily for the production of cultivated crops for harvest. Land used for facilities in support of farming operations are included.

(ii) Rangeland. Land used for grazing by livestock and big game animals on which the climax (natural potential) plant community is dominated by grasses, grasslike plants, forbs and shrubs.

(iii) Hayland or pasture. Land used for meadow grasses which are cut and cured for livestock feed.

(iv) Forest. Land used primarily for the production of adapted wood crops.

(6) *Fish and wildlife habitat.* Wetlands, fish and wildlife habitat, and areas managed primarily for fish and wildlife; may include impoundments that have a capacity of less than 20 acre-feet and a surface area at the high-water mark of less than 2 acres.

(7) *Combined uses.* Any appropriate combination of land uses where one land use is designated as the primary land use and one or more other land uses are designated as secondary land uses.

(d) *Criteria for approving alternative postmining use of land.* An alternative postmining land use may be approved by the regulatory authority, after consultation with the land owner or the surface management agency on Federal lands, if the following criteria are met. Proposals to remove an entire coal seam running through the upper part of a mountain, ridge, or hill must also meet these criteria in addition to the requirements of § 716.3 of this chapter.

(1) The proposed land use is compatible with adjacent land use and, where applicable, with land-use policies and plans. A written statement of the views of the authorities with statutory responsibilities for land-use policies and plans shall accompany the request for approval.

(2) Available data on the long-term expected need and market show that the proposed land use can be achieved and maintained.

(3) Specific and feasible plans have been prepared which included a time schedule showing how the proposed land use will be achieved within a reasonable time after mining and how the achieved land use will be sustained. The regulatory authority may require appropriate demonstrations to show that the planned procedures are feasible, reasonable, and integrated with mining and reclamation, and that the plans will result in successful reclamation.

(4) Completion of the necessary public facilities is assured as evidenced by appropriate letters of commitment to provide them in a manner compatible with the operator's plans.

(5) Specific and feasible plans for financing attainment and maintenance of the postmining land use including letters of commitment if the financing is to be provided by someone other than the permittee or operator.

(6) The plans are designed by a registered professional engineer, or other professional, who is knowledgeable about the proposed land-use category and will ensure that the plans conform to nationally accepted standards to assure adequate land stability, drainage, and vegetation cover, and will provide an appropriate aesthetic design for the postmining use of the site.

(7) The proposed use or uses will not present actual or probable hazard to public health or safety nor will they pose any actual or probable threat of water flow diminution or pollution.

(8) The use or uses will not involve unreasonable delays in reclamation.

(9) Necessary approval of measures to prevent or mitigate adverse effects on fish and wildlife has been obtained from the regulatory authority and appropriate State and Federal fish and wildlife management agencies.

(10) Proposals to change from premining land uses of rangeland, fish and wildlife habitat, hayland, or pasture to a postmining cropland use, where the cropland would require continuous maintenance such as seeding, plowing, cultivation, fertilization, or other similar practices to be practicable or to comply with applicable Federal, State, and local laws, shall be reviewed by the regulatory authority to assure that—

(i) There is a firm written commitment by the permittee or by the land owner or land manager to provide sufficient crop management after release of applicable performance bonds to assure that the proposed postmining cropland use remains practical and reasonable, and will not pose an actual or probable threat of water diminution or pollution; and

(ii) There is sufficient water available and committed to maintain crop production.

(iii) The quality and quantity of topsoil has been shown to be sufficient to support the proposed use over a period of years.

(iv) The proposed cropland use will be maintained after release of applicable bonds and is not proposed only as a temporary alternative to re-establishing the premining use of the land.

(11) The regulatory authority has provided by public notice not less than 45 days nor more than 60 days for interested citizens and local, State and Federal agencies to review and comment on the proposed land use.

§ 715.14 Backfilling and grading.

In order to achieve the approximate original contour, the permittee or operator shall, except as provided in paragraphs (d), (e), and (g) of this section, transport, backfill, compact unless otherwise approved by the regulatory authority, and grade all spoil material to eliminate all highwalls, spoil piles, and depressions. Cut-and-fill terraces may be used only in those situations expressly identified in this section. Land above the highway may be disturbed only in the amount necessary to comply with this section and § 715.17. The postmining graded slope must be determined by the premining average of natural slopes in the area as defined in paragraph (a) of this section.

(a) *Slope measurements.* (1) To determine the average natural slope of the area before mining, 10 slopes, or more as specified by the regulatory authority in accordance with site conditions, must be surveyed, measured, and recorded. Each measurement shall consist of an angle of inclination along the prevailing slope extending 100 linear feet above and below the coal outcrop; or, where this is impractical, at locations specified by the regulatory authority. Where the area has been previously mined, the measurements shall extend at least 100 feet beyond the limits of mining disturbances as determined by the regulatory authority to be representative of the premining configuration of the land.

(2) After the disturbed area has been graded and the topsoil replaced, the final graded slopes shall be measured at the beginning and end of lines established on the prevailing slope at locations representative of premining slope conditions and approved by the regulatory authority. These measurements must not be made so as to allow unacceptably steep slopes to be constructed.

(b) *Moderate slopes.* Where natural slopes are determined according to paragraph (a) of this section to average less than 20 degrees, or such lesser slope as the regulatory authority requires, the final graded slopes shall not exceed either the average maximum natural slope or any lesser slope as specified by the regulatory authority based on consideration of soil, climate, or other characteristics of the surrounding area.

(c) *Steep slopes.* (1) Where natural slopes are determined according to paragraph (a) of this section to average 20 degrees of more, or such lesser slope as the regulatory authority defines as "steep slope," the final graded slopes shall not exceed either the average maximum natural slope or any lesser slope as specified by the regulatory authority based on consideration of soil, climate, or other characteristics of the surrounding area.

(2) In order to conserve soil moisture and to control erosion on final graded slopes, cut-and-fill terraces along mine benches may be allowed if the terraces are compatible with the postmining land use approved under § 715.13, will prevent erosion, and are appropriate substitutes for construction of lower grades on the reclaimed lands. The terraces shall meet the following requirements:

(i) The width of the individual terrace bench shall not exceed 20 feet.

(ii) The vertical distance between terraces shall be as specified by the regulatory authority to prevent excessive erosion and to provide long-term stability.

(iii) The slope of the terrace face shall not exceed $1v:2h$ (50 percent).

(iv) The terrace shall have adequate slopes to divert drainage away from the face of the terrace and into drainage systems that are stabilized by vegetation or other stabilization methods that will require minimal maintenance after mining.

(v) Culverts and underground rock drains shall not be used on the terrace unless approved by the regulatory authority.

(3) All operations on natural slopes of 20 degrees or more as stated as paragraph (c)(1) of this section shall meet the provisions of § 716.2 of this chapter.

(d) *Mountaintop removal.* Where surface mining operations will remove entire coal seams in the upper part of a mountain, ridge, or hill by removing all of the overburden, final graded top plateau slopes on the mined area shall be less than $1v:5h$ so as to create a level plateau or gently rolling configuration and the outslopes of the plateau shall not exceed $1v:2h$, except where engineering data substantiates and the regulatory authority finds that a minimum static safety factor 1.5 will be attained. Although the area need not be restored to approximate original contour, all highwalls, spoil piles, and depressions except as provided in paragraph (e) of this section shall be eliminated. All mountaintop removal operations shall meet the provisions of § 716.3 of this chapter.

(e) *Depressions.* The requirement of this section to achieve approximate original contour does not prohibit construction of small depressions if they are approved by the regulatory authority to minimize erosion, conserve soil moisture or promote revegetation. However, the depressions shall be compatible with the approved postmining land use and shall not be inappropriate substitutes for construction of power grades on the reclaimed lands. Depressions approved under this section shall have a holding capacity of less than 1 cubic yard of water or, if it is necessary that they be larger, shall not restrict normal access to the area.

(f) *Definition of thin and thick restored overburden.* The thin overburden provisions of paragraph (g) of this section apply where the final thickness is less than 0.8 of the initial thickness. The thick overburden provisions of paragraph (h) of this section apply where the final thickness is greater than 1.2 of the initial thickness. Initial thickness is the sum of the overburden thickness and coal thickness. Final thickness is the product of the overburden thickness times the bulking factor to be determined for each mine area.

(g) *Thin overburden.* In surface coal mining operations carried out continuously in the same limited pit area for more than 1 year from the day coal-removal operations begin and where the volume of all available spoil and suitable waste materials is demonstrated to be insufficient to achieve approximate original contour, surface coal mining operations shall be conducted to meet the following standards if the operations do not meet the criteria specified in § 716.4 of this chapter:

(1) Transport, backfill, and grade, using all available spoil and suitable waste materials from the entire mine area, to attain the lowest practicable grade, which may not exceed the angle of repose, and to provide adequate drainage and long-term stability of the regraded areas.

(2) Eliminate highwalls by reshaping to stable slopes not exceeding $1v:2h$ (50 percent), or such lesser slopes as the regulatory authority may specify to reduce erosion, maintain the hydrologic balance, or allow the approved postmining land use.

(3) Transport, backfill, grade, and revegetate to achieve an ecologically sound land use compatible with the prevailing land use in unmined areas surrounding the permit area.

(4) Transport, backfill and grade to ensure that impoundments are constructed only where it has been demonstrated to the regulatory authority's satisfaction that all requirements of § 715.17 have been met and that the impoundments have been approved by the regulatory authority as meeting the requirements of this part and all other applicable Federal and State regulations.

(h) *Thick overburden.* In surface coal mining operations where the volume of spoil is demonstrated to be more than sufficient to achieve the approximate original contour surface coal mining operations shall be conducted to meet the following standards:

(1) Transport, backfill, and grade all spoil and wastes not required in the surface mining area to achieve approximate original contour to the lowest practicable grade.

(2) Deposit, backfill, and grade excess spoil and wastes only within the permit area and dispose of such materials in conformance with § 715.15.

(3) Transport, backfill, and grade excess spoil and wastes to maintain the hydrologic balance in accordance with

V 42 1 173 SEP 7 77 UMI

§ 715.17 and to provide long-term stability.

(4) Transport, backfill, grade, and revegetate wastes and excess spoil to achieve an ecologically sound land use compatible with the prevailing land uses in unmined areas surrounding the permit area.

(5) Eliminate all highwalls and depressions except as stated in paragraph (e) of this section by filling with spoil and suitable waste materials.

(i) *Regrading to remove rills and gullies.* When rills or gullies deeper than 6 inches form in areas that have been regraded and the top soil replaced but vegetation has not yet been established, the permittee shall fill, compact, or otherwise stabilize the rills and gullies and reseed or replant the areas according to § 715.20.

(j) *Covering coal and acid-forming, toxic-forming, combustible, and other waste materials; stabilizing backfilled materials; and using waste material for fill.* (1) *Cover.* All undisturbed coal seams and any acid-forming, toxic-forming, combustible materials or any other waste materials as identified by the regulatory authority that are exposed, used, or produced during mining shall be treated to neutralize potential toxicity and permanently covered with a minimum of 5 feet of nontoxic and noncombustible material, in order to prevent water pollution, adverse effects on plant growth and land uses, and sustained combustion.

(2) *Stabilization.* Backfilled materials shall be compacted wherever necessary to prevent leaching of toxic materials into surface or subsurface waters in accordance with § 2020.17(g) and wherever necessary to ensure the stability of the backfilled materials. The equipment to be used, the method of compacting material and the design specifications shall be approved by the regulatory authority before the toxic materials are covered.

(3) *Use of waste materials as fill.* Before waste materials from a coal preparation or conversion facility or from other activities conducted outside the permit area such as municipal wastes are used for fill material, it must be demonstrated to the regulatory authority by means of chemical and physical analyses that use of these materials will not adversely affect water quality, water flow, and vegetation; will not present hazards to public health and safety; and will not cause instability in the backfilled area.

(k) *Grading along the contour.* All final grading, preparation of overburden before replacement of topsoil, and placement of topsoil in accordance with § 715.16, shall be done along the contour to minimize subsequent erosion and instability. If grading along the contour would be hazardous to equipment operators, grading in a direction other than generally parallel to the contour may be approved by the regulatory authority.

§ 715.15 Disposal of spoil and waste material in areas other than the mine workings or excavations.

(a) *Disposal of spoil and wastes in other than valley or head-of-hollow fills.* Spoil and waste material not required to achieve the approximate original contour may be transported to and placed in a controlled (engineered) manner in disposal areas other than the mine workings or excavations only if all the following conditions, in addition to the other requirements of this part, are met:

(1) The disposal areas shall be within the permit area, and they must be approved by the regulatory authority.

(2) The disposal areas shall be located on the most moderate sloping and naturally stable areas available as approved by the regulatory authority.

(3) Where the slope in the disposal area exceeds 1v:5.5*h* (18 percent), or where otherwise required by the regulatory authority, structures such as keyway cuts (excavations to stable bedrock) or rock toe buttresses shall be used to stabilize the fill.

(4) The disposal area does not contain springs, natural water courses or wet weather seeps unless lateral drains are constructed from the wet areas to the main underdrains in such a manner that filtration of the water into the spoil pile will be prevented.

(5) The spoil and wastes shall be placed, compacted, covered, and graded to allow surface and subsurface drainage to be compatible with the natural surroundings, and to ensure long-term stability. The final configuration of the land must be suitable for land uses approved in accordance with § 715.13.

(6) The fill shall be designed using recognized professional standards and approved by a registered professional engineer.

(7) All organic material shall be removed from the disposal area and the topsoil must be removed and segregated before the surplus material is placed in the disposal area. However, if approved by the regulatory authority, organic material may be used as mulch or may be included in the topsoil.

(8) The fill shall not interrupt or encroach upon active drainage channels in a way that will impound water or cause an increase in suspended solids in the surface drainage outside the permit area over that existing before surface coal mining and reclamation operations.

(9) The fill shall be inspected for stability by a registered engineer or qualified professional specialist at least quarterly and during critical construction periods to assure removal of all organic material and topsoil, placement of underdrainage systems, and proper construction of terraces according to the approved plan. The registered engineer shall provide a certified report, after each inspection that the fill has been constructed as specified by the design approved by the regulatory authority.

(b) *Disposal of spoil in valley or head-of-hollow fills.* Waste material must not be disposed of in valley or head-of-hollow fills. Spoil to be disposed of in natural valleys must be placed in accordance with the following requirements.

(1) The disposal areas shall be within the permit area, and they must be approved by the regulatory authority and be appropriately bonded.

(2) The disposal site shall be near the ridge top of a valley selected to increase the stability of the fill and to reduce the drainage area above the fill.

(3) A system of underdrains constructed of durable rock shall be installed along the natural drainageways of the disposal area. The drainage system shall extend from the toe to the head of the fill and contain lateral drains to each area of potential drainage or seepage. In constructing the underdrains, a maximum of 10 percent of the rock must be less than 12 inches in size; however, no rock can be larger than 25 percent of the width of the drain. The minimum size of the main underdrain shall be:

Total amount of fill material	Predominant type of fill material	Minimum size of drain in feet	
		Width	Height
Less than 1,000,000 yd ³	Sandstone	10	4
Do.	Shale	16	8
More than 1,000,000 yd ³	Sandstone	16	8
Do.	Shale	16	16

(3) Spoil shall be placed and compacted to designed densities in lifts that are less than 4 feet thick.

(4) Terraces shall be constructed to stabilize the face of the fill. The height of each terrace shall not exceed 50 feet and the width shall not be less than 20 feet.

(5) The tops of the fill and each terrace shall be graded no steeper than 1v:20*h* (5 percent) to drain surface water to the sides of the fill where stabilized surface channels shall be established off the fill to carry drainage away from the fill. Drainage shall not be directed over the face of the fill unless approved by the regulatory authority.

(6) All surface drainage from the undisturbed area above the fill shall be diverted away from the fill area into protected channels.

(7) The outslope of the fill shall not exceed 1v:2*h* (50 percent). The regulatory authority may require a flatter slope because of the physical, climatological, and other characteristics of the site.

(8) The fill shall be inspected for stability by a registered engineer or qualified professional specialist at least quarterly and during critical construction periods to assure removal of all organic material and topsoil, placement of underdrainage systems, and proper construction of terraces according to the approved plan. The registered engineer

shall provide a certified report, after each inspection, that the fill has been constructed and maintained as specified by the design approved by the regulatory authority.

§ 715.16 Topsoil handling.

To prevent topsoil from being contaminated by spoil and waste materials, the permittee or operator shall remove the topsoil as a separate operation from areas to be mined. Topsoil shall be immediately redistributed according to the requirements of paragraph (b) of this section on areas graded to the approved postmining configuration. If sufficient graded areas are not immediately available because of climatic conditions or size of the area on which topsoil can be distributed, the topsoil shall be segregated, stockpiled, and protected from wind and water erosion or contaminants which lessen its capability to support vegetation.

(a) *Topsoil removal.* (1) All topsoil to be salvaged shall be removed before drilling for blasting, blasting, or mining to prevent loss and contamination of the topsoil with undesirable materials. All topsoil shall be removed unless otherwise approved by the regulatory authority to provide for use of alternative soil horizon or to avoid retention of excessive B horizon material. Where the removal of topsoil results in erosion that may cause air or water pollution, the regulatory authority shall limit the size of the area from which topsoil may be removed at any one time and specify methods of treatment to control erosion of exposed overburden.

(2) Where the A horizon of the topsoil is identified by surveys and soil core (or equivalent) analyses to be of sufficient depth to permit separate removal and to be of high quality in terms of plant-growth medium or native-seed source, the regulatory authority shall require that the entire A-horizon be removed separately and segregated from the other soil horizons and replaced as the surface soil layer.

(3) Overburden may be used instead of, or as a supplement to, topsoil only where the available topsoil is of inadequate quantity or quality to sustain vegetation, and if all the following requirements are met:

(i) The permittee demonstrates that the overburden is more suitable for vegetation by the results of chemical and physical analyses, which shall include determinations of pH, percent organic matter, nitrogen, phosphorous, potassium, texture class, water holding capacity, potential acidity or other analyses as required by the regulatory authority, and by the results of any field-site trials or greenhouse results required by the regulatory authority.

(ii) The chemical and physical analyses and the field-site trials are accompanied by a certification from a qualified soils scientist.

(iii) The alternative overburden is removed, segregated, stockpiled, and replaced in conformance with this section.

(b) *Topsoil redistribution.* (1) After final grading and before the topsoil is replaced, regarded land shall be scarified or otherwise treated to eliminate slippage surfaces.

(2) Topsoil shall be redistributed in a manner that—

(i) Achieves a uniform thickness throughout the regraded area.

(ii) Prevents excess compaction of the spoil and topsoil; and

(iii) Protects the topsoil from wind and water erosion before it is seeded or planted.

(3) Water erosion shall be minimized by spreading soil or finishing grading of soil along the contour, unless this action would be hazardous to equipment operators. Grading in a direction other than generally parallel to the contour shall be approved by the regulatory authority before final grading.

(c) *Topsoil storage.* If the permit allows storage of topsoil, the stockpiled topsoil shall be placed within the permit area where it will not be disturbed or be exposed to excessive water, wind erosion or contaminants which lessen its capability to support vegetation before it can be redistributed on terrain graded to final contour. If stockpiles are to be in place for more than 30 days, they shall be selectively placed and protected from wind and water erosion, unnecessary compaction, and contamination by undesirable materials either by a vegetation cover as defined in § 715.20(g) or by other methods that have been demonstrated to provide equal protection such as snow fences, chemical binders, and mulching. The regulatory authority may require more stringent standards if a high potential exists for loss of topsoil through erosion, and shall prohibit moving the topsoil once it is placed in a storage area until it is moved to a regraded area for redistribution.

(d) *Nutrients and soil amendments.* Nutrients and soil amendments in the amounts and analyses as determined by soil tests shall be applied to the topsoil to produce soil that will support the reclamation requirements of § 715.20.

§ 715.17 Protection of the hydrologic system.

The permittee shall plan and conduct coal mining and reclamation operations to minimize disturbance of and to prevent long-term changes in the prevailing hydrologic balance, on or off site. Changes in water quality and quantity, in the depth to ground water, or in the location of surface-water drainage channels will be limited to changes that do not violate applicable Federal and State regulations and do not adversely affect the post-mining use of the disturbed lands. The permittee shall conduct all operations in such a way as to minimize water pollution and, where necessary, use treatment methods to control water pollution. Practices that will minimize pollution include but are limited to stabilizing disturbed areas through shaping and grading, diverting runoff, achieving quick growing stands of temporary vegetation, lining drainage channels with rock or vegetation, mulching topsoil, sealing off acid-forming and toxic-forming materials, and selectively placing waste materials in backfill areas. If pollution can be controlled only by treatment, the permittee shall operate and maintain the necessary water-treatment facilities. However, the permittee shall emphasize mining and reclamation practices that will prevent or minimize water pollution in preference to water-treatment facilities.

(a) *Water-quality standards and effluent limitations.* All drainage from the disturbed area, including areas revegetated and not released from bond, shall be discharged through a settling pond, or a series of settling ponds. The regulatory authority may grant exemptions from this requirement only when the disturbed drainage area within the disturbed area is small and settling ponds are not necessary to meet water-quality standards and effluent limitations. Discharges from the entire permit area must meet all applicable Federal and State water-quality standards and the following numerical effluent limitations:

Effluent limitations, in milligrams per liter except for hydrogen-ion concentration

Effluent characteristic	Maximum allowable [1]	Average of daily values for 30 consecutive discharge days [1]
Iron, total	7.0	3.5
Manganese, total	4.0	2.0
Total suspended solids [2]	70.0	35.0
Hydrogen-ion concentration.	Within the range 6.0 to 9.0.	

[1] Based on a representative sampling schedule.

[2] In Arizone, Colorado, Montana, New Mexico, North Dakota, South Dakota, Utah, and Wyoming, total suspended solids limitations will be determined on a case-by-case basis, but they must not be greater than 45 mg/l (maximum allowable) and 30 mg/l (average of daily values for 30 consecutive discharge days) based on a representative sampling schedule.

(1) Any overflow or other discharge of surface water from the permit area that would result from an event larger than a 25-year 24-hour frequency event will not be subject to these effluent standards.

(2) The permittee shall install, operate, and maintain adequate facilities to treat any water discharge that violates the standards and limitations of this paragraph or other applicable standards. If the pH of discharged waters normally is less than 6.0, and the mine normally produces more than 500 tons of coal per operating day, an automatic lime feeder or other neutralization device approved by the regulatory authority shall be installed, operated, and maintained.

(b) *Surface-water monitoring.* (1) Equipment necessary to measure the quality and quantity of surface-water discharges from the permit area and to identify the effects of surface mining and reclamation operations on the surface water shall be installed, maintained, and operated, and shall be removed when no longer required. Total iron, total manganese, total suspended solids, pH, and flow must be measured on a daily basis whenever a discharge

V 42 173 SEP 7 77 UMI

occurs unless it can be demonstrated to the satisfaction of the regulatory authority that different analyses are required. The regulatory authority may require additional analyses.

(2) Daily samples shall, for all discharges that occur more than 1 hour (continuous or intermittent flow), be comprised of at least four samples representative of actual conditions, composited for a daily analysis. Chemical analysis must be performed as specified in 40 CFR 136. The results of these measurements shall be submitted to the regulatory authority on a monthly basis, but within 60 days of collection. However, if the discharge is subject to regulation by a Federal or State permit issued in compliance with section 301 of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1311), a copy of the completed reporting form supplied to meet the permit requirements may be submitted to the regulatory authority to satisfy the monitoring and reporting requirements of this paragraph, if the reported data meets the requirements of this paragraph. Violations of permit conditions must be reported to the regulatory authority immediately after receipt of analytical results by the permittee.

(c) *Diversion and conveyance of overland flow from disturbed areas.* In order to prevent acid and other toxic mine drainage from polluting surface and ground water and to minimize erosion, overland flow shall be diverted away from disturbed areas by means of temporary or permanent diversion structures, and the following requirements shall be met:

(1) Temporary diversion structures are those used during mining and reclamation. When no longer needed to protect disturbed areas, the structures shall be removed and the area reclaimed. They shall be constructed to safely pass the peak runoff from a precipitation event with a 10-year recurrence interval, or a larger event as specified by the regulatory authority.

(2) Permanent diversion structures are those remaining after mining and reclamation and approved for retention by the regulatory authority and other appropriate State and Federal agencies. To protect fills and property and avoid danger to public health and safety, permanent diversion structures shall be constructed to safely pass the peak runoff from a precipitation event with a 100-year recurrence interval or a larger event as specified by the regulatory authority. Permanent diversions shall be constructed with gently sloping banks that are stabilized by vegetation. Asphalt, concrete, or other similar linings shall not be used unless specifically required to prevent seepage or to provide stability and are approved by the regulatory authority.

(3) Diversions shall be designed, constructed, and maintained in a manner that does not increase the total suspended solids leaving the permit area on a seasonal basis above those levels that existed before mining and in excess of requirements set by applicable Federal and State law.

(4) Discharges from diversions that pass entirely through undisturbed areas shall meet applicable water-quality standards for the receiving streams. Discharges from diversions that pass through disturbed areas must comply with paragraph (a) of this section.

(5) Surface water shall not be diverted into underground mine workings unless it is demonstrated to the satisfaction of the regulatory authority that such diversion will abate water pollution or otherwise eliminate public hazards resulting from underground mining.

(d) *Stream channel diversions.* (1) Flow from perennial, intermittent, and ephemeral streams within the permit area may be diverted only when the diversions are approved by the regulatory authority and they are in compliance with local, State, and Federal law and approved regulations. When streamflow is allowed to be diverted, the new stream channel shall be designed and constructed to meet the following requirements:

(i) The average stream gradient shall be maintained and the channel designed to remain stable after mining and reclamation operations are completed.

(ii) Channel, bank, and flood-plain configurations shall be adequate to safely pass the peak runoff of a precipitation event with a 10-year recurrence interval for temporary diversions and a 100-year recurrence interval for permanent diversions; or larger events as specified by the regulatory authority.

(iii) Channel banks shall be protected from erosion by measures such as seeding, planting and applying riprap.

(iv) Fish and wildlife habitat and water and vegetation of significant value for wildlife food or shelter shall be protected in consultation with appropriate fish and wildlife management agencies.

(v) Diversions shall be designed, constructed, and maintained in a manner that does not increase the total suspended solids leaving the permit area on a seasonal basis above those levels that existed before mining. Applicable State and Federal water-quality standards shall be met.

(2) All temporary diversion structures shall be removed before release of applicable bonds unless the regulatory authority approves the retention of those structures.

(3) Buffer zone. No land shall be disturbed within 100 feet of an intermittent or perennial stream not approved for mining unless authorized by the regulatory authority. The area not to be disturbed shall be designated a buffer zone and marked with signs as specified in § 715.12.

(e) *Settling ponds.* Settling ponds shall be constructed in appropriate locations in each drainage area prior to any mining in that drainage area in order to control sedimentation or otherwise treat water in accordance with paragraph (a) of this section. These ponds may be used individually or in a series, and they shall meet the following criteria:

(1) The minimum storage volume shall equal the sum of—(i) The volume of runoff to be controlled from the drainage area above the settling pond that results from a 10-year 24-hour precipitation event;

(ii) 0.2 acre-feet of storage for each of disturbed area within the upstream drainage area; and

(iii) additional storage as necessary to meet the effluent standards of paragraph (a) of this section.

(2) An appropriate combination of principal and emergency spillways shall be provided to safely discharge the peak runoff from a precipitation event with a 25-year recurrence interval, or larger event as specified by the regulatory authority.

(3) All settling ponds shall be examined for structural weakness, erosion and other hazardous conditions in accordance with inspection requirements contained in § 77.216–3 of this Title.

(4) All settling ponds shall be removed and the disturbed areas regraded, revegetated, and stabilized before release of applicable bonds unless the regulatory authority approves retention of the ponds.

(5) Sediment shall be removed from settling ponds when the volume of sediment accumulates to 50 percent of the sediment storage volume required in paragraph (e)(1) of this section. The sediment shall be disposed of in a way that prevents it from entering surface water, contaminating subsurface water, and causing adverse effects due to its chemical and physical characteristics on infiltration, vegetation, or water quality. Sediment that has been removed from settling ponds and that meets the requirements for topsoil may be redistributed over graded areas in accordance with § 715.16.

(6) Discharges from settling ponds shall meet the water-quality and effluent requirements of paragraph (a) of this section.

(7) If a settling pond includes an embankment that is more than 20 feet in height, as measured from the upstream toe of the embankment to the crest of the emergency spillway, or has a storage volume of 20 acre-feet or more, the following additional requirements shall be met:

(i) An appropriate combination of principal and emergency spillways shall be provided to safely discharge the runoff from the design storm as specified by the regulatory authority. This design storm shall not have a recurrence frequency of less than 50 years.

(ii) Ponds shall be designed and constructed with a safety factor of at least 1.5 for embankment slope stability.

(iii) The minimum top width of the embankment shall not be less than the quotient of $\frac{H+35}{5}$ where H is the height of the embankment as measured from the upstream toe to the top of the embankment.

(iv) Ponds shall have appropriate barriers to control seepage along conduits that extend through the embankment.

(8) All ponds shall be designed and constructed under the supervision of, and inspected and certified after construction

for compliance with design requirements, by a registered professional engineer.

(f) *Discharged structures.* Discharges from settling ponds and diversions shall be controlled using available technology, such as energy dissipators, surge ponds, and other devices to reduce erosion and prevent deepening and enlargement of stream channels.

(g) *Acid and toxic materials.* Drainage from acid forming and toxic forming mine materials into ground and surface water must be prevented by—

(1) Identifying and burying in the permit area spoil and waste materials that can be toxic or otherwise harmful to vegetation and can adversely affect water quality. The material shall be buried with a minimum of 5 feet of nontoxic material or using other procedures in accordance with § 715.14. Material shall not be buried or stored within 100 feet of any perennial or intermittent stream, or used in construction of dams, embankments or roads or where they will pollute surface and ground water.

(2) Burying all material within 30 days, or less if specified by the regulatory authority. If necessary to store the material, piles shall be stored on impermeable material and protected from erosion and contact with surface water.

(3) Casing, sealing, or otherwise managing boreholes, shafts, wells, and auger or other horizontal holes to prevent pollution of surface or ground water, and to prevent mixing of ground waters of significantly different quality (unless mixing is approved by the regulatory authority). All boreholes that are within the permit area but are outside the surface coal mining area or which extend beneath the coal to be mined and into aquifers, shall be plugged permanently in a manner approved by the regulatory authority.

(4) Taking such other actions as required by the regulatory authority.

(h) *Recharge capacity of reclaimed lands.* The disturbed area shall be reclaimed to restore approximate premining infiltration rates and to restore the ability of the reclaimed area to transmit water to the ground-water system. All available measures shall be used to ensure that the recharge capacity of the reclaimed land will support the approved postmining use of the land.

(i) *Restoration of ground-water systems.* Backfilled materials shall be selectively placed to reestablish ground-water systems to approximate premining conditions.

(j) *Alluvial valley floors west of the 100th meridian west longitude.* (1) Essential elements of the hydrologic functions of alluvial valley floors shall be preserved throughout the mining and reclamation process by maintaining or establishing:

(i) The gradient of streams;

(ii) Aquifers, aquicludes, capillary zones, and perched water zones;

(iii) Quantity and quality of surface and ground water;

(iv) Depth to, and seasonal fluctuations of, ground water where ground water supports a subirrigated vegetation system;

(v) Configuration and stability of the land surface in the flood plain as they allow or facilitate irrigation with flood waters and maintain erosional equilibrium; and

(vi) Soil profiles, including physical and chemical characteristics of the substrate (or plant-growth medium) which provide moisture holding capacity and thereby provide for sustained vegetation growth through the dry months.

(2) Surface mining and reclamation operations conducted in or adjacent to alluvial valley floors located west of the 100th meridian west longitude shall not interrupt, discontinue, or preclude farming on these alluvial valley floors unless the premining land use of such alluvial valley floors has been undeveloped rangeland with no regular cropping of hay or unless the area of the affected alluvial valley floor is of small acreage and provides negligible support for one or more farmer's production. This paragraph (j)(2) does not apply to those surface coal mining operations that—

(i) Were in production in the year preceding August 3, 1977, were located in or adjacent to an alluvial valley floor, and produced coal in commercial quantities in the period identified in this paragraph; or

(ii) Had specific permit approval by the State regulatory authority before August 3, 1977, to conduct surface coal mining operations for an area within the affected alluvial valley floor.

(3) Before new surface mining and reclamation operations which may be authorized under paragraph (j)(2) of this section are commenced, the permittee shall submit and the regulatory authority shall approve detailed surveys and baseline data to establish standards against which the requirements of paragraph (l) of this section can be measured. The surveys and data shall include—

(i) A map at a scale determined by the regulatory authority showing the location of the alluvial valley floor.

(ii) Baseline data covering a full water year for each of the hydrologic elements identified in paragraph (l) of this section.

(iii) Such other data as the regulatory authority may require.

(k) *Ground-water monitoring.* Ground-water levels and quality of the ground water shall be monitored as approved by the regulatory authority, to determine the effects of surface coal mining operations on ground water. When mining is done below the water table, the water levels shall be monitored in representative ground-water wells within the area which may be influenced by the mining or in such other wells that can adequately reflect hanges in water levels. Where existing wells are inadequate to measure long-term changes, the permittee may be required by the regulatory authority to drill and complete wells to measure water quantity and quality in the permit area. When determined necessary by the regulatory authority, the permittee also may be required to drill and complete wells to measure water levels on and off site subject to surface owner consent. These wells must monitor all aquifers that may be affected by mining.

(l) *Hydrologic impact of roads.* (1) *General.* Access and haul roads and associated bridges, culverts, ditches, and road rights-of-way shall be constructed, maintained and reclaimed so as to control diminution or degradation of water quantity or quality. The land over which roads are constructed for surface coal mining and reclamation operations shall be reclaimed in accordance with this part, unless retention of a road is approved under § 715.13, as being an integral and contributing part of the postmining use of the land.

(2) *Construction.* (i) All roads, insofar as possible, shall be located on benches, ridges, or flatter and more stable slopes to minimize erosion. Stream fords are prohibited unless they are specifically approved by the regulatory authority as temporary routes across dry streams unrelated to coal haulage. Roads shall not be located in stream beds; nor shall they be located within the 100-year flood plain of any stream unless it can be demonstrated that the roads will not restrict the flow of the base flood (a flood that has a 1 percent or greater chance of occurring in any year), nor increase erosion or cause significant sedimentation or flooding. However, nothing in this paragraph will be construed as prohibiting relocation of stream channels in accordance with paragraph (d) of this section.

(ii) In order to minimize erosion and subsequent hydrologic disturbances, roads shall be constructed in compliance with the following grade restrictions, or other grade determined by the regulatory authority to be necessary to control erosion:

(A) The overall sustained grade shall not exceed 1v:10h (10 percent).

(B) The maximum grade greater than 10 percent shall not exceed 1v:6.5h (15 percent) for more than 300 feet.

(C) There shall not be more than 300 feet of maximum grade within each 1,000 feet.

(iii) All access and haul roads shall be adequately drained using structures such as, but not limited to, ditches, water carriers, cross drains, and ditch-relief drains. For access and haul roads that are to be maintained for more than 1 year, water-control structures shall be designed with a discharge capacity capable of passing the peak flow from a 25-year 24-hour precipitation event. Drainage pipes and culverts shall be constructed to avoid plugging or collapse and erosion at inlets and outlets. Drainage ditches shall be provided at the toe of all cut slopes formed by the construction of roads. Trash racks and debris basins shall be installed in the drainage ditches wherever debris from the drainage area could impair the functions of the structures. Ditch relief and cross

V 42 I 173
SEP 7 7 7
UMI

drains shall be spaced according to grade. Drainage from access and haul roads shall meet the water-quality requirements of § 715.17.

(iv) Access and haul roads shall be surfaced with durable material. Toxic- or acid-forming substances shall not be used in the surface material. Vegetation may be cleared only for the essential width necessary for road and associated ditch construction and to serve traffic needs.

(3) *Maintenance.* (i) Access and haul roads shall be routinely maintained by measures such as, but not limited to, wetting, scraping, or surfacing.

(ii) Ditches, culverts, drains, trash racks, debris basins and other structures serving to drain access and haul roads shall not be restricted or blocked in any manner that impedes drainage or adversely affects the intended purpose of the structure.

(m) *Hydrologic impacts of other transport facilities.* Railroad loops, spurs, siding or other transport facilities shall be constructed, maintained and reclaimed so as to control diminution or degradation of water quantity or quality.

§ 715.18 Dams constructed of refuse materials, general.

(a) No mine or processing refuse materials shall be used in existing or new dams without the approval of the regulatory authority. The permittee or operator shall design, locate, construct, operate, maintain, modify, abandon, and remove all dams (used either temporarily or permanently) when constructed of mine refuse materials, tailings, coal processing wastes, or other liquid or solid wastes in accordance with the requirements of this section.

(b) *Definitions.—Refuse materials.* Coal mine waste materials excavated or removed during surface coal mining and reclamation operations or separated from mined coal. The material may be a mixture of coal, slack coal, or waste coal; organic material; shale, claystone, sandstone, siltstone, or limestone, or related materials.

Safety factor. The ratio of the available shear strength to the developed shear stress on a potential surface of sliding determined by accepted engineering practice.

(c) *Dams constructed of refuse materials.* (1) Refuse shall not be used in the construction of dams unless demonstrated to have no adverse effect on stability.

(2) Plans for dams or impoundments shall be approved by the regulatory authority before construction and shall contain the minimum plan requirements established by the Mining Enforcement and Safety Administration pursuant to § 77.216–2 of this title.

(3) Dams and impoundments subject to this paragraph shall meet the following requirements:

(i) Design of impoundments shall be based on the flood from the probable maximum precipitation event unless the permittee shows that the failure of the impounding structure would not cause loss of life or severe property or environmental damage, in which case a design based on a minimum flood event of 100-year frequency may be approved by the regulatory authority. An intermediate-sized design flood may be required depending on site conditions.

(ii) The design freeboard distance between the lowest point on an impounding structure and the maximum water elevation shall be at least 3 feet to avoid overtopping by wind and wave action.

(iii) Impounding structures shall have minimum stability factors as follows:

Case	Loading condition	Minimum safety factor
I	End of construction	1.3
II	Partial pool with steady seepage saturation	1.5
III	Steady seepage from spillway or decant crest	1.5
IV	Earthquake (cases II and III with seismic loading)	1.0

(iv) The dam, foundation, and abutments shall be stable under all conditions of construction and operation of the impoundment. Sufficient foundation investigations and laboratory testing shall be performed to determine the factors of safety of the dam for all loading conditions in paragraph (c)(3)(iii) of this section and for all increments of construction.

(v) Seepage through the dam, foundation, and abutments shall be controlled to prevent excessive uplift pressures, internal erosion, sloughing, removal of material by solution, or erosion of material by loss into cracks, joints, and cavities. This may require the use of impervious blankets, previous drainage zones or blankets, toe drains, or relief wells.

(vi) Allowances shall be made for settlement of the dams and the foundation so that the required freeboard will not be diminished.

(vii) Impoundments created by dams of refuse materials shall be subject to a minimum drawdown criteria that allows the facility to be evacuated by spillways or decants of 90 percent of the volume of water stored during the design precipitation event within 10 days.

(viii) Closed-circuit coal waste shall not be used in dams constructed of refuse materials unless demonstrated to maintain or enhance dam stability.

(ix) During construction of dams subject to this paragraph, the structures shall be periodically inspected by a registered professional engineer to ensure construction according to appropriate designs and upon completion of construction, the structure shall be certified as having been designed in accordance with accepted professional policies by a registered professional engineer.

(x) A permanent identification marker, at least 6 feet high and showing the dam number assigned pursuant to § 77.215–1 of this title, and the name of the person operating or controlling the dam shall be located on or immediately adjacent to each dam within 30 days of certification of design pursuant to this section.

(4) All dams shall be routinely inspected by a registered professional engineer in accordance with MESA regulations pursuant to § 77–216–3 of this title.

(5) All dams shall be routinely maintained. Vegetative growth shall be cut where necessary to facilitate inspection and repairs, ditches and spillways cleaned, any combustible materials present on the surface removed, and any other appropriate maintenance procedures followed.

(6) All dams subject to this section shall be recertified annually as having been constructed and modified in accordance with current prevalent engineering practices to minimize the possibility of failures. Any changes in the geometry of the impounding structure shall be included in the annual recertification report. The certification will include a report on existing and required monitoring procedures and instrumentation, the average and maximum depths and elevations of any impounded waters over the past year, existing storage capacity of impounding structures, any fires occurring in the material over the past year, and any other aspects of the structures affecting their stability.

(7) Any enlargements, reductions in size, reconstruction or other modification of dams shall be approved by the regulatory authority.

(8) All refuse dams shall be removed and the disturbed areas regraded, revegetated, and stabilized prior to the release of bond unless the regulatory authority approves retention of such dams as being compatible with an approved postmining land use (§ 715.13).

§ 715.19 Use of explosives.

(a) *General.* (1) The permittee or operator shall comply with all applicable local, State and Federal law and regulations and the requirements of this section in the storage, handling, preparation, and use of explosives.

(2) Blasting operations that use more than the equivalent of 5 pounds of TNT shall be conducted according to a time schedule approved by the regulatory authority.

(3) All blasting operations shall be conducted by experienced, trained, and competent persons who understand the hazards involved. Persons working with explosive materials shall—

(i) Have demonstrated a knowledge of, and a willingness to comply with, safety and security requirements;

(ii) Be capable of using mature judgment in all situations;

(iii) Be in good physical condition and not addicted to intoxicants, narcotics, or other similar types of drugs;

(iv) Possess current knowledge of the local, State and Federal laws and regulations applicable to his work; and

(v) Have obtained a certificate of completion of training and qualification as required by State law or the regulatory authority.

(b) *Preblasting survey.* (1) Upon the request of a resident or owner of a man-made dwelling or structure, including pipes, cables, transmission lines, wells or water systems, within one-half mile of any portion of the permitted area, the permittee or operator shall conduct a preblasting survey of such structures and submit the survey to the regulatory authority. The area and scope of the survey shall be decided by the regulatory authority.

(2) Personnel approved by the regulatory authority shall conduct the survey to determine the condition of the structures in terms of resistance to vibrations of structural and nonstructural elements, and to document any preblasting damage, weakness, and other physical factors that could reasonably be expected to be effected by the blasting. Special attention shall be given to the preblasting condition of wells and other water systems used for human, animal, or agricultural purposes and the quantity and quality of such water.

(3) A written report of the survey shall be prepared and signed by the person or persons who conducted the survey and prepared the written report. The report shall specify the recommended weights of individual charges that would prevent damage to the structures examined in the area and State, if applicable, the effects repeated blasting will have on structural fatigue. Copies of the report shall be provided to the person requesting the survey, and to the regulatory authority on request. Based upon this survey report, the regulatory authority shall require the permittee or operator to prevent damage to structures and water systems by measures such as reinforcing the structures (provided consent of the owner is received), redesign of the blasting plan, or prohibition of blasting in the vicinity of the structure.

(c) *Public notice of blasting schedule.* At least 10 days, but not more than 20 days before beginning a blasting program in which explosives that use more than the equivalent of 5 pounds of TNT are detonated, the permittee or operator shall publish a blasting schedule in a newspaper of general circulation in the locality of the proposed site. Copies of the schedule shall be distributed by certified mail to local governments and public utilities and to each residence within one-half mile of the blasting sites described in the schedule. The permittee or operator shall republish and redistribute the schedule by certified mail at least every 3 months. Blasting schedules shall not be so general as to cover all working hours but shall identify as accurately as possible the time periods and locations when blasting will occur. The blasting schedule shall contain at a minimum—

(1) Identification of the specific areas in which blasting will take place. The individual blasting areas shall not be larger than 300 acres with a generally contiguous border.

(2) Dates and times when explosives are to be detonated in not more than 4-hour increments.

(3) Proposed weight and type of the explosives to be detonated at one time;

(4) Anticipated effects of blasting on people, private and public property, land, and water within and adjacent to the permit area;

(5) Methods to be used to control access to the blasting area;

(6) Types of audible warning and all clear signals to be used before and after blasting; and

(7) A description of possible emergency situations (defined in paragraph (e)(1)(ii) of this section) which have been approved by the regulatory authority as reasonable, when it may be necessary to blast at times that are significantly different from those described in the schedule. This description shall identify the circumstances under which emergency situations may occur and the reasons that blasting cannot be conducted at the scheduled time.

(d) *Public notice of changes on blasting schedules.* A revised blasting schedule shall be prepared by the permittee or operator before blasting in areas not covered by a previous schedule or whenever the proposed frequency, size, and weight of individual detonations are scheduled to be materially changed. If the change involves blasting in areas not covered by a previous schedule the procedures outlined in paragraph (c) of this section shall be followed. If the change involves only the size, weight, or frequency of blasts the permittee or operator shall notify, by the most appropriate means, the governmental bodies and individuals to whom the original schedule was sent.

(e) *Blasting procedures.* (1) *General.* (i) All blasting shall be conducted only during the daytime hours, defined as 1 hour after sunrise until 1 hour before sunset. Based on public requests or other considerations, including the proximity to residential areas, the regulatory authority may specify more restrictive time periods.

(ii) Blasting may not be conducted at times more than 1 hour different from those announced in the blasting schedule except in emergency situations where rain, lightning, other atmospheric conditions, or operator safety requires unscheduled detonation and the emergency conditions have been announced in accordance with paragraph (c)(7) of this section.

(iii) Audible warning and all-clear signals shall be given and shall be of different character and audible within a range of one-half mile from the point of the blast. All persons within the permit area shall be notified of the meaning of the signals through appropriate instructions and signs posted as required by § 715.12.

(iv) Access to the blasting area shall be regulated to protect the public, livestock, and, where required by the regulatory authority, wildlife, from the effects of blasting. Access to the blasting area shall be controlled to prevent unauthorized entry at least 10 minutes before each blast and until the permittee's or operator's authorized representative has determined that no unusual circumstances such as imminent slides or undetonated charges exists and access to and travel in or through the area can safely resume.

(v) All primed blast holes shall be detonated within 24 hours.

(vi) To prevent damage from air blast 2.6 feet of stemming for every inch of borehole diameter shall be used.

(vii) Except where lesser distances are approved by the regulatory authority (based upon a preblasting survey and premining seismic studies, and with written consent of the owner) blasting shall not be conducted within—

(A) 1,000 feet of any building used as a residence, school, church, hospital, nursing facility, or power generating station;

(B) 500 feet of facilities including, but not limited to, disposal wells, petroleum or gas storage facilities, municipal water storage facilities, fluid transmission pipelines, or gas or oil collection lines, water and sewage lines; and

(C) 500 feet of an underground mine except with the concurrence of the Mining Enforcement and Safety Administration.

(2) *Blasting standards.* (i) In all blasting operations, except as otherwise stated, the maximum peak particle velocity of the ground motion in any direction shall not exceed 2 inches per second at the immediate location of any dwelling house, public building, school, church, or commercial or institutional building.

(ii) The maximum peak particle velocity of ground motion does not apply to property owned or leased by the permittee which is inside the permit area.

(iii) No two consecutive subcharges within any charge shall be separated by a delay time of less than 8 milliseconds. *Charge* means a quantity of explosive or equivalent that is to be detonated within a period of 5 seconds. *Subcharge* means a quantity of explosive or equivalent that is to be detonated within a period of less than 8 milliseconds.

(iv) Tables for determining the maximum weight of explosives to be used per delay are given in paragraphs (e)(2)(vi) and (vii) of this section. If the blasting is done in accordance with these tables, the regulatory authority will consider the vibrations to be within the 2 inches per second limit.

(v) The weight of explosives to be used per delay period shall be determined by the formula.

$$W = \left(\frac{D}{50}\right)^3$$

where W = the weight of explosives, in pounds, and D = the distance, in feet, to the nearest dwelling, school, church, or commercial or institutional building.

V 42 I 173 SEP 7 77 V UMI

(vi) For distances greater than 300 feet, the following table will be used:

Distance in feet:	Weight, in pounds
350	49
400	64
500	100
600	144
700	196
800	256
900	324
1,000	400
1,100	484
1,200	576
1,300	676
1,400	784
1,500	900
1,600	1,024
1,700	1,156
1,800	1,296
1,900	1,444
2,000	1,600
2,500	2,500
3,000	3,600
3,500	4,900
4,000	6,400
4,500	8,100
5,000	10,000

For distances not in the table, the formula in paragraph (e)(2)(v) of this section shall be used.

(vii) If on a particular site the peak particle velocity continuously exceeds one-half inch per second after a period of 1 second following the maximum ground particle velocity, the regulatory authority shall require the total time delay of blasting operations to be less than 200 milliseconds or the charge per delay be reduced to comply with this limit.

(viii) For distances less than 300 feet the following table will be used:

Actual distance, in feet:	Pounds per delay interval of 8 milliseconds or greater
5–10	⅛
11–15	¼
16–20	½
21–25	¾
26–30	1.0
31–300	(1)

[1] 1 lb.+½ lb. for each foot of distance above 30 feet.

(3) *Seismograph measurements.* (i) Where a seismograph is used to monitor the velocity of ground motion and the velocity of limit of 2 inches per second is not exceeded, the tables in paragraphs (e)(2)(vi) and (viii) of this section need not be used. However, if the tables are not being complied with, a seismograph shall be used for every shot.

(ii) The use of a modified table for blasting operations at a particular site may be approved by the regulatory authority on receipt of a petition accompanied by seismograph reports. However, in no case shall the regulatory authority approve the use of a modified table where the velocity limit of 2 inches per second would be exceeded.

(iii) The regulatory authority may require a seismograph recording of any or all blasts.

(4) *Records of blasting operations.* A record of each blast, including seismograph reports, shall be retained for at least 3 years and shall be available for inspection by the regulatory authority, and the public upon request. The record shall contain the following data:

(i) Name of permittee, operator, or other person conducting the blast;

(ii) Location, date, and time of blast;

(iii) Name, signature, and license number of blaster in charge;

(iv) Direction and distance, in feet, to nearest dwelling, school, church, or commercial or institutional building;

(v) Weather conditions;

(vi) Type of material blasted;

(vii) Number of holes, burden, and spacing;

(viii) Diameter and depth of holes;

(ix) Types of explosives used;

(x) Total weight of explosives used;

(xi) Maximum weight of explosives per delay period of 8 milliseconds or less;

(xii) Maximum number of holes per delay period of 8 milliseconds or less;

(xiii) Method of firing and type of circuit;

(xiv) Type and height of length of stemming;

(xv) If mats or other protections were used;

(xvi) Type of delay electric blasting caps used, and delay periods used;

(xvii) Seismograph records, where required, including—

(A) Seismograph reading, including exact location of seismograph and its distance from the blast;

(B) Name of person taking the seismograph reading; and

(C) Name of person and firm analyzing the seismograph record.

§ 715.20 Revegetation.

(a) *General.* (1) The permittee shall establish on all land that has been disturbed, a diverse, effective, and permanent vegetative cover of species native to the area of disturbed land or species that will support the planned postmining uses of the land approved according to § 715.13.

(2) Revegetation shall be carried out in a manner that encourages a prompt vegetation cover and recovery of productivity levels compatible with approved land uses. The vegetation cover shall be capable of stabilizing the soil surface with respect to erosion. All disturbed lands shall, regardless of the approved postmining land use, be seeded or planted to achieve a vegetation cover of the same seasonal variety native to the area of disturbed land. If both the pre- and postmining land use is intensive agriculture, planting of the crops normally grown will meet the requirement. Vegetation cover will be considered of the same seasonal variety when it consists of a mixture of species of equal or superior utility for the intended land use when compared with the utility of naturally occurring vegetation during each season of the year.

(3) On Federal lands, the surface management agency shall be consulted regarding when revegetation is satisfactorily accomplished, what species are selected, and when the area is ready for utilization and management.

(b) *Use of introduced species.* Introduced species may be substituted for native species only if appropriate field trials have demonstrated that the introduced species will be of equal or superior utility for the approved postmining land use, or is necessary to achieve a quick, temporary and stabilizing cover. Introduced species shall meet applicable State and Federal seed or introduced species statutes, and may not include poisonous or potentially toxic species incompatible with the approved postmining land use.

(c) *Timing of revegetation.* Seeding and planting of land that has been regraded and the topsoil replaced shall be conducted during the first normal period for favorable planting conditions after final grading. The normal period for favorable planting shall be that planting time generally accepted locally to meet specific site conditions and climate. Any disturbed areas, except water areas and surface areas of haul roads, which have been graded shall be planted with a temporary cover of small grains, grasses, or legumes at a commensurate level with that needed to establish adequate cover to control erosion. When rills or gullies, that would preclude the successful establishment of vegetation or the achievement of the postmining land use form in regraded topsoil and overburden materials as specified in § 715.14, additional regrading or other stabilization practices will be required before seeding and planting.

(d) *Mulching.* Mulch means vegetation residues or other suitable materials that aid in soil stabilization and soil moisture conservation, thus providing climate conditions suitable for germination and growth, and do not interfere with the postmining use of the land. Mulches shall be anchored to the soil surface where appropriate to ensure effective protection of the soil and vegetation. The minimum amounts of mulch to be applied per acre are: for straw or hay, 2,000 pounds; for wood fiber, 1,000 pounds; for bark materials, 30 cubic yards. If the permittee can demonstrate that other wood products, composted waste, or other materials are more suitable for achieving successful revegetation and erosion control, the regulatory authority may authorize substitution of such other materials. Mulch shall be used on all regraded and topsoiled areas to control erosion, to promote germination of seeds, and to increase the moisture retention of the soil. Annual grains such as oats, rye, and wheat may be used instead of mulch when it is shown to the satisfaction of the regulatory authority that the substituted grains will provide adequate stability and that they will later be replaced by species approved for the postmining land use.

(e) *Methods of revegetation.* (1) The permitee shall use technical publications or the results of laboratory and field tests approved by the regulatory authority to determine the varieties, species,

seeding rates, and soil amendment practices essential for establishment and self-regeneration of vegetation. The revegetation procedures shall be designed to require only that degree of fertilization and maintenance procedures required to meet the standards of this section for the approved postmining use of the land.

(2) Where hayland, pasture, or rangeland is to be the postmining land use, the land shall be revegetated to the satisfaction of the regulatory authority. The species of grasses, legumes, or forbs for seeding or planting shall be selected by the permittee to provide a diverse, effective, and permanent vegetation cover with the seasonal variety, succession, and regeneration capabilities native to the area. Livestock grazing will not be allowed on reclaimed land until the seedlings are established and can sustain managed grazing. The regulatory authority, in consultation with the surface owner and permittee, shall determine when the revegetated area is ready for livestock grazing. When hoofed wildlife populations are large enough to cause damage, grazing by such wildlife must be controlled by appropriate methods until the seedlings are well established and can sustain normal grazing. The regulatory authority shall determine when the revegetated area is ready for wildlife grazing.

(3) Where an agricultural use that will require using tillage equipment such as plows, cultivators, and tractors is to be the postmining land use, the permittee shall use adequate erosion and sediment control practices approved by the regulatory authority.

(4) Where forest is to be the postmining land use, the permittee shall plant trees adapted for local site conditions and climate in combination with an herbaceous cover of grains, grasses, legumes, or forbs that provides a diverse, effective, and permanent vegetation cover with the seasonal variety, succession, and regeneration capabilities native to the area.

(5) Where wildlife habitat is to be included in the postmining land use, the permittee shall consult with appropriate State and Federal wildlife management agencies and, upon the approval of the regulatory authority, shall select species to be seeded or planted. The permittee shall select those species that will fulfill the needs of wildlife, including food, water, cover, and space, and shall space and distribute plant groupings and water resources to fulfill the requirements of wildlife.

(6) Where development of residential, recreational, industrial, or public service uses is to be the postmining land use, the lands must be revegetated initially according to paragraph (a) of this section. Final revegetation requirements must be approved by the regulatory authority.

(f) *Standards for measuring success of revegetation.* (1) The revegetation standards in the following table are minimum requirements for revegetation of disturbed areas.

Standards for revegetation

[Herbaceous species=grass, legumes, and nonleguminous forbs; woody plants=woody shrubs, trees, and vines; ground cover=area covered by the combined aerial parts of plants and litter that are produced naturally on site, expressed as a percentage of the total area of measurement]

Average annual precipitation, in inches	1 yr	5 yr	10 yr
A. Areas planted only in herbaceous species (percent ground cover of herbaceous species at the end of the growing season):			
Up to 10	6	8	10
10.1 to 16	10	20	30
16.1 to 26	20	30	40
More than 26	50	70	NA

Average annual precipitation, in inches	1 yr		5 yr		10 yr	
	Percent ground cover	Number of woody plants per acre	Percent ground cover	Number of woody plants per acre	Percent ground cover	Number of woody plants per acre
B. Areas planted to mixtures of herbaceous and woody species (percent ground cover of herbaceous species and number of plants per acre of woody species at the end of the growing season):						
Up to 10	6	2,500	5	2,000	4	1,500
10.1 to 16	7	800	10	900	15	1,000
16.1 to 26	20	400	25	400	30	400
More than 26	40	600	50	1400	NA	NA

[1] On steep slopes, the minimum number of woody plants must be increased to 600 per acre.

(2) (i) When revegetation requirements are based on returning the permit lands to premining land uses of hayland, pasture, wildlife habitat, or rangeland, the regulatory authority may also require the permittee to set aside and fence exclosures of land not to be disturbed by mining activity or domestic livestock. These exclosures, which must be representative of geology, soils, slope, aspect and vegetation in the permit area, will be used to estimate normal vegetation productivity, plant cover, species, plant succession, and plant self-regeneration. The regulatory agency shall approve the estimating techniques used to judge the degree of success achieved in the revegetated areas. These exclosures and estimations may be required before revegetation procedures are approved.

(ii) When exclosures are required, the degree of progress and success in revegetating shall, at a minimum, meet the standards in the following table. More stringent standards may be established by the regulatory authority based on natural conditions in the area. The permittee and the regulatory authority shall use those standards as guides to indicate potentials for ultimate revegetation success and to determine whether remedial measures are necessary to improve chances for success.

Standards for revegetation when exclosures are required

[Ground cover=area covered by the combined aerial parts of plants and litter that are produced naturally on site, expressed as a percentage of the total area of measurement; biomass yield=the total yield of living plants above ground in an area at the end of the growing season]

Average annual precipitation, in inches	End of growing season		
	1 yr	5 yr	10 yr
A. Number of adapted species in revegetated areas:			
Up to 10	3	12	15
10.1 to 16	6	14	20
16.1 to 26	6	20	25
More than 26	8	25	30
B. Ground cover of perennial plants expressed as a percent of the ground cover in the exclosures:			
Up to 10	90	80	85
10.1 to 16	70	80	85
16.1 to 26	70	80	90
More than 26	80	90	NA
C. Biomass yield of perennial plants expressed as a percent of the biomass yield in the exclosures:			
Up to 10	90	80	80
10.1 to 16	70	80	85
16.1 to 26	70	80	90
More than 26	80	90	NA

V 42 I 173 SEP 7 77 7 UMI V

(g) *Seeding of stockpiled topsoil.* Topsoil stockpiled in compliance with § 715.16 must (if not to be redistributed within 30 days) be seeded or planted with an effective cover of nonnoxious, quick growing annual and/or perennial plants or protected by other approved measures as specified in § 715.16.

PART 716—SPECIAL PERFORMANCE STANDARD

716.1 General obligations.
716.2 Steep-slope mining.
716.3 Mountaintop removal.
716.4 Special bituminous coal mines.
716.5 Anthracite coal mines.
716.6 Coal mines in Alaska.
716.7 Prime farmland.
716.8 Surface effects of underground mine.

AUTHORITY: Secs. 201 and 501, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201).

§ 716.1 General obligations.

(a) This part establishes special initial performance standards that apply in the following special circumstances:

(1) § 716.2 applies to surface coal mining operations on steep slopes.

(2) § 716.3 applies to surface coal mining operations involving mountaintop removal.

(3) § 716.4 applies to special bituminous coal mines.

(4) § 716.5 applies to anthracite surface coal mining operations.

(5) § 716.6 applies to surface coal mining operations in Alaska.

(6) § 716.7 applies to surface coal mining operations on prime farmlands.

(7) § 716.8 applies to underground coal mining operations.

(b) All surface coal mining and reclamation operations subject to this Part shall comply with the applicable special performance standards in this part. Such operations shall also comply with all general performance standards in Part 715 of this chapter unless specifically exempted *in this part* from the requirement of Part 715.

§ 716.2 Steep-slope mining.

(a) The permittee conducting surface coal mining and reclamation operations on natural slopes that exceed 20 degrees, or on lesser slopes that require measures to protect the area from disturbance, as determined by the regulatory authority after consideration of soils, climate, the method of operation, and other regional characteristics, shall meet the following performance standards. The standards of this section do not apply where mining is done on a flat or gently rolling terrain with an occasional steep slope through which the mining proceeds and leaves a plain or predominantly flat area; or where the mining is governed by § 716.3.

(1) Overburden or waste materials or debris, including that from clearing and grubbing, and abandoned or disabled equipment, shall not be placed or permitted to remain on the downslope. Material in excess if that required to meet the provisions of § 715.14 of this chapter must be disposed of in accordance with the requirements of § 715.15 of this chapter.

(2) First-cut overburden shall be stored within the permit area. The storage piles must be designed and constructed to minimize erosion and to maximize stability. Any material temporarily stored for more than 30 days must be protected by an effective cover of nonnoxious, quick-growing annual and/or perennial plants or other approved means as specified in § 715.20 of this chapter.

(3) Where the backfilled slope is 50 feet or more in length, terraces when approved by the regulatory authority, shall be sloped to safely and quickly discharge runoff water to stable drainage channels located off the fill area and must be constructed to meet the requirements of §§ 715.14(c) and 715.17 of this chapter.

(4) Woody materials that can cause instability must not be mixed into the backfill.

§ 716.3 Mountaintop removal.

(a) Coal surface mining and reclamation operations that remove entire coal seams runnig through the upper fraction of a mountain, ridge, or hill by removing all of the overburden and creating a level plateau or gently rolling contour with no highwalls remaining are exempt from the requirements of § 715.14 of this chapter for achieving approximate original contour, if the following requirements are met:

(1) An industrial, commercial, agricultural, residential, or public facility (including recreational facilities) use is proposed for the affected land.

(2) The alternative land-use criteria in § 715.13(d) of this chapter is met and the proposal is approved by the regulatory authority.

(3) All other applicable requirements of Part 715 of this chapter are met.

(b) Surface coal mining and reclamation operations conducted under this section shall comply with the following standards:

(1) An outcrop barrier at least 15 feet wide measured on the top of the coalbed perpendicular to the highwall be retained to prevent slides and erosion.

(2) The final graded top plateau slopes on the mined area shall be less than lv:5*h* so as to create a level plateau or gently rolling configuration and the outslopes of the plateau shall not exceed lv:2h, except where engineering data substantiates and the regulatory authority finds that a minimum static safety factor of 1.5 will be attained.

(3) The resulting level or gently rolling contour shall be graded to drain inward from the outslope except at specific points where it drains over the outslope in protected, stable channels.

(4) Damage to natural watercourses below the area to be mined shall be prevented.

(5) Spoil will be placed on the mountaintop bench as is necessary to achieve the postmining land use approved under § 715.13 of this chapter. All excess spoil material not retained on the mountaintop shall be placed in accordance with the standards of § 715.15 of this chapter.

(c) (1) The permit giving approval for mountaintop removal shall be reviewed not more than 3 years after the date of issuance and shall be renewable only upon demonstration by the permittee that all operations are proceeding in accordance with the terms of the applicable permit, time, schedule, and reclamation plan.

(2) The terms of a permit for mountain top removal may be modified by the regulatory authority if it is determined that more stringent measures are necessary to prevent or control slides and erosion, prevent damage to natural water courses, avoid water pollution, or to assure successful revegetation.

§ 716.4 Special bituminous coal mines.

(a) *Definition.* Special bituminous coal surface mines as used in this section means those bituminous coal surface mines that are located in the State of Wyoming and that are being mined or will be mined according to the following criteria:

(1) Excavation of the mine pit takes place on a relatively limited site for an extended period of time. For the purposes of this section, mine pit means an open-pit mine in which the surface opening is at least the full size of the excavation and has a contiguous border. The pit generally is quite deep and is formed by the removal of relatively large amounts of overburden to obtain lesser amounts of coal. The term as used in this section applies only to mining operations that extract coal from seams dipping 15 degrees or steeper from the horizontal.

(2) Excavation of the mine pit follows a coal seam that inclines 15 degrees or more from the horizontal, and as the excavation proceeds downward it expands laterally to maintain stability of the pitwall or as necessary to accommodate the orderly expansion of the total mining operations.

(3) (i) Surface and mining operations in the mine pit have taken place since January 1, 1972, and

(A) operations in the mine pit are removing more than one coal seam, and

(B) mining has begun on the deepest coal seam scheduled to be mined; or

(ii) Surface coal mining operations are begun after August 3, 1977, and the operations are conducted on lands immediately adjacent to operations meeting the criteria of paragraph (a) (3) (i) of this section.

(4) The amount of material removed from the pit is large in proportion to the surface area disturbed.

(5) There is no practicable alternative to the deep open-pit method of mining the coal.

(6) There is no practicable way to entirely reclaim the land as required by Part 715 of this chapter.

(b) *Requirements for special bituminous coal mines operating prior to July 1, 1973.* Those portions of a special bituminous coal mine approved for operation prior to July 1, 1973, including the

orderly expansion of such a mine pit to the extent authorized by State law, shall at a minimum meet the general performance standards of Part 715 of this chapter for all operations conducted on the permit area outside the mine pit and for those operations associated with spoil storage areas. The standards of Part 715 also apply to the mine pit with the exception of § 715.14, which relates to backfilling and grading. Special requirements for backfilling and grading the mine pit area are as follows:

(1) In the final mine area, highwalls may be allowed to remain, benches may be allowed and details of the benches shall be included in the mine plans submitted to the regulatory authority for approval.

(2) The exposed pit floors will be sloped and graded to provide access to the area, and topsoil shall be applied and the floor area seeded according to the requirements of §§ 715.16 and 715.20. Where water impoundments are included as part of the mine plan, riprap may be used if necessary to prevent erosion.

(3) Spoil piles will be graded and contoured with no more than an overall slope of 17 degrees allowed, and terraces may be used to break the slope when it can be shown that terraces will accomplish the required reclamation. For the postmining land use, steeper slopes may be permitted upon approval of the regulatory authority, provided it can be demonstrated that such method will provide the required results.

(c) *Requirements for other special bituminous coal mines.* Those portions of a special bituminous coal mine which do not meet the criteria of paragraph (b) of this section shall, at minimum, meet the general performance standards of Part 715 of this chapter for all operations conducted on the permit area outside the mine pit and for these operations associated with spoil storage areas. The standards of Part 715 also apply to the mine pit with the exception of § 715.14, which relates to backfilling and grading. Special requirements for backfilling and grading the mine pit area are as follows:

(1) *Slope specifications.* Slope specifications for the postmining land use shall be based on an average of the natural slopes measured in the immediate area of the mine site, and the maximum inclination of thee slope in the reclaimed area shall not be greater than this average slope. However, slopes steeper than the average of the natural slopes may be approved by the regulatory authority if it can be demonstrated that returning the mined area to a slope equal to or less than the average natural slope would greatly increase the amount of disturbed land. Measurements of individual slopes, locations at which measurements are made, and the average natural slope as determined from the individual slope measurements shall be submitted for approval for the regulatory authority. The regulatory authority may make an independent slope survey to verify the average natural slope.

(2) *Postmining land uses that do not include water impoundment.*

(i) The final mine area shall be backfilled, graded, and contoured to the extent necessary to return the land to the use approved by the regulatory authority.

(ii) All backfilling, grading, and contouring shall be done in a manner to preserve the original drainage system or to provide substitute drainage systems approved by the regulatory authority.

(iii) Terraces or benches may be used only if it can be demonstrated that contouring methods will not provide the required results. Detailed plans of dimensions and design of the terraces or benches, check dams, erosion prevention techniques, and slopes of the terraces or benches and their intervals shall be submitted to the regulatory authority for approval before construction.

(iv) Depressions that will accumulate water shall not be allowed unless they are approved under paragraph (c) (3) of this section.

(3) *Postmining land uses that include permanent water impoundment.* (i) The exposed mine pit area shall be sloped, graded, and contoured to blend with the topography of the surrounding terrain and to provide for access to the area. Where necessary to prevent erosion, riprap shall be used.

(ii) Under certain conditions where it can be demonstrated by the permittee that the pitwall can be stabilized by terracing or other techniques, it may be permissible to leave one-half the proposed shoreline, as measured along the circumference, composed of the stabilized pitwall. The remaining part of the shoreline shall be graded and contoured to blend with the topography of the surrounding terrain and to provide access to the area. Detailed explanations of the techniques to be used to stabilize the pitwalls shall be submitted for approval by the regulatory authority. The regulatory authority may verify the effectiveness of the proposed stabilization techniques from a study made by an independent engineering company and based on this information and an onsite inspection, the regulatory authority will then determine the acceptability of the proposed stabilization techniques.

(d) In the event of an amendment or revision to the State of Wyoming's regulatory program, regulations, or decisions made thereunder governing such mines, the Secretary shall issue such additional regulations as necessary to meet the purpose of these regulations.

§ 716.5 Anthracite coal mines.

(a) Permittees of anthracite coal surface mines in those States where the mines are regulated by State environmental protection standards shall be subject to the environmental protection standards of the State regulatory program in existence on August 3, 1977, instead of the Part 715 of this chapter.

(b) The environmental protection provisions of Title 25, Rules and Regulations, Part 1, Department of Environmental Resources, Commonwealth of Pennsylvania, shall apply to reclamation of anthracite surface mines operated in the Commonwealth of Pennsylvania instead of Part 715 of this chapter. In addition, the regulations of the Commonwealth of Pennsylvania pertaining to standards for air and water quality shall apply instead of the regulations of Part 715 of this chapter.

(c) If a State's regulatory program or regulations for anthraciate coal mining and reclamation operations in force on August 3, 1977 are amended, the Secretary, upon receipt of a notice of amendment shall issue additional regulations as necessary to meet the purposes of this Act.

§ 716.6 Coal mines in Alaska.

(a) Permittees of surface coal mining operations in Alaska from which coal has been mined on or after August 3, 1976, shall conduct operations in a manner that, at a minimum, meets all the general performance standards of Part 715 of this chapter.

(b) The Secretary, after consultation with the Governor of Alaska, may modify the applicability of any environmental protection standard to any surface coal mining operation if he determines that it is necessary to ensure the continued operation of the mine.

(c) Any person may petition the Secretary to modify the applicability of a performance standard to a coal mine in Alaska. No particular form of petition is required. However, the petition shall be in writing and shall identify clearly—

(1) The performance standard involved;

(2) The alternative methods to be used to protect the environment and public health and safety;

(3) The reasons why a modification is requested with full descriptions of the impacts continued requirements for compliance with the performance standard to be modified would have on mining and reclamation and of the impacts the proposed method would have on the environment and public health and safety; and

(4) The location of the mine.

(d) If the Secretary determines that the petition presents reasonable justification for modifying the performance standard, he may grant a temporary suspension of enforcement of the performance standard, and he shall publish a notice of intention to modify the applicability of the performance standard in the FEDERAL REGISTER and in a newspaper of general circulation in the area of Alaska where the affected coal mine is located. A public hearing shall be held in Alaska and any person may testify for or against the proposed modification. The Secretary, after considering the public comment, and consulting with the Governor of Alaska, shall publish his decision in the FEDERAL REGISTER and in the same newspaper in which the original notice was published.

§ 716.7 Prime farmland.

(a) (1) *Applicability.* Permittees of surface coal mining and reclamation operations conducted on prime farmland as defined in paragraph (b) of this section and identified in paragraph (c) of this section and that has been used for

V 42 173 SEP 7 77 UMI

the production of cultivated crops, including nurseries, orchards, and other specialty crops, and small grains for a period of at least 5 years out of the 20 years preceding the date of the permit application, shall comply with the general performance standards of Part 715 of this chapter in addition to the special requirements of this section.

(2) The requirements of this section are applicable to any permit issued on or after August 3, 1977. Permits issued before that date and revisions or renewals of those permits need not conform to the provisions of this section regarding actions to be taken before a permit is issued. However, operations conducted under existing permits must be in accordance with the special requirements of paragraph (g) of this section. Permit renewals or revisions shall not include contiguous or noncontiguous expansions that were not in the original permit area or in a mining plan previously approved.

(b) *Definition.* Prime farmland means those lands that meet the criteria prescribed by the Secretary of Agriculture as published in the FEDERAL REGISTER on August 23, 1977. These criteria are included here for convenience. Terms used in this section are defined in U.S. Department of Agriculture publications: Soil Taxonomy, Agriculture Handbook 436; Soil Survey Manual, Agriculture Handbook 18; Rainfall-Erosion Losses from Cropland, Agriculture Handbook 282; and Saline and Alkali Soils, Agriculture Handbook 60. To be considered prime farmland the soils must meet all of the following criteria—

(1) The soils have—

(i) Aquic, udic, ustic, or xeric moisture regimes and sufficient available water capacity within a depth of 40 inches or in the root zone, if the root zone is less than 40 inches deep, to produce the commonly grown crops in 7 or more years out of 10; or

(ii) Xeric or ustic moisture regimes in which the available water capacity is limited but the area has a developed irrigation water supply that is dependable and of adequate quality (A dependable water supply is one in which enough water is available for irrigation in 8 out of 10 years for the crops commonly grown); or

(iii) Aridic or torric moisture regimes and the area has a developed irrigation water supply that is dependable and of adequate quality.

(2) The soils have a soil temperature regime that is frigid, mesic, thermic, or hyperthermic (pergelic and cryic regimes are excluded). These are soils that at a depth of 20 inches have a mean annual temperature higher than 32 degrees F. In addition, the mean summer temperature at this depth in soils with an 0 horizon is higher than 47 degrees F.; in soils that have no 0 horizon the mean summer temperature is higher than 59 degrees F.

(3) The soils have a pH between 4.5 and 8.4 in all horizons within a depth of 40 inches or in the root zone if the root zone is less than 40 inches deep.

(4) The soils either have no water table or have a water table that is maintained at a sufficient depth during the cropping season to allow food, feed, fiber, forage, and oilseed crops common to the area to be grown.

(5) The soils can be managed so that, in all horizons within a depth of 40 inches or in the root zone if the root zone is less than 40 inches deep, during part of each year the conductivity of saturation extract is less than 4 mmhos/cm and the exchangeable sodium percentage (ESP) is less than 15.

(6) The soils are not flooded frequently during the growing season (less often than once in 2 years).

(7) The soils have a product of K (erodibility factor) x percent slope of less than 2.0 and a product of I (soil erodibility) x C (climatic factor) not exceeding 60.

(8) The soils have a permeability rate of at least 0.06 inch per hour in the upper 20 inches and the mean annual soil temperature at a depth of 20 inches is less than 59 degrees F.; the permeability rate is not a limiting factor if the mean annual soil temperature is 59 degrees F. or higher.

(9) Less than 10 percent of the surface layer (upper 6 inches) in these soils consists of rock fragments coarser than 3 inches.

(c) *Identification of prime farmland.* Prime farmland shall be identified on the basis of soil surveys and, if required by the regulatory authority, data on irrigation drainage flood control, and subsurface water management submitted by the applicant. The requirement for submission of soil surveys may be waived by the regulatory authority if the applicant demonstrates that no prime farmlands are involved according to procedures in paragraph (d) of this section. Soil surveys shall be conducted according to standards of the National Cooperative Soil Survey which includes the procedures set forth in Soil Taxonomy, Agriculture Handbook 436; and Soil Survey Manual, Agriculture Handbook 18. The surveys shall include—

(1) Data on moisture availability, temperature regime, flooding, water table, erosion characteristics, permeability, or other information that is needed to determine prime farmland in accordance with paragraph (b) of this section;

(2) A map designating the exact location and extent of the prime farmland; and

(3) A description of each soil mapping unit.

(d) *Negative determination of prime farmland.* Where the permittee can demonstrate one or more of the following situations, the land shall not be considered as prime farmland, and a soil survey and other information required by paragraph (c) of this section shall not be required for identification:

(1) No lands within the proposed permit boundaries have been used for the production of cultivated crops for a period of at least 5 years out of 20 years preceding the date of the permit application.

(2) The slope of all land within the permit area is 10 percent or greater.

(3) Land within the permit area is not irrigated or naturally subirrigated and, has no developed water supply that is dependable and of adequate quality, and the average annual precipitation is 14 inches or less.

(4) Other factors exist, such as a very rocky surface, or the land is frequently flooded, which clearly place all land within the area outside the purview of prime farmland.

(5) A written notification based on scientific findings and soil surveys that land within the proposed mining area does not meet the applicability requirements in paragraph (a) of this section is submitted to the regulatory authority by a qualified person other than the permittee, and is approved by the regulatory authority.

(e) *Plan for restoration of prime farmland.* The applicant shall submit to the regulatory authority a plan for the mining and restoration of any prime farmland within the proposed permit boundaries. This plan shall be used by the regulatory authority in judging the technological capability of the applicant to restore prime farmlands. The plan shall include—

(1) A description of the original undisturbed soil profile showing the thickness of each soil horizon that is to be removed, stored, and replaced.

(2) The proposed method and type of equipment to be used for removal, storage, and replacement of the soil horizons in their natural occurring sequence;

(3) The location of areas to be used for stockpiling the soil horizons and plans for its stabilization before redistribution.

(4) If applicable documentation such as agricultural school studies or other data from comparable areas that supports the use of other suitable material instead of the B or C soil horizon to obtain on the restored area equivalent or higher levels of yield as non-mined prime farmlands in the surrounding area under equivalent levels of management; and

(5) Plans for seeding or cropping the restored mine land and conservation practices to control erosion and sedimentation during the first 12 months after regrading is completed. Proper adjustments for seasons must be made so that regraded land is not exposed to erosion during seasons when vegetation or conservation practices cannot be established due to weather conditions.

(6) Agricultural school studies, company data, or other scientific data that prove that the permittee using his proposed method of reclamation will achieve the equivalent or higher levels of yield after mining as existed before mining.

(f) *Consultation with Secretary of Agriculture and issuance of permit.* (1) The regulatory authority may grant a permit which shall incorporate the plan submitted under paragraph (e) of this section if it finds in writing that the proposed plan—

(i) Demonstrates the technological capability to restore the prime farmland within the proposed permit area, within a reasonable time, to equivalent or higher levels of yield as nonmined prime farmland in the surrounding area under equivalent levels of management; and

(ii) Is feasible and will achieve compliance with the standards of paragraph (g) of this section.

(2) Prior to the granting of any permit that includes prime farmlands, the regulatory authority shall consult with the Secretary of Agriculture. The Secretary of Agriculture will provide a review of the proposed method of soil reconstruction and comment on possible revisions that will result in a more complete and adequate restoration. The Secretary of Agriculture has assigned his responsibilities under this paragraph to the Administrator of the U.S. Soil Conservation Service and the U.S. Soil Conservation Service will carry out the consultation and review through their State Conservationist, located in each State.

(g) *Special requirements.* For all prime farmlands to be mined and reclaimed, the permittee shall meet the following special requirements:

(1) Determine from a soil survey the depth and thickness of the A and B horizons and any underlying C horizon that collectively constitute the root zone of the locally adapted crops. If other underlying material, below the root zone of the natural soil, is to be used in soil reconstruction instead of the B horizon, these strata must be shown to be texturally and chemically equal or better suited to plant growth and of equal or greater thickness than the B horizon.

(2) Remove all soil horizons to be used in the reconstruction of the soil before drilling, blasting, or mining to prevent contaminating the soil horizons with undesirable materials. Where removal of soil horizons result in erosion that may cause air and water pollution, the regulatory authority shall specify methods of treatment to control erosion of exposed overburden.

(i) Remove separately the entire A horizon in a manner that prevents mixing or contamination with other material before replacement.

(ii) Remove separately the B horizon of the natural soil or, if determined by the regulatory authority to be of insufficient thickness for soil reconstruction, a combination of B horizon and underlying C horizon that will constitute the reconstructed root zone, in a manner that prevents mixing or contamination with other material.

(iii) Remove separately the underlying C horizons or other strata, or a combination of such horizons or other strata, to be used instead of the B horizon that are of equal or greater thickness and that can be shown to be equal or more favorable for plant growth than the B horizon, and that when replaced will create in the reconstructed soil a final root zone of comparable depth and quality to that which existed in the natural soil. To use such material, the requirements of § 715.16 of this chapter shall be met.

(3) If stockpiling of soil horizons is allowed by the regulatory authority, the A horizon and B horizon must be stored separately, the stockpiles must be placed within the permit area and where they will not be disturbed or exposed to excessive erosion by water or wind before the stockpiled horizons can be redistributed on terrain graded to final contour. Stockpiles in place for more than 30 days must meet the requirements of § 715.16(c).

(4) Scarify the final graded land before the soil horizons are replaced to eliminate slippage surfaces.

(5) Replace the material from the B horizon, or other suitable material specified in paragraph (g)(2) of this section in such a manner as to avoid excessive compaction of overburden and to a thickness comparable to the root zone that existed in the soil before mining.

(6) Replace the A horizon as the final surface soil layer to the thickness of the original soil as determined in paragraph (g)(1) of this section in a manner that—

(i) Prevents excess compaction of both the A horizon and underlying material and reduction of permeability to less than 0.06 inch per hour in the upper 20 inches of the reconstructed soil profile; and

(ii) Protects the A horizon from wind and water erosion before it is seeded or planted, and

(iii) Apply nutrients and soil amendments as needed to establish quick vegetative growth.

§ 716.8 Surface effects of underground mines.

All underground coal mining operations shall comply with the following standards and shall not be required to comply with those sections of Part 715 of this chapter that are not specifically listed in this section.

(a) The requirements of § 715.11(b) of this chapter, authorization to operate.

(b) The requirement of § 715.12(a) of this chapter, sign and marker specifications; § 715.12(b), mine identification signs; § 715.12(e) as regards blasting of surface areas.

(c) The requirements of § 715.14 of this chapter, backfilling and grading, except the standards regarding mountaintop removal and thin and thick restored overburden. These requirements apply only to the surface areas disturbed to provide access to the mine and such other surface areas disturbed during the mining operation as are identified by the regulatory authority. The requirements apply at the conclusion of mining operations.

(d) The requirements of § 715.15 of this chapter, disposal of spoil and waste materials.

(e) The requirements of § 715.17 of this chapter, protection of the hydrologic system; in regard to surface discharges and surface areas that are disturbed, except that the requirements of §§ 715.17 (h) and (j) shall not apply.

(f) The requirements of § 715.18 of this chapter, dams constructed of refuse materials.

(g) The requirements of § 715.19 of this chapter in regard to explosives used during surface operations.

(h) The requirements of § 715.20 of this chapter in regard to revegetation of surface areas disturbed. The requirements apply at the conclusion of mining operations.

PART 717—ADOPTION OF STATE STANDARDS

§ 717.1 Procedures for adoption.

(a) Any State law or regulation which is determined by the Secretary under the procedures in this section to be a more stringent performance standard for regulation of surface coal mining and reclamation operations than that provided under a performance standard in Part 715 or Part 716 of this chapter shall be adopted by the Secretary and applied in that State in lieu of the requirements of the standards in Part 715 or 716.

(b) A State may request the Secretary to review the provisions of any State law or regulation to determine whether such law or regulation provides a more stringent performance standard than comparable provisions in Part 715 or 716 of this chapter. No particular form of request is required. However, the request shall be in writing and shall include the text of the State law or regulation, identification of the comparable performance standard in Part 715 or Part 716 of this chapter, and an analysis of the reasons why the State law or regulation is a more stringent standard.

(c) If the Secretary determines that the requirements of State law or regulation may be more stringent than the comparable performance standard in Part 715 or Part 716 of the chapter, he shall initiate rulemaking under the procedures of section 501 of the Act for adoption of the standard.

(Secs. 201 and 501, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201))

PART 720—STATE ENFORCEMENT ACTIVITIES

Sec.
720.11 Enforcement authority.
720.12 Enforcement responsibilities.
720.13 Permits.
720.14 Reporting obligations.

AUTHORITY: Secs. 201, 501 and 502, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201).

§ 720.11 Enforcement authority.

Nothing in these regulations shall be interpreted to preclude a State from exercising its authority to enforce State law, regulations, and permit conditions unless—

(a) Compliance with the State law, regulation or permit condition will preclude compliance with these regulations.

(b) The Secretary has published in the FEDERAL REGISTER a list of state laws and regulations which have been preempted.

§ 720.12 Enforcement responsibilities.

If a State regulates the conduct of surface coal mining operations, the Act contemplates that the State will enforce the performance standards of Parts 715 and 716 of this Chapter that are more stringent than the requirements of State law

V 42 173 SEP 7 77 UMI

and the obligations of operators under Part 710 of this Chapter.

§ 720.13 Permits.

On or after February 4, 1978, if a State is enforcing the performance standards of Parts 715 and 716 of this Chapter that are more stringent than State law, that State shall develop and incorporate terms in initial, revised, or renewed permits that comply with those standards.

§ 720.14 Reporting obligations.

(a) During the initial regulatory program, each State regulatory authority shall submit to the district manager of the Office with jurisdiction over the inspected surface coal mining operation, or other office designed by the Director, within 5 days after its completion a copy of each State report which contains observations of the condition of the mine site and relates to the obligations imposed by these regulations.

(b) Any State issuing an initial, revised, or renewed permit on or after February 4, 1978, to conduct surface coal mining operations shall submit a copy of the application and the permit to the district manager of the Office with jurisdiction over the surface coal mining operation, or to such other office as the Director designates.

PART 721—FEDERAL INSPECTIONS

Sec.
721.11 Extent.
721.12 Right of entry.
721.13 Inspections based on citizen requests.
721.14 Failure to give notice and lack of reasonable belief.

AUTHORITY: Secs. 201, 501 and 502, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201)

§ 721.11 Extent.

The authorized representatives of the Secretary shall conduct inspections of surface coal mining operations subject to regulations under the Act—

(a) On the basis of not less than two consecutive State inspection reports indicating a violation of the Act, regulations or permit conditions required by the Act;

(b) On the basis of information provided by a State or any person which gives rise to a reasonable belief that the provisions of the Act, regulations or permit conditions required by the Act are being violated, or that a condition or practice exists which creates an imminent danger to the health or safety of the public, or is causing, or can reasonably be expected to cause significant, imminent environmental harm to land, air or water resources; and

(c) On a random basis of at least one complete inspection each 6 months. A complete inspection is an onsite review of the entire area disturbed or affected by mining.

§ 721.12 Right of entry.

(a) Authorized representatives of the Secretary, without advance notice and upon presentation of appropriate credentials and without a search warrant, shall have the right of entry to, upon, or through any surface coal mining and reclamation operations or any premises in which any records to be maintained are located.

(b) The authorized representatives may at reasonable times, and without delay, have access to and copy any records, inspect any monitoring equipment or method of operation required under this Act, the regulations or the permit.

§ 721.13 Inspections based on citizen requests.

(a) *Citizen reports* (1) Any person who suspects or knows of a violation of the Act, regulations or permit conditions required by the Act or of any imminent hazard may report this information in writing to the Office of Surface Mining Reclamation and Enforcement office nearest to the surface coal mining operation to which the information relates or to any other Office of Surface Mining Reclamation and Enforcement office. Written complaints must be signed and include a phone number where the complaining party can be contacted. The complaint or other information shall be considered as having a reasonable basis if it alleges facts which, if proven to be true, would be sufficient to show a violation of the Act, regulations or permit. Unless the Office has reason to believe that the information is incorrect, or determines that even if true it would not constitute a violation, the Office shall conduct an inspection.

(2) The identity of any person supplying information to the Office relating to possible violations or imminent hazards shall remain confidential within the Office unless the person supplying the information consents in writing to disclosure.

(b) *Right to accompany the authorized representative of the Secretary.* (1) If a Federal inspection is conducted as a result of information provided to the Office, the person who provided the information shall be notified when the inspection is to occur and the person will be allowed to accompany the authorized representative during the inspection.

(2) Any person accompanying an authorized representative of the Secretary has a right of entry to, upon and through the mining and reclamation operations about which he supplied information only if he is in the presence of and is under the control, direction and supervision of the authorized representative while on the mine property.

(c) *Notification of results of investigation.* Within 10 days of the inspection or, if no inspection, within 10 days of the complaint, the Office shall notify the person in writing of the following—

(1) The results of the investigation, including a description of any inspection which occurred and any enforcement action taken; copies of Federal inspection reports, notices of violation, and cessation orders may be forwarded to the person in satisfaction of this requirement.

(2) If no inspection was conducted, an explanation of the reason for not inspecting;

(3) A statement as to the person's right to informal review of the actions or inactions of the Office.

(d) *Review of action of local offices.* A person who does not agree with the action taken by the Office on his report may request the Regional Director to review the complaint and actions taken. The Regional Director shall advise the person in writing of the results of the review.

§ 721.14 Failure to give notice and lack of reasonable belief.

No notice of violation or cessation order may be vacated by reason of failure to give notice required by the Act prior to the inspection or by reason of a subsequent determination that prior to the inspection the Office did not have information sufficient to create a reasonable belief that a violation had occurred.

PART 722—ENFORCEMENT PROCEDURES

Sec.
722.1 Scope.
722.11 Imminent hazards.
722.12 Non-imminent hazard violations.
722.13 Failure to abate.
722.14 Service of notice.
722.15 Review at minesite of cessation orders.
722.16 Inability to comply.
722.17 Pattern of violation.

AUTHORITY: Secs. 201, 501 and 502, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201).

§ 722.1 Scope.

The regulations of this part set forth general procedures governing issuance of orders of cessation, notices of violation, and orders to show cause under section 521 of the Act.

§ 722.11 Imminent hazards.

(a) If an authorized representative of the Secretary finds conditions, or practices, or violations of applicable performance standards, which create an imminent danger to the health or safety of the public the authorized representative shall immediately order a cessation of surface coal mining and reclamation operations or the portion thereof relevant to the condition, practice, or violation.

(b) If an authorized representative of the Secretary finds conditions or practices, or violations of applicable performance standards, which can reasonably be expected to cause significant, imminent environmental harm to land, air, or water resources, the authorized representative shall immediately order a cessation of surface coal mining and reclamation operations or the portion thereof relevant to the condition, practice, or violation.

(c) An authorized representative of the Secretary shall impose affirmative obligations on an operator which the authorized representative deems necessary to abate the condition, practice or violation if—

(1) A cessation order is issued under paragraph (a) or (b) of this section; and

(2) The cessation of mining or reclamation activities will not completely abate the imminent danger to public

health or safety or the significant, imminent environmental harm or eliminate the practices or conditions that contributed to the imminent danger or significant, imminent environmental harm.

(d) When imposing affirmative obligations under this section, the authorized representative shall require abatement of the danger or harm in the most expeditious manner physically possible. The affirmative obligation shall include a time by which abatement shall be accomplished and may include, among other things, the use of existing or additional personnel and equipment.

(e) An authorized representative of the Secretary may terminate a cessation order issued under paragraph (a) or (b) of this section by written order when the authorized representative of the Secretary determines that the conditions or practices or violations which caused the danger to life or the environment have been eliminated.

§ 722.12 Non-imminent hazard violations.

(a) If an authorized representative of the Secretary finds a violation which is not an imminent hazard, the authorized representative shall issue a notice of violation fixing a reasonable time for abatement.

(b) An authorized representative may extend the time to abate a violation by written notice if the failure to abate within the time set was not caused by the permittee's or operator's lack of diligence.

(c) The total time for abatement as originally fixed and subsequently extended shall not exceed 90 days.

§ 722.13 Failure to abate.

An authorized representative of the Secretary shall order cessation of surface coal mining and reclamation operations, or the portion relevant to the violation, when the authorized representative has issued a notice of violation under § 722.12 and determines that the permittee or operator has failed to abate the violation within the time originally fixed or subsequently extended. In a cessation order issued under this section, the authorized representative shall impose affirmative obligations to abate the violation in the manner provided in § 722.11.

§ 722.14 Service of notice.

Notices and orders issued under this part shall be given to the permittee or operator or his designated agent. If no designated agent is at the mine site, service will be made upon any person who appears to be in charge of the mining or reclamation operation. The person receiving service shall be responsible for any immediate compliance actions required by the notice or order. Service is complete on delivery at the mine. However, a copy of each notice or order shall be mailed to the permittee or operator within 5 days.

§ 722.15 Review at minesite of cessation orders.

(a) Within 30 days after the permittee or operator has received any cessation order issued under this part, the District Manager or his delegate shall conduct an informal hearing at the minesite or within such reasonable proximity to the mine that it may be visited during the conduct of the hearing. No hearing will be required where the condition, practise or violation in question has been abated or the operator waives the hearing.

(b) Any request made to the Office of Surface Mining Reclamation and Enforcement for a substantial modification or vacation of a cessation order shall be deemed a request for an informal hearing under this section.

(c) Notice of the time, place and subject matter of the hearing shall be given to the operator or permittee, any citizen who filed a report which led to the cessation order to be reviewed and the state regulatory authority. Notice of the hearing also shall be posted at the appropriate district or field office and at the mine site and, to the extent possible, shall be given by newspaper in the area of the mine.

(d) The requirements of section 554 of Title 5 of the United States Code shall not govern the conduct of the hearings required by this section. The District Manager of his delegate may accept oral or written arguments, presentations of evidence, or any other relevant information from any person attending.

(e) The District Manager or his delegate shall within 15 days of the close of the informal hearing affirm, modify, or vacate the order. The decision shall be in writing and shall be sent to the permittee or operator, any citizen who filed a reprot which led to the cessation order reviewed and the State regulatory authority.

(f) Informal review under this subsection shall not affect the rights of any person to request formal review under section 525(a)(1) of the Act. A request for informal review under this section of the Act shall not affect the 30 day time period for filing a request for formal review under section 525(a)(1) of the Act.

§ 722.16 Inability to comply.

(a) Neither a notice of violation nor a cessation order issued under this part may be vacated because of inability to comply.

(b) A permittee or operator may not be deemed to have shown good cause for not suspending or revoking a permit by showing inability to comply.

(c) Unless caused by lack of diligence, inability to comply may be considered in mitigation of the amount of a Civil penalty under part 2033 of this Chapter and of the duration of the suspension or revocation of the permit under § 722.17.

§ 722.17 Pattern of violations.

(a) The regulations of this section set forth the procedures governing the suspension or revocation of State permits based on a pattern of violations arising during Federal inspections during the initial regulatory program.

(b) *Definitions* As used in this Section—

(1) *"Violations of the same or related requirements of the Act, regulations or permit conditions"* means noncompliance with any single section Parts 715, 716 or 717 of this chapter.

(2) *"Violations of different requirements of the Act, regulations or permit conditions"* means noncompliance with different sections of Part 715, 716 or 717 of this chapter.

(3) *"Unwarranted failure to comply"* means the failure of a permittee to prevent the occurrence of any violation of his permit or any requirement of the Act or these regulations due to indifference, lack of diligence, lack of reasonable care, or the failure to abate any violation of such permit, the Act or regulations due to indifference, lack of diligence or lack of reasonable care.

(4) *"Willful violation"* means an intentional action or omission which violates the Act, regulations or permit conditions required under the Act.

(c) *Order to show cause.* (1) If a Regional Director of the Office determines that a pattern of violations exists or has existed and that such violations are caused by the unwarranted failure of the permittee or were willfully caused, the Regional Director shall issue an order to the permittee to show cause why the permit should not be suspended or revoked.

(2) The Regional Director may determine that a pattern of violations exists or has existed, after considering the circumstances, including—

(i) The number of willful violations or violations caused by unwarranted failure to comply with the same or related requirements of the Act, regulations or permit conditions during 2 or more Federal inspections.

(ii) The number of willful violations or violations caused by unwarranted failure to comply with different requirements of the Act, regulations or permit conditions.

(iii) The extent to which the violations were isolated departures from lawful conduct.

(3) The Regional Director shall deem a pattern to exist if the number of willful violations or violations caused by unwarranted failure to comply with the Act, regulations or permit conditions is at a rate 50 percent above the national norm during two months of any four month period. The national norm will be determined by comparing the number of willful and unwarranted violations issued per inspection day to permittees in the initial regulatory period. The norm will be determined semi-annually and the norm for the proceeding half year will be utilized in determining whether a pattern exists. The national norm may be computed by a sampling or other statistically-valid method when the data exists for the computation.

V 4 2 1 7 3 SEP 7 7 7 UMI V

(d) *Suspension or revocation of permit.* (1) The order to show cause shall be issued and a public hearing, if requested, shall be conducted under the procedures of 43 CFR Part 4.

(2) If the Secretary finds that a pattern of violations exists or has existed, the permit shall be either suspended or revoked and the permittee directed to complete necessary reclamation operations.

PART 723—CIVIL PENALTIES

Sec.
723.1 Scope.
723.2 Objective.
723.11 When assessment made.
723.12 When to assess after a notice of violation.
723.13 Determination of amount of penalty.

AUTHORITY: Sec. 201, 501 and 502, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201)

§ 723.1 Scope.

This part covers the assessment of civil penalties under section 518 of the Act for violations of a permit condition, any provision of Title V of the Act, or any implementing regulations. This part governs when a civil penalty is assessed and how the amount is determined and sets forth applicable procedures. This part applies to cessation orders and notices of violation issued to permittees or operators under Part 722 of this chapter during a Federal inspection.

§ 723.2 Objective.

Civil penalties are assessed under section 518 of the Act to deter violations of the Act and to insure the maximum compliance with the Act on the part of the coal mining industry.

§ 723.12 When to assess after a notice of

(a) The Office will review each notice of violation and cessation order issued in accordance with the assessment procedures described in this section to determine whether a civil penalty will be assessed, the amount of the penalty and whether each day of a continuing violation will be deemed a separate violation for purposes of the total penalty assessed.

(b) The Office shall assess a civil penalty for each violation contained in a cessation order. If a cessation order is issued for a condition or practice which is not a violation, no civil penalty shall be assessed.

(c) In determining whether to assess a civil penalty the Office shall consider—

(1) The permittee or operator's history of previous violations at the particular coal mining operation;

(2) The seriousness of the violation;

(3) Whether the permittee or operator is negligent; and

(4) The demonstrated good faith of the permittee or operator is attempting to achieve rapid compliance after notification of the violation. The Office shall make this determination by use of a point system described in § 723.12.

§ 723.12 When to assess after a notice of violation.

(a) *General.* The Office determines whether to assess a penalty following the issuance of a notice of violation by a point system that takes into account the four criteria in § 723.4(c). Points are assigned based on each of the four criteria. If the total is more than 30 points, a penalty is assessed.

(b) *History of previous violations.* The Office shall assign one point for each past violation and five points for each past cessation order issued as a result of a violation up to a maximum of 30 points. Each violation which underlies a cessation order shall be counted separately from the cessation order itself. Violations and cessation orders which shall be counted are those, resulting from a Federal inspection, that have not been vacated or dismissed at the time of the assessment being computed and that occurred or were issued within the year preceding the violation under consideration. The Office shall count each violation without regard to whether it led to a civil penalty assessment.

(c) *Seriousness.* The Office shall assign up to 30 points based on the seriousness of the violation according to the following schedules.

(1) *Probability of occurrence.* The probability of the occurrence of the event against which a standard is directed may account for a maximum of 15 penalty points. The Office shall use the following definitions and schedules—

(i) Probability of occurrence:	*Points*
None or insignificant	0- 5
Unlikely	5-10
Likely	10-15
Occurred	15

(2) *Extent of potential or actual damage.* The extent of the potential or actual damage in terms of area and impact on the public or environment may account for a maximum of 15 penalty points based on the following—

(i) If the damage or impact against which the standard violated is designed to protect would remain within the permit area (or in the case of a deep mine, the area of surface structures), the Office shall assign zero to seven points depending on the duration and extent of the damage or impact.

(ii) If the damage or impact, against which the standard violated is designed to protect, would extend outside the permit area (or in the case of a deep mine, the area of surface structures), the Office shall assign eight to fifteen points depending on the duration and extent of the damage or impact.

(3) The Office shall assign up to 15 points for seriousness for any failure to keep records, to give notice or to conduct any measuring or monitoring required by the regulations or a permit based upon the extent to which enforcement is obstructed. If the method of assigning points for seriousness under paragraph (c) (1) and (2) of this section produces more points, the higher points shall be assigned.

(d) *Negligence.* (1) The Office shall assign up to 25 points based on the negligence of the permittee or operator, either through act or omission, in causing or failing to correct the condition or practice which is a violation. A violation which occurs through no negligence shall not be assigned penalty points for negligence. A violation which is caused by negligence shall be assigned 12 points or less depending on the degree of negligence. A violation which occurs through a greater degree of fault than negligence shall be assigned 13 through 25 penalty points depending on the degree of fault.

(2) In determining the degree of negligence involved in a violation and the number of penalty points to be assigned, the following definitions apply—

(i) *No negligence* means an inadvertent violation of the Act, regulations or permit conditions which was unavoidable by the exercise or reasonable care.

(ii) *Negligence* means the failure of a permittee or operator to prevent the occurrence of any violation of his permit or any requirement of the Act or the regulations due to indifference, lack of diligence, or lack of reasonable care, or the failure to correct any violation of such permit or the Act or the regulations due to indifference, lack of diligence or lack of reasonable care.

(iii) Examples of greater degree of fault than negligence are reckless, knowing or intentional conduct.

(3) In calculating points to be assigned for negligence, the actions of all persons working on the mine site shall be attributed to the permittee or operator.

(e) *Good faith in attempting to achieve compliance.* (1) The Office shall subtract or add points based on the degree of good faith of the permittee or operator in attempting to achieve rapid compliance after notification of the violation. The points shall be assigned according to the following schedule—

Degree Of Good Faith:	*Points*
Rapid	−10
Normal	0
Lack of good faith	10

(2) In determining the permittee's or operator's degree of good faith in attempting to achieve rapid compliance, the following definitions apply—

(i) *Rapid Compliance* means that the permittee or operator took extraordinary measures to abate the violation in the shortest possible time and that abatement was achieved more rapidly than reasonably required.

(ii) *Normal Compliance* means the permittee or operator abated the violation within the time given for abatement.

(iii) *Lack of Good Faith* means the permittee or operator did not show diligence in attempting to abate the violation and the violation was not timely abated.

(3) If the consideration of this criteria is impractical because the length of the abatement period, the assessment may be made without considering this criteria. Any such assessment may be reconsidered upon the permittee or operator's request after abatement is completed.

§ 723.13 Determination of amount of penalty.

The Office shall determine the amount of any civil penalty by converting the total number of points assigned under § 723.12 to a dollar amount according to the following schedule:

25 and below-500	48-2,800
26-600	49-2,900
27-700	50-3,000
28-800	51-3,100
29-900	52-3,200
30-1,000	53-3,300
31-1,100	54-3,400
32-1,200	55-3,500
33-1,300	56-3,600
34-1,400	57-3,700
35-1,500	58-3,800
36-1,600	59-3,900
37-1,700	60-4,000
38-1,800	61-4,100
39-1,900	62-4,200
40-2,000	63-4,300
41-2,100	64-4,400
42-2,200	65-4,500
43-2,300	66-4,600
44-2,400	67-4,700
45-2,500	68-4,800
46-2,600	69-4,900
47-2,700	70 and above 5,000.

§ 723.14 Assessment of separate violations for each day.

(a) If a cessation order is issued for failure to abate a violation within the time set in a prior notice of violation or cessation order, the Office shall assess separately each day the violation underlying the cessation order remains unabated. The daily penalty shall be the amount assessed for the violation or $750.00, whichever isg reater. The daily assessment of a penalty shall not be made for any period that the obligation to abate is suspended.

(b) The Office may assess separately each day of any continuing violation. In making this determination, the Office shall consider the factors listed in $750.00, whichever is greater. The daily permittee or operator which resulted from a failure to comply.

(c) The Office shall separately assess a minimum of two days for any continuing violation which is assigned more than 70 points under § 723.12.

§ 723.15 Procedures for assessment of civil penalties.

(a) With 10 days of service of a notice or order, the permittee or operator may submit information in writing pertaining to the violation involved to the District Office with jurisdiction over the mine and to the inspector who issued the notice or order. The Office shall consider any information so submitted in determining the facts surrounding the violation and the amount of the penalty.

(b) The Office shall serve the permittee or operator, by certified mail return receipt requested, with 30 days of the issuance of the notice or order, with a copy of the proposed assessment and of the worksheets showing the computation.

§ 723.16 Procedure for conference.

(a) If a written request from the permittee or operator is received within 15 days from receipt of a proposed assessment, the Office shall arrange for a conference to review the assessment. The permittee or operator may submit additional material for consideration during the conference. The Office may contact the permittee or operator to discuss the assessment prior to the conference if necessary to expedite the review.

(b) The Office shall consider all relevant information on the violation in question presented by the permittee or operator and may recalculate either up or down or vacate the proposed penalty. No information as to which the permittee or operator claims confidentiality shall be considered as a basis for reduction of a proposed assessment. When new facts warrant the imposition of a higher penalty, it shall be proposed in the manner provided in § 723.15. Every change in a proposed assessment shall be fully documented in the file including a written explanation of the reason the penalty has changed.

(c) Notice of the time and place of the conference shall be posted at the Office Surfacing Mining Reclamationt and Enforcement field office with jurisdiction over the mine at least five days prior to the conference. Any person shall have a right to attend the conference.

(d) If the issues are resolved, the agreement shall be in writing and signed by both parties. If payment is not received within 10 days, the Office may—

(1) Enter the agreed upon amount as a final order of the Secretary; or

(2) Rescind the agreement and reinstate the original proposed assessment.

(e) A reduction of a proposed civil penalty assessment of more than 25 percent and more than $500 agreed to during a conference shall be approved by the Regional Director or his designee before it is final and binding on the Secretary.

§ 723.17 Request for hearing.

(a) Within 30 days from receipt of the proposed assessment, the permittee or operator may request a hearing before the Office of Hearings and Appeals by filing a petition and tendering full payment of the proposed assessment to be held in escrow.

(b) The timely filing of a request for a conference under § 723.16 suspends the running of the 30-day period for requesting a hearing. The suspension shall continue until the completion of the conference, which shall be held within 60 days from the date of the request for the conference. The permittee or operator shall have 15 days after completion of the conference to request a public hearing.

(c) The Office of Hearings and Appeals conducts the hearings and issues orders or otherwise terminates the petition pursuant to its procedures in 43 CFR Part 4. The Office of Hearings and Appeals may determine whether a violation occurred. When determining the amount of the penalty the Office of Hearings and Appeals shall use the point system and conversion table contained in this part.

§ 723.18 Availability of records.

All records and files created or used in the assessment process under this part shall be available for public inspection.

AUTHORITY: Secs. 201, 501 and 502, Pub. L. 95-87; 91 Stat. 445 (30 U.S.C. § 1201)

§ 725.1 Scope.

This part sets forth policies and procedures for reimbursements to States for costs of enforcing performance standards set forth in Parts 715 and 716 of this chapter during the initial regulatory program.

§ 725.2 Objectives.

The objectives of assistance under this part are:

(a) To assist the States in meeting the increased costs of administering the initial performance standards.

(b) To encourage the States to build strong reclamation and enforcement programs.

§ 725.3 Authority.

Section 502(e)(4) of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201) authorizes the Secretary to reimburse States for costs of enforcing the performance standards of the initial regulatory program.

§ 725.4 Responsibility.

(a) The Director shall administer the grant program for reimbursements to States for costs of enforcing performance standards during the initial regulatory program

(b) The Regional Director of each of the Office regions shall receive, review, and approve grants applications under this part.

§ 725.5 Definitions.

As used in this part, the following terms have the specified meanings:

Agency means the State agency designated by the Governor to receive and administer grants under this part.

Base program means the State program to regulate surface coal mining prior to August 3, 1977.

§ 725.11 Eligibility.

(a) *Assumption of responsibility.* To be eligible for a grant for reimbursements for the cost of enforcing performance standards during the initial regulatory program, the State shall assume responsibility for enforcement of the initial regulatory program including the specific

V 42 173 SEP 7 77 V UMI

responsibilities identified under part 2030 of this chapter.

(b) *Designation of State agency.* In order to receive a grant for reimbursements for costs of enforcing performance standards during the initial regulatory program, the Governor of a State shall designate in writing one agency to submit grant applications, receive and administer grants under this part.

(c) *Periods covered by reimbursement grants.* An agency may apply for a reimbursement grant for any period during the initial regulatory program and for a reasonable start-up period beginning no earlier than August 3, 1977.

§§ 725.12 Coverage of grants.

An agency may use grant money under this part to cover costs in excess of the base program for administering and enforcing the initial regulatory program. The Regional Director shall determine the base program from the State fiscal year budget in effect on August 3, 1977. Costs of the following activities are eligible for reimbursement—

(a) Incorporation of the initial performance standards of Parts 715 and 716 of this chapter in new permits issued by the State.

(b) Modification of existing permits to include the initial performance standards of Parts 715 and 716 of this chapter.

(c) Additional inspections required to enforce the initial performance standards of Parts 715 and 716 of this chapter.

(d) Inspections which are more detailed than inspections before the initial regulatory program.

(e) Responses to complaints related to the initial performance standards of Parts 715 and 716 of this chapter.

(f) Enforcement actions required to secure compliance with the initial performance standards of Parts 715 and 716 of this chapter.

(g) Additional administrative activities related to hiring additional inspectors, revising permits, conducting inspections, preparing, copying and submitting reports required by Part 720, and submitting applications for reimbursement grants under this part.

§ 725.13 Amount of grants.

The Office shall pay 100 percent of the incremental costs to the agency of enforcing the performance standards during the initial regulatory program.

§ 725.14 Grant periods.

The Regional Director shall approve a grant for a period of 1 year or less. The Regional Director shall fund a program that extends over more than 1 year by consecutive annual grants.

§ 725.15 Grant application procedures.

(a) The agency may submit its application for a grant to the Regional Director no later than December 15, 1977, for the first year and no later than October 31 of each year thereafter.

(b) The agency shall use the short form application for nonconstruction programs and other procedures specified by Federal Management Circular 74-7, "Uniform administrative requirements for grants-in-aid to State and local governments" (34 CFR 256). No preapplication is required.

(c) Agencies shall include in Part III of the standard application sufficient information to enable the Regional Director to determine the Agencies' base programs and increases over the base programs eligible for reimbursement grants. Agencies shall include the following information, plus any other relevant data:

(1) A summary of the State permit, inspection and enforcement program, prior to the addition of the requirements of the Act of 1977, including—

(i) Permit requirements and the system for issuing permits;

(ii) Mining and reclamation plan requirements;

(iii) Coverage and frequency of inspections;

(iv) Actions required to enforce mining and reclamation requirements;

(v) The number and nature of responses to complaints; and

(vi) Other regulatory activities and related administrative functions affected by the performance standards of the initial regulatory program specified in Parts 715 and 716 of this chapter.

(2) A statement of the number of employees and annual budget required to carry out functions described in paragraph (c) (1) of this section.

(3) A copy of all State constitutional, statutory and regulatory provisions applicable to the enforcement and administration of the initial regulatory program.

(4) An opinion of the State's chief legal officer as to whether and to what extent the State is authorized to enforce and administer the initial regulatory program.

(5) A statement of the additional work required to enforce the initial regulatory program for each of the agency activities described in paragraph (c) (1) of this section.

(6) The additional staff and funds required for the increased workload described in paragraph (c) (5) of this section.

(d) The Regional Director may waive the resubmission of information required by paragraphs (c) (1), (c) (2), (c) (3) and (c) (4) of this section in applications for a second or third reimbursement grant.

§ 725.16 Grant agreement.

(a) If a Regional Director approves of an agency's grant application, the Regional Director shall prepare a grant agreement which includes—

(1) The approved scope of the program to be covered by the grant.

(2) The base program budget and estimated costs in excess of the base program.

(3) The amount of the grant.

(4) Commencement and completion dates for the segment of the program covered by this grant and for major phases of the program to be completed during the grant period.

(5) Permissible transfers of funds to other State agencies.

(b) The Regional Director shall limit grants under this part to the additional costs to an agency for enforcing the initial regulatory program.

(c) The Regional Director may not permit an agency to delegate or transfer its responsibility for the use of grant funds.

(d) Except as may be provided by the grant agreement, costs may not be incurred prior to the executive of the agreement.

(e) The Regional Director shall transmit four copies of the grant agreement, by certified mail, return receipt requested, to the agency for signature. The agency shall execute the grant agreement and return all copies within 3 calendar weeks after receipt, or within an extension of such time that may be granted by the Regional Director.

(f) The Regional Director shall sign the grant agreement upon its return from the agency and return one copy to the agency. The grant is effective and constitutes an obligation of Federal funds in the amount and for the purposes stated in the grant agreement at the time the Regional Director signs the agreement.

(g) Neither the approval of a program nor the award of any grant will commit or obligate the United States to award any continuation grant or to enter into any grant amendment, including grant increases to cover cost overruns.

§ 725.17 Grant amendments.

(a) A grant amendment is a written alteration in the grant amount, grant terms or conditions, budget or period, or other administrative, technical, or financial agreement whether accomplished on the initiative of the agency or the Regional Director or by mutual action of the agency and the Regional Director.

(b) The agency shall promptly notify the Regional Director in writing by certified mail, return receipt requested, of events or proposed changes which may require a grant amendment, such as—

(1) Rebudgeting;

(2) Changes which may affect the approved scope or objective of a program; or

(3) Changes which may increase or substantially decrease the total cost of a program.

(c) The Regional Director shall promptly approve or disapprove each proposed amendment, and shall notify the agency in writing of the approval or disapproval of the amendment.

(d) The grant amendment establishes the effective date of the action. If no date is specified in the grant amendment then the date the Regional Director signs the amendment will be the effective date of the action.

§ 725.18 Grant reduction and termination.

(a) *Conditions for reduction or termination.* (1) If an agency fails to carry out its responsibilities pursuant to Part 720 of this chapter the Regional Director shall reduce or terminate the grant.

(2) If any agency violates the terms of a grant agreement, the Regional Director may reduce or terminate the grant.

(3) If an agency fails to enforce the initial performance standards of Parts 715 and 716 of this chapter the Regional Director may reduce or terminate the grant.

(4) If an agency fails to enforce the conflict of interest provisions of Part 705 of this chapter the Director shall terminate the grant.

(5) If an agency fails to submit reports required by this part or Parts 720 and 705 of this chapter the Director may reduce or terminate the grant.

(b) *Grant reduction and termination procedures.* (1) The Regional Director shall give at least ten days' written notice to the agency by certified mail, return receipt requested, of intent to reduce or terminate a grant. The Regional Director shall include in the notice the reasons for the proposed action and the proposed effective date of the action.

(2) The Regional Director shall afford the agency opportunity for consultation prior to reducing or terminating a grant.

(3) The Regional Director shall notify the agency of the termination or reduction of the grant in writing by certified mail, return receipt requested.

(4) Upon termination the agency shall refund or credit to the United States that portion of the grant money paid or owed to the agency and allocated to the terminated portion of the grant. However, any portion of the grant that is required to meet commitments made prior to the effective date of termination shall be retained by the agency.

(5) The agency shall reduce the amount of outstanding commitments insofar as possible and report to the Regional Director the uncommitted balance of funds awarded under the grant.

(6) Upon notification of intent to terminate, the agency shall not make any new commitments without the approval of the Regional Director.

(7) The Regional Director may allow termination costs as determined by applicable Federal cost principles listed in Federal Management Circular 74-7.

(c) *Appeals.* (1) Agencies may appeal the Regional Director's decision to reduce or terminate a grant to the Director within 30 days of the Regional Director's decision.

(2) Agencies shall include in an appeal—

(i) The decision being appealed, and

(ii) The facts which the Agencies believe justify a reversal or modification of the decision.

(3) The Director shall act on appeals within 30 days of their receipt.

§ 725.19 Audit.

The agency shall conduct a final audit following the end of each grant pursuant to the procedures in Federal Management. Circular 74-7.

§ 725.20 Administrative procedures.

Administrative procedures governing accounting, payment, property, and related requirements are contained in Federal Management Circular 74-7.

§ 725.21 Allowable costs.

(a) The Regional Director shall determine costs which may be reimbursed according to Federal Management Circular 74-4, "Cost principles applicable to grants and contracts with State and local governments" (34 CFR 255).

(b) Costs must be in conformity with any limitations, conditions, or exclusions set forth in the grant agreement or this part.

(c) Costs must be allocated to the grant to the extent of benefit properly attributable to the period covered by the grant.

(d) Costs must not be allocated to or included as a cost of any other Federally assisted program.

§ 725.22 Financial management.

(a) Agency accounting for grant funds shall be in accordance with the requirements of Federal Management Circular 74-7. Agencies shall use generally accepted accounting principles and practices, consistently applied. Accounting for grant funds must be accurate and current.

(b) The agency shall adequately safeguard all funds, property, and other assets and shall assure that they are used solely for authorized purposes.

(c) The agency shall provide a comparison of actual amounts spent with budgeted amounts for each grant.

(d) When advances are made by a letter-of-credit method, the agency shall make drawdowns from the U.S. Treasury through its commercial bank as closely as possible to the time of making the disbursements.

(e) The agency accounting records shall be supported by source documentation.

(f) The agency shall schedule audits to determine the fiscal integrity of financial transactions and reports, and compliance with the terms of the grant agreement.

(g) The agency shall design a systematic method to assure timely and appropriate resolution of audit findings and recommendations.

§ 725.23 Reports.

(a) The agency shall, for each grant made under this part submit annually to the Regional Director a Financial Status Report in accordance with Federal Management Circular (FMC) 74-7, Attachment H. This report shall be accompanied by a performance report prepared according to Attachment I of FMC 74-7.

(b) The Regional Director shall require through the grant agreement that annual reports also provide the relation of financial information to performance and productivity data, including unit cost information.

§ 725.24 Records.

(a) The agency shall maintain complete records in accordance with Federal Management Circular 74-7. This includes books, records, documents, and other evidence and accounting procedures and practices, sufficient to reflect properly—

(1) The amount, receipt, and disposition by the agency of all assistance received for the program.

(2) The total costs of the program, including all direct and indirect costs of whatever nature incurred for the performance of the program for which the grant has been awarded.

(b) Contractors, including contractors for professional services, shall maintain books, documents, papers, and records which are pertinent to a specific grant award.

(c) The agency's records and the records of its contractors, including professional services contracts, shall be subject at all reasonable times to inspection, reproduction, copying, and audit by the Office, the Department of the Interior, the Comptroller General of the United States, the Department of Labor, or any authorized representative.

(d) For completed or terminated grants, the agency and contractors shall preserve and make their records available to the Office, the Department of the Interior, the Comptroller General of the United States, Department of Labor, or any authorized representative pursuant to FMC 74-7.

§ 725.25 Disclosure of information.

All grant applications received by the Regional Director constitute agency records. As such, their release may be requested by any member of the public under the Freedom of Information Act, 5 U.S.C. 552, and shall be disclosed unless exempt from disclosure under 5 U.S.C. 522(b).

AUTHORITY: Secs. 201, 501, and 502, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201).

§ 740.1 Scope.

This part sets forth policies and procedures for grants to States to—

(a) Develop state programs for the regulation and control of surface coal mining and reclamation operations;

(b) Administer and enforce state programs for the regulation and control of surface coal mining and reclamation operations; and

V 42 173 SEP 7 77 UMI

(c) Administer cooperative agreements for State regulation of surface coal mining and reclamation operations on Federal lands.

§ 740.2 Objectives.

The objectives of assistance under this part are—

(a) To assist the States in meeting the costs of administering reclamation and enforcement programs consistent with the Act;

(b) To encourage the States to build strong reclamation and enforcement programs; and

(c) To encourage the States to assume jurisdiction over surface coal mining regulation and reclamation operations.

§ 740.3 Authority.

Section 705 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201) authorizes the Secretary to make grants to States for developing, administering and enforcing State regulatory programs.

§ 740.4 Responsibility.

(a) The Director shall administer the State grant program for the development, administration, and enforcement of State programs under this part.

(b) The Regional Director of each of the Office regions shall receive, review, and approve grant applications under this part.

§ 740.5 Definitions.

As used in this part, agency means the State agency designated by the Governor to receive and administer grants under this part.

§ 740.11 Eligibility for program development grants.

(a) *Designation of State agency.* In order to receive a program development grant the Governor of a State shall designate in writing to the Director one agency to submit the grant applications, and to receive and administer the grants.

(b) *Periods covered by program development grants.* (1) An agency may apply for a program development grant for any period for which it does not have an approved State program. This is limited to periods during—

(i) The initial development of a State program;

(ii) The revision of a State program which has been disapproved by the Secretary; and

(iii) The revision of a State program from which the Secretary has withdrawn his approval.

(2) The Director shall limit grants for (b)(1) (ii) and (iii) of this paragraph to the costs of making revisions necessary to secure approval of the State programs.

(3) The Director shall not approve grants for costs incurred prior to August 3, 1977.

(c) *Limits on duration of grants.* (1) The Regional Director shall limit a State's program development grants to a maximum period of 18 months unless at least one of the following conditions exists—

(i) The 18-month period is insufficient because new legislation is required.

(ii) The State requests extension of the grant period for a reason found appropriate by the Regional Director.

(2) If one of the two conditions in this paragraph exists, the Director may extend the grant period to a maximum of 24 months.

§ 740.12 Eligibility for administration and enforcement grants.

(a) *Approved program required.* In order to receive a grant to administer and enforce a State program, the State must have an approved State regulatory program.

(b) *Designation of a State agency.* In order to receive a grant to administer and enforce a State program, the Governor must designate a single agency to receive and administer administration and enforcement grants, including cooperative agreement grants described in § 740.16.

(c) *Nondiscrimination.* The agency shall monitor the compliance activity of its subrecipients with respect to the nondiscrimination provisions in § 740.19.

(d) *When an agency may apply.* An agency may apply for an administration and enforcement grant so long as the State program is approved by the Secretary.

§ 740.13 Submission of estimated annual budgets and allocation of funds.

(a) *Program Development Grants.* As early as possible prior to the Federal fiscal year in which the program development grant will be requested an agency shall submit to the Regional Director a summary of its program development budget. The Director will use these budget summaries in preparing the Federal budget estimates which he is required to submit.

(b) *Administration and Enforcement Grants.* (1) For the fiscal years beginning on and after October 1, 1979, the agency shall submit to the Regional Director an initial estimate of its coal regulatory program budget, including the costs of administering State-Federal cooperative agreements pursuant to § 211.75 of this title, 18 months prior to the Federal fiscal year in which the grant will be requested. Agencies may include those activities required to administer and enforce the regulatory program in their regulatory program budget. The Director will use these budget summaries in preparing the Federal budget estimates which he is required to submit.

(2) For the fiscal year beginning October 1, 1979, and each year thereafter, the agency shall submit to the Regional Director a current regulatory program budget 3 months prior to the beginning of the Federal fiscal year for which a grant will be requested.

(c) *Allocation of funds.* (1) The Director shall allocate to the agencies the full amount requested and approved in the revised or actual budgets provided that the amount available in the Federal budget is sufficient.

(2) If the funds available to the Director for grants are insufficient to cover the total grant needs, including cooperative agreement grants, the Director shall allocate the funds available according to the proportion of each agency's budget to the total of all agencies' budgets.

(3) Allocation of a specific amount of funds to an agency does not assure that grants for that amount will be approved. Each agency must apply for and secure approval of grants in accordance with the requirements of this part.

(4) On July 1 of each year the Director shall reallocate any funds which are not requested by agencies as of June 1 of that year. Such funds shall be allocated only to those agencies which have received less than the allowable percentage of their eligible costs. Allocation shall be based on the proportion of each agency's mutually agreed upon costs to total mutually agreed upon costs in all agencies' regulatory program budgets for the current Federal fiscal year.

(5) Agencies which are allocated additional funds on July 1 may have until August 15 to submit new or revised grant applications for the additional amounts.

§ 740.14 Coverage of grants.

(a) *Program development grants.* An agency may use grant money under this part to develop—

(1) New or revised State laws, regulations, and procedures;

(2) Revised or expanded inspection systems;

(3) Training programs for inspectors and other personnel;

(4) New or revised organizational structures;

(5) Information and communications systems, including data processing systems;

(6) A planning process including a data base and information system to receive and act upon petitions to designate lands unsuitable for mining;

(7) An application for the initial administration and enforcement grant to the extent not covered by indirect costs or other cost items;

(8) Other components necessary to obtain an approved State program, as mutually agreed upon by the Regional Director and the agency receiving a grant.

(b) *Administration and enforcement grants.* An agency may use grant money under this part to administer an approved State regulatory program.

§ 740.15 Amount of grants.

(a) *Amount of program development grants.* (1) For the first year of a program development grant the Regional Director shall approve grants for not more than 80 percent of the total of agreed upon costs pursuant to § 740.14 (a).

(2) For the second year of a program development grant the Regional Director shall approve grants for not more than 60 percent of the total agreed upon costs pursuant to § 740.14(a).

(b) *Amount of administration and enforcement grants.* (1) If no program development grant has been awarded, the Regional Director may approve the first administration and enforcement grant for 80 percent of the agreed upon costs for administration and enforcement of the program.

(2) If a program development grant has been awarded for only 1 year, the Regional Director may approve an administration and enforcement grant for 60 percent of the agreed upon costs for administration and enforcement of the program.

(3) If a program development grant has been awarded for more than 1 year but less than 2 years, the Regional Director may approve the first administration and enforcement grant for 60 percent for that proportion remaining in the second year and for 50 percent for the proportion allocated to the third year.

(4) For the third and following years, the Regional Director may approve administration and enforcement grants for 50 percent of the agreed upon costs for administration and enforcement of the program.

§ 740.16 Special provisions for States with cooperative agreements.

(a) *Eligibility.* The Director may approve additional grants to States which have cooperative agreements pursuant to § 211.75 of this Title, for State regulation of surface coal mining and reclamation operations on Federal lands. This includes—

(1) States which had cooperative agreements on August 3, 1977, which have been modified to comply with the initial regulatory program.

(2) States which enter into cooperative agreements following approval of the State's regulatory program.

(b) *Coverage of grants.* An agency may use cooperative agreement grants to carry out the functions assigned to the State under the agreement.

(c) *Amount of grants.* The Regional Director may approve grants for the approximate amount which he determines the Federal Government would have expended for regulation of coal mining on the Federal lands being regulated by the State, except that no grant may exceed the actual costs to the State.

(d) *Grant periods.* The Regional Director shall approve a grant for a period of 1 year or less. The Regional Director shall fund a program that extends over more than 1 year by consecutive annual grants.

(e) *Application procedures.* (1) States with cooperative agreements in effect on August 3, 1977, may apply for cooperative agreement grants using the procedures set forth in § 740.18 (a), (b), (d), and (e).

(2) States with cooperative agreements established in conjunction with approved State regulatory programs may apply for cooperative agreements grants by including a supplement to an annual administration and enforcement grant application submitted according to § 740.18. The State shall include in the supplemental section:

(i) A separate Part II for the costs of the cooperative agreement; and

(ii) A separate Part III describing the specific activities required by the cooperative agreement for the period for which the grant is requested.

(f) *Other requirements.* The procedures and requirements set forth in §§ 740.17 through 740.26 are applicable to cooperative agreement grants.

§ 740.17 Grant periods.

The Regional Director shall approve a grant for a period of 1 year or less. The Regional Director shall fund a program that extends over more than 1 year by consecutive annual grants.

§ 740.18 Grant application procedures.

(a) The agency may submit its application to the Regional Director for a grant as soon as it is notified by the Regional Director that funds are available, but not later than May 31 of each calendar year.

(b) The agency shall use the short form application for nonconstruction programs and other procedures specified by Federal Management Circular 74-7, "Uniform administrative requirements for grants-in-aid to State and local governments," (34 CFR 256). No preapplication is required.

(c) For program development grant applications, agencies shall include in Part III of the standard application—

(1) An analysis and evaluation of the current State laws and changes required therein to conform to the requirements of the Surface Mining Control and Reclamation Act of 1977; unless previously submitted under Part 725 of this chapter;

(2) A description of the changes expected to be required in State regulations, organization, staffing, training and other policies and operations in order to develop a State program which can be approved; and

(3) A program to develop the legislation, regulations, procedures, organization, staffing, training materials and procedures, etc., necessary to obtain program approval.

(d) For administration and enforcement grants and cooperative agreement grants, agencies shall include in Part III of the standard application a description of the specific operations in the approved program which will be implemented during the period for which the grant is requested.

§ 740.19 Grant agreement.

(a) If the Regional Director approves an agency's grant application, the Regional Director shall prepare a grant agreement which includes—

(1) The approved scope of the program to be covered by the grant;

(2) The approved budget, including the Federal share;

(3) Commencement and completion dates for the segment of the program covered by the grant and for major phases of the program to be completed during the grant period.

(4) Permissible transfers of funds to other State agencies.

(b) The Regional Director may not permit an agency to delegate or transfer its responsibility for the use of grant funds.

(c) Pre-agreement costs for program development grants shall be allowed only as specified in the grant agreement.

(d) The Regional Director shall transmit four copies of the grant agreement by certified mail, return receipt requested, to the agency for signature. The agency shall execute the grant agreement and return all copies of it within 3 calendar weeks after receipt, or within an extension of such time that may be granted by the Regional Director.

(e) The Regional Director shall sign the grant agreement upon its return from the agency and return one copy to the agency. The grant is effective and constitutes an obligation of Federal funds in the amount and for the purposes stated in the grant agreement at the time the Regional Director signs the agreement.

(f) Neither the approval of a program nor the award of any grant will commit or obligate the United States to award any continuation grant or enter into any grant amendment, including grant increases to cover cost overruns.

§ 740.20 Grant amendments.

(a) A grant amendment is a written alteration in the grant amount, grant terms or conditions, budget or period, or other administrative, technical, or financial agreement whether accomplished on the initiative of the agency or the Regional Director, or by mutual action of the agency and the Regional Director.

(b) The agency shall promptly notify the Regional Director in writing by certified mail, return receipt requested, of events or proposed changes which may require a grant amendment, such as—

(1) Rebudgeting;

(2) Changes which may affect the approved scope or objective of a program; or

(3) Changes which may increase or substantially decrease the total cost of a program.

(c) The Regional Director shall promptly approve or disapprove each proposed amendment, and shall notify the agency in writing of the approval or disapproval of the amendment.

(d) The grant amendment establishes the effective date of the action. If no date is specified in the grant amendment then the date the Regional Director signs the amendment will be the effective date of the action.

§ 740.21 Grant reduction and termination.

(a) *Conditions for reduction or termination.* (1) If an agency violates the terms of a grant agreement, the Regional Director may reduce or terminate the grant.

(2) If an agency fails to implement, enforce or maintain an approved program, the Regional Director shall terminate the administration and enforcement grant.

(3) If an agency fails to implement, enforce or maintain only a part of the

V 42 173 SEP 7 7 7 UMI V

program, the Regional Director shall reduce the grant to the amount of the program being operated by the agency.

(4) If an agency is not in compliance with the following nondiscrimination provisions, the Regional Director may reduce or terminate the grant—

(i) Title VI of the Civil Rights Act of 1964 (78 Stat. 252), Nondiscrimination in Federally Assisted Programs, which provides that no person in the United States shall on the grounds of race, color or national origin be excluded from participation in, be denied the benefits or, or be subjected to discrimination under any program or activity receiving Federal financial assistance, and the implementing regulations at 43 CFR 17.

(ii) Executive Order 11246, as amended by Executive Order 11375, Equal Employment Opportunity, requiring that employees or applicants for employment not be discriminated against because of race, creed, color, sex, or national origin, and the implementing regulations at 41 CFR 60.

(iii) Section 504 of the Rehabilitation Act of 1973, as amended by Executive Order 11914, Nondiscrimination With Respect to the Handicapped in Federally Assisted Programs.

(b) *Grant reduction and termination procedures.* (1) The Regional Director shall give at least 10 days written notice to the agency by certified mail, return receipt requested, of intent to reduce or terminate a grant. The Regional Director shall include in the notice the reasons for the proposed action and the proposed effective date of the action.

(2) The Regional Director shall afford the agency opportunity for consultation prior to reducing or terminating a grant.

(3) The Regional Director shall notify the agency of the termination or reduction of the grant in writing by certified mail, return receipt requested.

(4) Upon termination the agency shall refund or credit to the United States that portion of the grant money paid or owed to the agency and allocated to the terminated portion of the grant. However any portion of the grant that is required to meet commitments made prior to the effective date of termination shall be retained by the agency.

(5) The agency shall reduce the amount of outstanding commitments insofar as possible and report to the Regional Director the uncommitted balance of funds awarded under the grant.

(6) Upon notification of intent to terminate the agency shall not make any new commitments without the approval of the Regional Director.

(7) The Regional Director may allow termination costs as determined by applicable Federal cost principles listed in Federal Management Circular 74–4.

(c) *Appeals.* (1) Agencies may appeal the Regional Director's decision to reduce or terminate a grant to the Director within 30 days of the Regional Director's decision.

(2) Agencies shall include in an appeal—

(i) the decision being appealed, and

(ii) the facts which the agency believes justify a reversal or modification of the decision.

(3) The Director shall act upon appeals within 30 days of their receipt.

§ 740.22 Audit.

The agency shall conduct a final audit following the end of each grant pursuant to the procedures in Federal Management Circular 74–7.

§ 740.23 Administrative procedures.

Administrative procedures governing accounting, payment, property and related requirements are contained in Federal Management Circular 74–7.

§ 740.24 Allowable costs.

(a) The Regional Director shall determine costs which may be reimbursed according to Federal Management Circular 74–4, "Cost principles applicable to grants and contracts with State and local governments" (34 CFR 255).

(b) Costs must be in conformity with any limitations, conditions, or exclusions set forth in the grant agreement or this part.

(c) Costs must be allocated to the grant to the extent of benefit properly attributable to the period covered by the grant.

(d) Costs must not be allocated to or included as a cost of any other federally assisted program.

§ 740.25 Financial management.

(a) Agency accounting for grant funds shall be in accordance with the requirements of Federal Management Circular 74–7. Agencies shall use generally accepted accounting principles and practices, consistently applied. Accounting for grant funds must be accurate and current.

(b) The agency shall adequately safeguard all funds, property, and other assets and shall assure that they are used solely for authorized purposes.

(c) The agency shall provide a comparison of actual amounts spent with budgeted amounts for each grant.

(d) When advances are made of a letter-of-credit method, the agency shall make drawdowns from the U.S. Treasury through its commercial bank as closely as possible to the time of making the disbursements.

(e) The agency accounting records shall be supported by source documentation.

(f) The agency shall schedule audits to determine the fiscal integrity of financial transactions and reports, and compliance with the terms of the grant agreement.

(g) The agency shall design a systematic method to assure timely and appropriate resolution of audit findings and recommendations.

§ 740.26 Reports.

(a) The agency shall, for each grant made under this part, submit annually to the Regional Director a Financial Status Report in accordance with Federal Management Circular (FMC) 74–7, Attachment H. This report shall be accompanied by a performance report prepared according to Attachment I of FMC 74–7.

(b) The Regional Director shall require through the grant agreement that annual reports provide the relation of financial information to performance and productivity data, including unit cost information.

§ 740.27 Records.

(a) The agency shall maintain complete records in accordance with Federal Management Circular 74–7. This includes books, documents, and other evidence and accounting procedures and practices, sufficient to reflect properly—

(1) The amount, receipt, and disposition by the agency of all assistance received for the program.

(2) The total costs of the program, including all direct and indirect costs of whatever nature incurred for the performance of the program for which the grant has been awarded.

(b) Contractors, including contractors for professional services, shall maintain books, documents, papers, and records which are pertinent to a specific grant award.

(c) The agency's records and the records of its contractors, including professional services contracts, shall be subject at all reasonable times to inspection, reproduction, copying, and audit by the Office, the Department of the Interior, the Comptroller General of the United States, the Department of Labor or any authorized representative.

(d) For completed or terminated grants the agency and contractors shall preserve and make their records available to the Office, the Department of the Interior, the Comptroller General of the United States, Department of Labor, or any authorized representative pursuant to FMC 74–7.

§ 740.28 Disclosure of information.

All grant applications received by the Regional Director constitute agency records. As such, their release may be requested by any member of the public under the Freedom of Information Act, 5 U.S.C. 552, and shall be disclosed unless exempt from disclosure under 5 U.S.C. 552(b).

PART 795—SMALL OPERATOR ASSISTANCE

Sec.

795.1 Scope.
795.2 Objective.
795.3 Authority.
795.4 Responsibilities.
795.5 Definitions.
795.11 Program initiation procedures.
795.12 Program services.
795.13 Eligibility for assistance.
795.14 Filing for assistance.
795.15 Application approval, notice and reimbursement.
795.16 Data requirements.
795.17 Qualified laboratories.
795.18 Assistance funding.
795.19 Applicant liability.

AUTHORITY: Secs. 201, 501 and 502, Pub L. 95-87, 91 Stat. 445 (30 U.S.C. 1201).

§ 795.1 Scope.

This part comprises the small operator assistance program. (Program) and governs the procedures for providing assistance to qualified small mine operators who request assistance under section 507 (c) of the Act, for—

(a) The determination of the probable hydrologic consequences of mining and reclamation, under section 507(b)(11) of the Act; and

(b) The statement of physical and chemical analysis of core samples, under section 507(b)(15) of the Act.

§ 795.2 Objective.

The objective of this section is to meet the intent of section 507(c) of the Act by—

(a) Providing financial and other necessary assistance to the qualified small operator; and

(b) Assuring that the regulatory authority shall have sufficient information to make a reasonable assessment of the probable cumulative impacts of all anticipated mining upon the hydrology of the area and particularly upon water availability.

§ 795.3 Authority.

The Secretary shall provide financial and other assistance under section 507 (c) of the Act to the extent funds are appropriated by Congress specifically for this Program.

§ 795.4 Responsibilities.

(a) *General.* Once the regulatory authority initiates the Program, it shall—

(1) Review requests for assistance and determine qualified operators;

(2) Develop and maintain a list of qualified laboratories and authorize reimbursement for appropriate laboratory contracts;

(3) Conduct periodic on-site evaluations of the Program activities with the appropriate small operator; and

(4) Participate with the Office in data coordination activities with the U.S. Geological Survey, U.S. Environmental Protection Agency and other appropriate agencies or institutions.

(b) *State.* A State shall include a Program within its proposed State regulatory program for approval by the Secretary.

(c) *Office.* The Office shall develop oversight policies and procedures to implement the Program. These shall include policies and procedures for—

(1) Data acquisition, analysis and interpretation;

(2) Interstate coordination and exchange of data;

(3) Model contract stipulations; and

(4) National certification of labs.

(d) The Office and the regulatory authority shall insure that equal opportunity in employment provisions are included within any contract or other procurement documents applicable under 41 CFR 1–12.8.

§ 795.5 Definitions.

As used in this part—

Monitoring means the collection of environmental data by either continuous or periodic sampling methods.

Probable cumulative impacts means the expected total qualitative and quantitive, direct and indirect effects of mining and reclamation activities on the hydrologic regime.

Probable hydrologic consequence means the projected result of proposed surface coal mining and reclamation operations which may reasonably be expected to change the quantity or quality of the surface and ground water; the surface or ground water flow, timing and pattern; the stream channel conditions; and the aquatic habitat on the permit area and other affected areas.

§ 795.11 Program initiation procedures.

(a) The State shall notify the Office six (6) months prior to submission of its State program for approval under section 503 of the Act. The notification shall include—

(1) A statement of the intent to submit a proposed State regulatory program;

(2) A description of actions taken to develop a State regulatory program for approval and a summary schedule of actions to be taken; and

(3) A declaration of whether—

(i) The State elects to receive funding and commence the administration of the Program, or

(ii) The State elects to have the Office administer the Program on behalf of the State through a cooperative arrangement until such time as the proposed State regulatory program is approved.

(b) If the State elects to administer the Program, it may submit a grant application for funding of the program under the procedures of Part 740 of this chapter. The Office shall review the State's grant application and information provided under paragraph (a) of this section and approve or disapprove the State's request.

(c) If the State elects to have the Office administer the Program, the Office shall implement the Program within the State.

§ 795.12 Program services.

To the extent possible with appropriate funds, the regulatory authority shall for qualified small operators who request assistance—

(a) Select and pay a qualified laboratory to—

(1) Determine for the operator, the probable hydrologic consequences of the mining and reclamation operations both on and off the proposed permit area in accordance with § 795.16.

(2) Prepare a statement of the results of test borings or core samplings in accordance with § 795.16.

(b) Collect and provide general hydrologic information on the basin or subbasin areas within which the anticipated mining will occur. The information provided shall be limited to that required to relate the basin or subbasin hydrology to the hydrology of the proposed permit area.

§ 795.13 Eligibility for assistance.

An applicant is eligible for assistance if he—

(a) Intends to apply for a permit pursuant to the Act; and

(b) Establishes that the probable total actual and attributed production of the applicant for each year of the permit will not exceed 100,000 tons. Production from the following operations shall be attributed to the permittee—

(1) All coal produced by operations beneficially owned entirely by the permittee;

(2) The pro rata share, based upon percentage of beneficial ownership, of coal produced by operations in which the permittee owns more than a 5 percent interest.

(3) All coal produced by persons who directly or indirectly control the permittee by reason of stock ownership, direction of the management or in any other manner whatsoever.

(4) The pro rata share of coal produced by operations so controlled by the person who controls the permittee.

§ 795.14 Filing for assistance.

Each applicant shall submit the following information:

(a) A statement of intent to file a permit application;

(b) The names and addresses of—

(1) The potential permit applicant;

(2) The potential operator if different from the applicant.

(c) A schedule of the estimated total production of coal from the proposed permit area and all other locations from which production is attributed to the applicant under § 795.13. The schedule shall include for each location—

(1) The name under which coal is or will be mined;

(2) The permit number and Mining Enforcement and Safety Administration identification number;

(3) The actual coal production for the year preceeding the application for assistance and that portion of the production attributed to the applicant; and

(4) The estimated coal production for each year of the proposed permit and that portion attributed to the applicant.

(d) A description of—

(1) The method of surface coal mining operation proposed;

(2) The anticipated starting and termination dates of each mining and reclamation phase;

(3) The number of acres of land to be affected by the proposed mining; and

(4) A general statement on the probable depth and thickness of the coal resource.

(e) A U.S. Geological Survey topographic map of 1:24,000 scale or larger

V 42 I 173 SEP 7 77 UMI V

or other topographic map of equivilent detail which clearly shows—

(1) The area of land to be affected and the natural drainage above and below the affected area;

(2) The names of property owners within the area to be affected and of adjacent lands;

(3) The location of existing structures and developed water sources within the area to be affected and on adjacent lands;

(4) The location of existing and proposed test borings or core samplings; and

(5) The location and extent of known working of any underground mines.

(f) Copies of documents which show that—

(1) The applicant has a legal right to enter and commence mining within the permit area; and

(2) A legal right of entry has been obtained for the Office, regulatory authority and laboratory personnel to inspect the lands to be mined and adjacent lands which may be affected to collect environmental data or install necessary instruments.

§ 795.15 Application approval, notice and reimbursement.

(a) If the regulatory authority finds the applicant eligible, it shall:

(1) Determine the minimum data requirements necessary to meet the provisions of § 795.16.

(2) Procure the services of one or more qualified laboratories. A copy of the contract and the final approved report shall be provided to the applicant.

(b) The regulatory authority shall inform the applicant in writing if the application is denied and of the reasons for denial.

§ 795.16 Data requirements.

(a) *General.* This section describes the minimum requirements for the collection of data to meet the objective of the Program. The regulatory authority shall determine the data collection requirements for each applicant or group of applicants. The data requirements will be based on—

(1) The extent of currently available hydrologic and core analysis data for the applicable basin or subbasin area provided by the regulatory authority; and

(2) The data collection and analysis guidelines developed and provided by the Office.

(b) *Specific provisions.* (1) A determination of the probable hydrologic consequences of the mining and reclamation operations, both on and off-site shall be made by a qualified laboratory. The data for this determination shall include—

(i) The existing and projected surface and ground water seasonal flow regime, including water level and water table evaluations. The regulatory authority shall specify duration and return frequencies to be used in the determination.

(ii) The existing and projected seasonal quality of the surface and ground water regime. This shall include measurements and estimates of dissolved and suspended solids, pH, iron, manganese, surface and channel erosion and other water quality parameters specified by the regulatory authority.

(2) A statement of the result of test borings or core samplings from the proposed permit area, and including—

(i) Logs from any drill holes, including identification of each stratum and water level penetrated;

(ii) The coal seam thickness and its chemical analysis including sulfur content;

(iii) The chemical analysis of potentially acid or toxic forming sections of the overburden, and the chemical analysis of the stratum lying immediately underneath the coal to be mined.

(c) *Exemptions.* The statement by a qualified laboratory under paragraph (b)(2) of this section may be waived by the regulatory authority by a written determination that data available for the permit area is adequate to make the required determinations of the consequences of mining.

(d) *Data availability.* Data collected under this Program shall be made available to all interested persons, except information related to the chemical and physical properties of coal. Information regarding the mineral or elemental content of the coal which is potentially toxic in the environment shall be made available.

§ 795.17 Qualified laboratories.

(a) *General.* (1) As used in this section, *qualified laboratory* means a designated qualified public agency, private consulting firm, institution, or analytical laboratory which can provide the required determination or statement under this Program.

(2) The Office shall establish and periodically publish in the FEDERAL REGISTER a list of qualified laboratories which may be used by regulatory authorities under the procedures of this section. A State regulatory authority may designate qualified laboratories under procedures included in an approved State regulatory program.

(3) Persons who desire to be included in the list of qualified laboratories established by the Office shall apply to the Office and provide such information as is necessary to establish the qualifications required by paragraph (b) of this section.

(b) *Basic qualifications.* (1) To qualify for designation, the laboratory shall demonstrate that it—

(i) Is staffed in the fields of hydrology, mining engineering, aquatic biology, geology or chemistry with experienced professional personnel.

(ii) Is capable of collecting necessary field data and samples.

(iii) Has adequate space for material preparation, cleaning and sterilizing necessary equipment, stationary equipment, storage, and space to accommodate periods of peak work loads.

(iv) Meets the Occupational Safety and Health Act or the equivalent State safety and health program.

(v) Has the financial capability and business organization necessary to perform the work.

(vi) Has analytical, monitoring and measuring equipment capable of meeting the standards and methods contained in—

(A) *Standard Methods for the Examination of Water and Waste Water, 14th Edition*, 1976. This publication is available from the American Public Health Association, 1015 18th Street, N.W., Washington, D.C. 20036.

(B) *Methods for Chemical Analysis of Water and Waste*, 1974. This publication is available from the Office of Technology Transfer. U.S. Environmental Protection Agency, Industrial Environmental Research Laboratory, Cincinnati, Ohio 45268.

(vii) Has the capability of making hydrologic field measurements and analytical laboratory determinations by acceptable hydrologic engineering or analytical methods, or by those appropriate recommended methods or guidelines for data acquisition of the Office or other Federal or State agencies.

(2) The qualified laboratory shall be capable of performing either the determination or statement under paragraphs § 795.16 (b) (1) or (b) (2). Subcontractors may be used to provide the services required provided their use is defined in the application for designation and approved by the Office.

§ 795.18 Assistance funding.

(a) *Use of Funds.* Funds authorized for this Program shall not be used to cover State administrative costs or the costs of test boring or core sampling.

(b) *Allocation of funds.* The regulatory authority shall to the extent practicable establish a formula for allocating funds among qualified small operators if available funds are less than those required to provide the services pursuant to this Part. This formula shall include such factors as the applicant's—

(1) Anticipated date of filing a permit application;

(2) Anticipated date for commencing mining; and

(3) Performance history.

§ 795.19 Applicant liability.

(a) The applicant shall reimburse the regulatory authority for the cost of the laboratory services performed pursuant to this Part if the applicant—

(1) Submits false information;

(2) Fails to submit a permit application within 1 year from the date of receipt of the approved laboratory report; or

(3) If the regulatory authority finds that the applicant's actual and attributed annual production of coal exceeds 100,000 tons for the first year of mining under the permit for which the assistance is provided.

(b) The regulatory authority may waive the reimbursement obligation if it finds that the applicant at all times acted in good faith.

830.12 Procedures for filing an application for review of discrimination.
830.13 Investigation and conference.
830.14 Filing of complaints.
830.15 Formal adjudicatory proceedings.

AUTHORITY: Secs. 201, 501, and 502, Pub. L. 95-87, 91 Stat 445 (30 U.S.C. 1201)

§ 830.1 Scope.

This part establishes procedures regarding—

(a) The reporting of acts of discriminatory discharge or other acts of discrimination under the Act caused by any person.

(b) The investigation of applications for review and holding of informal conferences about the alleged discrimination; and

(c) The filing of formal complaints of discrimination with the Office of Hearings and Appeals.

§ 830.11 Protected activity.

No person may discharge or in any other way discriminate or cause to be discharged or discriminated against any employee or any representative of employees because that employee or representative has—

(a) Filed, instituted or caused to be filed or instituted any proceedings under the Act by—

(1) Reporting violations to the State regulatory authority, the Secretary, or any employer's representative;

(2) Requesting an inspection; or

(3) Any other action

(b) Made statements or has testified—

(1) In any informal or formal adjudicatory proceeding;

(2) In any informal conference proceeding;

(3) In any rulemaking proceeding;

(4) In any investigation or other proceeding under the Act.

(c) Has exercised on his own behalf or on behalf of others any right granted by the Act.

§ 830.12 Procedures for filing an application for review of discrimination.

(a) *Who may file.* Any employee, or his authorized representative, who believes that he has been discriminated against by any person in violation of § 830.11 may file an application for review. For the purpose of these regulations, an application for review means the presentation of a written report of discrimination.

(b) *Where to file.* The employee or representative may file the application for review at any location of the Office and each office shall maintain a log of all filings.

(c) *Time for filing.* The employee or representative may file an application for review within 30 days after the alleged discrimination occurs. An application is considered filed—

(1) On the date delivered if delivered in person to the Office, or

(2) On the date mailed to the Office.

(d) *Running of the time for filing.* The time for filing begins when the employee knows or has reason to know of the alleged discriminatory activity.

§ 830.13 Investigation and conference procedures.

(a) Within 15 days after receipt of any application for review, the Office shall mail a copy of the application for review to the person alleged to have caused the discrimination and shall notify the employee and the alleged discriminating person that the Office will investigate the complaint. The employer may file a response to the application for review within 10 days after he receives the copy of the application for review. The response shall specifically admit, deny or explain each of the facts alleged in the application unless the employer is without knowledge in which case he shall so state.

(b) The Office shall initiate an investigation of the alleged discrimination within 30 days after receipt of the application for review. The Office shall complete the investigation with 60 days from the date it was initiated. If circumstances surrounding the investigation prevent completion within the 60-day period, the Office shall notify the person who filed the application for review and the alleged discriminating person of the delay, the reason for the delay, and the expected completion date for the investigation.

(c) Within 10 days after completion of the investigation the Office shall hold an informal conference with the parties to discuss the findings and preliminary conclusions of the investigation. The purpose of this informal conference is to attempt to conciliate the matter. If a complaint is resolved at an informal conference, the terms of the agreement will be recorded in a written document that will be signed by the employer, the employee and the representative of the Office. If the Office concludes on the basis of a subsequent investigation that the employer has failed in any material respect to comply with the terms of any agreement reached during an informal conference, the Office shall take appropriate action to obtain compliance with the agreement.

(d) Following the investigation and informal conference, the Office shall complete a report of investigation which shall include a summary of the conference. Copies of this report shall be available to the parties in the case.

§ 830.14 Filing of complaints.

(a) If the Office concludes that a violation has probably occurred which was not resolved at the informal conference, the Director shall file a complaint with the Office of Hearing and Appeals within 20 days from the completion of the informal conference.

(b) The employee may file a complaint of discrimination with the Office of Hearings and Appeals—

(1) After 90 days has elapsed from the filing of his application; or

(2) Within 20 days following notification by the Director that no formal proceedings will be initiated.

§ 830.15 Formal adjudicatory proceedings.

(a) Formal adjudication of a complaint filed under this part shall be conducted in the Office of Hearings and Appeals under 43 CFR Part 4.

(b) After filing an application for review under this part, an employee may seek temporary relief in the Office of Hearings and Appeals under 43 CFR Part 4.

NOTE.—The proposed regulations submitted by the Office of Surface Mining Reclamation and Enforcement, Department of the Interior, for publication in the FEDERAL REGISTER have been redesignated to conform to CFR codification practices. For the convenience of the user, the following table shows the relationship between the part numbers on the original document and the corrected part numbers as published in the FEDERAL REGISTER.

[30 CFR Part 837]

ABANDONED MINE RECLAMATION FUND FEE COLLECTION AND PRODUCTION RECORDS

Proposed Rules

AGENCY: Office of Surface Mining Reclamation and Enforcement, Department of the Interior.

ACTION: Proposed Rules.

SUMMARY: These regulations provide each coal mine operator with methods to determine his reclamation fee obligation to the Abandoned Mine Reclamation Fund (fund) and provide instructions for the payment of the fee with a production statement of the proper location. This document implements the provisions of the Surface Mining Reclamation and Control Act of 1977 which promote the reclamation of coal and non-coal mined areas that have not been adequately reclaimed.

DATES: Comments must be received before October 7, 1977. Public hearings will be held September 20, 1977.

ADDRESSES: Comments should be addressed to: Director, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, Washington, D.C. 20240. Public hearings will be

V 42 173 SEP 7 77 UMI

held at the Department of the Interior Auditorium, 18th and C Streets NW., Washington, D.C.; Kiel Auditorium, 1416 Market Street, St. Louis, Mo.; Public Library Auditorium, 1347 Broadway, Denver, Colo.; and Morris Harvey College, Riggleman Hall, 2300 McCorkle Avenue, Charleston, W. Va.

FOR FURTHER INFORMATION CONTACT:

Paul Reeves, Office of Surface Mining Reclamation and Enforcement, 202-343-4237.

SUPPLEMENTARY INFORMATION: Coal mining activities have imposed large social and environmental costs on the public in many areas of the country in the form of unreclaimed lands, water pollution, and a decline in natural beauty. Uncontrolled coal mining practices, in many areas of the country, have resulted in degradation of the quality of life in local communities.

A major goal of the "Surface Mining Control and Reclamation Act of 1977" (Act) is to promote the reclamation of coal and noncoal mined areas that have not been adquately reclaimed. Part 837 addresses the financial aspect of reclaiming mined areas that were not adequately reclaimed before the enactment of this Act. The Act establishes an Abandoned Mine Reclamation Fund (fund) to be administered by the Secretary of the Interior, and supported by a reclamation fee imposed on coal production. The revenues derived from the reclamation fee are to be deposited in the fund for use by the Secretary, the Secretary of Agriculture and the States under approved programs for the purpose of reclaiming abandoned mined lands.

Two initial questions were at what point to determine the "value of a ton of coal at the mine", as used in section 402 of the Act, and how should the fee be levied on in situ coal consumed. Two approaches were considered. The first approach was to require the coal operator to weigh his coal as soon as it is extracted from the earth, or removed from deposits that are not in their original geological locations (reclaimed coal). This approach would require an operator to weigh the coal before any coal preparation process. The second approach was to base the reclamation fee on the weight and value of the coal at the time of its bona fide sale, transfer or use. The second approach is proposed since it represents the first common point where weights are usually determined within the industry.

The statuory definition of "surface coal mining operations" includes "in situ distillation or retorting" and therefore such operations are subject to the provisions of the Act including the reclamation fee payment provisions. It was determined that the amount of coal consumed or used by in situ distillation or retorting could be calculated by measuring the gas produced at the wellhead if the Btu value of the coal were known.

The regulations state that the reclamation fee shall be paid by the operator on each ton of coal produced for sale, transfer, or use, including the products of in situ mining, and the fee shall be determined by the weight, value, and Btu content at the time of initial bona fide sale, transfer, or use. Coal that was mined before October 1, 1977, but has not yet been sold, transferred or used will not be subject to the fee. The fee for coal produced during the fourth quarter, 1977, will be due no later than January 30, 1978.

DRAFTING INFORMATION

The principal authors of these proposed regulations are: Daniel Jones and George Williams, Abandoned Lands Work Group and Edward Clair, Office of the Solicitor, Department of the Interior.

Interested persons may submit written comments on the proposed regulation to the Director, Office of Surface Mining Reclamation and Enforcement, Department of the Interior, Washington, D.C. 20240 no later than October 7, 1977.

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: September 2, 1977, 8:50 a.m.

LEO M. KRYLITZ,
Acting Secretary of the Interior.

It is proposed to add Part 837 to Title 30, Chapter VII, to read as follows:

PART 837—ABANDONED MINE RECLAMATION FUND—FEE COLLECTION AND COAL PRODUCTION REPORTING

Sec.

837.1 Scope.
837.2 Objectives.
837.3 Responsibility.
837.5 Definitions.
837.11 Applicability.
837.12 Reclamation fee.
837.13 Fee computations.
837.14 Determination of percentage based fees.
837.15 Reclamation fee payment.
837.16 Production records.

AUTHORITY: Sec. 201, Pub. L. 95-87, 91 Stat. 445 (30 U.S.C. 1201).

§ 837.1 Scope.

This part sets out the procedures for the collection of fees for the Abandoned Mine Reclamation Fund (fund).

§ 837.2 Objectives.

The objectives of this part are to establish—

(a) Methods for determining the reclamation fee payable on coal production.

(b) Procedures for paying the reclamation fee to the Director.

(c) Requirements for production recordkeeping and reporting.

§ 837.3 Responsibility.

(a) The Secretary of the Interior administers the fund.

(b) The Director, under the general direction of the Assistant Secretary, Energy and Minerals, is responsible for administering the provisions of this part.

§ 837.5 Definitions.

As used in this part—

Anthracite, bituminous and subbituminous coal means all coals other than lignite coal.

Calendar quarter means a 3-month period within a calendar year. The first calendar quarter begins on January 1 of a calendar year and ends on the last day of March. The second calendar quarter begins on the first day of April and ends on the last day of June. The third calendar quarter begins on the first day of July and ends on the last day of September. The fourth calendar quarter begins on the first day of October and ends on the last day of December.

Coal preparation means the treatment of coal to improve its quality, and usually refers to the removal of impurities and the sizing of the coal to meet market specifications.

Fee compliance officer means any person authorized by the Secretary to exercise his authorty in matters relating to this part.

In situ coal mining means the process of recovering energy from coal in its natural geological location by igniting the coal seam and recovering the gas at the wellhead.

Lignite coal means consolidated lignitic coal having less than 8,300 British thermal units per pound, moist, and mineral-matter-free. British thermal units per pound are determined by Parr's formula, page 213, equation 3, D-388 (reapproved 1972), Part 26, 1976 Annual Book of ASTM Standards.

Reclaimed coal means coal recovered from a deposit that is not in its original geological location. Examples of these deposits are refuse piles or culm banks; refuse, culm or retaining dams and ponds that are or have been used during the mining or preparation process; and stream coal deposits.

Surface coal mining means the extraction of coal from the earth by removing the materials over the coal seam before recovering the coal and includes auger coal mining.

Ton means 2,000 pounds avoirdupois (.90718 metric ton).

Underground coal mining means the extraction of coal from the earth by developing entries from the surface to the coal seam before recovering the coal by underground extraction methods and includes in situ mining.

Value means gross value.

§ 837.11 Applicability.

The regulations in this chapter apply to all surface coal mining and reclamation operations except—

(a) The extraction of coal by a landowner for his own noncommercial use from land owned or leased by him;

(b) The extraction of coal for commercial purposes by surface mining which affects two acres or less;

(c) The extraction of coal as an incidental part of Federal, State or local government-financed highway or other construction; and

(d) The extraction of coal incidental to the extraction of other minerals where coal does not exceed 16⅔ percent of the mineral tonnage removed for commercial use or sale.

§ 837.12 Reclamation fee.

(a) The operator shall pay a reclamation fee on each ton of coal produced for sale, transfer, or use, including the products of in situ mining.

(b) The fee shall be determined by the weight and value at the time of initial bona fide sale, transfer of ownership, or use by the operator.

(c) If the operator combines surface mined coal, including reclaimed coal, with underground mined coal before the coal is weighed for fee purposes, the higher reclamation fee shall apply, unless he can substantiate the amount of coal produced by each mining method by acceptable engineering calculations or other reports which the Director may require.

(d) In computing the tons of coal produced for reclamation fee purposes in the fourth calendar quarter of 1977, the operator may deduct the tons of coal immediately available for sale, transfer, or use on September 30, 1977, from coal produced for sale, transfer, or use during the fourth calendar quarter of 1977. If the operator makes this deduction, he shall attach to his fourth quarter, 1977, OSM form 4100-1, a sworn and notarized statement of the amount of coal immediately available for sale, transfer, or use on September 30, 1977, and the quantity of such coal produced by surface and underground mining respectively.

§ 837.13 Fee computations.

(a) *Surface mining fees.* The fee for anthracite, bituminous, and subbituminous coal, including reclaimed coal, is 35 cents per ton unless the value of such coal is less than $3.50 per ton, in which case the fee is 10 percent of the value.

(1) If the value of a ton of coal is equal to or greater than $3.50 per ton, multiply the number of tons produced in the calendar quarter by $0.35. Example: If the tonnage is 1,000, then 1,000 tons×$0.35=$350, which is the fee.

(2) If the value of a ton of coal is less than $3.50 per ton, multiply the value of a ton of coal by the total number of tons produced in the calendar quarter by 0.1. Example: If the value of a ton of coal is $2 and the tonnage is 1,000, then $2×1,000 tons×0.1=$200.

(b) *Underground mining fees.* The fee for anthracite, bituminous, and subbituminous coal is 15 cents per ton unless the value of such coal is less than $1.50 per ton, in which case the fee is 10 percent of the value.

(1) If the value of a ton of coal is equal to or greater than $1.50 per ton, multiply the number of tons produced in the calendar quarter by $0.15. Example: If the tonnage is 1,000, then 1,000 tons×$0.15=$150, which is the fee.

(2) If the value of a ton of coal is less than $1.50 per ton, multiply the value of a ton of coal by the total number of tons produced in the calendar quarter by 0.1. Example: If the value of a ton of coal is $1 and the tonnage is 1,000, then $1×1,000 tons×0.1=$100, which is the fee.

(c) *Surface and underground mining fees for lignite coal.* The fee for lignite coal is 10 cents per ton unless the value of such coal is less than $5 per ton, in which case the fee charged is 2 percent of the value.

(1) If the value of a ton of lignite is equal to or greater than $5 per ton, mulcalendar quarter by $0.10. Example: If the tonnage is 1,000, then 1,000 tons×$0.10=$100, which is the feet.

(2) If the value of a ton of lignite is less than $5 per ton, multiply the value of a ton of lignite by the total number of tons produced in the calendar quarter by 0.02. Example: If the value is $4 and the tonnage is 1,000, then $4×1,000 tons×0.02=$80, which is the fee.

(d) *In situ coal mining fees.* The fee for in situ mined coal, except lignite coal, is 15 cents per ton based on BTUs per ton in place equated to the gas produced at the site. The fee for in situ mined lignite is 10 cents per ton based on the BTUs per ton of coal in place equated to the gas produced at the site. For example, if the BTU value of in situ coal is determined to be 23 million BTUs per ton, then for every 23 million BTUs of gas produced at the wellhead, one ton of coal will be deemed produced for the purposes of this part.

(1) The BTU value of a ton of in place coal shall be determined by analyses, certified by an independent laboratory, of the coal seam that is effected for potential BTU value of a ton of in place coal.

(2) For anthracite, bituminous, and subbituminous coal the fee shall be computed as follows: $F=(G/C)\times V_1$.

(3) For lignite coal the fee shall be computed as follows: $F=(G/L)\times V_2$.

(4) For the purposes of this paragraph:

F=Reclamation fee.
C=million BTUs per ton of coal in place.
L=million BTUs per ton of lignite in place.
G=gas produced at the wellhead in million BTUs.
V_1=$0.15/ton equivalent; or if the value of a ton of coal equivalent is less than $1.50, multiply the value by 0.1 and substitute the result for V_1 in the appropriate formula.
V_2=$0.10/ton equivalent, or if the value of a ton of lignite equivalent is less than $5 multiply the value by 0.02 and substitute the result for V_2 in the appropriate formula.

§ 837.14 Determination of percentage based fees.

(a) If the operator submits a fee based on a percentage of the value of coal, he shall include with his fee and production report documentation supporting the alleged coal value. Based on this information and any additional documentation, including examination of the operator's books and records, that the Director may require, the Director may accept the valuation submitted by the operator, or may determine the value of the coal.

(b) If the Director determines that a higher fee shall be paid, the operator shall submit the additional fee plus statutory interest within thirty days of notification by the Director that an additional fee payment is due.

§ 837.15 Reclamation fee payment.

(a) Each operator shall pay the reclamation fee on a calendar quarter basis.

(b) The fee for the fourth calendar quarter of 1977 shall be paid no later than January 30, 1978.

(c) Each operator shall use OSM Form 4100-1, Coal Production and Reclamation Fee Report form, for each quarterly payment period for each mine.

(d) The reclamation fee payment for each calendar quarter shall be paid no later than 30 calendar days after the end of the calendar quarter. Delinquent payments are subject to an interest charge at the statutory rate.

(e) The OSM Form 4100-1 and check or money order for each coal mine shall be made payable to Director, Office of Surface Mining Reclamation and Enforcement and shall be sent in the same envelope to:

Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, P.O. Box 25065-DFC, Denver, Colo. 80225.

§ 837.16 Production records.

(a) Each operator shall maintain, on a current basis, books and records that contain at least the following information and data—

(1) Tons of coal sold or transferred, amount received per ton, name of party to whom sold or transferred, and the date of each sale or transfer.

(2) Tons of coal used by the operator during production or coal preparation, and date of consumption.

(3) For in situ coal mining operations, total BTU value of gas produced, the BTU value of a ton of coal in place certified by an independent laboratory, and the amount received for gas sold or used.

(b) The fee compliance officer shall have access to the mine for the purpose of determining compliance with the regulations in this part.

(c) Each operator shall make any book or record available at reasonable times for inspection and copying by the fee compliance officer.

(d) The operator shall maintain books and records for a period of 7 years from the end of the calendar quarter in which the fee was due.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

■

LIBRARIES AND LEARNING RESOURCES; EDUCATION, INNOVATION AND SUPPORT

Technical Amendments

V 42 173 SEP 7 77 UMI

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 134—LIBRARIES AND LEARNING RESOURCES; EDUCATION INNOVATION AND SUPPORT

PART 134b—EDUCATIONAL INNOVATION AND SUPPORT

Technical Amendments

AGENCY: Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: The Office of Education is amending its regulations because of technical amendments to the governing statute. These amendments are necessary to conform to the existing regulations to the statute, as amended.

EFFECTIVE DATES: Pursuant to Section 431(d) of the General Education Provisions Act, as amended, these regulations will be transmitted to Congress concurrently with their publication in the FEDERAL REGISTER. That section provides that regulations shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions concerning Congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Dr. Milbrey L. Jones, Telephone: 202–245–2488.

SUPPLEMENTARY INFORMATION: These amendments specifically authorize the Commissioner to waive the requirements of section 406 of the Act directing State and local educational agencies to serve private school children when a local educational agency or the State educational agency has "substantially failed" to provide for services to those children. In this situation, the Commissioner would arrange to provide the Title IV benefits to these children. Secondly, the amendments remove the authority to fund private educational organizations for demonstration nutrition and health projects under section 431(a)(2) of Part C of the Act.

Those affected by these amendments to the regulations are State and local educational agencies, and private educational organizations in the case of nutrition and health projects. State educational agencies continue to have the opportunity to remedy "substantial failure"" by a local educaional agency. If the Commissioner waives the requirement of section 406 of the Act in a case of "substantial failure", the affected State or local educational agency will lose only the funds necessary to implement an arrangement by the Commissioner to provide services to private school children. Private educational organizations are eliminated as a potential type of grantee of nutrition and health projects under Part C of Title IV.

The statute does not indicate circumstances in which a waiver for "substantial failure" would not be granted. Consideration was given to developing criteria for the granting of such waiver; however, it is felt that due to the multiplicity of factual situations that might arise, it is best to make such determinations on a case-by-case basis. This is consistent with § 134.104 of the existing regulations for granting a waiver of the requirements of section 406 of the Act in the case of legal prohibition.

One comment was received on the Notice of Proposed Rulemaking published in the FEDERAL REGISTER (42 FR 16159) on March 25, 1977. The comment and the Commissioner's response to it follow:

Comment. A commenter objected to the elimination of private educational organizations as a potential type of grantee under Part C of Title IV on the grounds that this limitation would restrict the ability of the private sector to create model projects designed to improve nutrition and health services for areas with high concentrations of children from low-income families.

Response. No change has been made to the provision in the proposed rule. The purpose of this amendment to the regulation is to conform the regulation to the statutory amendments made by sections 324 and 501(r) of Pub. L. 94–482. Those amendments have revoked the Commissioner's authority to fund private educational organizations for demonstration nutrition and health projects.

After considering the comment the Commissioner hereby adopts the proposed regulations which were published in the FEDERAL REGISTER on March 25, 1977, with no changes.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

(Catalog of Federal Domestic Assistance No. 13.570–571; Libraries and Learning Resources, Education Innovation and Support)

Dated: July 22, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: August 30, 1977.

HALE CHAMPION,
Acting Secretary of Health, Education, and Welfare.

Parts 134 and 134b of Title 45 of the Code of Federal Regulations are amended as follows:

1. By revising the first two lines of the Comment following paragraph (b) of § 134.105 to read as follows:

§ 134.105 Provision of services by the State educational agency.

• • • • •

Comment. These two paragraphs provide State educational agencies with an opportunity to • • •

2. By adding a new § 134.105(c) to read as follows:

• • • • • •

(c) If a State educational agency does not make satisfactory arrangements under § 134.105(a) within a reasonable period of time, the Commissioner may waive the requirements for the participation on an equitable basis of children enrolled in private elementary and secondary schools.

(20 U.S.C. 1806(e))

3. By revising § 134.108(b) to read as follows:

§ 134.108 Suspension and termination.

• • • • • •

(b) If no waiver is granted under § 134.104 or § 134.105(c) and the State educational agency fails to take action under § 134.105(a), section 434(c) of the General Education Provisions Act requires that payments shall be withheld from such State or local educational agency until there is no longer any such failure to comply.

(20 U.S.C. 1232c(c); 1806)

4. By revising § 134.108(d) to read as follows:

• • • • • •

(d) This section shall not apply where the Commissioner has granted a waiver under §§ 134.104(a) or 134.105(c).

(20 U.S.C. 1232c(c); 1806 (d), (e))

§ 134.108 [Amended]

5. By deleting the comment following § 134.108(d).

Subpart C [Removed]

6. In Part 134b, by deleting Subpart C—Health and Nutrition, § 134b.20.

Subpart D [Redesignated]

7. By retitling Subpart D as Subpart C.

8. By revising the table of contents listing for Subpart D—*Strengthening State and Local Educational Agencies* in Part 134b to retitle it as Subpart C.

9. By revising the first four lines of paragraph (b) of § 134b.2 to read as follows:

§ 134b.2 Authorized activities.

• • • • • •

(b) For the support of demonstration projects by local educational agencies designed to improve nutrition and health • • •

• • • • • •

Beneficial Ownership Disclosure Requirements

Solicitation of Comments

AGENCY: Securities and Exchange Commission.

ACTION: Solicitation of comments.

SUMMARY: Certain institutions have raised substantial practical and interpretative questions in complying with the rules, now scheduled to take effect on April 30, 1978, governing the disclosure of the beneficial ownership and related information of certain equity securities. Institutions have also objected to the exclusion of certain persons from those permitted to use the abbreviated acquisition notice and the duplication of disclosure which they believe would result if rules are adopted requiring institutional investment managers to report information with respect to accounts over which investment discretion is exercised. Although the Commission is not proposing to amend the new rules at this time, it is requesting public comment with respect to the objections raised by institutional investors in order to assure that its regulatory actions are fully responsive to the public interest.

DATE: Comments must be received on or before September 30, 1977.

ADDRESS: Comments should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. Comment letters should refer to Commission File Number S7-714. All comments received will be available for public inspection in the Commission's Public Reference Room, 1100 L Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

John Granda, Division of Corporation Finance, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 (202—755-1750) or Edward A. Scallet, Office of the General Counsel, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 (202—755-1234).

SUPPLEMENTARY INFORMATION:

I. BACKGROUND

A. SUMMARY OF PERTINENT RULES

In order to assist all interested persons in understanding the issues upon which the Commission is soliciting comments, a brief summary of the new rules which are pertinent to those issues follows. The summary is brief and the attention of all interested persons is directed to the actual text of the rules and forms for a more complete understanding.[1]

Generally, Section 13(d) of the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) and Rule 13d-1 (17 CFR 240.13d-1) thereunder, require that a Schedule 13D (17 CFR 240.13d-101) be filed by any person (or group of persons) within 10 days of any acquisition, if after such acquisition such person or group is the beneficial owner of more than five percent of certain classes of equity securities specified in Section 13(d)(1).

The Commission in its new rules[2] defined the term "beneficial owner" for certain purposes to include any person who directly or indirectly has or shares voting and/or investment power in such security (Rule 13d-3) (17 CFR 240.13d-3). The holder of a right to acquire beneficial ownership of a security and a pledge under a defaulted pledge agreement are also deemed to be beneficial owners under certain circumstances (Rule 13d-3). Under the new rules, the acquisition by a group of the beneficial ownership of the securities owned by its members is deemed to occur upon the date of the agreement to act together for a prescribed purpose (Rule 13d-6) (17 CFR 240.13d-6). The new rules also require aggregation of securities of the same issuer held by a beneficial owner in several different accounts or trusts (Rule 13d-3).

A new short form (Form 13D-5) (17 CFR 240. 13d-102) was adopted to be used by certain institutional investors in reporting their beneficial ownership so long as such ownership was neither acquired nor is maintained for the purpose (or with the effect) of changing or influencing the control of the issuer. The short form may be filed within 10 days after the end of the calendar quarter in which the triggering acquisition was made, and thereafter the form is to be amended on a quarterly basis to reflect all material changes as well as increases and decreases of beneficial ownership during the quarter until ownership has dropped to five percent or less of the subject securities.

B. INSTITUTIONAL INVESTOR CONCERNS

The Commission has received three rulemaking petitions pursuant to the Commission's rules of practice (17 CFR 201.4) seeking to have the Commission amend Rule 13d-5 (17 CFR 240. 13d-5) to permit insurance companies to use the short form acquisition notice.[3] Two of those petitions also seek amendment of Rule 13d-6 to limit paragraph (b) thereof to agreements relating to equity securities of an issuer.[4] Because the petitions largely reflect similar concerns representative excerpts are set forth below.[5]

The member banks of the New York Clearing House Association have articulated their concerns regarding the new rules in a submission by that organization which is also set forth below.

Additional concerns raised by institutional investors are contained in the letters of comment on proposed Rule 13f-1 (17 CFR 240. 13f-1) published in Securities Exchange Act Release No. 13396, March 22, 1977, 42 FR 16831. Those letters have been made part of Commission File Number S7-714 and are available for public inspection and copying.

II. ISSUES UPON WHICH THE COMMISSION SOLICITS COMMENTS

The Commission, at this time, is not proposing to amend or modify the new rules announced in February, 1977. While these rules may impose some burdens on institutional investors and others, that concern must be balanced against the need for full and accurate disclosure of the beneficial ownership of equity securities. This is the balance the Commission's rules attempted to achieve. Similarly, the decision to exclude insurance companies from the list of persons eligible to use the short form was based on several factors.[6]

[1] The text of the rules and a more complete description of the rules and illustrations thereof are set forth in Securities Exchange Act Release No. 13291, February 24, 1977, 42 FR 12342.

[2] Certain of these rules codify existing case law. See, e.g., "GAF Corp. v. Milstein," 453 F.2d 709 (C.A. 2, 1971) certiorari denied, 406 U.S. 910 (1972).

[3] Petitions have been received from the American Insurance Association, the American Council of Life Insurance, and The Prudential Insurance Company of America.

[4] American Council of Life Insurance and The Prudential Insurance Company of America.

[5] The full petitions are contained in Commission File Number S7-714 and are available for public inspection and copying.

[6] In its release announcing the adoption of its beneficial ownership disclosure rules (Securities Exchange Act Release No. 13291, 42 FR 12342), the Commission articulated the bases for its determination with respect to insurance companies, as follows:

As originally proposed, the short form would have been available to insurance companies, as defined in Section 3(a)(19) of the Exchange Act. However, the Commission has determined that the considerations which would make use of a short form appropriate for broker-dealers, banks, investment companies, investment advisers and employee benefit plans do not apply equally to insurance companies. The rationale for precluding insurance companies from using the short form is based, in part, upon the lack of any uniform legal requirement restricting such companies in the amount of securities they may acquire in a given issuer and on the fact that the transactions by which an insurance company or its affiliates may become the beneficial owners of securities, even taking into account the aggregation and attribution aspects of the new rules, generally involve volitional investment decisions of a character different from those generally made by the other entities entitled to use Form 13D-5. Moreover, even though certain aspects of the operations of insurance companies are subject to regulation under state law, the Commission does not believe such regulation to be an adequate substitute for the protection to investors provided by disclosure under Section 13(d).

In reaching its decision regarding insurance companies, the Commission was aware

Nevertheless, the Commission believes that it should solicit comments on, and give due consideration to, the issues which have been highlighted by the institutional investors, and for that reason has previously announced the deferral of the effective date of the rules from August 31, 1977 to April 30, 1978 (Securities Exchange Act Release No. 13844, August 10, 1977, 42 FR 41405). The Commission requests that persons commenting on these issues furnish detailed empirical and other evidentiary support buttressing their objections to and suggestions for any proposed modification in the new rules.

While the Commission will consider comments on any aspect of the new rules, including any of the matters raised in the petitions and submissions referred to above, the issues upon which the Commission specifically desires comment are set forth below. In considering the issues which have been raised, consideration should be given to the question of whether it will also be necessary to revise the definition of beneficial ownership, presently set forth in Rule 13d-3. Accordingly, the Commission specifically invites comments on the question whether, and, how, the definition of beneficial ownership should be revised to alleviate the institutions' problems in a manner consistent with the purposes of Section 13(d) of the Exchange Act.

In responding to the following questions, please furnish specific cost date with respect to: (1) Compliance with the new rules as they now stand; and (2) compliance with the rules as amended in any manner recommended by the commentator.

1. *Availability of the short form.* (a) Should insurance companies generally, or life insurance companies or property and casualty companies specifically, qualify for inclusion in Rule 13d-5 as a class of beneficial owners entitled to use Form 13D-5 in lieu of Schedule 13D?

(b) Should a group whose members are individually eligible to use Form 13D-5 be permitted to use that form regardless of whether the securities are acquired in a private placement?

(c) Should two or more persons who are beneficial owners of the same securities and who are otherwise eligible to use Form 13D-5 be permitted to file a single Form 13D-5?

(d) Should the attribution of beneficial ownership from a subsidiary, which is not qualified to use the short form, to its parent, which is so qualified, preclude the parent from utilizing the short form?

2. *Overlap under proposed Rule 13f-1.* (a) Should the disclosures required by rules under Section 13(f) provide the exclusive reporting obligation for the securities beneficially owned by institutional investors who disclaim any intention of investing for purposes of influencing control or management?

(b) Can the purposes of Sections 13(d) and (f) be effected without duplicative reporting?

3. *Practical problems.* (a) Should the reporting and/or disclosure requirements of Form 13D-5 be based on beneficial ownership as of the end of the calendar quarter rather than at any time during the quarter?

(b) Should Form 13D-5 be required to be filed within some period of time in excess of the present 10 days after the end of the calendar quarter; and, if so, what is an appropriate period of time?

4. *Definitional and interpretative problems.* (a) When should a pledgee under an agreement as to which there has been a default be deemed the beneficial owner of the pledged securities?

(b) Should persons qualified to file the short form be exempted from the requirement that they be deemed the beneficial owner of securities which they have the right to acquire within 60 days either through the conversion of convertible securities or through the exercise of options, warrants or rights?

(d) Would an exemption for persons qualified to file Form 13D-5 from the requirement to aggregate securities held by foreign branches and subsidiaries in unrelated investment accounts be inconsistent with the purposes of Section 13d?

(e) If two or more persons agree to act together solely for the purpose of acquiring, holding, or disposing of a non-equity security of an issuer, should Rule 13d-6 (b) be amended so that the group formed thereby will not be deemed to be the beneficial owner of the equity securities beneficially owned by such persons?

In addressing the issues raised in this release commentators should feel free to consider the materials accumulated in Commission File No. S7-580[7] in connection with the beneficial ownership rules proposed by the Commission in Exchange Act Release No. 11616 (40 FR 42212).

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 29, 1977.

ATTACHMENTS TO RELEASE NOS. 33-5859 34-13900

EXCERPT FROM THE PETITION OF THE AMERICAN INSURANCE ASSOCIATION RELATING TO RULE 13D-5

III. THE COMMISSION'S ACTION IN AMENDING PROPOSED RULE 13D-5 TO EXCLUDE INSURANCE COMPANIES WAS CONTRARY TO ITS REGULATORY PURPOSES UNDER THE EXCHANGE ACT AND THE WILLIAMS ACT

The Williams Act amendments to the Exchange Act were designed to fill the gap in the disclosure provisions of existing securities legislation which occurred:

(1) When a person or group of persons seeks to acquire a substantial block of equity securities of a corporation by a cash tender offer or through open market or privately negotiated purchases and (2) when a corporation repurchases its own equity securities.[13]

Congress recognized the need for protection of investors "caught in the midst of a battle for corporate control" set off by an outside tender offer. It therefore provided that any person or group which acquired 10 percent or more of any class of registered equity security (as well as certain investment company securities) or which made a tender offer for such securities must disclose information as to the size of its holding, the source of its funds, any contracts or arrangements relating to the shares, and any plans to change the business or corporate structure of the acquired firm.[14]

Congress did not intend to require extensive disclosure on the part of purchasers whose acquisition of securities was not intended to or did not have the effect of changing or influencing control of the issuer or otherwise did not fall within the purposes of the Act. This purpose was reflected in amended sections 13(d)(5)(D) and 14(d)(8)(D) of the Exchange Act.[15]

Subsequently, the Williams Act was amended to reduce the triggering level of securities acquisitions for reporting requirements to 5 percent, to include certain insurance company securities, and to allow the Commission to adopt a short form notice of acquisitions under section 13(d):

> The Commission, by rule or regulation or by order, may permit any person to file in lieu of the statement required by paragraph (1) of this subsection or the rules or regulations thereunder, a notice stating the name of such person, the number of shares of any equity securities subject to paragraph (1) which are owned by him, the date of their acquisition and such other information as the Commission may specify, if it appears to the Commission that such securities were acquired by such person in the ordinary course of business and were not acquired for the purpose of and do not have the effect of changing or influencing the control of the issuer nor in connection with or as a participant in any transaction having such purpose or effect.[16]

In its 1975 Release, the Commission proposed a definition of "beneficial ownership" which would include persons acquiring securities in the ordinary course of business and not with a view toward affecting corporate control. The Commission proposed the adoption of a short form acquisition notice.[17] In so doing it noted that the proposed standard for use of the short form by institutional investors was the standard established in 13(d)(5): Such an investor must have acquired its securities "in the ordinary course of business and not with the purpose or effect of changing or influencing the control of the issuer nor in connection with, or as a participant in, any transaction having such purpose or effect."[18]

Benefit of the short form was to be limited to the list of institutional investors specified in the proposed rule on the grounds that "they are the ones most likely to have acquired more than a five percent interest in

of a number of private enforcement investigations pending at that time which tended to reveal a pattern by certain insurance companies of utilizing their assets to engage in or assist activities in violation of the Williams Act. Its release referred to the factors that the Commission believes facilitated the conduct under scrutiny.

an issuer in the ordinary course of their business." [19]

Insurance companies clearly meet these standards in their investment activities. State laws regulating insurance companies restrict the percentage of outstanding equity securities of any issuer which an insurance company may acquire. These restrictions also set a ceiling on the percentage of any insurer's assets which may be invested in one issuer's securities. The effect of state regulation is to limit the possibility of insurance companies engaging in takeover bids through ordinary investment operations, whether through tender offers or otherwise.

As the Commission itself concluded in its 1971 study of institutional investors, insurance companies do not purchase securities with the intent of gaining control of the investment vehicle.[20] Rather, the insurance company seeks a combination of return and safety in its investments. Thus, companies which are typically subject to takeover bids—because of declining stock prices, inert management, or temporary large cash balances—would probably be unattractive investments. The insurance company seeks to invest in a management, not to enter into a contest with it.

The principles of diversification and limitation of downside risks guide insurance portfolio managers in their activities. Statutory limitations on investments rarely impinge on a portfolio decision because insurance companies are even more committed to diversification and risk avoidance than regulators require.

Insurance company investments are also subject to full public scrutiny. Uniform reporting forms are prescribed by the National Association of Insurance Commissioners which require disclosure of all investment holdings as well as sales and purchases during each calendar year. The information filed by each company is available to the public through state commissioners' offices as well as through privately-owned reporting services.

Congress has recognized that state regulation combined with uniform disclosure requirements effectuates registration under the Exchange Act with respect to the insurance industry. In amending the Exchange Act in 1964, Congress exempted insurance companies from the registration requirements established by section 12(g): *Provided*, That certain conditions were met, including state regulation of the company's proxies and filing by the company of an annual statement substantially conforming that prescribed by the National Association of Insurance Commissioners.[21]

The Commission's action appears to contradict the intent of Congress as expressed in the 1964 amendments. The statutory language reflects a Congressional determination that the basic pattern of State regulation of insurance companies should not be disturbed unnecessarily by the Federal securities laws. Furthermore, Congress expressed its belief that State regulation, when combined with uniform disclosure requirements, was sufficient to achieve the purposes of the Exchange Act.

No evidence to contradict these facts appear in the record of the Rule 13d-5 rulemaking. The Commission's negation of its own past pronouncements, of Congressional intent as expressed in the Exchange Act and the Williams Act amendments, and of its own proposed rules is without factual support. For this reason, the Commission should now amend Rule 13d-5 to include insurers.

IV. THE COMMISSION'S STATED RATIONALE FOR THE EXCLUSION OF INSURANCE COMPANIES FROM THE COVERAGE OF RULE 13d-5 LACKS A BASIS IN FACT OR REASON

A. THE INSURANCE INDUSTRY IS SUBJECT TO EFFECTIVE STATE REGULATION WITH RESPECT TO SECUAITIES ACQUISITIONS

In its brief rationale for excluding insurance companies from the benefits of Rule 13d-5, the Commission stated:

> The rationale for precluding insurance companies from using the short form is based, in part, upon the lack of any uniform legal requirement restricting such companies in the amount of securities they may acquire in a single issuer • • • Moreover, even though certain aspects of the operations of insurance companies are subject to regulation under state law, the Commission does not believe such regulation to be an adequate substitute for the protection to investors provided by disclosure under Section 13(d)."[22]

This statement recognizes that insurance company investments are a matter of State regulation. It ignores, however, the pervasive character of such regulation, as well as the applicability of New York law to the majority of insurance companies and their assets. By comparison to the insurance industry, other institutional investors which have been granted the benefits of Rule 13d-5, are relatively unregulated.[23]

In view of the disparity between the goal of the Williams Act—disclosure of acquisitions—and the imposition of State legal requirements limiting portfolio acquisitions, it appears that this portion of the Commission's rationale is inapplicable to the stated purposes of the Rule. This is particularly true in light of the near-total, lack of similar limitations on other institutional investors. However, it is worth reviewing what the Commission would have found had it addressed the question of State regulation of insurance companies.

As the Commission stated in its 1971 study of institutional investors, "Insurance company equity investments are severely restricted by state insurance laws."[24] These restrictions are applied in two ways. First, insurance companies are restricted as to the percentage of their assets which may be placed in equity investments, and further restricted as to the percentage of assets which may be committed to any one equity vehicle. Second, and more directly relevant to the Williams Act, insurance companies are limited in the percentage of the outstanding shares of any one issuer which they may acquire.

As the Commission found in its Institutional Investor Study, while statutory limits vary from State to State, of New York's Insurance Law provides a nationwide standard.[25] New York requires that non-domiciliary insurance companies must substantially comply with the investment limitations placed on New York companies.[26] It is estimated that 70 percent of the insurance companies in the United States and 80 percent of total insurance company assets are subject to New York regulation.[27] In addition, most other insurance companies which are not subject to New York regulatory requirements confine themselves to the amounts and types of investments authorized by New York.[28]

Under New York law insurance companies' investments in common stocks or shares are limited to those institutions which meet the following requirements:

> (i) 'All the obligations and preferred stock, if any, of such institutions are eligible as investments' under applicable provisions of the New York Insurance Law;
>
> (ii) 'Such institution shall have earned, during (the past seven fiscal years), an aggregate sum which would have been sufficient to pay dividends of four per centum per annum upon the par value (or in the case of commonstocks or shares without par value, then upon the stated capital in respect thereof) of all its common stocks or shares outstanding during such period;' and
>
> (iii) With some exceptions, the common stocks or shares of any such institution other than a bank, trust company or insurance company are registered on a national exchange pursuant to the Securities Exchange Act of 1934.[29]

Because few States are more restrictive than New York, and because most large companies and groups do business there, the New York standards amounts to a national standard for most purposes.

[20] See pp. 39–40, infra.

[21] Section 12(g)(2)(G) of the Exchange Act, 15 U.S.C. section 781(g)(2)(G). Similarly, insurance policies were declared exempt from regulation as securities in section 3(a)(8) of the Securities Act of 1933, and insurance companies were specifically exempted from the coverage of the Investment Company Act of 1940 by section 3(c)(3) of that statute. In both instances, the exemptions were based on Congressional recognition of the preeminent role of state regulation of the insurance business. See H.R. Rep. No. 85, 73d Cong., 1st Sess. 15 (1933); 77 Cong. Rec. 2936–38, 2946 (1933) (Securities Act of 1933); "Hearings before House Comm. on Interstate and Foreign Commerce on H.R." 10065, 76th Cong., 3rd Sess. 61–62 (1940); 86 Cong. Rec. 10070–71 (1940) (Investment Company Act of 1940). See also *SEC* v. *Variable Annuity Co.*, 359 U.S. 65 (1959).

No. 92–64 (hereinafter cited as "Institutional Investor Study"), pt. 2, at 144–46 (investment advisers), 439–50 (bank trust departments); pt. 3, at 901–04 (offshore funds), 980–1004 (pension-benefit plans) (1971).

[24] Id., pt. 2, at 687 (emphasis added).

[25] See note 26, infra.

[26] N.Y. Ins. L. § 90 (McKinney 1966). See "Institutional Investor Study," pt. 2 at 687.

[27] A. M. Best Co., "Aggregates and Averages" (1974); N.Y. State Ins. Dept., "Statistical Tables from Annual Statements" (1974). Such limitations are generally in accord with policies adopted by insurance company portfolio managers, and therefore represent no great administrative burden to the company. See "Institutional Investor Study", pt. 2 at 823.

[28] The "Institutional Investor Study" stated: Most companies responding to the Study's questionnaires have found the New York statute to be the primary restraint upon their common stock investment decisions, regardless of where the companies are domiciled. While a few smaller companies domiciled in relatively liberal States and not doing business in New York have been able to substantially exceed New York's bounds, even most medium-sized insurers confine themselves to amounts and types of issues authorized by New York law.

Except in the case of acquisition of shares in qualified insurance subsidiaries of life insurance companies and qualified mortgage companies, insurance companies may not invest in more than 5 percent of total issued and outstanding shares in any one institution, nor may such investment in the common shares of an institution exceed 1 percent of the insurance company's admitted assets.[29] In addition, no more than 10 percent of an insurance company's admitted assets may be committed to all securities, debt and equity, of any one issuer.[31] Finally, no more than 10 percent of the admitted assets of an insurance company or 100 percent of its surplus, whichever is less may be committed to investments in common stocks and shares.[32]

B. INSURANCE COMPANY INVESTMENTS ARE WIDELY DISCLOSED

A second issue, that of the role of State regulators in enforcing disclosure of insurance company investments is more relevant to the Williams Act. Again, had the Commission studied this issue it would have found such disclosure more complete than any contemplated by its Williams Act rules. The contrast which can be drawn to banks and other financial institutions is favorable to the insurance industry.[33]

Insurance companies are required to report all investments to State regulatory offices in the States in which they transact business. The National Association of Insurance Commissioners ("NAIC") has promulgated a statement blank to be filed by fire and casualty companies on an annual or quarterly basis. Schedule D of that blank is attached hereto as Appendix II.* By reference to Schedule D, it can be seen that insurance companies must report equity holdings by type and country of origin, at book value, market value, and actual cost. Separate schedules within the form show all stock holdings, acquisitions, and dispositions for the past reporting period.

The information filed with State insurance commissioners on the NAIC form is both comprehensive and open to public inspection. Comparative data for insurance companies nationwide is gathered and made available through surveys of the insurance industry published annually by the A. M. Best Company ("Best's Market Guide") and United Statistical Associates ("Corporate Holdings of Insurance Companies".)[34]

Thus, from the perspective of disclosure, investments by insurance companies are at least as accessible to the public as are those of other institutional investors, and are more accessible than those of banks. There exists no reason for treating insurers differently than other institutions under the Williams Act. In fact, the Commission could have achieved its overall purpose simply by requiring insurance companies to file a copy of Schedule D of the NAIC blank. Precedent for using NAIC standards as a benchmark in securities law disclosure requirements for insurance companies can be seen in section 12(g)(2)(G) of the Exchange Act, which exempts insurance company securities from registration under section 12(g) where the company files annual reports prescribed by NAIC with state authorities.

The conclusion to be drawn from this discussion of State regulation of insurance companies and the availability of public information on the investment holdings of insurance companies is that the Commission did not consider the relevant factual background when it excluded insurance companies from the coverage of Rule 13d-5.

C. TRANSACTION ENGAGED IN BY INSURANCE COMPANIES IN THE ACQUISITION OF SECURITIES INVOLVE INVESTMENT DECISIONS SIMILAR TO THOSE MADE BY OTHER INSTITUTIONAL INVESTORS

The Commission's final rationale for excluding insurance companies from the coverage of Rule 13d-5 is based on the following assertion: |T|he transactions by which an insurance company or its affiliates may become the beneficial owners of securities, even taking into account the aggregation and attribution aspects of the new rules, generally involve volitional investment decisions of a character different from those made by other entities entitled to use Form 13D–5.[35]

This aspect of the Commission's rationale introduces a puzzling element into the discussion of the behavior of institutional investors. In the many studies, hearings, and reports issued by the Commission and Congress during the period prior to the enactment of the Williams Act amendments and thereafter, the AIA has been unable to locate any discussion of whether institutional investments were "volitional." An "involuntary" investment is difficult to imagine in the present economic structure of the United States, except if that term were to apply in instances where the institutional investor as agent acts at the express direction of some principal. Obviously, such situations are relatively rare in the overall scale of investments by mutual funds, bank trust departments, and insurance companies.

Investment decisions might be said to be influenced negatively by regulations which restrict certain types of investment. To the extent of those restrictions, such decisions might conceivably be said to lack volition to some degree. However, as previously established, insurance companies are subject to State regulatory restrictions which are at least as stringent than those affecting other institutional investors. Therefore, from this perspective there is no basis for a statement that insurance companies possess greater volition in their decisions than do other investors.

To the contrary, the Commission itself has concluded that the behavior of insurance companies as investors is similar to that of other institutions.[36] The principal emphasis of insurance investment activities is security of the investment.[37] This policy (enforced by State regulatory limitations) means that insurance companies commit a small proportion of their assets to equity securities and spread their equity investments among many companies.[38] Insurance companies purchase equities of companies which are perceived to be well-managed.

In adopting rule 13d–5 in its present form, the Commission has created a distinction between insurance companies and other institutional investors which may seriously affect the ability of insurers to compete in public and private capital markets. Banks, broker-dealers, mutual funds, pension funds, and other institutions will have access to reports on significant transactions by insurance companies within ten days after they occur. No comparable information will be available to insurance companies on their competitors' investment operations.

The Commission's exclusion of insurance companies from use of the quarterly short form report would encourage insurers to invest only in the largest blue chip securities. Obviously five percent of the outstanding shares in IBM or Exxon represents a far larger investment than five percent of most companies listed over-the-counter, on the American Stock Exchange or on regional exchanges. An insurance company would become subject to Schedule 13D reporting requirements if it invested a reasonable amount of funds in a small over-the-counter stock. No such reporting requirements would arise from investing the same amount of funds in IBM. Similar investment patterns by bank trust departments concerned the Congress in 1973, as evidenced by hearings on the IImpact of Institutional Investors in the Stock Market.[39] The Commission should weigh with serious concern the consequences of encouraging a revival of the "two-tier" market through onerous reporting requirements for insurance companies.

Further, insurance companies are among the largest participants in the private placement market. The distinction in reporting under Section 13(d) between insurance companies and other large participants in the market for private placements could put insurers at another competitive disadvantage. In its 1977 Release, the Commission stated that "a group of institutional investors, each of whom alone meets one of the standards of rule 13d–5(a)(2), upon agreeing to act together for the purpose of acquiring securities in a private placement, may utilize the short form." If an insurance company is a member of such a group, the insurance company alone would have to report its acquisition on Schedule 13D within ten days, even though all members of the group acquired fungible securities for the same purposes. This and similar inconsistencies resulting from comprehensive reporting requirements placed solely upon insurers may well have a chilling effect upon private placements.

Vigorous competition exists today among all types of institutional money managers. Balancing equities between money managers which are exchange members and money managers which are not exchange members was one of the fundamental objectives in the Securities Acts Amendments of 1975, as evidenced by SEC Release No. 34–13388. Requiring insurance companies to report securities

transactions much sooner than other institutional investors could put insurers at a competitive disadvantage. In communicating with potential clients, other money managers would be able to discuss the pros and cons of investment strategies pursued by insurance companies, while the insurers, competing for the same clients, could only guess at the investment posture of other institutional managers. Certainly the Commission should have considered fully the possible anticompetitive effects of singling out insurers for disparate treatment before adopting present rule 13d–5.

The Federal Communications Commission ("FCC") recently investigated the specific question of whether insurers should be treated differently than banks and other institutional investors with respect to equity ownership of broadcast licensees. Its conclusion was that the investment activities of insurance companies should be subject to exactly the same regulatory requirements as those of other institutions.

The FCC has long maintained rules limiting the multiple ownership of broadcast stations and cable television systems. These rules prohibit the ownership of two or more stations in any of the three broadcast services (AM radio, FM radio, or television) in the same area of service. Further, no entity or person may own or have a controlling interest in more than 7 AM, 7 FM, and 7 television stations.[40] For purposes of these rules, the FCC had considered a 1 percent equity interest in a broadcast licensee as a "cognizable interest" which through which a person might exercise some element of control in the corporation.[41]

Over the course of several years the FCC raised this limitation for various institutional investors.[42] In 1975, the FCC proposed further raising its benchmark to a uniform 5 percent for insurance companies, investment companies, and banks. The arguments in favor of such a change were outlined in the FCC's decision:

> The reason most frequently suggested for adoption of the increased benchmark is that banks, insurance companies, and investment companies are "passive" investors who cannot exercise managerial influence over their portfolio companies. Most commentators point out that the charters and prospectuses of these institutional investors as well as state and federal regulation limit the amount of stock they can purchase in any one company. Consequently, these parties believe that banks, insurance companies and investment companies, who all play the same passive investment role, should be subject to the same benchmark. Also, those commentators reason that 5 percent is a reasonable and realistic benchmark because it will have a beneficial effect on the degree of investment in the broadcast and cable businesses and at the same time will guard against any undue concentration of control.[43]

Despite the arguments of those opposed to raising the benchmark percentage for fear of concentrating ownership in the broadcast media, the FCC decided to adopt the proposed rule change on the grounds that it would increase institutional investment in broadcast and cable companies, thereby strengthening the "economic foundation" of these industries. The FCC further concluded that increasing the benchmark would not cause "undue concentration of control." It noted that opponents of the proposal had cited no instance, nor had the FCC staff found any, in which institutional investors had used their minority interest to influence the management of a widely-held broadcast or cable company.[44]

The FCC specifically recognized that insurance companies are entitled to equal treatment with other institutional investors under its multiple ownership rules. Unlike this Commission's recent proceeding, the FCC's investigation focused on the insurance industry and considered a full record.[45] The FCC's conclusion is parallel to those reached by Congress and the Commission in previous studies of institutional investors.

EXCERPT FROM PETITION OF THE PRUDENTIAL INSURANCE COMPANY OF AMERICA RELATING TO RULE 13d-6

V. RULE 13d–6(b) WILL HAVE CAPRICIOUS AND MISCHIEVOUS RESULTS IF APPLIED TO THE ORDINARY COURSE OF BUSINESS LENDING ACTIVITIES OF LIFE INSURANCE COMPANIES

1. *The acquisition of equity securities in private placements by life insurance companies.* As we have on other occasions explained to the Commission, an integral part of the business of a life insurance company is the investment of the excess of the net premiums, investment income and principal repayments that remains after payment of benefits under its policies and contracts. A substantial part of this money is loaned to corporate borrowers for a variety of purposes, most often for construction or improvement of plant and for working capital. The loans are individually negotiated, are made pursuant to lengthy and carefully drawn loan agreements and result in the acquisitions of debt securities by the insurance company, most often in the form of a promissory note or notes. The loans are ordinarily for medium and long term—from 5 to 20 years.

Some indication of the volume of these transactions may be found in reports of the Commission's Office of Economic Research and in the Statistical Bulletins from 1956 through 1974. Over $106 billion of debt securities were privately placed with institutional investors with almost $8 billion sold in 1973 and more than $6 billion sold in 1974.[9]

For the most part this lending activity does not involve the acquisition of equity securities. Sometimes, however, it does give rise to the acquisition of equity securities by life insurance companies. In recent years a sizeable amount of corporate financing, particularly by utilities, has been carried out through the issuance and sale of preferred stock. Many of these issues are redeemable and include provisions for sinking funds. Some of these issues are registered, and insurance companies, either individually or through the supposed creation of a "group" (discussed below), sometimes acquire or are deemed to acquire more than 5 percent of such an issue (which is often, it should be noted, very much less than 5 percent of the voting power of the outstanding securities).

On other occasions the lending transaction will involve the issuance of convertible debt, once again giving rise to the acquisition of equity securities. Finally, certain borrowers, which though perfectly creditworthy, are thought for reason of size or other factors to present greater risk, will compensate for that risk by issuing to the lenders warrants to acquire common stock of the company.

2. *Concurrent loans by several insurance companies.* On numerous occasions several life insurance companies will concurrently make loans to a single issuer, where the amount of the borrowing is larger than any single company cares to make on its own. When this occurs it is both convenient and sensible for the lenders to retain the same outside counsel, to work cooperatively with each other and to end up with essentially the same form of loan agreement. There is in no sense whatever a joint venture among the participating companies, and throughout the transaction each retains the unqualified right to act independently. At the conclusion of the transaction, that is, shortly after the closing, the cooperative effort ceases and the parties go their own ways. They have no continuing joint or common interest. They are in fact competitors of each other. In that capacity they do not exchange information about their portfolio holdings or investment decisions. One company may well want to dispose of the equity securities acquired in such a transaction, but it would not inform the others of such intention. The companies wish to and will act independently of each other.[7] The Commission staff has nevertheless taken the position that in these circumstances the several participating life insurance companies constitute a "group" for purposes of Section 13(d) and hence, even though none of the participating companies may acquire more than 5 percent of an issue, a Schedule 13D filing has been required where the companies have acquired in the aggregate more than the required percentage. This serves to increase substantially the number of occasions when a Section 13(d) report must be filed.

Rule 13d–6(b), as recently adopted, appears to incorporate this interpretation of the staff and provides that when two or more persons agree to act together to acquire securities of an issuer—not necessarily equity securities—the group formed thereby is deemed to have acquired beneficial ownership of all securities of the issuer owned by each member of the group. This attribution rule may well be desirable when applied to acquisitions of the kind comprehended by Section 13(d) (1) and as to which a Schedule 13D must be filed; when several persons act together to affect control of an issuer, information about the securities of that issuer previously owned by each of them is obviously of interest to other affected persons. It makes no sense at all, however, as applied to life insurance company lending activities, whether or not a short form is permitted. Indeed, we have serious doubts about the validity of this interpretation, as applied to non-control acquisitions. The release cites *GAF Corp. v. Milstein*, 453 F. 2d 709 (2nd Cir. 1971), cert. denied, 406 U.S. 910 (1972), in support of this position. *Milstein*, however, dealt only with the question of whether a filing under Section 13(d) was required when the group was formed or whether a further acquisition was necessary. No issue was raised as to whether securities other than those of the class the group was formed to acquire should be presumed also to have been acquired. Moreover, the Court said explicitly that groups "would not be required to file unless the members conspired to pool their securities interests *for one of the stated purposes.*" (453 F. 2d at 719, emphasis supplied.) Nonetheless, we do not ask that this interpretation be withdrawn but, as the discussion below indicates, only that the extent of the presumed beneficial ownership be suitably determined.

As explained above, there are thousands of loans made annually by life insurance companies where no equity securities are involved. Many of these loans are made by "groups" of life insurance companies. As the rules are now framed, such a group, from the date the group is formed until the loan is actually made on the closing date when the group disbands, will be deemed to own all of the common stock, all of the preferred stock and all of the warrants and convertible debentures owned by each of the participants. In many cases more than 5 percent of a registered class will be deemed to have been acquired. We doubt that the Commission has the power to declare that when two life insurance companies agree simply to lend money to an issuer, acquiring notes or debentures in the process, they must be deemed, contrary to fact, to have acquired the equity securities, if any, previously owned by each of them. But in any event we cannot understand why anyone should care about this hypothetical and transient ownership or why two reports should be filed pursuant to Section 13(d), one to announce the decision by the group of companies to make the loan and the other to announce that the loan has been made and that, coincidentally, the unnecessary attribution of ownership has disappeared.

To require a poll to be taken of every life insurance company that participates in a simple lending transaction to determine whether all of them own in the aggregate more than 5 percent of a class of equity security, and to require two or more reports to be filed in those circumstances, is to go far beyond the intendment of the statute for no apparently sensible reason. Yet many such reports will have to be filed if the rule is allowed to stand as it now reads.

Even where a "group" of life insurance companies is formed to acquire equity securities, as, for example, where preferred stock is to be acquired instead of debt securities, there is no reason whatever to attribute ownership of all other classes of equity securities, as there might possibly be where an acquisition is for the purpose of affecting control. When persons agree to work together for the purpose of obtaining or affecting the control of an issuer, it may be important to know what other securities of that issuer are owned by each of them, even where their agreement does not in terms extend to such other securities. But where a routine, ordinary course of business acquisition is made by a group, there is no occasion to inquire what other securities of the issuer are owned by each of them since this is not relevant to any concern of the public, particularly a concern of the kind that gave rise to the Williams Act. At most, the attribution should be limited to the class or classes of securities that the group has been formed to acquire.[8]

This point was made by Prudential in comments made when these rules were proposed, but the current release offers no explanation of why so broad an attribution rule was adopted for non-control acquisitions. This is not in keeping with the Commission's obligations under the applicable law. As the Court of Appeals for the District of Columbia recently observed:

> "An agency need not respond to frivolous or repetitive comment it receives. However, where apparently significant information has been brought to its attention, or substantial issues of policy or gaps in its reasoning raised, the statement of basis and purpose must indicate why the agency decided the criticisms were invalid. Boilerplate generalities brushing aside detailed criticism on the basis of agency 'judgment' or 'expertise' avail nothing; what is required is a reasoned response, in which the agency points to particulars in the record which, when coupled with its reservoir of expertise, support its resolution of the controversy. An agency may abuse its discretion by proceeding to a decision which the record before it will not sustain, in the sense that it raises fundamental questions for which the agency has adduced no reasoned answers." *NRDC v. United States Nuclear Regulatory Commission* (C.A.D.C., July 21, 1976), cert. granted, 45 U.S. Law Week 3570 (1977).

While we believe that, even in the case of acquisitions that are intended to affect control, it would be preferable if Rule 13d–6 (b) were limited to transactions where two or more persons act together to acquire equity securities of an issuer, our concern is with ordinary course of business non-control acquisitions, and so the amendment recommended below applies solely to such transactions. We suggest, therefore, that Rule 13d–6(b) should be amended to add the following:

> ". . . *Provided, however*, That if the group is of the type specified in Rule 13d–5 (a)(2)(vii), then it shall be deemed to have acquired beneficial ownership of securities of the persons comprising the group only if it has been formed for the purpose of acquiring, holding, or disposing of one or more classes of equity securities of an issuer, and in such case the group shall be deemed to have acquired beneficial ownership of the securities of such class or classes beneficially owned by such persons, for purposes of Section 13(d)(1)."

This would preserve the present attribution rule for acquisitions intended to be covered by Section 13(d) and provide a more limited and more sensible attribution rule for group non-control acquisitions.

VI. CONCLUSION

The Commission should amend Rule 13d–5 (a)(2) to add life insurance companies to the categories of persons entitled to use Form 13D–5 and should amend Rule 13d–6 in the manner suggested above.

Respectfully submitted,

The Prudential Insurance Co. of America.
Of Counsel: Lawrence J. Latto, Shea & Gardner, 734 15th Street NW., Washington, D.C. 20005.

MARCH 21, 1977.

SUBMISSION OF THE NEW YORK CLEARING HOUSE ASSOCIATION

[File No. S7–687]

OUTLINE OF COMMENTS REGARDING RECENTLY ADOPTED AMENDMENTS TO REGULATION 13D

I. BASIC POSITION

The Securities and Exchange Commission's resulted in a regulation which is unworkable as applied to commercial banks.* The cost to commercial banks of even attempting to comply with the revised Regulation would run into millions of dollars. These enormous costs are unjustified in view of proposed Rule 13f–1 which was issued under the statute Congress intended to provide for institutional investor disclosure. Rule 13f–1 will provide such necessary disclosure, although a number of amendments are required to avoid problems similar to those created by Regulation 13D.

A duplication of such disclosure by means of a separate reporting system under Regulation 13D would, because of various technical differences between the two regulations, create enormous additional expense without any resulting benefit to the investing public. Such duplication is contrary to the express intention of Congress in enacting Section 13(f) of the 1934 Act and the basic concern expressed by a number of government officials regarding the burden of duplicative and non-productive paperwork.

II. SPECIFIC PROBLEMS UNDER REGULATION 13D

(a) Initial Creation of a Computerized Reporting System or Other Mechanism to Comply with Regulations 13D Could Cost Certain Individual Banks Millions of Dollars and the Aggregate Cost for Banks Generally Might Exceed Fifty Million Dollars. In order to comply with the Regulation 13D reporting requirements, major banks throughout the country will be required to develop sophisticated computer systems to track and report the relevant data These systems must provide information regarding thousands of securities held in thousands of different accounts, and must indicate whether a bank's "beneficial ownership" of each security has exceeded the 5 percent threshold test.

The cost of establishing a computer system for the domestic trust department operations of a major bank with a very limited branch system is in the area of $250,000. This is a "bare-bones" cost estimate which would be far exceeded at many major banks. Even this estimate assumes the availability, from a commercial reporting service, of a list of all "Section 13(d) securities" and the amount of shares equivalent to 5 percent of the total outstanding, as well as acknowledgment by the Commission that banks may rely upon such a list. If this assumption is inaccurate, the costs are incalculable. At the present time, commercial reporting services include only securities that are listed on a national securities exchange or are quoted on the automated quotation system of a registered securities association (e.g., the NASDAQ system).**

A major part of the expense in establishing the computer system is attributable to the need to include convertible securities and options in calculating the percentage holdings of the underlying equity security. This expense would not arise under proposed Rule 13f–1, which does not include a percentage test. The expense is not justified because it is inappropriate to assume that banks would exercise conversion rights for the purpose of acquiring a controlling position. At the very

[7] The loan agreements may provide that certain action may be taken with the consent of the holders of a stated percentage of the issue, but this does not call for a continuation of the original cooperative activity, and in any event these actions are associated with the debt rather than the equity aspects of the transaction.

[8] As Rule 13d–5(a)(2)(vii) now reads, a "group" qualifies for use of Form 13D–5 only if the securities were acquired in a Section 4(2) transaction. We assume this refers only to the securities that the group was formed to acquire and not to the securities previously owned by the individual members of one recent amendments to Regulation 13D have group that are presumed to be owned by Rule 13d–6(b). It would be helpful if the Commission could confirm that this reading is correct.

* This outline does not consider the question of the legality of these amendments, which was discussed in The New York Clearing House Association's Memorandum of Comments dated December 15, 1975 in response to Release No. 34–11,616.

** Proposed Rule 13f–1 provides that an institutional investment manager may rely on the most recent list of "Section 13(f) securities" published by the Commission. Congress added the statutory requirement that the Commission furnish such a list after institutional investors explained that compliance would be seriously complicated in its absence.

least, a person qualified to file a short form notice under Rule 13f–5, i.e., a person assumed not to have the purpose of acquiring control, should be exempt from the requirement under Rule 13d–3(d) (1) to deem securities to be outstanding which are subject to conversion or option rights.

The start-up costs required to establish a computerized reporting system would be substantially increased if the system is required to cover (i) a decentralized trust operation involving a bank with a large branch system, (ii) pledged securities or (iii) securities held by foreign branches and affiliates. The costs associated with the last two items are discussed below.

In addition to these start-up costs, there will be significant ongoing operations costs required to comply with the Regulation 13D reporting requirements. A bank's holdings in each of thousands of securities must be continuously reviewed and each report filed with the Commission must be updated on a quarterly basis.

(b) Pledged Securities Should Not Be Classified as "Beneficially Owned" until Such Time as the Pledgee Exercises Its Right to Vote Such Securities. It would be inordinately expensive, as well as misleading, for banks and their non-banking subsidiaries to create a reporting system that automatically includes all securities pledged to secure loans as to which there exists an uncured default of more than thirty days. Banks generally do not have any centralized information system with respect to aggregate holdings of pledged securities, and it would be a major undertaking to create either a computer or manual listing of all such securities. Even if a bank developed a computer program for aggregate holdings, it could not determine the existence of defaults under loan agreements or whether such defaults are uncured for more than thirty days. A manual input system as to such facts, extending throughout the entire commercial department of each bank, will also have to be created, which will require very substantial time of bank officers and counsel to implement and maintain. The expense of creating a manual mechanism for reporting all pledged securities has been estimated by one bank to cost $500,000. The operations of a number of major banks are so extensive that estimates of the cost of reporting pledged securities are not feasible. For example, one major bank makes secured loans through 267 domestic branches, 209 foreign branches (in over 100 counties) and 374 offices of foreign banking subsidiaries, and, in addition, a domestic finance company affiliate makes secured loans through approximately 200 offices.

Banks and their non-banking subsidiaries frequently take no action to accelerate loans or foreclose on pledged securities in cases in which defaults exist for periods in excess of 30 days. Inasmuch as the pledgee may never vote the pledged securities, there is no justification for the substantial expense required to report such securities as beneficially owned prior to the exercise of voting authority.

(c) Application of Regulation 13D to Securities Held in Investment Accounts at Foreign Branches and Subsidiaries of Commercial Banks Would Not Provide Meaningful Additional Disclosure but Would Substantially Increase the Cost of Creating a Compliance System. Securities held in investment accounts at foreign branches and subsidiaries of commercial banks are insignificant in comparison to the banks' domestic investment account holdings. The reporting of such foreign holdings, however, would substantially increase the expense of creating a computerized compliance system. Estimates by one major bank, with only a small number of foreign offices, of the expenditures to create the necessary computerized reporting system would exceed $1,000,000.

The potential costs involved are extremely high because (i) the securities held in investment accounts at foreign branches and affiliates are only infrequently included in any computer system and (ii) even where a system has been established, it is frequently not compatible with the bank's main computer operations. The cost of creating the integrated computer system will greatly increase for commercial banks having investment accounts at a much larger number of branches and affiliates.

Banks with branches or affiliates in certain countries could not comply with Regulation 13D without violating the laws of their host countries. The laws of a number of countries would prohibit the disclosure of any individual's holding, whether or not it exceeded 5 percent of the outstanding shares, and Swiss law may prohibit the disclosure of the aggregate holdings of a Swiss affiliate of a United States bank.

(d) Regulation 13D Will Require Computer Runs on Every Business Day to Determine if at Any Point a Bank's Aggregate Holdings Exceed 5 percent. Although the revised Regulation permits banks and certain other institutional investors to file the short form notice (Form 13D–5) on a quarterly basis, a bank will be required to determine whether its aggregate holdings of each security exceed 5 percent as of each business day during the quarter. A daily computer run will be required to make this determination. It has been estimated that such daily computer runs would involve several hours of operation on a major computer, which on an annual basis would cost in the area of $100,000 for many banks.

(e) Retroactive Application of Regulation 13D Amendments Would Greatly Increase Costs of Compliance and Disregards Clear Legislative Intent and Judicial Decisions. The amendemnts to Regulation 13D require the aggregation of the holdings of unrelated trust accounts (although they frequently have conflicting investment strategies) and expand the definition of beneficial ownership. As a result, retroactive application of these amendments would require major banks to make reports on numerous securities in which their "beneficial ownership", as that phrase is now defined, exceeded 5 percent prior to the effectiveness of the amendments. The Commission may not have intended, however, to apply the amendments on a retroactive basis because such an application would be contrary to Congress' intention in enacting the Williams Act and to judicial precedent.

Reporting on these pre-existing holdings alone would involve aggregate filing fees for some banks in excess of $15,000. More significantly, it would require substantial time of bank personnel and legal counsel to prepare the short form notices. In preparing reports on pre-existing holdings, it would also be necessary to examine each account in which the revelant securities are held to determine if the bank "acquired such securities in the ordinary course of business and not with the purpose nor with the effect of changing or influencing the control of the issuer, nor in connection with or as a participant in any transaction having such purpose or effect * * *." This substantial effort must be made merely to determine qualification for use of the short form.

A bank could acquire securities "in connection with" a transaction having the effect of changing control, even though the bank's role in such charge is non-existent or totally passive. For example, a bank could be appointed the trustee of a trust containing only a few shares of a company in connection with the disposition of control by the founder, or a bank could receive shares of a company in fiduciary accounts in connection with the spin-off of that company's shares by its former parent.

(f) A Long Form Schedule 13D Is Not Feasible for Reporting by Banks, but the Regulation as Adopted Would Make the Short Form 13D–5 Unavailable in Numerous Situations. It is virtually impossible for a commercial bank to file a full Schedule 13D in connection with securities held in numerous trust accounts. A full Schedule 13D requires substantial information concerning every person "on whose behalf the acquisition has been effected" and other persons who are known to have an "economic interest" in the securities. When a bank holds securities in numerous separate trust accounts, there will frequently be thousands of persons with respect to whom information would be required. The cost and effort involved in any meaningful attempt by a bank to supply this information would be enormous, and, irrespective of the effort and cost, the information could frequently not be obtained.

Notwithstanding the practical impossibility of a full Schedule 13D filing by banks and their parent holding companies, certain provisions of the Regulation make the alternative short form 13D–5 unavailable in a number of situations. A parent bank holding company would be required to use a full Schedule 13D if one share of a security for which a report was required were beneficially owned by a foreign bank subsidiary (which is not a bank under Section 3(a)(6) of the 1934 Act) or many non-banking subsidiaries, domestic or foreign. The full Schedule 13D would also be required if one share had been pledged to secure a 30-day defaulted loan made by a foreign bank subsidiary or a domestic non-banking subsidiary, such as a finance company. Finally, the full Schedule would be required unless each share could meet the highly subjective test of being acquired without "the purpose nor with the effect of changing or influencing the control of the issuer, nor in connection (there) with * * *."

Impossibility of Meeting August 31, 1977 Effective Date Even if Necessary Changes Are Made. Even if the Commission were to agree to make the changes discussed above, it is impossible for the commercial banking industry, despite its best efforts, to meet the August 31, 1977 effective date for the amendments to Regulation 13D. Furthermore, in view of the great expense that will result from efforts to comply with such amendments even at a much later date, it is requested that the effective date be suspended for banks and other institutional investors until a study by the Commission can be completed as to what, if any, significant information would not be reported under Rule 13f–1. In order to complete such study effectively, the Commission should have the benefit of a full cycle of reporting under Rule 13f–1.

SECURITIES AND EXCHANGE COMMISSION

ENERGY POLICY AND CONSERVATION

Oil and Gas Producers—Financial Accounting Standards

V42I173 SEP 7 77 UMI

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 210]

[Release Nos. 33-5861, 34-13910, 35-20158]

ACCOUNTING PRACTICES—OIL AND GAS PRODUCERS—FINANCIAL ACCOUNTING STANDARDS

Proposed Amendments

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: This release is a rulemaking proposal which would amend the Commission's regulations to incorporate certain financial accounting and reporting standards required by the Energy Policy and Conservation Act, Pub. L. 94-163 (the "EPCA"), to be developed by December 22, 1977. The Commission is proposing these rules pursuant to authority granted it by the EPCA and the accounting practices required to be developed will be applicable to persons engaged in the production of oil and gas who will be required under the EPCA to file reports with the Department of Energy, including those who are not subject to the filing requirements of the Federal securities laws. The amendments are proposed to place the Commission in a position to adopt by December 22, 1977, financial accounting and reporting standards for oil and gas producing activities. The proposed amendments are the same as the standards contained in the proposed Statement of Financial Accounting Standards, "Financial Accounting and Reporting by Oil and Gas Producing Companies," issued on July 15, 1977, by the Financial Accounting Standards Board.

DATE: Comments should be submitted on or before October 14, 1977.[1]

ADDRESS: Comments should refer to File S7-715 and should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol St., Washington, D.C. 20549. All comments will be available for public inspection.

FOR FURTHER INFORMATION CONTACT:

Richard C. Adkerson, Office of the Chief Accountant, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 (202-755-1671).

SUPPLEMENTARY INFORMATION: For purposes of developing a reliable energy data base related to the production of crude oil and natural gas, the EPCA requires the Commission to assure the development by December 22, 1977, and observance of accounting practices to be followed by persons engaged in the production of crude oil or natural gas in the United States. The Act authorizes the Commission to prescribe rules with respect to the accounting practices to be developed pursuant to the Act or to make effective by recognition, or by other appropriate means indicating a determination to rely on, accounting practices developed by the Financial Accounting Standards Board if the Commission is assured that such practices will be observed to the same extent as would result if the Commission had prescribed such practices by rule. The FASB, the private sector body responsible for establishing financial accounting and reporting standards, has recently published an exposure draft of a proposed Statement of Financial Accounting Standards (the "FASB Exposure Draft") entitled "Financial Accounting and Reporting by Oil and Gas Producing Companies." The FASB Exposure Draft would require oil and gas producing companies to follow a form of the successful efforts method of accounting. This release proposes amendments to Regulation S-X (17 CFR Part 210) to incorporate the FASB's proposed standards as rules of the Commission.

The Commission's proposal of these amendments is not indicative of any change in its policy regarding its relationship with the FASB. The timing of this action is necessitated solely because of the need for the Commission to ensure that it can comply with the deadline imposed by the EPCA in the unlikely event the FASB does not adopt final standards by December 22, 1977.

BACKGROUND

In Accounting Series Release No. 150 (39 FR 1260), the Commission issued a statement of its policy on the establishment and improvement of accounting principles and practices. The policy provides that the Commission will continue to look "* * * to the private sector for leadership in establishing and improving accounting principles and standards through the FASB with the expectation that the body's conclusions will promote the interest of investors * * *"

The EPCA requires the Commission to assure the development of accounting practices to be followed in the preparation of accounts by persons engaged in the production of crude oil or natural gas in the United States. A deadline of December 22, 1977, was established for the development of these accounting practices.

The EPCA explicitly recognizes the Commission's policy with respect to the FASB. The Act provides that the Commission is authorized "* * * to prescribe rules applicable to persons engaged in the production of crude oil or natural gas, or make effective by recognition, or by other appropriate means indicating a determination to rely on, accounting practices developed by the Financial Accounting Standards Board, if the Securities and Exchange Commission is assured that such practice will be observed by persons engaged in the production of crude oil or natural gas to the same extent as would result if the Securities and Exchange Commission had prescribed such practices by rule * * *." The EPCA further provides that the Commission shall afford interested persons an opportunity to submit written comment with respect to whether the Commission should exercise its discretion to recognize or otherwise rely on such accounting practices developed by the FASB.

In anticipation of the enactment of the EPCA, the FASB added to its technical agenda in October, 1975, a project entitled "Financial Accounting and Reporting in the Extractive Industries." In connection with that project the FASB appointed a task force of 18 persons to advise it in preparing a Discussion Memorandum analyzing issues related to this project. The staff of the Commission prepared part of one of the chapters in the Discussion Memorandum to discuss certain issues relating to the SEC's repsonsibilities under the EPCA. The Discussion Memorandum was issued on December 23, 1976.

The Commission in Securities Act Release No. 5801 (42 FR 8237) called attention to the publication of the FASB Discussion Memorandum and encouraged interested parties to comment on the issues presented therein and to participate in the FASB's public hearing on this project. In that release the Commission indicated that "* * * consistent with its policy most recently expressed in Accounting Series Release No. 150, (the Commission) contemplates that the Financial Accounting Standards Board will be providing the leadership in establishing financial accounting principles and standards for producers of oil and gas." The FASB received 140 position papers, letters of comments, and outlines in response to this Discussion Memorandum and held a public hearing on this project on March 30 and 31 and April 1 and 4, 1977. Thirty-nine presentations were made at the hearing.[2]

The Commission has followed closely the deliberations of the FASB in connection with this project. A member of the Commission's staff served as an observer of the FASB's task force. The Commission's staff received and reviewed all written responses to the FASB Discussion Memorandum, and a member of the staff of the Commission attended the FASB public hearing. Since the public hearing, an active liaison between the FASB and the Commission has been maintained to exchange views on different issues involved in the project.

PURPOSE OF THE RELEASE

This release is issued for two purposes: (1) To propose amendments pursuant to the EPCA which would be applicable to persons filing reports with the Federal Energy Administration[3] and (2) to propose concurrently amendments pursuant to the Federal securities laws. These proposed rules would incorporate the provisions of the FASB Exposure Draft.

The Commission does not generally adopt statements of the FASB as its rules. It is proposing rules in this case to ensure that it can comply with its responsibilities under the EPCA. The EPCA provides that the Commission can extend the December 22, 1977, deadline for the development of the accounting practices to allow for a meaningful comment period with respect to whether it should determine to rely on the accounting practices promulgated by the FASB. The FASB has informed the Commission that it expects to issue a final standard prior to December 22, 1977. However, in the event that the FASB does not adopt a final standard prior to December 22, 1977, the Commission will be in a position to adopt the proposed standards, revised as it considers appropriate on the basis of comments submitted in response to this release and to the FASB Exposure Draft.

In this release, it is the intention of the Commission to propose rules which are the same as the provisions of the FASB Exposure Draft. The provisions of the Exposure Draft have been rearranged to facilitate adoption as rules of the Commission. Comments are specifically requested on any matters where these rearrangements resulted in possible deviations from the provisions of the FASB Exposure Draft.

DISCLOSURE MATTERS

The proposed rules do not include the provisions of the FASB Exposure Draft (paragraphs 42-55) pertaining to disclosure of financial and operating data. The EPCA requires that oil and gas producers report to the Federal Energy Administrator (the reporting responsibilities under the EPCA have been since assigned to the Department of Energy) certain financial and operating data, some of which are similar in many respects to those proposed for disclosure in financial statements by the FASB. The Commission in Securities Act Release No. 5837 (42 FR 33135) requested comments from interested parties relating to the reporting of these financial and operating data. In that release, the Commission also indicated that it is considering revising its disclosure requirements related to these types of data in filings under the Federal securities laws. Comments on that release were due August 12 1977.

The Commission intends to propose rules relating to reporting these supplemental financial and operating data after reviewing the responses to its request for comments in Securities Act Release No. 5837. In connection with the development of these reporting requirements, the Commission will consider and coordinate its proposed requirements with those set forth in the FASB Exposure Draft.

COMMENTS TO FASB

The Commission encourages all interested parties to submit comments directly to the FASB in response to the Exposure Draft. Copies of the Exposure Draft may be obtained from the FASB's Publications Division at the address below. Comments should be submitted in writing, received by September 22, 1977, and addressed to:

Financial Accounting Standards Board, File Reference 1015, High Ridge Park, Stamford, Conn. 06905.

In accordance with its usual procedures, the Commission will receive and review copies of all such submissions to the FASB, and it will not be necessary for those responding to the FASB to provide copies of their responses to the Commission. Interested parties may, of course, submit comments or additional comments directly to the Commission. Copies of the comment letters in response to the FASB Exposure Draft provided to the Commission will become part of the Commission's public record for this rulemaking proposal.

IMPACT ON COMPETITION

Section 23(a)(2) of the Securities Exchange Act, amended, requires that "[t]he Commission, in making rules and regulations pursuant to any provisions of this title, shall consider among other matters the impact any such rule or regulation would have on competition. The Commission shall not adopt any such rule or regulation which would impose a burden on competition not necessary or appropriate in furtherance of the purposes of this title."

Many of those who provided written submissions in response to the FASB Discussion Memorandum and who made oral presentations at the FASB public hearing stated that adoption of the successful-efforts method of accounting could have an impact on competition in the oil and gas producing industry. Many proponents of the full-cost method of accounting indicated one effect of mandating the successful-efforts method would be that the less established oil and gas producing companies would have difficulties in obtaining capital to finance their operations, because these companies would generally report lower earnings (and perhaps losses) and lower stockholders' equity (and perhaps deficits) than if the full-cost method were followed. The full-cost proponents generally believe that the exploration activities of the smaller companies would be limited and that the lower level of exploration by these companies, which may be offset somewhat by exploration activities of the larger companies, would not be in accord with the current national energy policy of encouraging domestic production of oil and gas.

Others in their submissions to the FASB stated that the adoption of any method of accounting would have little, if any, effect on the ability of oil and gas producing companies to raise capital to finance their exploration activities. The FASB has indicated that it has considered both of these positions. The following was included in the "Bases for Conclusions" section of the FASB Exposure Draft:

> In the Board's judgment, the evidence in support of either position is inconclusive. Some empirical studies of capital market behavior seem to show that securities prices are affected little, if at all, by changes in accounting methods. Those studies conclude that the market takes into account the differences in accounting methods used by different companies. Those studies seem to suggest that companies' ability to raise capital would not be affected by a proscription of the full cost method (or, for that matter, of the successful efforts method). Other studies, however, reach exactly the opposite conclusion. They seem to show that securities prices are affected by the method of accounting used.
>
> The contradictory conclusions of those studies and their possible implications are discussed in considerable depth in "Tentative Conclusions on Objectives of Financial Statements of Business Enterprises," which was issued by the Board in December 1976. A number of specific studies are cited in Chapter 2, "Investors and Creditors," of "Tentative Conclusions"; additional studies are identified in the bibliography of the extractive industries Discussion Memorandum. Chapter 2 of "Tentative Conclusions" discusses both the traditional view of investors' and creditors' information needs (which concentrates on analysis of individual securities and enterprises that issue them) and the more recent capital market theory (which concentrates on portfolios and the extent to which individual securities increase or decrease the level of risk of a portfolio). An appendix to "Tentative Conclusions" provides an even more technical discussion of recent capital market theory.
>
> In regard to the question of companies' ability to raise capital, the Board has considered the studies discussed in "Tentative Conclusions" and in the Discussion Memorandum, the evidence put forth by advocates of both full costing and successful efforts costing, the written submissions and oral testimony in response to the Discussion Memorandum, and the interviews referred to in paragraph 85(a) (of the FASB Exposure Draft). In the Board's judgment, the claims that full costing enhances a company's ability to obtain capital and that successful efforts costing inhibits that ability have been neither demonstrated nor refuted conclusively.
>
> Moreover, in the Board's view an accounting method should not be mandated by the Board with the intention of influencing investors' decisions, regardless of how socially acceptable or economically desirable the expected results might be perceived by some. Financial accounting should be evenhanded and attempt to report the results of business decisions as nearly as those results can be determined. The Board does not believe that it is feasible to design (and continuously redesign) accounting standards in an attempt to foster changing perceptions of national economic goals. To do so would, all too often, lessen the effectiveness of financial statements in reporting on the financial affairs of an enterprise and would, in the Board's opinion, not be in the public interest.

---

[1] However, comments on the FASB Exposure Draft are due September 22, 1977. See the discussion below at "Comments to FASB."

[2] Transcripts of the public hearing and copies of the response to the FASB Discussion Memorandum are available for inspection or purchase from the Financial Accounting Standards Board, High Ridge Park, Stamford, Conn. 06905.

[3] Section 505(a) of EPCA amends the Energy Supply and Environmental Coordination Act of 1974 by adding a provision that the Federal Energy Administrator (in the future the Department of Energy) require by rule" * * * that persons engaged, in whole or in part, in the production of crude oil or natural gas—(A) Keep energy information in accordance with the accounting practices developed pursuant to Section 503 of the Energy Policy and Conservation Act, and (B) Submit reports with respect to energy information kept in accordance with such practices."

V 42 I 173 SEP 7 77 UMI

The Commission has reviewed the submissions to the FASB concerning the potential impact on competition resulting from the proposed selection of a method of accounting. Those wishing to provide additional comments on the impact that the proposed rules would have on competition are requested to submit such comments to the Commission.

COMMISSION ACTION

The Commission hereby proposes to amend 17 CFR Part 210 by the addition of new § 210.3–18 as presented below:

PART 210—FORM AND CONTENT OF FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, AND INVESTMENT COMPANY ACT OF 1940

§ 210.3–18 Financial accounting and reporting for oil and gas producing activities.

This section prescribes financial accounting and reporting standards for registrants of the Commission, which are engaged in oil and gas producing activities, in filing registration statements and reports under the Federal securities laws and for all persons engaged, in whole or in part, in the production of crude oil or natural gas in the United States in filing reports with the Department of Energy pursuant to section 11(c) of The Energy Supply and Environment Coordination Act of 1974, as amended by section 505 of The Energy Policy and Conservation Act of 1975, except for such activities of a regulated oil and gas producing company that are subject to individual-company-cost-of-service ratemaking.

(a) *Definitions.* The following definitions apply to the terms listed below as they are used in this rule:

(1) *Oil and gas producing activities.* Such activities include:

(i) The search for oil and gas in their natural states and original locations.

(ii) The acquisition of property rights or properties for the purpose of further exploration and/or for the purpose of removing the oil and gas from existing reservoirs on those properties.

(iii) The construction, drilling and production activities necessary to retrieve oil and gas from its natural reservoirs.

(iv) The acquisition, construction, installation, and maintenance of field gathering and storage systems.

These standards are not being applied to:

(i) The transporting, refining, and marketing of oil and gas, except for the transportation within the original production field for gathering or storage purposes.

(ii) The extraction of hydrocarbons from shale, tar sands or coal.

(2) *Proved reserves.* Those quantities of crude oil, natural gas, and natural gas liquids which, upon analysis of geologic and engineering data, appear with reasonable certainty to be recoverable in the future from known oil and gas reservoirs under existing economic and operating conditions. Proved reserves are limited to those quantities of oil and gas which can be expected, with little doubt, to be recoverable commercially at current prices and costs, under existing regulatory practices and with existing conventional equipment and operating methods. Current prices include consideration of changes in existing prices provided by contractual arrangements, by law, or by regulatory agencies, where applicable; and for changes in prices for gas to be produced subsequent to termination or expiration of existing contracts, which latter prices should be based on current prices plus escalation for similar production subject to the entities' recent contracts. Depending upon their status of development, such proved reserves are subdivided into "proved developed reserves" and "proved undeveloped reserves."

(3) *Proved developed reserves.* Reserves which can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms for primary recovery should be included as "proved developed reserves" only after testing by a pilot project or after the operation of an installed program has confirmed through production response that increased recovery will be achieved.

(4) *Proved undeveloped reserves.* Reserves which are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for recompletion. Reserves on undrilled acreage shall be limited to those drilling units offsetting productive units, which are virtually certain of production when drilled. Proved reserves for other undrilled units can be claimed only where it can be demonstrated with certainty that there is continuity of production from the existing productive formation. Under no circumstances should estimates for proved undeveloped reserves be attributable to any acreage for which an application of fluid injection or other improved recovery technique is contemplated, unless such techniques have been proved effective by actual tests in the area and in the same reservoir.

(5) *Proved properties.* Properties with proved reserves.

(6) *Unproved properties.* Properties with no proved reserves.

(7) *Field.* An area consisting of a single reservoir or multiple reservoirs all grouped on or related to the same individual geological structural feature and/or stratigraphic conditions. There may be two or more reservoirs in a field which are separated vertically by intervening impervious strata, or laterally by local geologic barriers, or by both. Reservoirs that are associated by being in overlapping or adjacent fields may be treated as a single or common operational field. The geological terms "structural feature" and "stratigraphic condition" are intended to identify localized geological features as opposed to the broader terms of basins, trends, provinces, plays, areas-of-interest, etc.

(8) *Reservoir.* A porous and permeable underground formation containing a natural accumulation of producible oil or gas that is confined by impermeable rock or water barriers and is individual and separate from other reservoirs.

(9) *Exploratory well.* A well drilled outside a proved area, or within a proved area but to a previously untested horizon, so that its purpose is to determine whether oil or gas reserves exist rather than to develop proved oil or gas reserves discovered by previous drilling. Exploratory wells include (i) A well located on a structural feature or other type of trap that previously has not produced oil or gas (a "new field wildcat"); (ii) a well located to explore for a new pool on a structural feature or other type of trap already producing oil or gas but outside the known limits of the producing area (a "new pool wildcat"); (iii) a well located within the productive area of a pool or pools already partly or wholly developed but drilled below the deepest productive pool to explore for deeper unknown prospects (a "deeper pool test") or drilled above a productive pool to explore for shallower unknown prospects (a "shallower pool test"); and (iv) a well located and drilled with the expectation of extending for a considerable distance the productive area of a partly developed pool (an "outpost or extension test").

(10) *Development well.* A well drilled within the proved area of an oil or gas reservoir to the depth of a stratigraphic horizon known to be productive for the purpose of extracting proved oil or gas reserves.

(b) *Costs to be capitalized.* Assets involved in oil and gas producing activities, the costs of which are to be capitalized when incurred, are broadly defined as follows:

(1) *Mineral interests in properties.* Including (i) fee ownership or a lease, concession or other contractual interest representing the right to extract oil or gas subject to such terms as may be imposed by the conveyance of that interest; (ii) royalty interests, production payments payable in oil or gas, and other nonoperating interests in properties operated by others; and (iii) agreements with foreign governments or authorities under which an enterprise participates in the operation of the related properties or otherwise serves as "producer" of the underlying reserves (as opposed to being an independent purchaser, broker, dealer, or importer). Properties do not include supply agreements or contracts that represent the right to purchase, rather than extract, oil and gas.

(2) *Wells and related equipment and facilities.* The costs of which include those incurred to (i) Drill and equip those exploratory wells that have found proved reserves (other than costs of stratigraphic or test wells, which are charged to expense when incurred) and (ii) obtain access to proved reserves and

provide facilities for extracting, treating, gathering, and storing the oil and gas, including the drilling of development wells, whether successful or unsuccessful.

(3) *Support equipment and facilities used in oil and gas producing.* Items such as seismic equipment, drilling equipment, construction and grading equipment, vehicles, repair shops, warehouses, supply points, camps, and division, district, or field offices.

(4) *Uncompleted wells, equipment, and facilities.* The costs of which include those incurred to (i) drill and equip wells that are not yet completed (other than the costs of stratigraphic or test wells, which are charged to expense when incurred) and (ii) acquire or construct equipment and facilities that are not yet completed and installed.

(c) *Assessment of unproved properties.* Unproved properties shall be assessed periodically (but at least once a year) to determine whether they have been impaired. If the results of the assessment indicate an impairment, a loss shall be recognized by providing a valuation allowance. Impairment of individual unproved properties whose acquisition costs are relatively significant shall be assessed on a property-by-property basis, and an indicated loss shall be recognized by providing a valuation allowance. When an enterprise has a relatively large number of unproved properties whose acquisition costs are individually insignificant, the amount of loss to be recognized and the amount of the valuation allowance needed to provide for impairment of those properties may be determined either in the aggregate or for groups of properties on the basis of the experience of the enterprise and other information.

(d) *Surrender or abandonment of properties.* When an unproved property is surrendered, abandoned, or otherwise deemed worthless, capitalized acquisition costs relating thereto shall be charged against the related allowance for impairment to the extent an allowance has been provided; if the allowance previously provided is inadequate, a loss shall be recognized. Normally, no gain or loss shall be recognized if only an individual well or individual item of equipment is abandoned or retired or if only a single lease or other part of a group of proved properties constituting the amortization base is abandoned or retired as long as the remainder of the property or group of properties continues to produce oil or gas. Instead, the asset being abandoned or retired shall be deemed to be fully amortized, and its costs shall be charged to accumulated depreciation, depletion, or amortization. When the last well on an individual property (if that is the amortization base) or group of properties (if amortization is determined on the basis of an aggregation of properties with a common geological structure) ceases to produce and the entire property or property group is abandoned, gain or loss shall be recognized. Occasionally, the partial abandonment or retirement of a proved property or group of proved properties or the abandonment or retirement of wells or related equipment or facilities may result from a catastrophic event or other major abnormality. In those cases, a loss shall be recognized at the time of abandonment or retirement.

(e) *Amortization of capitalized costs.* (1) Capitalized acquisition costs of proved properties shall be amortized using the unit-of-production method on the basis of total estimated units of proved oil and gas reserves. (2) Capitalized costs of exploratory wells that have found proved reserves and capitalized development costs shall be amortized using the unit-of-production method on the basis of total estimated units of proved developed reserves. However, costs of equipment or facilities whose useful life is shorter than the productive life of the related oil and gas reserves shall be depreciated by an appropriate method over the estimated useful life of the equipment or facility. Amortization, using the unit-of-production method as required by subparagraphs (1) and (2) of this paragraph, may be computed either on property-by-property basis or on the basis of some reasonable aggregation of properties with a common geological structural feature or stratigraphic condition, such as a reservoir or field. For those properties or groups of properties containing both oil reserves and gas reserves, the units of oil and gas used to compute amortization shall be converted to a common unit of measure on the basis of their approximate relative energy content. Unit-of-production amortization rates shall be revised periodically (but at least once a year) to reflect changes in estimates of reserves and changes in capitalized costs; those revisions shall be accounted prospectively as changes in accounting estimates. Estimated dismantlement and abandonment costs and estimated residual salvage values shall be taken into account in determining amortization and depreciation rates.

(f) *Costs to be charged to expense as incurred.* Some costs incurred in oil and gas producing activities do not result in acquisition or betterment of an asset and, therefore, shall be charged to expense. Examples include geological and geophysical costs, the costs of carrying and retaining undeveloped properties, and the costs of drilling nonproducing exploratory wells. The costs of drilling an exploratory well that is drilled solely to obtain geological information and that is not intended to be completed as a producing well (sometimes called a stratigraphic or test well) shall be charged to expense when incurred. The costs of drilling all other exploratory wells shall be capitalized pending determination of whether proved reserves are found. If proved reserves are found, the capitalized drilling costs relating thereto become part of the cost of the enterprise's wells and related equipment and facilities. If proved reserves are not found, the capitalized drilling costs relating thereto, net of any salvage value, shall be charged to expense. The determination of whether proved reserves are found in usually made on or shortly after completion of drilling the well, and the capitalized costs shall either be charged to expense or reclassified as part of the cost of the enterprise's wells and related equipment and facilities at that time. Occasionally, however, determination of whether the well has found proved reserves cannot be made at the time drilling is completed. Costs associated with such an exploratory well on which drilling has been completed shall not normally be carried as an asset for more than one year following completion of drilling; after that year has passed, the costs of that well and the related property shall be presumed to be impaired and, therefore, a loss shall be recognized. In unusual circumstances, however, even though determination of whether proved reserves have been found cannot be made after one year has passed, evidence of the existence of commercially recoverable quantities of oil and gas may be so persuasive that the presumption of impairment is overcome. In those circumstances, the exploratory drilling costs and related property acquisition costs shall continue to be carried as assets. Thereafter, the need to recognize a loss shall be assessed periodically (but at least once a year), and the costs shall continue to be carried as assets. Thereafter, the need to recognize a loss shall be assessed periodically (but at least once a year), and the costs shall continue to be carried as assets, only if the presumption of impairment is refuted.

(g) *Mineral property conveyances and related transactions.* (1) Certain transactions, sometimes referred to as conveyances, are in substance borrowings repayable in cash or its equivalent and shall be accounted for as borrowings. The following are examples of such transactions:

(i) Enterprises seeking supplies of oil or gas sometimes make cash advances to operators to finance exploration in return for the right to purchase oil or gas discovered. Funds advanced for exploration that are repayable by offset against purchases of oil or gas discovered, or in cash if insufficient oil or gas is produced by a specified date, shall be accounted for as a receivable by the lender and as a payable by the operator.

(ii) Funds advanced to an operator that are repayable in cash out of the proceeds from a specified share of future production of a producing property, until repaid in full, free and clear of all expenses associated with operation of the property, plus interest at a specified or determinable rate, shall be accounted for as a borrowing. The advance is a payable for the recipient of the cash and a receivable for the party making the advance. Such transactions, as well as those described in subparagraph (3) (i) of this paragraph, are commonly referred to as production payments. The two types differ in substance, however, as explained in subparagraph (3) (i) of this paragraph. (2) In the following types of conveyances, gain or loss shall not be recognized at the time of the conveyance:

(i) A transfer of productive assets in exchange for similar productive assets.

V 42 I 173 SEP 7 77 UMI

(ii) A pooling of assets in a joint undertaking intended to find, develop, or produce oil or gas from a particular property or group of properties.

(iii) A sale of part of an interest owned, and there is a substantial uncertainty about the recovery of costs applicable to the retained interest.

(iv) A sale of part of an interest owned, and the seller has a substantial obligation for future performance.

(3) If a conveyance is not one of the types described in subparagraph (2) of this paragraph, gain or loss shall be recognized unless there are other aspects of the transaction that would prohibit such recognition under accounting principles applicable to enterprises in general. In accordance with subparagraphs (1) and (2) of this paragraph, the following types of transactions shall be accounted for as indicated in each example. No attempt has been made to include the many variations of those arrangements that occur, but subparagraphs (1) and (2) of this paragraph shall, where applicable, determine the accounting for those other arrangements as well.

(i) Some production payments differ from those described in Subparagraphs (1)(ii) of this paragraph in that the seller's obligation is not expressed in monetary terms but as an obligation to deliver, free and clear of all expenses associated with operation of the property, a specified quantity of oil or gas to the purchaser out of a specified share of future production. Such a transaction is a sale of a mineral interest for which gain or loss shall not be recognized because the seller has a substantial obligation for future performance. The seller shall account for the funds received as unearned revenue to be recognized as the oil or gas is delivered. The purchaser of such a production payment has acquired an interest in a mineral property that shall be recorded at cost and amortized by the unit-of-production method as delivery takes place. The oil or gas reserve estimates and production data shall be reported as those of the purchaser of the production payment and not of the seller.

(ii) An assignment of the operating interest in an unproved property with retention of a nonoperating interest in return for drilling, development and operation by the assignee is a pooling of assets in a joint undertaking for which the assignor shall not recognize gain or loss. The assignor's cost of the original interest shall become the cost of the interest retained. The assignee shall account for all costs incurred as specified by paragraphs (b) through (f) of this section and shall allocate none of those costs to the mineral interest acquired. If oil or gas is discovered, each party shall report its share of reserves and production.

(iii) An assignment of a fractional operating interest in an unproved property in exchange for a "free well" with provision for joint ownership and operation is a pooling of assets in a joint undertaking by the parties. The assignor shall record no cost for the obligatory well; the assignee shall record no cost for the mineral interest acquired. All drilling, development, and operating costs incurred by either party shall be accounted for as provided in paragraphs (b) through (f) of this section. If the conveyance agreement requires the assignee to incur geological or geophysical expenditures instead of, or in addition to, a drilling obligation, those costs shall likewise be accounted for by the assignee as provided in paragraphs (b) through (f) of this section. If reserves are discovered, each party shall report its share of reserves and production.

(iv) A fractional part of an operating interest may be assigned to effect an arrangement called a "carried interest" whereby the assignee (the carrying party) agrees to defray all costs of drilling, developing, and operating the property and is entitled to all of the revenue from production from the property, excluding any third party interest, until all of the assignee's costs have been recovered, after which the assignor will share in both costs and production. Such an arrangement represents a pooling of assets in a joint undertaking by the assignor and assignee. The carried party shall make no accounting for any costs and revenue until after recoupment (payout) of the carried costs by the carrying party. Subsequent to payment the carried party shall account for its share of revenue, operating expenses, and (if the agreement provides for subsequent sharing of costs rather than a carried interest) subsequent development costs. During the payout period the carrying party shall record all costs, including those carried, as provided in paragraphs (b) through (f) of this section, and shall record all revenue from the property including that applicable to the recovery of costs carried. The carried party shall report as oil or gas reserves only its share of proved reserves estimated to remain after payout, and unit-of-production amortization of the carried party's property cost shall not commence prior to payout. Prior to payout the carrying party's reserve estimates and production data shall include the quantities applicable to recoupment of the carried costs.

(v) A fractional interest in a property may be exchanged for a fractional interest in a property of another party. The purpose of such an arrangement, commonly called a joint venture in the oil and gas industry, often is to avoid duplication of facilities, diversify risks, and achieve operating efficiencies. Such reciprocal conveyances represents exchanges of similar productive assets, and no gain or loss shall be recognized by either party at the time of the transaction.

(vi) In a unitization all the operating and nonoperating participants pool their assets in a producing area (normally a field) to form a single unit and in return receive an undivided interest (of the same type as previously held) in that unit. Unitizations generally are undertaken to obtain operating efficiencies and to enhance recovery of reserves, often through secondary recovery operations. Participation in the unit is generally proportionate to the oil and gas reserves contributed by each. Because the properties may be in different stages of development at the time of unitization, some participants may pay cash and others may receive cash to equalize contributions of wells and related equipment and facilities with the ownership interests in reserves. In those circumstances, cash paid by a participant shall be recorded as an additional investment in wells and related equipment and facilites, and cash received by a participant shall be recorded as a recovery of cost. The cost of the assets contributed plus or minus cash paid or received is the cost of the participant's undivided interest in the assets of the unit. Each participant shall include its interest in reporting estimated reserves and production data.

(vii) When a fractional interest in an unproved property is sold, even though for cash or cash equivalent, substantial uncertainty usually exists as to recovery of cost applicable to the interest retained. Consequently, the amount received shall be treated as a recovery of cost. However, if the sales price exceeds the capitalized cost of the property, gain shall be recognized to the extent of the excess.

(viii) The sale of an entire interest in a proved property that constitutes a separate amortization base is not one of the types of conveyances described in paragraph (g)(2) of this section. The difference between the amount of sales proceeds and the unamortized cost shall be recognized as a gain or loss.

(ix) The sale of a part of a proved property, or of an entire proved property constituting a part of an amortization base, shall be accounted for as the sale of an asset, and a gain or loss shall be recognized, since it is not one of the conveyances described in paragraph (g)(2) of this section. The unamortized cost of the property a part of which was sold shall be apportioned to the interest sold and the interest retained. However, the sale may be accounted for as a normal retirement under the provisions of paragraph (d) of this section with no gain or loss recognized if doing so does not significantly affect the unit-of-production amortization rate.

(x) The sale of the operating interest in a proved property for cash with retention of a nonoperating interest is not one of the types of conveyances described in paragraph (g)(2) of this section. Accordingly, it shall be accounted for as the sale of an asset, and any gain or loss shall be recognized. The seller shall allocate the cost of the proved property to the operating interest sold and the nonoperating interest retained on the basis of the fair values of those interests.

(h) *Income taxes.* Comprehensive interperiod income tax allocation by the deferred method shall be followed for intangible drilling and development costs and other costs incurred that enter

into the determination of taxable income and pretax accounting income in different periods. The excess of statutory depletion over cost depletion for tax purposes shall be accounted for as a permanent difference in the period in which the excess is deducted for income tax purposes.

These amendments shall be effective for financial statements for fiscal years beginning after June 15, 1978, and for interim periods within those fiscal years, although earlier application is encouraged. Accounting changes adopted to conform to the provisions of these amendments shall be made retroactively by restating the financial statements of prior periods. Financial statements for the fiscal year in which these amendments are first applied, and for interim periods of that year, shall disclose the nature of those accounting changes and their effect on income before extraordinary items, net income, and related per share amounts for each period restated.

These amendments are proposed to be adopted pursuant to authority in sections 6, 7, 8, 10 and 19(a) (15 U.S.C. 77f, 77g, 77h, 77j, 77s) of the Securities Act of 1933; sections 12, 13, 15(d), and 23(a) (15 U.S.C. 78l, 78m, 78o(d), 78w) of the Securities Exchange Act of 1934; sections 5(b), 14, and 20(a) (15 U.S.C. 79e, 79n, 79t) of the Public Utility Holding Company Act of 1935 and section 503 (b)(2) (Pub. L. 94-163) of the Energy Policy and Conservation Act of 1975.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 31, 1977.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

INFORMATION AND ASSISTANCE

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Regulation 572]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period Sept. 9–15, 1977. This regulation is needed to provide for orderly marketing of fresh Valencia oranges for the regulation period because of the production and marketing situation confronting the orange industry.

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–3545.

SUPPLEMENTARY INFORMATION: Findings. (1) pursuant to the amended marketing agreement and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of Valencia oranges, as provided in this regulation will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantities of Valencia oranges that may be marketed from District 1, District 2, or District 3 during the specified week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation for the quantities of Valencia oranges that should be marketed during the specified week. The recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors covered in the order. The committee further reports the fresh market demand for Valencia oranges is good.

Average f.o.b. price was $4.47 per carton on 531 cars for the week ended September 1, as compared with $4.58 per carton on 515 cars the previous week.

Track and rolling supplies at 264 cars were up 18 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantities of Valencia oranges which may be handled should be established as provided in this regulation.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information became available upon which this regulation is based and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient. A reasonable time is permitted for preparation for such effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for Valencia oranges and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning such provisions and effective time has been provided to handlers of Valencia oranges. It is necessary, to effectuate the declared policy of the act, to make this regulation effective during the period specified. The committee meeting was held on September 6, 1977.

§ 908.872 Valencia Orange Regulation 572.

(a) Order. (1) The quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period September 9, 1977, through Sept. 15, 1977, are hereby fixed as follows:

(i) District 1: 260,000 cartons;

(ii) District 2: 390,000 cartons;

(iii) District 3: Unlimited.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: September 7, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-26411 Filed 9-7-77;11:30 am]

PART 929—CRANBERRIES GROWN IN THE STATES OF MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW JERSEY, WISCONSIN, MICHIGAN, MINNESOTA, OREGON, WASHINGTON, AND LONG ISLAND IN THE STATE OF NEW YORK

Suspension of Marketable Quantity and Allotment Percentage for Cranberries

AGENCY: Agricultural Marketing Service.

ACTION: Final Rule.

SUMMARY: This document suspends the marketable quantity and the allotment percentage for cranberries for the 1977–78 crop year. Based on a reappraisal of the crop and the demand situation for cranberries it is not necessary to limit the quantity of cranberries to be marketed from the 1977–78 crop to effectuate the declared policy of the act.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: *Findings.* (1) Pursuant to the marketing agreement and Order No. 929 (7 CFR Part 929), regulating the handling of cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), a handling regulation (§ 929.304; 42 FR 21786) was issued prescribing a marketable quantity of 248,604,800 pounds (2,486,048 barrels) of cranberries and an allotment percentage of 95 percent for marketing from the 1977–78 crop. Information now indicates that the 1977–78 crop of cranberries will total about 217,400,000 pounds (2,174,000 barrels). Hence, it

V 42 174
SEP 8 77
UMI

is found that there is no need to limit, pursuant to § 929.49, the quantity of cranberries that may be purchased from or handled on behalf of growers during the crop year September 1, 1977, through August 31, 1978, and that continuance of the regulation limiting the quantity as prescribed by such regulation would not be consistent with the declared policy of the act.

(2) It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure and postpone the effective date of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that this action relieves restrictions on the handling of cranberries.

It is, therefore, ordered that the provisions of § 929.304 (42 FR 21786) are hereby suspended.

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).)

Dated: September 2, 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-26118 Filed 9-7-77;8:45 am]

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Docket No. R–0111]

PART 265—RULES REGARDING DELEGATION OF AUTHORITY

Overseas Branch Applications

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: In order to expedite and facilitate the performance of certain of its functions, the Board of Governors has amended its Rules Regarding Delegation of Authority. This amendment expands the authority of the Secretary or Acting Secretary of the Board to approve on the Board's behalf certain applications to establish branch offices overseas.

EFFECTIVE DATE: August 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Allen F. Goodfellow, Senior Foreign Banking Analyst, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–2523).

SUPPLEMENTARY INFORMATION: Under the existing rule, which this action changes, the Board's Secretary can approve applications by member banks of the Federal Reserve System and corporations operating under sections 25 and 25a of the Federal Reserve Act (Agreement and Edge Act corporations) to establish overseas branches and agencies, but only after the applying organization has first received approval from the Board to establish branches in two or more foreign countries. After several years' experience with the existing rule, the Board has concluded that overseas branch applications may appropriately be approved under delegated authority in the normal case, except where an application represents an organization's initial expansion overseas through a full-service branch. In this regard, a "shell" branch to be established in The Bahamas, Cayman Islands, or other offshore currency center would not be considered a full-service branch and could be approved under delegated authority even if it represented a member bank's first overseas branch. The new rule therefore provides that the Secretary may approve any application to establish an overseas branch or agency, including a "shell" branch, except an organization's application to establish its first overseas full-service branch. This new rule does not change any Board policy regarding approval of applications and, as in the past, the Secretary may approve an application under this rule only if it raises no significant policy issue the Board has not already resolved and if the appropriate Federal Reserve Bank and divisions of the Board's staff recommend approval.

This amendment has been adopted without following the provisions of 5 U.S.C. 553 relating to notice, public participation, and deferred effective date because the change involved is procedural in nature and does not constitute a substantive rule subject to the requirements of that section. The amendment is effective immediately.

Therefore, under the authority of 12 U.S.C. 248(k), 12 C.F.R. Part 265 is amended, effective immediately, by revising paragraph (a)(8) of § 265.2 to read as follows:

§ 265.2 Specific Functions Delegated to Board Employees and Federal Reserve Banks.

* * * * *

(a) The Secretary of the Board (or, in the Secretary's absence, the Acting Secretary) is authorized:

* * * * *

(8) Under the provisions of sections 25 and 25(a) of the Federal Reserve Act and Parts 211 and 213 of this chapter (Regulations K and M), to approve the establishment, directly or indirectly, of a foreign branch or agency by a member bank or corporation organized under section 25(a) (an "Edge" corporation) or operating under an agreement with the Board pursuant to section 25 (an "Agreement" corporation) if all the following conditions are met:

(i) The appropriate Reserve Bank recommends approval.

(ii) The relevant divisions of the Board's staff recommend approval.

(iii) No significant policy issue is raised by the proposal as to which the Board has not expressed its view.

(iv) The application is not one for the applicant's first full-service branch in a foreign country.

* * * * *

Board of Governors of the Federal Reserve System, August 31, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.77-26049 Filed 9-7-77;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 77–CE–17–AD; Amdt. 39–3028]

PART 39—AIRWORTHINESS DIRECTIVES

Beech Models C90, E90, A100, B100, 200 and 200T Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) applicable to certain Beech Models C90, E90, A100, B100, 200 and 200T airplanes which requires a one-time inspection of the cabin door latching mechanism for proper adjustment and readjustment if required. This action will assure proper locking of the cabin door and prevent possible incidents involving loss of cabin pressurization.

DATES: This amendment becomes effective September 12, 1977. Compliance: Required within the next 25 hours time-in-service after the effective date of this AD.

ADDRESSES: Beechcraft Service Instructions No. 0914, applicable to this AD, may be obtained from Beech Aircraft Corp., Commercial Service Department, 9709 East Central, Wichita, Kans. 67201. A copy of the Service Instructions cited above are contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th St., Kansas City, Mo. 64106 and Room 916, 800 Independence Ave. SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

William L. Schroeder, Aerospace Engineer, Engineering and Manufacturing Branch, FAA, Central Region, 601 East 12th St., Kansas City, Mo. 64106; telephone 816–374–3446.

SUPPLEMENTARY INFORMATION: A recent incident involving loss of cabin pressurization on a Beech Model 200 airplane was caused by the cabin entrance door becoming unsealed and allowing cabin pressurization air to leak out around the door. Inspection of the door showed that the latch hooks at the top of the door were incorrectly adjusted allowing them to become disengaged, thereby causing this condition. Loss of cabin pressurization can result in unsafe conditions for occupants and may cause the pilot to have to initiate emergency procedures. Subsequent to its investigation, the manufacturer has determined that the latching mechanism in the cabin door on certain Models C90, E90, A100, B100, 200 and 200T airplanes may have been improperly adjusted during manufacture. As a result, the manufacturer has issued Beechcraft Service Instructions No. 0914, recommending a one-time inspection of the door latch hooks, pins, and latching mechanism for proper adjustment and readjustment if necessary. The FAA has concluded that improperly adjusted door latch hooks, pins and door latching mechanisms are unsafe conditions that may exist in other airplanes of the same type design. Accordingly, an AD is being issued applicable to certain serial numbers of the above mentioned Beech Model airplanes, making compliance with the Service Instructions mandatory. This AD was coordinated with the manufacturer prior to issuance. The FAA has determined that there is an immediate need for a regulation to assure safe operation of the affected airplanes. Therefore, notice and public procedure under 5 U.S.C. 553(b) is impracticable and contrary to the public interest, and good cause exists for making the amendment effective in less than thirty (30) days after the date of publication in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal authors of this document are: William L. Schroeder, Flight Standards Division, Central Region, and John L. Fitzgerald, Jr., Office of the Regional Counsel, Central Region.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

BEECH. Applies to Models C90 (serial numbers LJ–689 through LJ–713), E90 (serial numbers LW–167 through LW–216), A100 (serial numbers B–213 through B–232), B100 (serial numbers BE–10 through BE–22), Model 200 (serial numbers BB–175 through BB–185, BB–187 through BB–193, BB–195 through BB–198, BB–200 through BB–202, and BB–204 through BB–223), and Model 200T (serial numbers BT–1 and BT–2) airplanes certificated in all categories.

Compliance: Required as indicated unless already accomplished.

To assure proper locking of the cabin door and to prevent possible incidents involving loss of cabin pressurization, within the next 25 hours time-in-service after the effective date of this AD, accomplish the following in accordance with Beechcraft Service Instructions No. 0914 or later approved revisions and instructions contained in the applicable airplane mantenance manual:

A. Visually inspect the cabin door latch hooks and pins for proper engagement and adjustment, check the door latch mechanism for over center position when locked, and adjust latch hooks, pins and/or door latch mechanism if necessary.

B. Any equivalent means of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

This amendment becomes effective on September 12, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421 and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); § 11.89, Federal Aviation Regulations (14 CFR 11.89).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Kansas City, Mo., on August 26, 1977.

JOHN E. SHAW,
Acting Director, Central Region.

[FR Doc.77-26067 Filed 9-7-77;8:45 a.m.]

[Docket No. 77–WE–11–AD; Amdt. 39–3029]

PART 39—AIRWORTHINESS DIRECTIVES

McDonnell Douglas Model DC–8–62, –62F, –63, and –63F Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment is being issued to amend airworthiness directive (AD) 77–15–11 to incorporate structural modifications as an alternative closing action for the repetitive inspection requirements in the AD.

DATES: Effective date—September 12, 1977. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: Persons affected by this AD may obtain copies of Douglas DC–8 Service Bulletin 54–58, 57–83, and 57–84 by writing to: McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, Calif. 90846. Attention: L.A. Eisenberg, CI–750, 54–60.

Copies of the service bulletins are contained in the: Rules Docket in Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Jerry J. Presba, Executive Secretary Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009.

SUPPLEMENTARY INFORMATION: AD 77–15–11, Amendment 39–2979 (42 FR 37807), appeared in the FEDERAL REGISTER on July 25, 1977. The AD was issued to require repetitive inspections of the McDonnell Douglas Model DC–8 wing lower forward spar cap, tee doubler, and wing skin, and repair of any cracks found. Since the issuance of the original AD, the manufacturer has designed a new tee doubler and other structural modifications which are designed to prevent the fatigue cracking problems which necessitated this AD. These structural modifications are contained in McDonnell Douglas DC–8 Service Bulletin 57–84. AD 77–15–11 is being amended to include the modifications as an option to the repetitive inspection requirements of the original AD.

Since this amendment provides an alternative method of compliance which relieves the repetitive inspection requirements, and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Everett W. Pittman, Aircraft Engineering Division, and Richard G. Wittry, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Regulations (14 CFR 39.13), Amendment 39–2979 (42 FR 37807), Airworthiness Directive 77–15–11 is amended as follows:

(1) By amending the first sentence of Paragraph (f) to read as follows:

(f) If cracks are found in the wing spar cap and/or wing skin as a result of the inspections of Paragraph (e), repair before further flight in accordance with the provisions of either McDonnell Douglas DC–8 Service Bulletin 57–83, dated April 15, 1977, or Option I of Service Bulletin 57–84, dated August 12, 1977, or later FAA approved revision. * * *

(2) by adding new Paragraphs (g) and (h) as follows:

(g) Airplanes modified in accordance with Option I of McDonnell Douglas DC–8 Service Bulletin 57–84 dated August 12, 1977, or later FAA approved revision are no longer subject to the repetitive inspection requirements of this AD.

(h) If no cracks are found as a result of the inspections of Paragraph (e), operators may rework the airplane in accordance with Option II of McDonnell Douglas Service Bulletin 57–84 dated August 12, 1977, or later FAA approved revision, and may then discontinue the repetitive inspection requirements of this AD for a period not to exceed 15,000 hours time in service after rework. Before accumulating 15,000 hours time in service after the rework, and thereafter at intervals not to exceed 4000 hours time in service, accomplish the inspection requirements of Paragraph (e).

(3) Reidentify the last two paragraphs as (i) and (j).

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354 (a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Amendment 29–2979 became effective July 28, 1977. This amendment 39–3029 becomes effective Sept. 12, 1977.

V 42 174 SEP 8 77 UMI

Issued in Los Angeles, Calif. on August 29, 1977.

HERMAN C. BLISS,
Acting Director,
FAA Western Region.

[Airworthiness Docket No. 77-SW-36; Amdt. 39-3030]

PART 39—AIRWORTHINESS DIRECTIVES

Swearingen Aircraft Corporation Model SA226T, –AT, and –TC Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) to assure that the variable authority nose wheel steering system utilizing a Talley P/N 1399T100–5 or –7 actuator installed on some SA226 series airplanes, will be disconnected in a manner to preclude failures from jeopardizing the operation of the airplane.

DATES: Effective date September 12, 1977. Compliance requires the disconnection of the nose gear steering system within the next 25 hours' in service after the effective date of this AD.

ADDRESSES: Swearingen Service Bulletin SB 32–012 may be acquired from the manufacturer whose address is listed in the AD.

FOR FURTHER INFORMATION CONTACT:

John Swihart, Systems and Equipment Section, ASW–213, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Tex. 76101, Telephone No. 817–624–4911, Ext. 518; or Ramon Gibson, Flight Test Section, ASW–216, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Tex. 76101, Telephone No. 817–624–4911, Ext. 523.

SUPPLEMENTARY INFORMATION: Production SA226 series airplanes delivered after September 1974 and some retrofitted airplanes incorporate a variable authority nose wheel steering system which utilizes a Talley P/N 1399T100–5 or –7 actuator. There have been several incidents of unwanted nose gear steering actuator output, several incidents of locked-up clutches, and a number of incidents involving high actuator back drive torque. Since most of the malfunctions do not provide any early warning, Swearingen believes, and FAA concurs, the variable authority nose gear steering system must be disconnected in a manner which will preclude such failures from jeopardizing the safe operation of the airplane. A modification is being developed by the manufacturer and will be offered to all operators in the near future.

Since this situation affects air safety, notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are John D. Swihart, Jr., Aerospace Engineer, Systems and Equipment Section, Flight Standards Division, and James O. Price, General Attorney, Office of the Regional Counsel, Southwest Region.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new Airworthiness Directive:

SWEARINGEN: Applies to all Model SA226T, -AT, and -TC airplanes incorporating a variable authority nose wheel steering system which utilizes a Talley P/N 1399T100–5 or –7 actuator.

Compliance required within the next 25 hours' time in service after the effective date of this AD, unless already accomplished.

To assure the variable authority nose gear steering system will not jeopardize the safe operation of a Model SA226T, -AT, or -TC airplane, it should be disabled in accordance with Swearingen Aviation Corp. Service Bulletin SB 32–012, dated June 20, 1977, or later FAA approved revision, or an equivalent procedure approved by the Chief, Engineering and Manufacturing Branch, Southwest Region, Federal Aviation Administration, Fort Worth, Tex.

The manufacturer's instructions identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received the referenced document from the manufacturer may obtain copies upon request to Swearingen Aviation Corp., P.O. Box 32486, San Antonio, Tex. 78284. The document may also be examined at the Office of the Regional Counsel, Southwest Region, FAA, 4400 Blue Mound Road, Fort Worth, Tex., and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. A historical file on this AD, which includes the incorporated material in full, is maintained by the FAA at its headquarters in Washington, D.C., and at the Southwest Regional Office in Fort Worth, Tex.

This amendment becomes effective September 12, 1977.

(Sections 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354 (a), 1421, 1423), Section 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Fort Worth, Tex., on August 15, 1977.

PAUL J. BAKER,
Acting Director, Southwest Region.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on June 19, 1967.

[FR Doc.77-25897 Filed 9-7-77;8:45 am]

SUBCHAPTER K—ADMINISTRATIVE REGULATIONS

[Docket No. 15290; Special Federal Aviation Reg. No. 31]

PART 183—REPRESENTATIVES OF THE ADMINISTRATOR

Release of Security Information

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action terminates a special Federal Aviation regulation relating to the prohibition of disclosure of security information, because a subsequent Federal Aviation regulation provides for the prohibition of disclosure of the same type of information covered by the special regulation.

EFFECTIVE DATE: August 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert P. Jones, Regulations Branch, Air Operations, Security Division, Civil Aviation Security Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202–426–8798.

SUPPLEMENTARY INFORMATION:

HISTORY

Special Federal Aviation Regulation No. 31 was adopted effective January 15, 1976 (41 FR 2248). Its purpose was to prohibit the unauthorized disclosure of information in, or obtained in connection with, the reports or records of the Advisory Committee on Airport Security or a report of the Administrator made in his capacity as chairman of that advisory committee. Special Federal Aviation Regulation No. 31 was issued pursuant to section 316(d) of the Federal Aviation Act of 1958 which was added by the Air Transportation Security Act of 1974.

On December 9, 1976, the FAA adopted Part 191—Withholding Security Information From Disclosure Under the Air Transportation Security Act of 1974 (14 CFR Part 191). Under Part 191, which implements section 316(d)(2) of the Federal Aviation Act of 1958, the Director, FAA Civil Aviation Security Service, or his designee, prohibits disclosure of certain security information if, among other things, in his opinion it would "be detrimental to the safety of persons traveling in air transportation or intrastate air transportation." Since, notwithstanding the Freedom of Information Act (5 U.S.C. 552), disclosure of the information described in Special Federal Aviation Regulation No. 31 may be prohibited pursuant to Part 191 by the Director, FAA Civil Aviation Security Service, or his designee, that special regulation is no longer necessary and action is hereby taken to revoke it.

Since this action revokes a regulation which is no longer deemed necessary, I find that notice and public procedure hereon are unnecessary, and good cause exists for making this action effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Robert P. Jones, Regulations Branch, Civil Aviation Security Service, and Richard C. Beitel, Office of the Chief Counsel.

Accordingly, Special Federal Aviation Regulations No. 31 (41 FR 2248) is hereby revoked, effective August 30, 1977.

(Sec 316(d) of the Federal Aviation Act of 1958 (49 U.S.C. 1357(d)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C., on August 30, 1977.

QUENTIN S. TAYLOR,
Acting Administrator.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release SAB–16]

PART 211—INTERPRETATIVE RELEASES RELATING TO ACCOUNTING MATTERS

Subpart B—Staff Accounting Bulletins

STAFF ACCOUNTING BULLETIN No. 16

AGENCY: Securities and Exchange Commission.

ACTION: Publication of Staff Accounting Bulletin.

SUMMARY: This interpretation describes the position of the Commission's staff concerning disclosure to be made by registrants when their financial statements filed with the Commission are potentially affected by the FASB's Exposure Draft, "Financial Accounting and Reporting by Oil and Gas Producing Companies." It is the staff's position that disclosure should include an indication of the estimated general magnitude of the potential impact on earnings and shareholders' equity by registrants whose financial statements would be substantially changed if the proposals presented in the FASB Exposure Draft are adopted.

EFFECTIVE DATE: Immediately.

FOR FURTHER INFORMATION CONTACT:

Richard C. Adkerson, Office of the Chief Accountant, Securities and Exchange Commission, 500 North Capitol St., Washington, D.C. 20549 (202–755–1671).

SUPPLEMENTARY INFORMATION: The statements in the Bulletin are not rules or interpretations of the Commission nor are they published as bearing the Commission's official approval; they represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the Federal securities laws.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 1, 1977.

STAFF ACCOUNTING BULLETIN No. 16

The staff hereby adds Topic 10–I regarding disclosure of the potential impact of the FASB's proposed Statement of Financial Accounting Standards, "Financial Accounting and Reporting by Oil and Gas Producing Companies."

TOPIC 10: MISCELLANEOUS DISCLOSURE

* * * * * *

I. Disclosure Regarding the FASB Exposure Draft, "Financial Accounting and Reporting by Oil and Gas Producing Companies."

Facts. On July 15, 1977, the Financial Accounting Standards Board issued an exposure draft of a proposed Statement of Financial Accounting Standards, entitled "Financial Accounting and Reporting by Oil and Gas Producing Companies" (the "FASB Exposure Draft"). The potential impact of the proposed standards on the financial statements of some registrants is significant. For some registrants, application of the proposed standards may result in net income for current and prior periods being substantially reduced or changed to net losses and shareholders' equity likewise being substantially reduced or changed to a deficit.

The FASB Exposure Draft proposes, among other matters, the following:

1. All companies engaged in oil and gas production would be required to adopt a prescribed form of the successful efforts method of accounting for exploration and development costs.

2. FASB Statement No. 9, "Accounting for Income Taxes—Oil and Gas Producing Companies," would be superseded; and comprehensive interperiod income tax allocation by the deferred method would be required for all exploration and development costs.

3. Accounting treatment is proposed for specific types of mineral property conveyances and various types of related transactions.

4. Accounting changes to conform to the new standards would be made retroactively by restating the financial statements of prior periods.

5. The proposed standards would become effective for financial statements for fiscal years beginning after June 15, 1978.

Question. What disclosure concerning the FASB Exposure Draft should be made in filings with the Commission?

Interpretive Response. The staff believes the following data relating to the FASB Exposure Draft should be disclosed in the footnotes of the financial statements of registrants which would be materially affected if the standards are adopted:

1. A general statement of the existence of the FASB Exposure Draft and its relationship to the registrant's current accounting policies.

2. A statement that the registrant would or may, as appropriate, be required to restate its current and previously issued financial statements, if the provisions of the FASB Exposure Draft are adopted as proposed.

3. A quantification of the general magnitude of the estimated potential effects on reported shareholders' equity and on earnings from applying the proposed provisions of the FASB Exposure Draft.

4. A discussion of significant implications, if any, that adoption of the standards proposed by the FASB would have on the registrant's dividend policy and on its ability to comply with covenants in its debt or other agreements, such as those involving debt/equity ratios and restrictions on additional financing and asset acquisitions.

The staff recognizes the significant data accumulation problems faced by some registrants in estimating the effects of applying the standards proposed by the FASB. In addition, the staff is aware that differences of opinion may exist in interpreting certain provisions of the FASB Exposure Draft and that changes may be adopted by the FASB in its final statement. Nevertheless, the significance of the FASB Exposure Draft to certain registrants' financial statements is such that a general indication of the magnitude of the effects of applying the proposed standards may be required to preclude the possibility of the financial statements being considered misleading.

The staff does not expect the estimates disclosed to be stated as precise amounts. It would consider acceptable descriptions in terms of broad ranges or percentages. Moreover, the staff recognizes that registrants' estimates may be subject to revision based on information obtained in subsequently compiling the data for restating their financial statements, subsequent changes in interpreting the provisions of the FASB Exposure Draft, and changes by the FASB to the proposed standards in its final statement. Disclosure of the estimated impact should include qualifications for these or other matters, as appropriate.

The disclosure discussed at Item 3 above may be made outside the financial statements, such as in Management's Discussion and Analysis of the Summary of Operations. In these cases, the financial statement disclosures (Items 1, 2, and 4) should include a reference to the location in the filing where the Item 3 disclosure is made.

The staff believes that, when practicable, these disclosures should be included in all filings with the Commission which contain financial statements of a registrant, including summarized financial statements in Forms 10–Q. The staff recognizes that, in many cases, compiling the data for the disclosure relating to the magnitude of the estimated impact on net income and shareholders' equity may not be practicable for quarterly filings in 1977. In such cases, registrants should disclose the information described at Items 1, 2, and 4 above and indicate the reasons for not providing the Item 3 information.

The staff believes that registrants should include all the information discussed above in registration statements and annual reports filed with the Commission. Furthermore, the staff believes that registrants will have had sufficient time to compile the data necessary to make all of the disclosures discussed above in quarterly reports filed after December 31, 1977. If developing the information for periodic reports filed with the Commission causes an undue hardship on a registrant, the registrant should discuss its circumstances with the staff.

[FR Doc.77-26162 Filed 9-7-77;8:45 am]

[Release No. 34–13914]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

PART 249b—FURTHER FORMS, SECURITIES EXCHANGE ACT OF 1934

Transfer Agents

AGENCY: Securities and Exchange Commission.

V 42 174 SEP 8 77 UMI

ACTION: Final rule.

SUMMARY: This rule and related form prescribe the procedure to be followed by those transfer agents registered with the Commission in withdrawing from registration. The form is intended to simplify the withdrawal process and the information required by the form will enable the Commission to determine whether it is necessary or appropriate in the public interest, for the protection of investors, or in furtherance of the Securities Exchange Act that the withdrawal be denied, postponed or subject to specific terms and conditions.

EFFECTIVE DATE: October 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Lisa G. Gessow,

Attorney, Division of Market Regulation, Securities and Exchange Commission, 500 North Capitol St., Washington, D.C. 20549, (202-755-8916).

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Securities and Exchange Commission (the "Commission"), pursuant to Sections 2, 17, 17A and 23(a) of the Act (15 U.S.C. 78b, 78q, 78q-1 and 78w(a)), has amended Title 17, Chapter II, Parts 240 and 249b of the Code of Federal Regulations to add §§ 240.17Ac3-1 and 249b.101.

RULE 17Ac3-1

Rule 17Ac3-1 provides that a transfer agent registered with the Commission may withdraw from registration by filing a notice of withdrawal of its transfer agent registration on, and in accordance with the instructions contained in, Form TA-W.[1] Withdrawal from registration will become effective on the sixtieth day after filing of a properly completed Form TA-W unless the Commission takes affirmative action to accelerate, deny or postpone such withdrawal.

The rule further provides that every withdrawal filed pursuant to Rule 17Ac3-1 constitutes a "report" within the meaning of Sections 17 and 32(a) of the Act.

FORM TA-W

Form TA-W has been adopted to simplify the registration withdrawal process. The information required on the Form is intended to enable the Commission to determine whether it is necessary or appropriate in the public interest, for the protection of investors, or in furtherance of the purposes of section 17A that the withdrawal be denied, postponed or subject to specific terms and conditions. The information requested includes the name of the registrant, the address of its principal place of business, the date registrant ceased performing any transfer agent function as defined in the Act, whether the registrant is involved in any legal actions or proceedings or is aware of any potential claims against it,[2] whether there are any unsatisfied judgment or liens against registrant arising out of its performance of transfer agent functions, the names and addresses of any successor transfer agents and whether such successors transfer agents are registered pursuant to the Act, the names and addresses of the persons who will maintain custody or possession of registrant's transfer agent books and records, the address at which such books and records will be located and the reasons for ceasing the performance of transfer agent functions or for otherwise requesting withdrawal of its registration as transfer agent.

STATUTORY BASIS AND COMPETITIVE CONSIDERATIONS

Rule 17Ac3-1 and Form TA-W are adopted pursuant to the Securities Exchange Act of 1934, in particular sections 2, 17, 17A and 23(a) thereof, 15 U.S.C. 78b, 78q, 78q-1 and 78w(a).

The Commission finds that any burden on competition imposed by this rule is necessary and appropriate in the public interest, for the protection of investors and to facilitate the establishment of a national system for the prompt and accurate clearance and settlement of transactions in securities.

EFFECTIVE DATE

Rule 17Ac3-1 and Form TA-W are effective as of October 10, 1977. Accordingly, 17 CFR Parts 240 and 249b are amended by adding §§ 240.17Ac3-1 and 249b.101 as follows:

§ 240.17Ac3-1 Withdrawal from registration with the Commission.

(a) Notice of withdrawal from registration as a transfer agent with the Commission pursuant to section 17A(c)(3)(C) of the Act shall be filed on Form TA-W in accordance with the instructions contained thereon.

(b) Except as hereinafter provided, a notice to withdraw from registration filed by a transfer agent pursuant to section 17A(c)(3)(C) of the Act shall become effective on the sixtieth day after the filing thereof with the Commission or within such shorter period of time as the Commission may determine. If a notice to withdraw from registration is filed with the Commission at any time subsequent to the date of issuance of a Commission order instituting proceedings pursuant to Section 17A(c)(3)(A) of the Act, or if prior to the effective date of the notice of withdrawal the Commission institutes such a proceeding or a proceeding to impose terms and conditions upon such withdrawal, the notice of withdrawal shall not become effective except at such time and upon such terms and conditions as the Commission deems necessary or appropriate in the public interest, for the protection of investors, or in furtherance of the purposes of section 17A.

(c) Every notice of withdrawal filed pursuant to this rule shall constitute a "report" within the meaning of sections 17 and 32(a) of the Act.

§ 249b.101 Form TA-W, notice of withdrawal from registration as transfer agent.

This form shall be used for withdrawing, pursuant to section 17A of the Securities Exchange Act of 1934, the registration of transfer agents registered with the Commission.

NOTE.—Copies of Form TA-W have been filed with the Office of Federal Register as part of this document. Copies may be obtained from the Publications Section, Securities and Exchange Commission, 500 North Capitol St., Washington, D.C. 20549 and at each of the Commission's regional offices. Copies of Form TA-W will be available on or about the week of September 26, 1977.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 1, 1977.

[FR Doc.77-26188 Filed 9-7-77;8:45 am]

[1] Transfer agents registered with the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation or the Board of Governors of the Federal Reserve System are not subject to the rule and form adopted herein today. Each of the three Federal bank regulatory agencies has developed its own procedures for withdrawing the registrations of bank transfer agents registered with it.

[2] Any out-of-proof conditions are considered, for these purposes, as potential claims.

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 76-197]

PART 110—ANCHORAGE REGULATIONS

Special Anchorage Areas, Dana Point, Calif.

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This amendment establishes a special anchorage area in Dana Point Harbor, Calif. This amendment is needed to meet the heavy demand for anchorage space for transient pleasure vessels. In special anchorage areas, vessels under 65 feet in length are not required to carry or exhibit anchor lights.

EFFECTIVE DATE: This amendment is effective October 8, 1977.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590 (202-426-1477).

SUPPLEMENTARY INFORMATION: On March 7, 1977, the Coast Guard published a proposed rule (42 FR 12890) concerning this amendment. Interested parties were given until April 20, 1977, to submit comments. No comments were received.

DRAFTING INFORMATION: The principal persons involved in drafting this rule are: Lieutenant Commander H. E. Snow, Project Manager, Office of Marine Environment and Systems, and Mr. S. D. Jackson, Project Attorney, Office of the Chief Counsel.

In consideration of the foregoing, Part 110 of Title 33 Code of Federal Regulations is amended by adding § 110.93 to read as follows:

§ 110.93 Dana Point Harbor, Calif.

The area in Dana Point Harbor, Calif. commencing at a point at latitude 33°-27'36.2" N. longitude 117°42'20.4" W.; thence 016°20' True for 612 feet to a point at latitude 33°27'42.1" N., longitude 117°42'18.4" W.; thence 106°20' True for 85 feet to a point at latitude 33°27'41.8" N., longitude 117°42'17.7" W.; thence 196°20' True for 222 feet to a point at latitude 33°27'39.7" N., longitude 117°42'18.2"' W.; thence 152°20' True 234 feet to a point at latitude 33°27'37.4" N., longitude 117°42'18.2" W.; thence 166°-20' True for 499 feet to a point at latitude 33°27'32.6" N., longitude 117°42'16.8" W.; thence 320° True for 470 feet to the point of origin.

(Sec. 1, 30 Stat. 98, as amended (33 U.S.C. 180); sec. 6(g)(1)(B), 80 Stat. 937 (49 U.S.C. 1655(g)(1)(B)); 49 CFR 1.46(c)(2).)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A-107.

Dated August 29, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard
Commandant.

[FR Doc.77-25984 Filed 9-7-77;8:45 am]

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

SUBCHAPTER B—LAND RESOURCE MANAGEMENT (2000)

PART 2850—POWER TRANSMISSION LINES

Subpart 2851—Principles and Procedures Power Transmission Lines

ELECTRIC TRANSMISSION FACILITIES CROSSING FEDERAL LANDS

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: Power transmission rights-of-way for facilities of less than 66kV capacity are not required to include a stipulation that transmission capability in excess of the needs of the grantee be made available for transmission of Federal power. The upper limit is changed from 33kV. There is seldom any excess transmission capability on such low capacity lines. Processing of right-of-way applications will be simplified by eliminating the required stipulation.

DATE: Effective September 9, 1977.

ADDRESS: Director (210), Bureau of Land Management, 1800 C Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Billy R. Templeton, 202-343-8735.

SUPPLEMENTAL INFORMATION: The principal author of this document is Billy R. Templeton of the Bureau of Land Management, Division of Legislation and Regulatory Management.

On page 20315 of the FEDERAL REGISTER of April 19, 1977, proposed rulemaking was published to raise the minimum voltage at which a wheeling stipulation is required in a power transmission facility from 33 kV to 66 kV. Comments and suggestions were invited from the public for a 30-day period, ending May 31, 1977. Comments were received from six sources. Five favored the proposal, but recommended that the level be increased above 66 kV or waived completely. One was opposed to the proposal completely.

A suggestion was made to set the minimum above 66 kV or waive the requirement for a wheeling stipulation entirely. It has been determined that this is not necessary since under the provisions in § 2851.1-1(a) the Secretary may waive the wheeling stipulation requirement if appropriate.

The one unfavorable comment was that the proposed amendment could have an adverse impact on potential preference customers not presently being served by Federal power because of inability to secure wheeling arrangements. It was suggested that the proposed rule could deny access to new lines below 66 kV to serve these potential customers. This would discriminate between them and other preference customers currently receiving power wheeled over lines below 66 kV.

In adopting the proposed amendment to increase the wheeling stipulation voltage level from the present 33 kV to proposed 66 kV, the Department considered the potential impact such change would have on those potential preference customers below 66 kV. It was concluded that the possibility that service to a new customer would turn on the existence or nonexistence of the wheeling stipulation on a line below 66 kV is so remote as to be virtually nonexistent.

Accordingly, amendments proposed under the authority of section 501(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1761), to Title 43, Chapter II, Subchapter B, Part 2850, Subpart 2851 of the Code of Federal Regulations are adopted as set forth below.

DANIEL P. BEARD,
Deputy Assistant
Secretary of the Interior.

AUGUST 30, 1977.

1. Section 2851.1-1(a)(5) is amended to read as follows:

§ 2851.1-1 Terms and conditions.

(a) • • •

(5) An applicant for a right-of-way for a transmission facility having a voltage of 66 kilovolts or more must, in addition to the requirements of Subpart 2802 of this part execute and file with its application a stipulation agreeing to accept the right-of-way grant subject to the following conditions:

• • • • • •

2. Section 2851.2-1(c)(4) is amended to read as follows:

V 42 174 SEP 8 77 UMI

§ 2851.2–1 Applications.

• • • • • •

(c) • • •

(4) If the line is to have a nominal voltage of 66 kilovolts or more, the application should include a one-line diagram of the proposed line and the immediate interconnecting facilities including power plants and substations, a power flow diagram or proposed line and connecting major lines showing conditions under normal use, and typical structure drawings of proposed lines showing construction dimensions and a list of materials.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20775; FCC 77–583]

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Providing Clarification and Modification of Rules for Emergency Position Indicating Radiobeacons on Frequencies 121.5 and 243 MHz

AGENCY: Federal Communications Commission.

ACTION: Final Rule.

SUMMARY: A Report and Order is adopted setting out rules pertaining to emergency position indicating radiobeacons (EPIRB's). This action clarifies and modifies our rules concerning technical standards, processing of equipment authorizations, license applications and vessel inspections. The clarification and modifications will permit more expeditions processing of authorizations thereby benefiting the Commission and the public.

EFFECTIVE DATE: October 11, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Robert C. McIntyre, Safety & Special Radio Services Bureau, 202–632–7197.

SUPPLEMENTARY INFORMATION:

REPORT AND ORDER—PROCEEDING TERMINATED

Adopted: August 24, 1977.

Released: September 6, 1977.

In the matter of Amendment of Parts 2 and 83 of the Commission's rules to provide clarification and modification of the rules for emergency position indicating radiobeacons on the frequencies 121.5 and 243 MHz, Docket No. 20775.

1. On April 23, 1976, we released a Notice of Proposed Rule Making (NPRM) in this Docket (FCC 76–328, 41 FR 17572, April 27, 1976), to amend Parts 81 and 83 of the rules to provide clarification and modification of the rules for emergency position indicating radiobeacons (EPIRB's).

2. Comments concerning the proposed rules appended to the Notice of Proposed Rule Making in this docket were received from Aeronautical Radio, Incorporated (ARINC), Air Transport Association of America (ATA), Aircraft Owners and Pilots Association (AOPA) and late comments were received from Narco Marine (Narco). Comments were filed jointly by ARINC and ATA. The late comments filed by Narco concerning the proposed rules do not raise any new basic matters not already covered by other commenters.

3. EPIRB's are radio frequency devices which transmit signals simultaneously on 121.5 and 243 MHz to facilitate search and rescue operations by indicating the position of a distress situation. EPIRB signals are modulated by a well defined, distinctive, sweeping tone chosen to be easily recognizable and compatible with radiolocation equipment. Aircraft equipment with radio direction finding equipment are extensively used in search and rescue operations and can rapidly determine the location of an EPIRB emitting a signal.

4. The Commission called attention in the Notice to the fact that since adopting rules[1] providing for the operation of EPIRB's the Laboratory Division of the Office of Chief Engineer (OCE) has evaluated a number of these devices which were submitted for purposes of type acceptance and has, through the equipment authorization program, assessed the effectiveness of our rules. As an outgrowth of this evaluation, we are of the opinion that it is in the public interest to make certain changes to our rules; these changes affect rules concerning technical standards, equipment authorizations and administrative procedures pertaining to the maritime radio service. Objections were raised to the following rule changes proposed by the Commission:

Measurement procedures.
Table of Frequency Allocations.
EPIRB Testing.

The following paragraphs of this Report and Order discuss the views of the respondents with regard to these controversial areas and are silent on the other proposed changes to which no objections were raised.

MEASUREMENT PROCEDURES

5. The Notice includes provisions for the use by the public of measurement procedures prepared by the Office of Chief Engineer for obtaining the necessary data to demonstrate compliance with the Commission's rules for purposes of equipment authorizations. Section 83.134(i) now requires that measurement procedures delineated in Radio Technical Commission for Aeronautics (RTCA) Documents DO–145 and DO–146 be used for peak effective radiated power measurements. ARINC, ATA and AOPA state that the Commission did not explain in detail the problem with the RTCA documents and that the issuance of superseding test procedures by the Chief Engineer would only serve to increase the ambiguity which the Commission has suggested exists in RTCA documents DO–145 and DO–146. For this reason the commentors request that the Commission retain reference to the RTCA documents in its rules pertaining to effective radiated power measurements.

6. The Commission has previously made public[2] its concerns regarding the procedures set out in RTCA documents DO–145 and DO–146 and indicated that, since these procedures are subject to various interpretations, significant differences in radiated output power may result from their use. Variations in radiated output power in excess of 9 dB have been observed when similar transmitters are tested using methods employed by different manufacturers. This magnitude of difference (approximately 10 times in power) can result in a variation of 3 to 1 in the range of EPIRB's which are rated as equivalent and may adversely affect the safety of life. We have further informed RTCA Special Committee No. 127[3], which is charged with developing a new minimum performance standard to replace DO–145 and 146, of the ambiguity which exists in the present measurement procedures so that RTCA may give this matter appropriate consideration in their new standard. Accordingly, we see no reason to retain reference to RTCA documents concerning power measurements in our rules since the procedure described in these documents is not acceptable to the Commission.

7. The respondents further raise objections to our proposal to require a new, but as yet, unspecified test procedure for EPIRB's. The proposed rules pertaining to Part 83 would require the use of an OCE Bulletin describing a measurement procedure for peak effective radiated power of EPIRB's to be used by applicants for equipment authorizations. We note that no equipment manufacturers voiced opposition to the adoption of

[1] Report and Order, Docket No. 19693, adopted March 7, 1974 (39 FR 10140; 45 FCC 2d 885).

Public Notice, "Clarification of Measurement Procedure for Field Strength of Marine Emergency Position Indicating Radiobeacons (EPIRB) Transmitters"; Reference No. 31697, dated October 10, 1974.

[3] Commission letter to the Chairman, Task Force No. 3 of SC 127, Reference File No. AVI 6–1, dated April 11, 1975.

these rules. Nevertheless a specific OCE Bulletin to be used, which was not available when the Notice was adopted, we will also permit the use of any other measurement procedure submitted to and accepted by the Commission for purposes of application for equipment authorizations.

TABLE OF FREQUENCY ALLOCATIONS

8. The Notice proposed modification of the Table Frequency Allocations in Part 2 of the rules to set out EPIRB's under the Radiodetermination Service rather than the Maritime Mobile Service since the emissions of an EPIRB are used to indicate position thereby facilitating search and rescue operations (see International Radio Regulations No. 68A). Radiodetermination is defined internationally and in our rules as "the determination of position, or the obtaining of information relating to position, by means of the propagation properties of radio waves". Therefore it is the Commission's view that EPIRB stations should be considered more appropriately in this service than the maritime mobile service.

9. ARINC, ATA and AOPA object to this change on the basis that it is "superficially correct" and that the Commission's rules and the International Telecommunication Union's Radio Regulations (RR) provide for EPIRB's in the Maritime Mobile Service. Additionally, the respondents object to the specific inclusion of "maritime mobile service", "maritime radiodetermination service" and "ship stations" in column 11 of the Table of Frequency Allocations in Part 2 of the rules on the basis that it will lead to the expanded use of these frequencies for purposes other than search and rescue.

10. RR No. 68A provides for the operation of EPIRB's in a "mobile station" but not specifically in a "maritime mobile station" as in the case of other shipboard equipment. Additionally, all other types of radiobeacons are provided for in the radiodetermination radio service and the EPIRB definition is grouped with these definitions (see RR Nos. 45–68A). For these reasons, and because particularly with regard to an emergency frequency, it is necessary that the service and stations provided for on these frequencies be specifically identified to avoid any possibility of misuse, the Commission does not share the opinion of ARINC, ATA and AOPA that the proposed rules will result in the derogation of the usefullness of these frequencies. Accordingly, the rules pertaining to the Table of Frequency Allocations appended to the Notice are adopted as proposed.

EPIRB TESTING

11. We proposed in the Notice that testing of EPIRB's be conducted using a dummy load to insure that no transmissions or radiated energy occur that could be received by a radio station and result in a false alarm. This proposal is more stringent than our existing regulation which permits over-the-air tests during the first five minutes of every hour. All comments received were unanimous in their opposition to this change. ARINC, ATA and AOPA interpreted the proposed rules as an action which would increase the possibility of false distress signals since Coast Guard coordination was no longer required. Narco points out that a large number of EPIRB's are equipped with antennas which are permanently wired to the transmitter. If testing with a dummy load is the only type of test permitted, it will be necessary to disassemble the unit to permit testing. Since in many cases this would not be practical and could possibly damage the waterproof integrity of the EPIRB, we will continue to permit testing of EPIRB's with Coast Guard coordination or using over-the-air tests during the first five minutes of any hour if testing with a dummy load is not used.

EPIRB AUTHORIZATION

12. Separately, but related to the foregoing matters, we are amending § 83.68 (b) to provide that EPIRB's required by Coast Guard regulations be operated under specified conditions pursuant to the rules, rather than as a result of a provision on a station authorization. This will eliminate a requirement that EPIRB operational authority must be individually obtained by filing an application for modification of a ship station license; at renewal the authorization should be appropriately modified to reflect the addition of an EPIRB. This will relieve a restriction on the public. We will continue, however, to require an application for authority to operate an EPIRB installed voluntarily, or authority to operate an EPIRB only on board a vessel.

13. *Accordingly, it is ordered,* That pursuant to the authority contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, set forth below effective October 11, 1977.

14. *It is further ordered,* That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; (47 U.S.C. 154, 303.))

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Parts 2 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

A. In Part 2—Frequency Allocations and Radio Treaty Matters; General Rules and Regulations.

1. In § 2.106, column 11 is amended to read as follows:

§ 2.106 Table of frequency allocations.

Frequency MHz 10	*Nature of services of 11 stations*
• • • • •	
121.5	Aeronautical Mobile. Maritime Mobile. Maritime Radiodetermination. Ship. Survival craft and equipment. Emergency position indicating radiobeacon. Emergency locator transmitter.
• • • • •	

123.100	Aeronautical search and rescue. Ship. Survival craft and equipment.
• • • • •	
243	Survival craft and equipment. Emergency position indicating radiobeacon. Emergency locator transmitter.
• • • • •	

2. A new § 2.947 is added to read as follows:

§ 2.947 Measurement procedure.

(a) The Commission will accept data which have been measured in accordance with the following standards or measurement procedures:

(1) Those set forth in OCE Bulletins or reports prepared by the Office of the Chief Engineer of the Commission. These will be issued as required, and specified in the particular part of the rules where applicable.

(2) Those acceptable to the Commission and published by national engineering societies such as the Electronic Industries Association, the Institute of Electrical and Electronic Engineers, Inc., and the American National Standards Institute.

(3) Any measurement procedure acceptable to the Commission may be used to prepare data demonstrating compliance with the requirements of this chapter.

(b) Information submitted pursuant to paragraph (a) of this section shall completely identify the specific standard or measurement procedure used.

(c) In the case of equipment requiring measurement procedures not specified in the references set forth in paragraph (a) (1) and (2) of this section, the applicant shall submit a detailed description of the measurement procedures actually used.

(d) A listing of the test equipment used shall be submitted.

(e) If deemed necessary, the Commission may require additional information concerning the measurement procedures employed in obtaining the data submitted for equipment authorization purposes.

3. Section 2.999 is amended to read as follows:

§ 2.999 Measurement procedure.

The measurement procedures employed shall be in accordance with the requirements set forth in § 2.947. In addition, any specific test requirements set forth in the particular rules governing the equipment for which type acceptance is requested shall apply.

B. In Part 83—Stations on Shipboard in the Maritime Services.

1. Section 83.2(i) is amended to read as follows:

§ 83.2 General.

• • • • • •

(i) *Ship station license.* A license authorizing the operation of one or more of the following: A ship station, a survival craft station associated with a ship, an emergency position indicating radiobeacon (EPIRB) station, a ship radionavigation station, an associated portable

V 42 I 174 SEP 8 77 UMI

ship unit or units for use in the vicinity of the ship with which it is associated.

• • • • •

§ 83.3 [Amended]

2. Section 83.3 is amended by deleting paragraph (q).

3. Section 83.4 is amended by adding a new paragraph (w) to read as follows:

§ 83.4 Maritime radiodetermination service.

• • • • •

(w) *Emergency position indicating radiobeacon (EPIRB) station.* A station in the maritime radiolocation service consisting of a transmitter only, the distinctive emissions of which are intended to facilitate search and rescue operations.

4. Section 83.35(a) is amended to read as follows:

§ 83.4 Maritime radiodetermination service.

(a) A formal application for a new ship station license or for a modification of an existing license if required by § 83.33 when accompanied by a request for an interim ship station license, shall be filed in accordance with § 83.36 and presented in person by the applicant or his agent at the nearest field office of the Commission or at the Commission's main office in Washington, D.C.: *Provided*, That, as an alternative procedure, an applicant in Alaska for such a ship station license may submit an application by mail to the Commission's Field Office at Anchorage, Alaska, when accompanied by a written request for an interim ship station license.

• • • • •

5. Section 83.46 is amended by adding a new paragraph (f) to read as follows:

§ 83.46 Application for inspection and certification.

• • • • •

(f) The FCC Forms specified in paragraphs (b) and (d) of this section shall be used to apply for inspection of EPIRB stations on board vessels which are required to be mandatorily fitted by U.S. Coast Guard regulations (Chapter I of Title 46 of the Code of Federal Regulations) when they are additionally subject to (1) either or both the Safety Convention and Part II of Title III of the Communications Act, or (2) to Part III of Title III of the Communications Act.

6. Section 83.68 is amended by modifying the title and paragraph (b) to read as follows:

§ 83.68 Authority for survival craft stations and EPIRB stations.

• • • • •

(b) An EPIRB station may be operated on board a vessel under the following circumstances:

(1) When the vessel is authorized to operate a survival craft station;

(2) When the vessel is required by the U.S. Coast Guard to be equipped with an EPIRB station; or

(3) When the vessel is operated beyond the range of maritime VHF distress coverage of coast stations. Authority to operate an EPIRB station must be applied for as provided in § 83.36(a) herein. Except that, an EPIRB station may be operated, for the remaining period of the license term during which EPIRB installation occurs, on vessels set forth in subsection (b)(2) of this section even if there is no specific authority for EPIRB operation on the specific license.

7. In § 83.132, paragraph (a)(1)(iii) is amended, paragraph (a)(iv) is deleted, and paragraph (a)(5) is added as follows:

§ 83.132 Authorized classes of emission.

(a) • • •

(1) Stations using radiotelegraphy:

• • • • •

(iii) For the frequency 121.5 MHz, A2,

(iv) [Deleted.]

• • • • •

(5) Stations not covered by the above:

(i) For the frequency 121.5 MHz, A9.

(ii) For the frequency 243.0 MHz, A9.

• • • • •

8. Section 83.134(i) is revised to read as follows:

§ 83.134 Transmitter power.

• • • • •

(i) For EPIRB stations operating on the frequencies 121.5 and 243MHz the peak effective radiated power on each frequency, measured during and at the end of 48 hours of continuous operation, and without replacement or recharge of batteries, shall not be less than 75 milliwatts. This specification shall apply to all units whether dry, or immersed for any or all of the forty-eight hour period in fresh or salt-water, as long as the entire antenna extends above the water surface. The peak effective radiated power shall be determined pursuant to the measurement procedure set out in Commission publication Bulletin OEC 45. The required power shall be obtained over a temperature range of −20 to +50 degrees Celsius.

9. Section 83.139(b) is amended and a new paragraph (h) is added to read as follows:

§ 83.139 Acceptability of transmitters for licensing.

• • • • •

(b) Each survival craft station transmitter which has not been type approved pursuant to § 83.469 or § 83.472 shall be type accepted by the Commission.

• • • • •

(h) Each emergency position indicating radiobeacon transmitter authorized for use in an EPIRB station, ship station, or a survival craft station shall be type accepted by the Commission for operation under this part to be acceptable for licensing.

10. Section 83.144 heading and paragraphs (c), (d)(1), (d)(1)(iii), and (h) are amended to read as follows:

§ 83.144 Special requirements for emergency indicating radiobeacon stations, Class B.

• • • • •

(c) The EPIRB shall be provided with a visible and/or aurible indicator which clearly shows that the device is operating. The indicator shall be activated by the transmitter RF output power.

(d) • • •

(1) May be fitted with a manually-activated test switch, (or comparable device) associated test circuit, and output indicator activated by the RF output power which shall, in the test position:

• • • • •

(iii) Reduce radiation to a level not to exceed 25 microvolts per meter at a distance of one hundred fifty (150) feet irrespective of direction.

• • • • •

(h) The EPIRB shall be powered by a battery, whether an original or replacement component, contained within the transmission case or in a battery holder that is securely and rigidly attached to the transmitter case. The useful life of the battery (established by the EPIRB manufacturer) is the length of time, after its date of manufacture, that the battery may be stored under marine environmental conditions without losing its ability to permit the transmitter power requirement prescribed in § 83.134(i) to be met. The date (month and year) of the battery's manufacture shall be indelibly and legibly marked on the battery and the expiration date (month and year) upon which 50 percent of its useful life will have expired shall be indelibly and legibly marked on both the battery and the outside of the transmitter. The electromechanical connectors on and to the battery must be corrosion resistant and positive in action, and may not rely for contact upon spring force alone.

• • • • •

11. Section 83.145 is amended by modifying paragraph (b) and adding a new subparagraph (b)(8) as follows:

§ 83.145 Special requirements for emergency position indicating radiobeacon stations, Class A.

• • • • •

(b) In addition to the requirements applicable to Class B devices a Class A EPIRB must:

• • • • •

(b)(8) Have the batteries replaced after the date specified in § 83.144(h) upon which 50 percent of its useful life has expired or after the transmitter has been used in an emergency situation.

• • • • •

12. Section 83.322(c) is amended as follows:

§ 83.322 Frequencies for use in distress.

• • • • •

(c) The frequency 121.5 MHz (using class A2 emission) is available for assignment to survival craft stations for radiobeacon purposes. The frequency 121.5 MHz (using class A9 emission) is available for assignment to stations for facilitating search and rescue operations. The frequencies 121.5 MHz and 123.1 MHz (class A3 emission) are available for assignment to ship stations for scene of action search and rescue operations between ship and aircraft. The frequency 121.5 MHz will be assigned to ship stations for search and rescue operations only if the frequency 123.1 MHz is also authorized. Communication in support of search and rescue operations is permitted on the frequency 121.5 MHz only when communications on the frequency 123.1 MHz or other VHF frequencies is not practicable. Ships and aircraft engaged in such communications on 121.5 MHz should shift to 123.1 MHz as soon as possible.

• • • • •

13. Section 83.352(b) is amended as follows:

§ 83.352 Frequencies for use in distress.

• • • • •

(b) The frequency 121.5 MHz (using class A2 emission) is available for assignment to survival craft stations for radiobeacon purposes. The frequency 121.5 MHz (using class A9 emission) is available for assignment to stations for facilitating search and rescue operations. The frequencies 121.5 MHz and 123.1 MHz (class A3 emission) are available for assignment to ship stations for scene of action search and rescue operations between ships and aircraft. The frequency 121.5 MHz will be assigned to ship stations for search and rescue operations only if the frequency 123.1 MHz is also authorized. Communication in support of search and rescue operations is permitted on the frequency 121.5 MHz only when communications on the frequency 123.1 MHz or other VHF frequencies is not practicable. Ships and aircraft engaged in such communications on 121.5 MHz should shift to 123.1 MHz as soon as possible.

• • • • •

14. Section 83.401(c) is amended to read as follows:

§ 83.401 Assignable frequencies for direction finding.

• • • • •

(c) In the event of distress, the following frequencies may be used for radio direction-finding for purposes of search and rescue by any authorized ship, survival craft or emergency position indicating radiobeacon stations.

410 kHz	8364 kHz
500 kHz	121.5 MHz
2182 kHz	243.0 MHz

15. A new § 83.406 is added to read as follows:

§ 83.406 Special provisions applicable to emergency position indicating radiobeacons.

(a) The station licensee of each EPIRB station shall provide and keep at the station an installation and maintenance record. Alternatively, such record may be made part of the ships radio-telephone or radiotelegraph station log. Entries in this record shall be made by the licensee or the responsible installation, service or maintenance person concerned in each particular instance, but the station licensee shall have the responsibility for the faithful and accurate making of such entries as are required by this section.

(b) Each entry in this record shall be signed by the responsible person concerned.

(c) The following entries shall be made in this record:

(1) The date and place of initial installation;

(2) The results of equipment tests including those conducted by the U.S. Coast Guard; and

(3) All transmissions shall be recorded when practicable including the date, time, vessel position, and a description of the circumstances requiring such transmission.

[Docket No. 20620; RM-2426]

PART 15—RADIO FREQUENCY DEVICES

Operation of Wide-Band Swept RF Equipment Used as Anti-Pilferage Devices; Correction

AGENCY: Federal Communications Commission.

ACTION: Erratum.

SUMMARY: Erratum to § 15.323 of Report and Order in Docket No. 20620, which adopted new provisions under Subpart F of Part 15 of the rules for operation of wide-band Swept RF equipment.

EFFECTIVE DATE: September 12, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Don Olmstead, RF Devices and Experimental Branch, Office of Chief Engineer (202-632-7095).

SUPPLEMENTARY INFORMATION:

Released: September 1, 1977.

In the matter of: the amendment of Part 15 to provide for the operation of wide-band swept RF equipment used as anti-pilferage devices, Docket No. 20620, RM-2426.

The Report and Order in the above entitled matter, released August 5, 1977 and published in the FEDERAL REGISTER on August 8, 1977 (42 FR 39979), on page 39981, is corrected so that the second sentence of § 15.323 reads as follows:

§ 15.323 Measurement requirements for operation under § 15.305(c).

• • • Measurements on frequencies below 25 MHz shall be made using a shielded loop as the pickup device, and measurements on frequencies above 25 MHz shall be made using a tuned dipole or a linearly-polarized broadband dipole as the pickup device. • • •

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.77-26045 Filed 9-7-77;8:45 am]

[Docket No. 21197]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in Presque Isle, Maine; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This action assigns Channel 269A as a fourth FM assignment to Presque Isle, Maine, after interest was expressed by Jack Sieber and Notice was given. It also, effective at the end of the current license term, modifies the license of the University of Maine on Station WUPI, from Channel 216 to Channel 212, to avoid Intermediate Frequency interference with the new assignment. Reimbursement was not ordered for the license modification because the University had previously requested modification and because the channel should have been assigned in a prior proceeding, but was not because of a mistake of fact.

EFFECTIVE DATE: April 1, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau (202-632-7792).

SUPPLEMENTARY INFORMATION:

REPORT AND ORDER—PROCEEDING TERMINATED

Adopted: August 29, 1977.
Released: September 1, 1977.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Presque Isle, Maine), Docket No. 21197.

1. The Commission has before it responses to its Notice of Proposed Rule Making and Order to Show Cause (hereinafter "Notice")[1], concerning FM assignments at Presque Isle, Maine. The Notice proposed the assignment of Channel 269A as a fourth FM assignment to that community, and ordered the University of Maine to show cause why the license for its Class D educational station at Presque Isle should not be modified from Channel 216 to Channel 212 to avoid Intermediate Frequency (IF) interference with the new assignment.[2]

[1] 42 FR 20152 (pub. April 18, 1977).

[2] Section 73.207 sets forth the mileage separation requirements between various classes of FM stations, including those 53 or 54 channels apart which could cause IF interference problems.

V 42 174 SEP 8 77 UMI

2. Responses to the Notice were filed by the University and Jack F. Sieber, proponent of the new assignment. The University does not object to license modification, but seeks reimbursement from the new permittee of Channel 269A for the expenses incurred in changing frequencies. This request is in accord with the Notice which stated that the permittee of Channel 269A would be required to provide reimbursement to the University of the costs in connection with the channel change. Sieber opposes the University on its reimbursement request and states that based upon the history of this proceeding the University should bear the costs of modification.

3. The history of this proceeding began on October 3, 1974, when the University filed a petition for rule making with the Commission seeking Channel 291 as a reserved educational noncommercial assignment to Presque Isle, Maine. To comply with the Commission's rules regarding IF interference, this required deletion of unoccupied Channel 237A. The University proposed the assignment of Channel 269A as a substitute for Channel 237A. However, since Channel 269A also posed an IF interference problem to Channel 216, on which the University operates a Class D station, the University filed an application (BPED–1742) to change frequency from Channel 216 to Channel 212. Then, on May 28, 1975, the Commission adopted a Notice of Proposed Rule Making [3] which proposed the assignment of Channel *291 and the deletion of Channel 237A. Noting that the deletion offered the advantage of ending the intermixture of classes of channels, the Commission did not propose a substitute Class A channel. Further, it did indicate that if there were interest in such an assignment, Channel 269A could be substituted.

4. Shortly thereafter, Sieber tendered an application for a construction permit on Channel 237A, but he did not comment directly in the rule making proceeding looking toward the proposed deletion of Channel 237A. His application was found to be defective because the proposed site was short spaced by four miles to co-channel Station CVB at Quebec City, Canada, and it was returned to Sieber by letter of January 14, 1976.

5. Then, on March 5, 1976, the Commission adopted its Report and Order [4] deleting Channel 237A and assigning Channel *291 to Presque Isle. Based on what now appears to be an erroneous assumption that no interest in a Class A channel at Presque Isle had been expressed, the Report and Order found no reason to substitute Channel 269A for Channel 237A. (The Commission's computer data base did not reveal the existence of the Sieber application because it had already been returned.)

6. Since Channel 237A was no longer available, Sieber resubmitted his application on June 23, 1976, this time seeking to use noncommercial educational Channel 201 for commercial purposes. Although such use would be contrary to the Commission's policy and regulations, this expression of interest in an assignment at Presque Isle caused the Commission to issue its latest Notice in this case on April 7, 1977, to consider assigning Channel 269A to that community and to modify the University from Channel 216 to 212. The prior application of the University for that very change in channels had been dismissed at the University's request on March 19, 1976.

7. It is now Sieber's contention that the Commission made a mistake of fact in deleting the Class A assignment at Presque Isle, without substitution, in the face of his expressed interest there. Furthermore, he notes that the University previously applied for modification from Channel 216 to Channel 212 without reimbursement, when circumstances were such that it would have benefitted from the addition of Channel 269A at Presque Isle. Therefore, Sieber argues, the new permittee of Channel 269A should not be expected to pay the cost of reimbursement to the University for making such a change, where the University would have benefited from the change absent a mistake of fact.

8. The Commission's usual policy is to require the party benefitting from a frequency modification to bear the cost of reimbursement of such modification, and such policy was applied to Presque Isle in footnote 3 of the Notice. Nevertheless, Sieber has brought to our attention the unusual nature of this case and the Commission's error in overlooking his expression of interest in the Class A assignment during the proceeding which deleted it. Upon review of the history of the Presque Isle assignment, it is our finding that the University of Maine should not be reimbursed. Significant in this finding is the fact that the University originally proposed substitution of Channel 269A for 237A in order to further its own proposal to obtain Channel *291, and had originally applied to the Commission for the very modification from Channel 216 to Channel 212 for which it now seeks reimbursement. Had all the facts been known, Channel 269A would have been assigned to Presque Isle, Maine, in the first proceeding without reimbursement to the University of Maine. Clearly, it would neither be fair nor equitable to now shift that cost to Sieber given these circumstances.

9. The University of Maine also seeks reimbursement for correction of TV interference problems that might occur with respect to the nearby Canadian satellite Station CHSJ–TV–1 at Bon Accord, New Brunswick. The Commission's engineering study indicates any interference to the TV service would be limited to a small area near the transmitter site and would cause no interference to TV service in Canada. On this basis the Canadian Government has approved of the proposed assignments. Therefore we shall not condition the University's modification on reimbursement for costs that might be associated with any possible interference problems.[5]

10. Sieber has expressed interest in promptly constructing a station on Channel 269A if authorized, and we find that it would be in the public interest to restore a Class A channel to Presque Isle to provide for another commercial FM voice. Sieber states that he is willing to compete with the other Class C stations in that community, and on this basis a waiver of our policy against intermixture is warranted. Presque Isle is large enough to warrant what in effect is only its third assignment.

11. The University has conditioned its consent to license modification upon the Commission's imposing reimbursement conditions. This we shall not do as explained above. Therefore we do not have its acquiescence in the modification. In accordance with *Transcontinent TV Corp. F.C.C.*, 308 F. 2d 339 (D.C. Cir. 1962), we shall make the channel changes at Presque Isle effective on the license expiration date of WUPI, April 1, 1978, or at such earlier date as the University may request, upon ceasing operation on Channel 21.

12. *Accordingly, it is ordered,* That effective April 1, 1978, the FM Table of Assignments (§ 73.202(b) of the Commission's rules and regulations) is amend to read as follows for Presque Isle, Maine:

City	*Channel No.*
Presque Isle, Maine——	241, 245, 269A, *291

13. *It is further ordered,* That pursuant to section 316(a) of the Communications Act of 1934, as amended, the outstanding license held by the University of Maine, licensee of Station WUPI, Presque Isle, Maine, is modified effective 3 AM local time April 1, 1978 (concurrently with the expiration of that license, or such earlier date as FM Station WUPI may, upon its request, cease operation on Channel 216) to specify operation on Channel 212 in lieu of Channel 216. The licensee shall inform the Commission in writing by no later than October 15, 1977, of its acceptance of this modification. Station WUPI may continue to operate on Channel 216 subject to the following conditions:

(a) At least 30 days before commencing operation on Channel 212, the licensee of Station WUPI shall submit to the Commission the technical information normally required of an applicant for a construction permit on Channel 212;

(b) At least 10 days prior to commencing operation on Channel 212, the licensee of Station WUPI shall submit the measurement data required of an applicant for an FM broadcast station; and

(c) The licensee of Station WUPI shall not commence operation on Channel 212 without prior Commission authorization.

14. Authority for the actions taken herein is found in sections 4(i), 303 (g) and (r), 307(b), and 316 of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules and regulations.

15. It is directed, That the Secretary of the Commission send a copy of this Report and Order by certified mail, return receipt requested to the University of Maine, Station WUPI, Presque Isle, Maine.

16. *It is further ordered,* That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083 (47 U.S.C. 154, 303, 307).)

PART 81—STATIONS ON LAND IN THE MARITIME SERVICE AND ALASKA—PUBLIC FIXED STATIONS

Clarifying the Limitation on Authorization of Frequencies Below 4000 kHz to Public Coast Stations Serving Lakes or Rivers

AGENCY: Federal Communications Commission.

ACTION: Rule amendment.

SUMMARY: This amendment of the rules clarifies the limitation on authorization of frequencies below 4000 kHz to public coast stations which serve only lakes or rivers.

EFFECTIVE DATE: September 12, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Robert P. De Young, Safety and Special Radio Services Bureau (202–632–7197).

SUPPLEMENTARY INFORMATION:

ORDER

Adopted: August 24, 1977.
Released: September 1, 1977.

Amendment of § 81.304(f)(2) of the rules to clarify the limitation on the authorization of frequencies below 4000 kHz to public coast stations serving lakes or rivers.

1. Mobile Marine Radio, Inc. (hereafter sometimes referred to as "MMR"), the licensee of Public Coast I–ABL Station WLO in Mobile, Ala., has requested the Commission to interpret or otherwise clarify the meaning of § 81.304(f)(2) of its rules.[1]

2. MMR is licensed to and does provide, inter alia, radiotelephony service in the 2, 4, 8, 13, 16, and 22 MHz bands and VHF–FM telephony service. MMR serves vessels in the Gulf of Mexico, the Caribbean, the Atlantic Ocean, and on the Alabama inland river system. Because of the service it provides to the Alabama inland river system, MMR points out that a strict interpretation of the rule would require it to delete its 2 MHz frequency, 2572 kHz, as of January 1, 1977. Such a result was not foreseen nor intended by the Commission in any of the Dockets which resulted in the adoption of § 81.304(f).[2]

3. The intent of the Commission in adopting the restriction on public coast stations serving lakes and rivers was to ensure that frequencies with longer range potential would not be inefficiently used. The intent of the Commission can be clarified by adding the word "only" to the phrases "lakes and rivers" as it appears in the subparagraph.

4. In view of the above: *It is ordered,* That § 81.304(f)(2) of the rules is amended in accordance below, effective September 12, 1977.

5. Because this amendment is consistent with the Commission's reasons for adopting the rule, because it is intended merely to clarify the rule, and because the procedural and substantive rights of no Commission licensee will be affected by this order, the notice and public procedures of 5 U.S.C. 553 are impracticable and unnecessary. Authority for this action is contained in § 1.412(c) of the Commission's rules.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082 (47 U.S.C. 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part 81 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

In Part 81—Stations on Land in the Maritime Services and Alaska—Public Fixed Stations.

In § 81.304, paragraph (f)(2) is amended to read as follows:

§ 81.304 Frequencies available.

* * * * * * *

(f) * * *

(2) Except in the Mississippi River System and Great Lakes, public coast stations serving only lakes or rivers will not be authorized to employ frequencies below 4000 kHz.

* * * * * * *

[FR Doc.77-26046 Filed 9-7-77;8:45 am]

[1] Section 81.304(f) provides:

(f) Except for safety communications, after January 1, 1977:

(1) Radiotelephony frequencies below 4000 kHz shall not be used by a public coast station for communication with a vessel which is within the VHF service range of that public coast station; and

(2) Except in the Mississippi River System and Great Lakes, public coast stations serving lakes or rivers will not be authorized to employ frequencies below 4000 kHz.

[2] See Docket No. 18307, 35 FR 10, 212 (1970), which pertained to the 48 contiguous states plus Hawaii, Puerto Rico, and the Island Territories; Docket No. 18633, 36 FR 12, 502 (1971), which pertained to the Great Lakes; and Docket No. 18632, FR 20, 949 (1971), which pertained to Alaska.

[FCC 77-591]

PART 97—AMATEUR RADIO SERVICE

Deletion of "Grandfather" Privilege to Upgrade to Amateur Extra Class

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: This will delete § 97.25(c) of the Commission's rules. § 97.25(c) gave all amateurs who are in the General or Advanced Class and who were amateurs prior to April, 1917 the privilege to apply for the Amateur Extra Class without taking any additional tests. This is a little used section and in an effort to deregulate the amateur rules, it is being eliminated, subject to a substantial "last call" period.

EFFECTIVE DATE: March 1, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Robert Cassler, Personal Radio Division, Safety and Special Radio Services Bureau, 202–634–6620.

ORDER

ADOPTED: August 24, 1977.

RELEASED: September 1, 1977.

In the matter of Deletion of § 97.25(c) of the Amateur rules—"grandfather" privilege to upgrade to Amateur Extra Class.

1. In an effort to eliminate those rules and regulations which are not essential to the proper administration of the Amateur Radio Services, the Commission has under consideration § 97.25(c) of its rules. Section 97.25(c) is a "grandfather" clause which allows any amateur who was licensed prior to April, 1917, and is currently an amateur operator holding a General or Advanced Class license, the right to apply for the Amateur Extra Class license without further examination.

2. This section of the amateur rules has not been invoked by any amateur for a considerable time. Simple arithmetic shows that individuals who might qualify under this provision would typically be at least 75–80 years of age. We believe it reasonable to assume that virtually everyone wishing to resume amateur activity has already done so in the intervening 60 years from 1917 to the present. By this Order, the Commission deletes § 97.25(c). The effective date of this deletion will be March 1, 1978, to give a last call to all amateurs who might wish to avail themselves of § 97.25(c).

3. Inasmuch as this deletion is basically a minor amendment to Part 97 of the Commission's rules, the Commission, for good cause, as stated herein, finds that the notice and public procedures provisions of the Administrative Procedures Act, 5 U.S.C. 553, are unnecessary. Authority for the amendment of this rule appears in sections 4(i) and 303 of the Communications Act of 1934, as amended.

V 42 174
SEP 8 77
UMI

4. *Accordingly, it is ordered*, That Part 97 of the Commission's rules is amended, effective March 1, 1978, as set forth below.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; (47 U.S.C. 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part 97 of Chapter I of Title 47 of the Code of Federal Regulations is amended, as follows:

§ 97.25 [Amended]

1. In § 97.25, paragraph (c) is deleted and paragraphs (d) and (e) are redesignated (c) and (d), respectively.

[FR Doc.77-26047 Filed 9-7-77;8:45 am]

[FCC 77-590]

TRANSMITTER IDENTIFICATION CARD

Deregulation of Rules Concerning Deletion of Form 452–C

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: The Commission is simplifying the station license posting requirements by the elimination of the Transmitter Identification Card (FCC Form 452–C). This action is being taken under the Commission's policy of simplification and deregulation of its rules.

EFFECTIVE DATE: September 12, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Bruce A. Franca, Safety and Special Radio Services Bureau, 202–632–7197.

SUPPLEMENTARY INFORMATION:

ORDER

Adopted: August 24, 1977.
Released: September 1, 1977.

In the matter of deregulation of Parts 81, 83 and 87 of the Commission's rules; deletion of Form 452–C.

1. It has been the Commission's experience that requiring the posting of a Transmitter Identification Card (FCC Form 452–C) has been of little enforcement value and any marginal value the requirement might have is outweighed by the burden of the procedure to the public. Therefore, we are discontinuing the use of Form 452–C in the Aviation and Maritime Services. Licensees are reminded, however, that the rules governing the posting of station licenses and photocopies remain in effect.

2. This action is similar to one taken by the Personal Radio Services in an Order released on February 18, 1977 (FCC 77–108).

3. Inasmuch as these amendments involve the discontinuance of a Commission form, and are basically minor amendments, the Commission, for good cause, as stated herein, finds that the notice and public procedures provisions of the Administrative Procedure Act, 5 U.S.C. 553, are unnecessary. Further, inasmuch as the amendments relieve a restriction, the effective date provisions of the Administrative Procedure Act are not applicable. Authority for the amendment of these rules appears in section 4(i) and 303 of the Communications Act of 1934, as amended.

4. *Accordingly, it is ordered*, That Parts 81, 83 and 87 of the Commission's rules are amended, effective September 12, 1977, as set forth below.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; (47 U.S.C. 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Parts 81, 83 and 87 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

In § 81.102, the headnote and text are amended as follows:

§ 81.102 Posting station license.

(a) The current authorization or a clearly legible photocopy thereof, for each station (other than a marine-utility station) at a permanent location, or at a single temporary location, shall be posted in a conspicuous place at the principal control point of the station, and a photocopy of such authorization shall be posted at all other control points listed on the authorization. If a photocopy of the authorization is posted at the principal control point, the location of the original shall be stated on that photocopy.

(b) The current station authorization or a clearly legible photocopy thereof, for a single marine-utility station and for each single station of any other class subject to this part, which is of portable nature and is authorized for use and operation at two or more temporary locations, shall be posted, either at the control point of the station, in a conspicuous place or shall be affixed, readily visible for inspection, to the transmitting apparatus or, if the transmitting apparatus is contained in a cabinet or other structure, affixed, readily visible for inspection, to such cabinet or structure. If a photocopy of the authorization is posted, the location of the original shall be stated on the photocopy.

(c) A current license authorizing a plurality of marine-utility stations, pursuant to § 81.68 shall be retained by the licensee at any location where it is readily accessible for inspection.

(d) A current land station license authorizing one or more shipyard mobile stations, pursuant to § 81.22(e), or a clearly legible photocopy thereof, shall be posted in a conspicuous place at the principal control point of the land station; and a photocopy of such license shall be posted at all other control points listed on the license. If a photocopy of the license is posted at the principal control point, the location of the original shall be stated on that photocopy.

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

In § 83.102, the headnote, paragraphs (a) and (b) are amended, and paragraph (d) as amended is redesignated (c) to read as follows:

§ 83.102 Posting station license.

(a) Except for certain stations to which paragraph (b) of this section is applicable, the original license for each station on board ship subject to this part shall be conspicuously posted at the principal location on board at which each such station is operated: *Provided*, That when a ship is fitted with two or more stations authorized by a single license document:

(1) The original license shall be conspicuously posted at the principal operating location of the compulsorily-provided station.

(2) If no station is compulsorily-provided, the original license shall be conspicuously posted at the principal operating location of any station authorized for telephony.

(b) A current license authorizing a plurality of stations, or a station of a portable nature, where posting of a station license is impracticable, shall be retained by the licensee at any location where it is readily accessible for inspection.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, notification by telegram or by letter, in each case by this Secretary of the Commission, stating that the Commission has granted an appropriate station authorization, may be posted in lieu of such authorization if the latter has not yet been received by the station licensee or permittee: *Provided*, That as the result of an official inspection of the station by an authorized representative of the Commission the posting of such notification may not be accepted in lieu of the formal station authorization until additional information pertaining thereto, as may be deemed necessary by that representative for purposes of official inspection, has been obtained from the Commission at Washington, D.C.

PART 87—AVIATION SERVICES

In § 87.95, the headnote and paragraph (c) is amended to read as follows:

§ 87.95 Posting station license.

(a) The current authorization, or a clearly legible photocopy thereof, for each station at a fixed location shall be prominently displayed at the principal control point of the transmitter or transmitters: *Provided, however*, That with respect to radio-navigation land test stations, the procedures set forth in paragraph (c) of this section may be followed. If a photocopy of the authorization is posted, the location of the original shall be stated on that photocopy.

(b) The current authorization for an aircraft radio station license shall be posted prominently in the aircraft or shall be kept with the aircraft registration certificate. In the case of aircraft radio stations licensed by means of a single authorization for the operation of all fleet aircraft, the original authorization, or a photocopy thereof, shall be posted prominently in the aircraft or shall be kept with the aircraft registration certificate.

(c) The current authorization for each land mobile station shall be retained as a permanent part of the station records, but need not be posted.

(d) In case of Civil Air Patrol mobile stations licensed by means of a single authorization for all the fleet, the original authorization or photocopy thereof, shall be posted prominently in the aircraft or shall be kept with the aircraft registration certificate, or in the case of ground mobile stations posted in accordance with paragraph (c) of this section.

[FR Doc.77-26126 Filed 9-7-77;8:45 am]

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Ex Parte No. 284]

PART 1038—PERFORMANCE STANDARDS FOR THE TRANSPORTATION OF PERISHABLE COMMODITIES

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: This document prescribes new rules, and adopts new procedures, governing the transportation of perishable commodities by railroad. The new procedures will require the railroads to publish in their tariffs schedules governing the transportation of perishables between key producing and consuming points. The performance standards require the carrier to complete certain designated functions within a maximum of 24 hours. The purpose of the new rules and procedures is to facilitate the prompt and reliable transportation of perishable commodities by railroad.

EFFECTIVE DATE: November 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, Deputy Director, Section of Rates, Interstate Commerce Commission, Washington, D.C. 20423 (202–275–7693).

SUPPLEMENTARY INFORMATION: The proceeding emanated from Ex Parte No. 263, *Loss and Damage Claims*, in which shipper dissatisfaction with the transportation of perishables became evident. The purpose of this proceeding is to determine the cause of delays and the impact of such delays on the Nation's commerce and the consumer, and to take action necessary to insure greater certainty and service adequacy in the movement of perishables.

The regulations originally proposed would require perishable commodities to be transported with "reasonable dispatch." "Reasonable dispatch" was defined as the performance of transportation within the time published by a carrier in its schedules, or during the time agreed upon by the carrier and shipper as shown on the bill of lading.

After receiving numerous comments concerning the proposed regulations, the Commission decided not to impose specific time limits on the overall performance of transportation, but rather to adopt "reasonable standards of operating efficiency." These performance standards established guidelines for the performance of certain functions within specified times. The adoption of the performance standards was based on three studies which indicated that most railroad delays were encountered not in line-haul service, but in yards, terminals, and interchange points. As these delays are not experienced in motor carrier service, and as motor carrier service was generally felt to be less troublesome than rail, the regulations were applied only to railroads.

After several petitions for consideration were filed, by both shipper and carrier interests, the Commission convened an informal conference on December 1, 1976. The purpose of the conference was to identify problems and possible solutions in the transportation of perishables.

During the course of the conference, it became apparent that shippers were concerned more with overall transit time than with the time consumed by certain specific functions. It also became apparent that they were concerned primarily with movements between key producing and consuming points. And the railroads expressed concern about being held to their published schedules for every conceivable movement, no matter how small.

Therefore, the Commission has determined that the most practical solution, which will take into account the concerns of both shippers and carriers, is to require transportation between key points to be performed within scheduled times, and to subject all other movements of perishables to a modified version of the performance standards. The proceeding has been left open so that shippers and carriers may determine key points and reasonable schedules.

H. G. HOMME, JR.,
Acting Secretary.

Chapter X of Title 49 of the Code of Federal Regulations is modified and supplemented by adding part 1038, Performance Standards for the Transportation of Perishable Commodities, as set forth below.

§ 1038.1 Definitions.

As used herein, the term perishable commodity means any edible commodity the transportation of which is subject to rules, regulations, or charges for perishable protective service and which requires the transporting carrier expeditiously to transport the same and to produce and maintain as needed throughout transportation a controlled atmosphere for protection against heat or cold as one of the essential parts of the service in order to retard deterioration thereof prior to arrival at destination.

§ 1038.2 Performance Standards for Perishable Service.

(a) Performance of transportation within the standard for perishable service consists of the completion by the carrier within the usual and customary period but not in excess of twenty-four (24) hours of each of the following functions, unless subject to exceptions authorized in paragraph (b) below

(1) Removal of a car from the track serving the shipper and forwarding from origin in linehaul service or delivery to a connection at origin after loading is completed and instructions sufficient to forwarding are furnished the carrier.

(2) Forwarding of a car from any yard or interchange connection between origin and destination.

(3) Delivery of a car to a connecting line after arrival at an interchange point.

(4) Actual or constructive placement of a car after arrival at destination when on the line of the carrier directly serving the consignee.

(5) Issuance of a notice of arrival or constructive placement as required by the applicable tariffs on a car held for orders, a car placed on a public delivery track, or a car held subject to constructive placement.

(6) Completion of light repairs to a car shall be accomplished within twenty-four (24) hours of receipt. Light repairs are those which can be accomplished in twenty (20) man-hours or less.

(b) *Exceptions.*—(1) At points at which less than daily train, switching, or repair service is provided, including points at which such service is provided, on Saturdays, Sundays, or holidays named in the applicable tariffs, compliance with the standards required by these regulations shall be deemed to have been accomplished by removal of cars, forwarding, interchange, placement, completion of light repairs, or giving of arrival, placement, or constructive placement notice, on the next day on which such services are performed.

(2) Exceptions may be authorized by the Railroad Service Board and become effective on the date such exceptions are published in the Federal Register. Notice of such exceptions must be posted in the offices of the carrier from which arrival notices are sent or given.

§ 1038.3 Duties Imposed by Car Service Rules Not Affected.

The provisions of this shall not be construed to relieve any railroad of the duties imposed by the Commission's car service rules, 49 CFR part 1033 (specifically, the provisions of §§ 1033.7, 1033.17, and 1033.18), nor to relieve any railroad of the duty to observe all requirements of law and the regulations prescribed by the Commission.

§ 1038.4 Defenses.

Nothing in these regulations should be construed as limiting or denying a railroad the defense of *force majeure* as construed by the courts.

(49 U.S.C. Sec. 1(4), 1(6), 1(11), 1(13), 1(14)(a), and 1(15) in part I of the ICC Act, and cognate Sections in parts II, III, and IV of that Statute, and the National Transportation Policy)

[FR Doc.77-26153 Filed 9-7-77;8:45 am]

V 42 174 SEP 8 77 UMI

SUBTITLE B—OTHER REGULATIONS RELATING TO TRANSPORTATION

CHAPTER X—INTERSTATE COMMERCE COMMISSION

PART 1047—EXEMPTIONS

AGENCY: Interstate Commerce Commission.

ACTION: Administrative rule change.

SUMMARY: This administrative rule change will: (1) revise § 1047.25 to reflect Administrative Ruling 119, which lists the status of various commodities under the exemption provided by Section 203(b)(6) of the Interstate Commerce Act; and (2) insert clarifying subheadings between certain sections within Part 1047. These changes are intended to reflect changes in the exemption which have rendered present Part 1047.25 outdated, and to improve the sub-classification system in Part 1047.

EFFECTIVE DATE: October 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert S. Turkington, Assistant Director, Bureau of Operations, Interstate Commerce Commission, Washington, D.C. 20423 (202–275–7849).

Accordingly, 49 CFR Part 1047 is amended to read as follows:

1. By revising § 1047.25 to read as follows:

PARTIAL EXEMPTION FOR AGRICULTURAL COMMODITIES, LIVESTOCK AND FISH

§ 1047.25 Status of selected agricultural commodities, livestock and fish under 49 U.S.C. 303(b)(6) and Administrative Ruling No. 119.

Section 203(b)(6) of the Interstate Commerce Act (49 U.S.C. 303(b)(6)), as amended by the Transportation Act of 1958, provides an exemption for motor vehicles used in carrying ordinary livestock, fish, and unmanufactured agricultural commodities. Over the years, there have been numerous Bureau opinions, Commission decisions, and judicial holdings, as well as specific statutory language, defining certain commodities as falling either within or without the exemption. Administrative Ruling 119, which is reproduced below, is the most current compilation:

ADMINISTRATIVE RULING NO. 119, REVISED OCTOBER 1, 1974, SUPPLEMENTS RULINGS NOS. 107 AND 110, SECTION 203(b)(6)

INTERSTATE COMMERCE COMMISSION, BUREAU OF OPERATIONS

The purpose of this ruling is to provide a list showing the status of various commodities under the exemption in Section 203(b)(6) of the Interstate Commerce Act, as amended by the Transportation Act of 1958. The Bureau opinions in this ruling are tentative and informal and made in the absence of pertinent formal decisions by the Commission or the courts.

This composite commodity list is made up from the following sources:

1. Administrative Ruling No. 107 (49 CFR 1047.25) which the Transportation Act of 1958 incorporated into Section 203(b)(6) of the Act, but with certain changes. Listings based on Ruling No. 107 carry the identification: "Law".

2. Administrative Ruling No. 110 which explained the changes in Ruling No. 107 made by the Transportation Act of 1958. Listings taken from Ruling No. 110 carry the identification: "Law-Ruling 110".

3. Commission and court decisions since 1958. These are identified by the designation: "Case No. ———". The title and citation of the decision is shown in the Case List which follows the Commodity List.

4. Informal opinions given by the Bureau of Operations and its predecessor Bureaus in response to inquiries received since 1958. These are identified by the word: "Bureau".

A commodity listed as "Exempt" loses its exempt status whenever it is transported in a vehicle which at the same time is transporting for compensation commodities not within the exemption.

The fact that a particular commodity does not appear in the list does not mean that it is either within or not within the exemption. By analogy it may be possible to form a conclusion as to the status of commodities similar to those listed.

The safety and hours of service regulations of the Federal Highway Administration of the Department of Transportation apply generally to operations conducted under this exemption.

R. D. PFAHLER,
Director.

SECTION 205(b)(6) OF THE INTERSTATE COMMERCE ACT AS AMENDED BY THE TRANSPORTATION ACT OF 1958

Nothing in this part, except the provisions of Section 204 relative to qualifications and maximum hours of service of employees and safety of operations or standards of equipment shall be construed to include * * * (6) motor vehicles used in carrying property consisting of ordinary livestock, fish (including shell fish), or agricultural (including horticultural) commodities (not including manufactured products thereof), if such motor vehicles are not used in carrying any other property, or passengers, for compensation: *Provided*, That the words "property consisting of ordinary livestock, fish (including shell fish), or agricultural (including horticultural commodities (not including manufactured products thereof)" as used herein shall include property shown as "Exempt" in the "Commodity List" incorporated in ruling numbered 107, March 19, 1958, Bureau of Motor Carriers, Interstate Commerce Commission, but shall not include property shown therein as "Not Exempt": *Provided further, however*, that notwithstanding the preceding proviso the words "property consisting of ordinary livestock, fish (including shell fish), or agricultural (including horticultural) commodities (not including manufactured products thereof)" shall not be deemed to include frozen fruits, frozen berries, frozen vegetables, cocoa beans, coffee beans, tea, bananas, or hemp, and wool imported from any foreign country, wool tops and noils, or wool waste (carded, spun, woven, or knitted), and shall be deemed to include cooked or uncooked (including breaded) fish or shell fish when frozen or fresh (but not including fish and shell fish which have been treated for preserving, such as canned, smoked, pickled, spiced, corned, or kippered products);

COMPOSITE COMMODITY LIST OF ADMINISTRATIVE RULING NO. 119

Additives. Ruling No. 107 reflects the policy of allowing minor amounts of additives, since such things as vitamins in milk, seasoning or sweetening in foods, coated Christmas trees, etc. are shown as exempt. Informal rule of thumb is that no more than 5 percent non-exempt additives are allowable—Bureau

Advertising matter, in reasonable amounts, transported along with exempt commodities to which it relates, not considered as affecting the exempt nature of shipment—Bureau

Advertising matter, comprising 20–30 cases transported with 500 cases of tulip bulbs—Exempt—Bureau

Alfalfa, see Feeds

Animal fats—Not exempt—Law

Animals, see Livestock

Bagged commodities—Placing exempt commodities in bags does not affect their exempt status—Law

Bagging, scrap (worn jute bagging)—Not exempt—Bureau

- Pigeons, racing—Not exempt—Law
- Birdseed, see separate heading: Feeds

Bones, animal—Not exempt—Bureau

Bran, see Feeds

Broom corn, threshed and baled—Exempt—Law

Bulbs, see Horticultural Commodities

Butter—Not exempt—Law

Buttermilk—Exempt—Law

Candied apples (fresh apples on a stick dipped in taffy)—Not exempt—Bureau

Casein, derived from milk—Not exempt—Case No. 1

Canned fruits and vegetables—Not exempt—Law

Carnauba wax as imported in slabs or chunks—Not exempt—Law

Castor Beans—Exempt—Law

Castor pomace (cake remaining after extraction of oil from castor beans)—Not exempt—Bureau

Cattle, live, see Livestock

Cattle, slaughtered—Not exempt—Law

Charcoal—Not exempt—Law

Cheese—Not exempt—Law

Cheese, cottage—Not exempt—Law

Cheese, cottage, curd, in bulk—Not exempt—Bureau

Cheese, cream—Not exempt—Law

Chicle (a gum obtained from latex of trees) in form normally shipped, i.e. purified and neutralized—Not exempt—Bureau

Christmas trees, plain, sprayed, or coated—Exempt—Law

Cider, apple, and cider vinegar—Not exempt—Bureau

Citrus fruits, see Fruits

Clay—Not exempt—Bureau

Coal—Not exempt—Law

Cocoa bean shells, in any form—Not exempt—Bureau

Cocoa beans—Not exempt—Law-Ruling 110

Coconut, see Nuts

Coffee beans—Not exempt—Law-Ruling 110

Coffee, roasted—Not exempt—Law

Coffee, instant—Not exempt—Law

Compost, composed of manure and straw sweepings, dried, disintegrated, and decomposed—Exempt—Bureau

Compost, mixture of manure, straw or rice hulls, but not sawdust—Exempt—Bureau

Compost, product, a mixture of processed garbage and sewage sludge—Not Exempt—Bureau

Compost, mixture of manure and sweepings with water and bacterial agents to hasten fermentation, used as a growth medium for mushrooms—Not exempt—Bureau

Containers, crates, and boxes which have been used in the movement of exempt commodities, which have been reconditioned and sold from stock to new purchasers—Not exempt—Bureau

Containers, crates, and boxes which have been used in the movement of exempt commodities and are being returned for reuse—Exempt—Law

Containers, new, for use in shipping exempt commodities—Not exempt—Law

Copra meal—Not exempt—Law

Corn, See Grain

Corn cobs—Exempt—Law

Corn cobs, ground—Exempt—Law

Corn fodder—Exempt—Law

Cottage cheese, see Cheese

Cotton, carded but not spun, woven or knitted—Exempt—Law

Cotton felt, used in mattresses, etc. consisting of scraps of raw cotton, blended and carded, but not otherwise processed—Exempt—Bureau

Cotton, ginned or unginned—Exempt—Law

Cotton lap (baled cotton, blended, cleaned and formed into rolls preparatory to milling)—Exempt—Bureau

Cotton linters—Exempt—Law

Cotton motes (fibers removed from cotton seed after ginning and removal of linters)—Exempt—Bureau

Cotton waste consisting of bits of string, thread, and yarn—Not exempt—Bureau

Cotton waste consisting of scraps of cotton fibre not spun, woven, or knitted—Exempt—Law

Cotton yarn—Not exempt—Law

Cottonseed, whole—Exempt—Law

Cottonseed cake—Not exempt—Law

Cottonseed, dehulled—Exempt—Law

Cottonseed hulls—Exempt—Law

Cottonseed meal—Not exempt—Law

Crates, see Containers

Cream, see Milk

Cream cheese, see Cheese

Dehydrated, see commodity name: Fruits, Vegetables, Eggs, etc.

Diatomaceous earth—Not exempt—Law

Dinners, frozen—Not exempt—Law (But see next two entries)

Dinners, chicken, cooked and frozen—Exempt—Bureau (Based on Case No. 26)

Dinners, seafood, frozen—Exempt—Law—Ruling 110

Dried, see commodity name: Fruits, Vegetables, Eggs, etc.

Eggs:
- Albumen, fresh, liquid—Exempt—Law
- Albumen, fresh, liquid, pasteurized—Exempt—Bureau
- Dried—Exempt—Law
- Frozen—Exempt—Law
- Hard boiled, pickled, packed in vinegar and water with spices—Not exempt—Bureau
- In shell—Exempt—Law
- Liquid, whole or separated—Exempt—Law
- Mixture of 90% powdered and 10% syrup and salt, dried—Not exempt—Bureau
- Oiled—Exempt—Law
- Omelet mix consisting of fresh broken eggs and milk with minute amounts of salt and pepper and seasoning, packaged and frozen—Exempt—Bureau
- Powder, dried—Exempt—Law
- Shelled—Exempt—Law
- Shells, pulverized, for medical use (designated "pure calcium carbonate")—Not exempt—Bureau
- Whites, frozen—Exempt—Bureau
- Whole, with added yolks, dried—Exempt—Bureau
- Whole, frozen with added yolks—Exempt—
- Whole, frozen, standardized by subtraction of whites—Exempt—Bureau
- Yolks, dried—Exempt—Law
- Yolks, fresh, liquid—Exempt—Law
- Yolks, frozen—Exempt—Bureau
- Yolks, with 10% salt or sugar added—Not exempt—Bureau

Fats, animal—Not exempt—Law

Feathers—Exempt—Law

Feathers, cleaned and ground, not further processed, nothing added (sometimes referred to as "feather meal")—Exempt—Bureau

Feathers, ground, combined with dehydrated poultry offal—Exempt—Bureau

Feeds:
- Alfalfa, dried, chopped, and pressed into cubes and wafers by machine, after dampening with water—Exempt—Bureau
- Alfalfa, dried, etc., as above, but by a steam process—Not exempt—Bureau
- Alfalfa pellets—Not exempt—Law
- Beet pellets—Not exempt—Bureau
- Beet pulp—Not exempt—Law
- Bird gravel—Not exempt—Bureau
- Bird seed, containing milo, millet, wheat chaff, and peanut heart—Exempt—Bureau
- Bird seed bell, seed (millet, wheat, milo, and sunflower seed) mixed with an adhesive, such as corn syrup or wood glue, fitted with a wire hanger, and molded into a bell shape, for feeding wild birds—Exempt—Case No. 19
- Bran ahorts—Not exempt—Law
- Corn gluten—Not exempt—Law
- Cottonseed products, see separate heading: Cottonseed
- Distilled corn grain residues, with or without solubles added—Not exempt—Law
- Formulas composed of hominy feed, beet pulp, corn gluten, wheat middlings, cane molasses, and minerals—Not exempt—Bureau
- Hamster and gerbil food with 9 percent soy bean and alfalfa meal added—Not exempt—Bureau
- Hominy feed—Not exempt—Law
- Meal, see separate heading: Meal
- Middlings—Not exempt—Law
- Oat hulls, ground—Exempt—Law
- Parrot food, mixture of exempt commodities—Exempt—Bureau
- Pelletized ground refuse screenings—Not exempt—Law
- Rice bran—Exempt—Law
- Rice hulls, anhydrous ammonia added providing a 10 percent protein source as feed—Not exempt—Bureau
- Rice hulls, ground or unground, nothing added—Exempt—Bureau
- Rice mill feed pellets—Status pending—Case No. 32
- Screenings, feed—Exempt—Law
- Soya bean husks—Exempt—Case No. 16
- Wheat bran—Not exempt—Law
- Wheat mixed feed (mixture of coarse outer covering of wheat kernel, wheat germ, wheat flour, and offal of the tail of the mill)—Not exempt—Case No. 2

Fertilizer, commercial—Not exempt—Law

Fibers:
- Abaca (manila hemp), piassava, ixtle, rattan, and palm and grass fibers—Exempt—Case No. 3
- Clippings resulting from rope making—Not exempt—Bureau
- Coir yarn, made from coconut fibre, is manufactured by spinning—Not exempt—Case No. 3

Flax—Exempt—Law

Hemp—Not exempt—Law-Ruling 110

"Hemp" specifically made not exempt by amendment of Section 203(b)(6), means true hemp (cannabis sativa) or its fiber, and does not embrace similar plants or plant fibers commonly referred to by name—Case No. 3

Jute in bales—Exempt—Law

Jute fabric, product of a textile operation—Not exempt—Bureau

Kapok, in loose bales, not processed beyond separation of fibers from seeds—Exempt—Bureau

Palmleaf, not processed beyond separation from leaf, cleaning, combing, drying and baling—Exempt—Bureau

Ramie—Exempt—Law

Ramie Tops, consisting of long fibers of the ramie plant—Exempt—Bureau

Rayon or synthetic fibers, or mixtures thereof (waste materials or otherwise)—Not exempt—Bureau

Sisal, not being a true hemp—Exempt—See explanation under "Hemp" above

Fish (including shell fish):
- *General.* Frozen, quick frozen, and unfrozen fish and shell fish in the various forms in which it is shipped, such as live fish, fish in the round, beheaded, and gutted fish, filetted fish, beheaded shrimp, and oysters, clams, crabs, and lobsters, with or without shells, including crab meat and lobster meat—Exempt—Law
- Breaded, cooked, or uncooked, frozen or fresh—Exempt—Law-Ruling 110; Case No. 24
- Cakes, codfish, cooked or uncooked, frozen or fresh—Exempt—Law-Ruling 110; Case No. 24
- Canned, as a treatment for preserving—Not exempt—Ruling 110; Case No. 24
- Clam juice or broth, cooked or uncooked, frozen or fresh—Exempt—Ruling 110; Case No. 24
- Condensed fish solubles (obtained by condensing the aqueous portion of the residue of pressing oil from fish)—Not exempt—Bureau
- Cooked or partially cooked fish or shellfish, frozen or fresh—Exempt—Law-Ruling 110; Case No. 24
- Crab offal (residue after extraction of meat from crabs including shells, dried and ground)—Exempt—Bureau
- Crabmeat, pasteurized, placed in hermetically sealed containers for purpose of preservation—Not exempt—Bureau
- Crabmeat, pasteurized, sealed for purposes of cleanliness only, preservation accomplished by refrigeration—Exempt—Bureau
- Croquettes, salmon, cooked or uncooked, frozen or fresh—Exempt—Law-Ruling 110; Case No. 24
- Deviled crabs, clams, or lobsters, cooked or uncooked, frozen or fresh—Exempt—Law-Ruling 110; Case No. 24
- Dinners, cooked or uncooked, frozen or fresh—Exempt—Law-Ruling 110; Case No. 24
- Fish, processed by cleaning, scaling, and adding a small amount of salt—Exempt—Case No. 4
- Fish, ground, frozen into blocks—Exempt—Bureau
- Fish luncheon meat of smoked ground fish formed into loaves—Not exempt—Bureau
- Fish, lightly salted or spiced, requiring refrigeration to retard deterioration—Exempt—Bureau
- Fried fish fillets, oysters, or scallops, frozen or fresh—Exempt—Law-Ruling 110; Case No. 24
- Frogs, live or dressed—Exempt—Law
- Frogs and turtles, placed in formaldehyde to prevent or retard deterioration during transportation (but not as a preservative as that term is normally used) and used in substantially the same manner as live specimens—Exempt—Bureau
- Frozen, see General above, and individual listings

V 42 174
SEP 8 77
UMI

Hermetically sealed in containers as a treatment for preserving—Not exempt—Law
Hermetically sealed in containers for cleanliness only, preservation attained by refrigeration—Exempt—Law
Meal—Not exempt—Law
Offal (inedible portions of fish not further processed)—Exempt—Law
Oil from fishes—Not exempt—Law
Preserved, or treated for preserving, such as smoked, salted, pickled, spiced, corned, or kippered—Not exempt—Law
Residue remaining after extraction of oil from fish—Not exempt—Bureau
Salmon eggs, brined and packed in salt and formaldehyde solution in vacuum sealed jars—Not exempt—Bureau
Salmon eggs, frozen, not pickled or brined or otherwise treated for preservation—Exempt—Bureau
Salted, as a treatment for preserving—Not Exempt—Law
Scraps, frozen, granulated, and pressed into blocks, for cat food—Exempt—Bureau
Sea lions and walrus—Not exempt—Bureau
Seafood casseroles and dinners of which fish or shellfish is the principal ingredient—Exempt—Bureau
Seal blubber—Not exempt—Bureau
Seal skins—Not exempt—Bureau
Shells of sea creatures, other than those mixed with other refuse or "offal"—Not exempt—Bureau
Shells, oyster, moving to market for use in button making—Not exempt—Law
Shells, oyster, ground—Not exempt—Case No. 28
Shrimp cocktail (shrimp cooked and placed in glass jars with special sauce and seasoning and kept under refrigeration)—Exempt—Bureau
Soup or chowder containing a relatively small proportion of fish or shellfish in proportion to other ingredients which are not within the exemption—Not exempt—Bureau
Stew, consisting of raw oysters or clams, milk and seasoning, frozen but uncooked—Exempt—Law
Sticks, cooked or uncooked, frozen or fresh—Exempt—Law-Ruling 110
Sticks, frozen, cooked, breaded—Exempt—Case No. 5
Tuna Pies, frozen—Exempt—Bureau
Turtles, sea or fresh water—Exempt—Law
Whale meat, fresh—Exempt—Law
Flagstone—Not exempt—Law
Flax fiber, see Fibers
Flaxseed, whole—Exempt—Law
Flaxseed meal—Not exempt—Law
Flies, live sterile screwworm, used in screwworm eradication program—Exempt—Bureau
Flour—Not exempt—Law:
  Corn flour, extruded and hammered to a flour consistency—Not exempt—Bureau
  Corn meal flour—Not exempt—Bureau
  Mustard flour, consisting of seeds ground or milled and bolted—Not exempt—Bureau
  Tapioca flour, produced in same manner as wheat flour—Not exempt—Bureau
Flowers and flower plants, see Horticultural commodities
Fodder, corn and sorghum—Exempt—Law
Forage, see Hay and Feeds
Forest products:
  Bark—Exempt—Law
  Bark—Boiled to clean and soften—Exempt—Law
  Bark, raw, broken up by means of hammermill, or shredded, ground, or crushed, graded, and bagged—Exempt—Bureau
  Bark, shredded in its natural state, sprayed with copper based fungicide—Exempt—Bureau
Blankets of pine and spruce boughs—Exempt—Law
Bolts for making shingles—Exempt—Law
Divi and divi pods, natural products of certain trees, not processed—Exempt—Bureau
Excelsior wood: shredded birch bark, not a by-product of sawing, planing or finishing of wood—Exempt—Bureau
Fence pickets, split by hand from bolts, edged and pointed—Not Exempt—Bureau
Fence posts and rails, consisting of logs peeled and cut to length, the posts having holes drilled in them for insertion of rails, and the rails being split and sharpened at both ends—Not exempt—Case No. 6
"Firelog": wood shavings, sawdust, low grade petroleum, used in place of firewood—Not exempt—Bureau
Greenery—Exempt—Law
Growing, see separate heading; Horticultural Commodities
Hickory "wheels": short lengths cut from trees or logs—Exempt—Bureau
Hickory meal: sawdust or powdered hickory wood—Not exempt—Bureau
Holly sprigs and cuttings—Exempt—Law
Leaves—Exempt—Law
Leaves, sisal, husks and moisture removed—Exempt—Law
Lignin sulphonate obtained by cooking wood chips in a chemical solution and used as a road binder—Not exempt—Bureau
Logs and pilings impregnated with a preservative, usually creosote—Not exempt—Case No. 7
Mesquite brush, ground, dehydrated and packaged in plastic bags—Exempt—Bureau
Mesquite brush, twigs and debris burned off—Exempt—Law
Mine timbers or cants, comprised of 8 foot lengths of fir, rough-sawn, square cornered—Not exempt—Bureau
Mistletoe—Exempt—Law
Myrobalons, as imported in natural state—Exempt—Law
Palmyra stalk fibers (fronds from palm leaves)—Exempt—Law
Peat moss, dried, shredded, baled—Exempt—Law
Peat or peat moss, in bags or boxes—Exempt—Bureau (See also Case No. 31)
Peat moss flower pots impregnated with wetting agent—Not exempt—Bureau
Peat, for use as an organic fertilizer, wet with water and other solutions, decomposed in a pressure vessel and dried—Not exempt—Case No. 31
Peeler cores, composed of the center portions of logs remaining after plywood is cut therefrom—Exempt—Case No. 30
Pilings, wooden, untreated—Exempt—Case No. 9
Pilings, wooden, impregnated with a preservative, usually creosote—Not exempt—Case No. 7
Pine Cones, leaves, and miniature trees preserved by use of a solution containing calcium chloride—Exempt—Case No. 8
Poles, wooden, untreated—Exempt—Case No. 9
Poles, preassorted, preventative-treated (used by utilities companies, contractors, municipalities, etc.)—Not exempt—Case No. 10
Poles, telephone, not creosoted—Exempt—Law
Railroad ties composed of bolts from felled trees sawed crosswise and peeled or split but not otherwise processed—Exempt—Bureau
Railroad ties, lengths of wood cut to length and sawed lengthwise to size—Not exempt—Bureau
Resin, crude—Exempt—Law
Resin products, such as turpentine—Not exempt—Law
Roots, natural or dried—Exempt—Law
Sap, maple—Exempt—Law
Sawdust and shavings, regardless of their place of production, the process by which they are created, or their ultimate use—Not exempt—Case No. 11
Sawdust from lumber mills—Not exempt—Law
Shakes and shingles, whether split by hand or by machine—Not exempt—Case No. 12
Shingle bolts—Exempt—Law
Slabwood produced from sawmill operations—Not exempt—Case No. 13
Spanish moss—Exempt—Law
Sphagnum moss—Exempt—Law
Spices, see separate listing: Spices
Tanbark or tanwood, residue after tanning dye is extracted from bark, roots, or wood by means of extreme pressure and hot water, used as a mulch—Not exempt—Bureau
Tanning extracts (wattle, chestnut, quebracho) produced by leaching bark, clarifying the extract and concentrating it in vacuum evaporators—Not exempt—Bureau
Timber (rough logs or bolts) cut in random lengths, with bark removed—Exempt—Bureau
Trees:
  Christmas, plain, sprayed, or coated—Exempt—Law
  Cut to length, peeled, or split—Exempt—Law
  Growing, see Horticultural commodities
Sawed into lumber—Not exempt—Law
Trimmings from logs and bolts, except bark—Not exempt—Case No. 11
Valonia, as imported in natural state—Exempt—Law
Wood chips for making wood pulp—Not exempt—Law
Wood cut into short crosswise lengths for firewood (not sawed lengthwise)—Exempt—Bureau
Wreaths of holly or other natural material with small amount of foundation or decorative material—Exempt—Law
Frogs, see Fish
Frozen, see commodity name: Fruits, Vegetables, Fish, Poultry, etc.
Fruits and Berries:
  Apple peels and cores ground, but not otherwise processed—Exempt—Bureau
  Apple pomace (substance remaining after extraction of juice)—Not exempt—Bureau
  Apples, fresh, unfrozen, peeled, cored, sliced and dipped in brine solution to retain freshness—Exempt—Bureau
  Bagged—Exempt—Law
  Bananas, fresh, dried, dehydrated, or frozen—Not exempt—Law-Ruling 110
  Blueberries, incidentally frozen while being maintained in low temperature storage, allowed to thaw during transportation—Exempt—Bureau
  Canned—Not exempt—Law
  Cherries in sulphur dioxide "brine" for purpose of holding them in fresh state until they can be processed for marketing, which processing includes "debrining"—Exempt—Case No. 14
  Cherries, maraschino type, resulting from further processing of cherries mentioned just above—Not exempt—Case No. 14
  Chopped glazed fruit (similar to that used in fruit cakes)—Not exempt—Bureau
  Citrus fruit salad, fresh, chilled—Exempt—Bureau
  Citrus fruit sections, fresh, cold-packed or semi-frozen—Exempt—Law

Citrus fruit sections, frozen—Not exempt—Law-Ruling 110
Citrus fruit sections, not frozen, packed with sugar, water, citric acid, and benzoate of soda, additives being 6% to 10% of total—Not exempt—Bureau
Citrus pulp (substance remaining after juice extraction)—Not exempt—Bureau
Color added—Exempt—Law
Cranberries, partially frozen as result of being placed in open boxes in storage under controlled temperatures to insure freshness pending transportation to canneries—Exempt—Bureau
Cranberries, purposely quick-frozen, maintained in a frozen state during transportation—Not exempt—Bureau
Dates, pitted, dried—Exempt—Law
Dehydrated—Exempt—Law
Dried, naturally or artificially—Exempt—Law
Dried, not further processed, placed in sealed packages or receptacles—Exempt—Bureau
Figs, dried, halved or quartered—Exempt—Law
Figs or dates, ground, in paste form, cooked, or with substantial amounts of other substances added—Not exempt—Bureau
Fig paste, consisting of ground figs, either in their natural state or dried—Exempt—Bureau
Frozen—Not exempt—Law-Ruling 110
Frozen (quick-frozen) for the purpose of preservation during transportation—whether shipped under temperature control or not—Not exempt—Bureau
Fruit baskets or gift packages consisting of fresh fruit with 5% or less of jelly in jars and candy—Exempt—Bureau
Fumigated—Exempt—Law
Graded—Exempt—Law
Grape slurry comprised of grapes removed from stems and crushed—Exempt—Bureau
Hulls of oranges after juice extractions—Not exempt—Law
In brine, to retain freshness—Exempt—Law
Juice, orange or other citrus—Not exempt—Law
Juice, fruit, plain or concentrated—Not exempt—Law
Kernels—Exempt—Law
Myrobalan (prune-like tropical fruit), dried, crushed and bagged—Exempt—Bureau
Oiled apples—Exempt—Law
Olives, processed for table use, in brine or not in brine, stuffed or not stuffed, in any type container—Not exempt—Bureau
Orange and lemon peel, dried, prepared from hulls of fruit following juice extraction—Not exempt—Bureau
Peaches, peeled, pitted, and put in cold storage in unsealed containers—Exempt—Law
Pies, frozen—Not exempt—Law
Plantains (considered to be bananas)—Not exempt—Case No. 15
Preserved, such as jam—Not exempt—Law
Purees, strawberry and other, frozen—Exempt—Law
Quick frozen—Not exempt—Law-Ruling 110
Raisins, seeded or unseeded—Exempt—Law
Raisins, very lightly coated with honey, cinnamon, or sugar—Exempt—Bureau
Raisins, chocolate coated or glaced, thereby preserving and candying them—Not exempt—Bureau
Sliced, frozen—Not exempt—Law-Ruling 110
Strawberries, in syrup and unsealed containers in cold storage—Exempt—Law
Strawberries, in unsealed containers with temperature controlled at 10° or lower—Not exempt—Bureau
Grain:
  Artificially dried—Exempt—Law
  Barley, brewers' (residuary by-products of the malting process in which barley, steeped and germinated, is mixed with hops and other ingredients and allowed to ferment)—Not exempt—Bureau
  Barley, malted (processed only to the extent of soaking in warm water to hasten or induce germination, then drying, and removal of sprouts in some instances)—Exempt—Bureau
  Barley, pearled (husked and polished grains)—Exempt—Bureau
  Barley, rolled—Exempt—Law
  Barley, whole—Exempt—Law
  Brewers grains, wet, by-product of brewing process—Not exempt—Bureau
  Corn cob pellets consisting of finely ground cobs with graphite added—Not exempt—Bureau
  Corn, cracked—Exempt—Law
  Corn, from which oil is extracted, ground and dried to comprise a product known as "brewers corn grits"—Not exempt—Bureau
  Corn screenings—Exempt—Bureau
  Corn shucks, used as "hot tamale shucks"—Exempt—Bureau
  Corn, shelled—Exempt—Law
  Corn, whole—Exempt—Law
  Cracked wheat (bulgur or bulgar) processed by cooking the grains for purification and preservation, then drying, dehulling and grinding—Not exempt—Bureau
  Feeds, see separate heading: Feeds
  Hulls and husks, see separate heading: Feeds
  Milo maize—Exempt—Law
  Oats, crimped or rolled in the same manner as rolled barley—Exempt—Bureau
  Oats, whole—Exempt—Law
  Oats, whole, crushed and ground, in bags—Exempt—Bureau
  Oil, extracted from grain—Not exempt—Law
  Popcorn, popped—Not exempt—Law
  Popcorn, shelled (unpopped) packaged with cooking fat or oil (one part oil to 2½ parts popcorn)—Not exempt—Bureau
  Popcorn, shelled (unpopped), weighing ten or more ounces, accompanied by a separate package of seasoning consisting of salt, monosodium glutamate, butter flavor, cottonseed oil, and artificial color and flavor weighing approximately ¾ ounce—Exempt—Bureau
  Popcorn, unpopped, shelled, in sealed or unsealed containers—Exempt—Law
  Puffed grains—wheat, rice, millet or corn—produced by application of steam inside air tight tubes, and heat from outside burners, although not fully cooked—Not exempt—Bureau
  Rice bran—Exempt—Law
  Rice, brewers—Exempt—Law
  Rice, clean—Exempt—Law
  Rice, ground, not sifted, bolted or graded—Exempt—Bureau
  Rice, hull ash (burned hulls of threshed rice)—Not exempt—Bureau
  Rice, hulled ("brown rice")—Exempt—Bureau
  Rice, long grain, enriched, parboiled, subjected to enough steam pressure to harden kernel and reduce stickiness, but not boiled or precooked—Exempt—Bureau
  Rice, milled, fortified with vitamins—Exempt—Bureau
  Rice polish—Exempt—Law
  Rice, precooked—Not exempt—Law
  Rice, whole—Exempt—Law
  Rye, whole—Exempt—Law
  Sorghum grains, whole—Exempt—Law
  Wheat, bulgar, cleaned, cooked under steam pressure, dried, dehulled, ground, graded and bagged—Not exempt—Bureau
  Wheat germ—Not exempt—Law
  Wheat, new, crushed, uncooked—Exempt—Bureau
  Wheat, whole—Exempt—Law
Grass sod—Exempt—Law
Gravel—Not exempt—Law
Greenery, see Forest products
Grinding, without prior or subsequent manufacturing processes does not affect the exempt status of the commodity—Law
Guano, bat (excrement of bats, dried, but not further processed)—Exempt—Bureau
Gums, the exudation of trees and shrubs, such as arabic, ghatti and tragacanth, in natural state or dried, sifted, and ground, but not purified, neutralized or refined—Exempt—Bureau
Hair, alpaca, camel, or goat, clipped from animal—Exempt—Law
Hair, hog or other animal, product of slaughter of animal—Not exempt—Law
Hair, rabbit or vicuna (plucked or clipped from live animal)—Exempt—Bureau
Hay and forage, dried naturally or artificially—Exempt—Law
Hay, chopped—Exempt—Law
Hay, dehydrated—Exempt—Law
Hay, salt (from salt marshes)—Exempt—Law
Hay, see also Feeds
Hay, sweetened with 3% molasses by weight Not exempt—Law
Hemp, see Fibers
Herbs, see Spices
Hides, green and salted—not exempt—Law
Honey, in the comb or strained—Exempt—Law
Honey, heat treated to retard granulation—Exempt—Law
Hops—Exempt—Law
Horticultural commodities:
  Bulbs—Exempt—Law
  Flowers, growing or cut—Exempt—Law
  Leaves, natural or dried—Exempt—Law
  Nursery stock—Exempt—Law
  Plants, vegetables and flower—Exempt—Law
  Roots; rhubarb, asparagus, mint, etc.—Exempt—Law
  Star flowers—dried, spray painted—Exempt—Bureau
  Trees, growing, balled in earth—Exempt—Law
  Wreaths, holly or other natural material, with small amount of foundation or decorative material—Exempt—Law
Hulls and husks, see Feeds, Nuts
Humus, of a nature similar to peat moss—Exempt—Law
Ice for cooling subsequent shipments of exempt commodities—Exempt—Law
Ice Cream and ice cream mix, see Milk and cream
Imported commodities—Fact of importation does not affect status of otherwise exempt commodities, except that wool imported from any foreign country is not exempt—Law-Ruling 110
Insecticides—Not exempt—Law
Juices, see Fruits
Jute fiber, see Fibers
Kapok, see Fibers
Kelp, dried, ground—Exempt—Law
Latex, see Rubber
Leaves, see Forest products, Horticultural commodities, and Spices
Legume inoculant—Not exempt—Bureau
Licorice paste and powder (prepared from ground licorice root, and used in tobacco and confectionary trades and for medicinal purposes)—Not exempt—Bureau
Licorice roots, spent (by-product or residue remaining after open-vat leaching process used by extract licorice)—Not exempt—Bureau

V 42 174 SEP 8 77 UMI

Livestock:
- Exhibit animals such as those of 4-H club members, which though shown for a few days, are chiefly valuable for slaughter—Exempt—Law
- Laboratory animals, not domesticated, such as rats, mice, guinea pige—Not exempt—Bureau
- Medical use animals, such as ordinary healthy swine for serum manufacture—Exempt—Law
- Monkeys—Not exempt—Law
- Ordinary, i.e. all cattle, swine, sheep, goats, horses, and mules, except such as are chiefly valuable for breeding, racing, show purposes, and other special uses—Exempt—Law
- Race horses—Not exempt—Law
- Registered or purebred cattle for ordinary farm or ranch uses, not chiefly valuable for breeding, race, show, or other special purposes—Exempt—Law
- Riding horses, used for personal pleasure riding—Exempt—Bureau
- Rodeo animals (bucking horses, cow ponies, parade horses, pick-up horses, Brahma bulls, steers, calves, buffalo)—Not Exempt—Bureau
- Show horses—Not exempt—Law
- Zoo animals—Not exempt—Law

Limestone, agricultural—Not exempt—Law
Linseed meal, see Meal
Lumber, rough sawed or planed—Not exempt—Law
Manure, in natural state—Exempt—Law
Manure, dried or dehydrated, bagged—Exempt—Law
Manure to which sand is added as conditioning ingredient, equivalent to 3% of the total mixture—Exempt—Bureau
Manure to which is added substantial amounts of biological soil organisms and pulverized granite, fermented and dehydrated—Not exempt—Bureau
Manure, fermented, with additives such as yeast and molds, producing a rich liquor which in water solution is used for soil enrichment—Not exempt—Bureau
Manure, paunch (cud of animal's rumen) product of slaughter—Not exempt—Bureau
Maple sap—Exempt—Law
Maple syrup—Not exempt—Law
Meal, alfalfa—Not exempt—Law
Meal, copra—Not exempt—Law
Meal, cottonseed—Not exempt—Law
Meal, fish—Not exempt—Law
Meal, alfalfa—Not exempt—Law
Meal, linseed—Not exempt—Law
Meal, peanut—Not exempt—Law
Meal, soybean—Not exempt—Law
Meat and meat products:
- Beef dinners, frozen—Not exempt—Bureau
- Fresh, frozen or canned—Not exempt—Law
- Meat pies, frozen—Not exempt—Bureau
- Meat of Seals, sea lions and walrus—Not exempt—Bureau
- Scrap bones and meat, refuse from packing houses—Not exempt—Bureau

Milk and Cream:
- Anhydrous milk fat made by a continuous separation process directly from mik or cream in the same manner as nonfat dried milk solids—Exempt—Bureau
- Butterfat, isex, Gold Label (trade name) consisting of over 50% sugar and 2% water and 44% butterfat—Not exempt—Bureau
- Buttermilk—Exempt—Law
- Buttermix/condensed cream consisting of 45% butter fat 30% sugar and 25% akimmed milk solids—Not exempt—Bureau
- Casein, produced commercially through specialized processes—Not exempt—Case No. 1
- Cheese, see that main heading
- Concentrate, pasteurized and homogenized, with ⅔ of the water removed—Exempt—Bureau
- Concentrate (mixture of fresh cream with skim milk from which a portion of water is removed)—Exempt—Bureau
- Concentrate, consisting of fresh whole milk from which a portion of the water is removed to which no subetantial amount of non-exempt subetance is added—Exempt—Bureau
- Condensed—Not exempt—Law
- "Culturemate": non-fat dry milk powder, 10% dry phosphate salts, dry process extract, small amounts of dextrose and whey—Not exempt—Case No. 29
- Dry milk solids (essentially the same as powdered milk)—Exempt—Case No. 1
- Evaporated milk, in sealed cans—Not exempt—Bureau
- Frozen—Exempt—Law
- Homogenized—Exempt—Law
- Ice cream mix (blend of milk, dried skim milk and sugar)—not exempt—Bureau
- Milk "replacer" (blend of 93% ingredients
- Lactose: milk sugar, traces of protein and ash, made by condensing sweet cheese whey, crystalizing by cooking, then spinning, drying and bagging—Exempt—Case No. 29
- Milk "replacer" containing 10% animal fat—Not exempt—Bureau
- Milk "replacer" (blend of 98% ingredients themselves "exempt" commodities and 2% dietary supplements and flavoring ingredients, not otherwise processed)—Exempt—Bureau
- Milk "replacer" (Calf Pab), containing at least 20 nonexempt ingredients (no percentages shown)—Not exempt—Bureau
- Milk shake mix, composed of powdered milk with substantial amounts of sweetening and flavoring added—Not exempt—Bureau
- Pasteurized—Exempt—Law
- Powdered—Exempt—Law
- Raw—Exempt—Law
- Raw milk with coloring added to indicate it has been found unfit for human consumption—Exempt—Bureau
- Skim—Exempt—Law
- Skim, dried—Exempt—Bureau
- Skim, with two-thirds of water removed, in bulk or unsealed containers—Exempt—Law
- Standardized—Exempt—Law
- Sterilized in hermetically sealed cans—Not exempt—Law
- Vitamin "A"—Exempt—Law
- Whey, see that main heading
- Whipped cream, frozen, containing only exempt dairy products, which is mechanically processed into that form—Exempt—Bureau
- Whole milk with moisture content removed and nothing added—Exempt—Bureau
- Yoghurt, plain or flavored—Not exempt—Bureau

Milo, see Grains
Mohair, raw, cleaned, or scoured—Exempt—Law
Molasses—Not exempt—Law
Moss, see Forest products
Mushrooms, fresh—Exempt—Law
Nursery stock, see Horticultural commodities
Nutria carcasses, ground, for use as mink feed—Not exempt—Bureau
Nutria (or coypu), skinned, whole or chopped—Not exempt—Bureau
Nutria and rat carcasses, whole, frozen or unfrozen—Not exempt—Bureau
Nuts:
- Blanched (placed in water hot enough to soften the skins and facilitate removal of kernel, but not sufficient to kill the enzymes)—Exempt—Bureau
- Cashews, roasted or cooked—Not exempt—Bureau
- Cashews, scorched (not roasted or cooked, but darkened in color unintentionally by overheating during shelling process)—Exempt—Bureau
- Coconut, dried, shredded, flaked, or prepared by thread mill or devil mill to produce thread-like particles or granules, not further processed—Exempt—Bureau
- Coconut meal, see separate heading: Copra meal
- Macadamia nuts—Exempt—Bureau
- Peanut meal—Not exempt—Law
- Peanut shells, ground—Exempt—Law
- Peanuts, roasted and salted in the shell—Not exempt—Bureau
- Pistachio, shells colored with food coloring but not otherwise processed—Exempt—Bureau
- Raw, shelled or unshelled—Exempt—Law
- Roasted or boiled—Not exempt—Law
- Shelled, raw—Exempt—Law
- Shelled, salted (not roasted or otherwise similarly processed)—Exempt—Bureau
- Shelled, sprayed or washed with preservative but not candied or flavored—Exempt—Bureau
- Shells—Exempt—Law
- Shells, ground peanut—Exempt—Law
- Shells, peanut, pelletized, comprised of hulls or shells ground and formed into pellets by application of pressure with steam as binder (similar to production of alfalfa pellets)—Not exempt—Bureau
- Shells, pecan, ground—Exempt—Case No. 17
- Shells, pecan, mixed with chemicals equivalent to 10% of the total mixture—Not Exempt—Bureau
- Unshelled, raw—Exempt—Law

Oats, see Grains
Offal, consisting of blood, intestines, viscera, etc., by-product of the slaughtering of animals—Not exempt—Bureau
Oil, mint—Not exempt—Law
Oil, extracted from vegetables, grain, seed, fish, or other commodity—Not exempt—Law
Olives, see Fruits and Berries
Packaged commodities—Packaging exempt commodities does not affect their exempt status—Law
Peanuts, see Nuts
Peat Moss, see Forest products
Pelletized feeds, see Feeds
Pelts—Not exempt—Law
Pies, frozen—Not exempt—Law
Pigeons, racing, see Birds
Plants, vegetable or flower, see Horticultural commodities
Poles, see Forest products
Popcorn, see Grains
Potash—Not exempt—Bureau
Poultry and Poultry Products:
- Additives, such as injected butter, gravy, seasoning, etc., sold in or along with uncooked poultry, do not void the exempt if not in excess of 5% by weight—Bureau
- Blood of poultry and rabbits from which corpuscles have been removed by centrifugal force (processing by a machine similar to a cream separator)—Exempt—Bureau
- Broth, dehydrated by spray-drying into a powder—Not exempt—Case No. 25
- Carcasses, raw, in marble-size chunks—Exempt—Bureau
- Cut up, raw—Exempt—Bureau
- Cut-up, precooked or cooked; same, breaded and/or battered; same, marinated, breaded and/or battered; all frozen or refrigerated—Exempt—Case No. 26
- Deboned, cooked or uncooked, fresh or frozen, in rolls or diced—Exempt—Bureau
- Dehydrated, chunked, process includes boiling, grinding, and drying—Not exempt—Case No. 25
- Dinners, cooked and frozen—Exempt—Bureau; see also separate heading: Dinners
- Dressed, fresh or frozen—Exempt—Law
- Fat, as removed from poultry, not cooked—Exempt—Bureau
- Fat, skimmed from broth, plain or reduced to powder by spray-drying—not exempt—Case No. 25
- Feathers—Exempt—Law
- Frozen—Exempt—Law
- Live—Exempt—Law
- Offal, including blood (natural by-products of the killing and processing of poultry for market)—Exempt—Case No. 27
- Picked—Exempt—Law
- Pies, cooked, frozen or unfrozen—not exempt—Bureau
- Powdered, process includes boiling, fine grinding, and spray-drying—Not exempt—Case No. 25
- Rolled in batter but uncooked—Exempt—Bureau
- Rolls, containing sectioned and deboned poultry, cooked—Exempt—Bureau
- Sticks, cooked—Exempt—Bureau
- Stuffed and frozen—Exempt—Law
- Stuffing, in plastic bags, packed with but not in bird—Exempt—Bureau

Pulp, beet—Not exempt—Law
Pulp, sugarcane—Not exempt—Law
Purees, see Fruits
Rabbits, dressed—Exempt—Law
Rabbits, wild, skinned—Not exempt—Bureau
Raisins, see Fruits
Ramie Fiber, see Fibers
Residue, (foots or sediments) remaining after removal of oil from various commodities—Not exempt—Bureau
Resin, see Forest products
Rice, see Grains
Rock—Not exempt—Law
Roots, see Forest products, Horticultural commodities, Spices and herbs
Rubber, crude, in bales—not exempt—Law
Rubber, latex, natural, liquid, from which water has been extracted and to which ammonia has been added—Not exempt—Law
Rye, see Grains
Sand—Not exempt—Law
Sap, see Forest products
Sawdust, see Forest Products
Sea Creatures, see Fish
Seasoning or salt, added to a commodity within the exemption in insignificant amounts, not considered to affect exempt status of commodity—Bureau
Seaweed, dried, ground—Exempt—Law
Seeds:
- Anise, not subject to a manufacturing process—Exempt—Bureau
- Bird seed, see separate heading: Feeds
- Cotton, see separate heading: Cottonseed
- Deawned—Exempt—Law
- Flax, see separate heading: Flaxseed
- Grass seed—Exempt—Bureau
- Grass seed, packaged in individual boxes and bags—Exempt—Bureau
- Hybrid seed corn—Exempt—Bureau
- Inoculated—Exempt—Law
- Meal made from seeds, see Meal
- Natural—Exempt—Law
- Oil extracted from seeds—Not exempt—Law
- Packets or boxes of seeds in display racks—Exempt—Law
- Scarified—Exempt—Law
- Screened or sized—Exempt—Law
- Seed kits, flower or vegetable, consisting of seeds, soil substitutes, and plant food, in growing tray (punch and grow kits)—Not exempt—Bureau
- Sesame seeds in hulls, bagged—Exempt—Bureau
- Sesame seeds, cleaned and dehulled by mechanical process—Exempt—Bureau
- Siftings and screenings consisting of residue from sieving of seeds (not further processed)—Exempt—Bureau
- Soybean seeds, in bags to which are attached a small container of inoculant—Exempt—Bureau
- Spice, see Spices
- Sprayed for disease control—Exempt—Law
- Sunflower seed hulls, lubricated by spraying with hot water to increase density, formed into loose, crumbling pellets—Exempt—Bureau
- Tamarind, ground, comprised of seeds removed from pods without boiling, cooking, or the like, and processed only by cleaning and grinding—Exempt—Bureau
- Used as seasonings, not subjected to a manufacturing process—Exempt—Bureau

Shells, see Cocoa bean, Eggs, Fish, Nuts
Shingle bolts, see Forest Products
Skins, animal—Not exempt—Law
Skins, seal (sea mammal hides)—Not exempt—Bureau
Sliced, see commodity name: Fruits, Vegetables, etc.
Sludge, dried sewage—Not exempt—Bureau
Soil, potting—Not exempt—Law
Soil, potting or African Violet Mix consisting of 90 percent peat, 8 percent sand and 2 percent vermiculite—Not exempt—Bureau
Soil, top—Not exempt—Law
Sorghum fodder—Exempt—Law
Sorghum grains—Exempt—Law
Soup, frozen—Not exempt—Law
Spanish moss, as gathered from trees—Exempt—Bureau
Spices and Herbs:
- Angelica root—Exempt—Bureau
- Chicory root, natural or dried—Exempt—Bureau
- Chili powder, consisting of dried, ground chili pepper pods—Exempt—Bureau
- Chili powder (mixture of ground peppers, spices and herbs, and a small amount of salt)—Exempt—Bureau
- Cumin seed—Exempt—Bureau
- Deer, (or deer's) tongue leaves, natural, dried, or processed in a manner similar to that undergone by redried, tobacco leaf—Exempt—Bureau
- Ground, but not further processed—Exempt—Law
- Paprika, ground—Exempt—Case No. 20
- Pepper, ground, not further processed—Exempt—Bureau
- Raw, unground spices—Exempt—Case No. 20
- Reconditioned spices, ground (screened for removal of impurities but not further processed)—Exempt—Bureau
- Seeds, see also that main heading
- Sweet basil leaves, dried and separated from stems—Exempt—Bureau
- Unground, whether seeds, berries, leaves, bark or roots—Exempt—Law

Stone, natural, marble or granite—Not exempt—Bureau
Stover—Exempt—Law
Straw—Exempt—Law
Sugar—Not exempt—Law
Sugar beets—Exempt—Law
Sugar cane—Exempt—Law
Sugar cane pulp—Not exempt—Law
Sugar, raw—Not exempt—Law
Syrup, cane—Not exempt—Law
Syrup, maple—Not exempt—Law
Tankage, consisting of offal from slaughtered animals—Not exempt—Bureau
Tea—Not exempt—Law-Ruling 110
Telephone poles, see Forest products
Textile waste, see Cotton waste
Tobacco:
- Binder tobacco, composed of adhesive materials added to pulverized tobacco, the resultant mixture formed into flat sheets (similar to homogenized tobacco)—Not exempt—Bureau
- Chopped leaf—Exempt—Law
- Cigars and cigarettes—Not exempt—Law
- Fragments, siftings and dust resulting from processes which produce tobacco items within the exemption (i.e. chopped tobacco leaf, redried leaf, etc.); also that which becomes unusable during preliminary handling prior to the manufacture of non-exempt tobacco items—Exempt—Bureau
- Homogenized—Not exempt—Law
- Leaf—Exempt—Law
- Redried leaf—Exempt—Law
- Smoking—Not exempt—Law
- Stem meal—Not exempt—Bureau
- Stemmed leaf—Exempt—Law
- Stems—Exempt—Law
- Tobacco made of ground-up scraps, considered a form of homogenized tobacco—Not exempt—Bureau

Topsoil—Not exempt—Law
Trees, see Forest products
Turtles, see Fish
Vegetables:
- Bagged—Exempt—Law
- Beans, dried artificially and packed in small container—Exempt—Law
- Cabbage rolls (heads of cabbage pickled in water and salt after which the leaves are cut off and stuffed with a tomato and whole pepper, in jars with juice of pickled cabbage)—Not exempt—Case No. 18
- Candied sweet potatoes, frozen—Not exempt—Law
- Canned—Not exempt—Law
- Cauliflower, cured in salt brine, shipped in open unsealed containers—Exempt—Case No 21
- Cooked—Not exempt—Law
- Cooked in water or steam for a period longer than that necessary for the inactivation of the enzymes, or by immersion in oil or fat—Not exempt—Case No. 22
- Cucumbers and other vegetables processed into pickles by the ordinary means—Not exempt—Bureau
- Cucumbers and tomatoes, barrel-cured into kosher pickles (fresh cucumbers or tomatoes kept in barrel overnight with water, garlic, salt, spices and seasonings, then placed in jars and kept under refrigeration)—Not exempt—Case No. 18
- Cucumber delight (sliced cucumbers with onions, peppers, sugar and salt, in jars or barrels with juices)—Not exempt—Case No. 18
- Cucumbers, salt cured—Exempt—Law
- Cured—Exempt—Law
- Cut up, fresh, in cellophane bags—Exempt—Law
- Dried, naturally or artificially—Exempt—Law
- Dehydrated—Exempt—Law
- French fried onion rings—Not exempt—Case No. 22
- French fried potatoes—Not exempt—Law
- Frozen—Not exempt—Law-Ruling 110
- Garlic paste, made from fresh crushed garlic cloves heated only enough to deactivate the enzymes, small percentage of preservative added—Exempt—Bureau
- Garlic powder—Exempt—Law
- Graded—Exempt—Law
- Mushrooms (considered vegetables for purposes of Section 203(b)(6), frozen—Not exempt—Bureau; Freeze dried (frozen, then thawed, then dehydrated)—Exempt—Bureau
- Oil, extracted from vegetable—Not exempt—Law

V 42 174 SEP 8 77 UMI

Onion chips and flakes, dried—Exempt—Law
Onion powder—Exempt—Law
Onion powder, made from onions sauted in oil and then powdered or dehydrated—Not exempt—Bureau
Onion rings, frozen, shipped with frozen fish dinners of which they are intended to be a part—Exempt—Bureau
Onion, cured in salt brine, shipped in open unsealed containers—Exempt—Case No. 21
Peas, split—Exempt—Law
Peeled, uncooked—Exempt—Law
Pepper delight (peppers with vinegar, salt and sugar)—Not exempt—Case No. 18
Pepper hulls, cured in salt brine, shipped in open unsealed containers—Exempt—Case No. 21
Peppers and kraut, stuffed (whole peppers filled with sauerkraut in jars with natural sauerkraut juice)—Not exempt—Case No. 18
Pickled—Not exempt—Case No. 21
Potato by-product made from raw rejects, peeled and washed in caustic solution and hot water, dewatered, dried and ground—Exempt—Bureau
Potato by-product, consisting of mashed potatoes recovered from drying machines or gathered as spillage from floor during latter stages of processing of instant mashed potatoes—Not exempt—Bureau
Potato flakes (cooked and dehydrated flakes of potato)—Not exempt—Bureau
Potatoes, candied (sweet), whipped, rissole, or puff—Not exempt—Case No. 22
Potatoes, peeled, sliced, blanched or dipped in preservative solution, but not cooked or otherwise processed—Exempt—Bureau
Potatoes, peeled and scalded or blanched (not subjected to a greater degree of heat than that necessary to inactivate enzymes)—Exempt—Bureau
Potatoes, powdered, prepared from potatoes, washed, cooked, peeled, with moisture removed—Not exempt—Bureau
Powder, onion and garlic—Exempt—Law
Precooked, pouch-packed, with or without sauce—Not exempt—Case No. 22
Products, the ingredients of which include vegetable matter combined with other commodities—Not exempt—Case No. 22
Quick frozen—Not exempt—Law-Ruling 110
Romanian kraut (shredded cabbage with juice consisting of water, sugar, celery seed and fresh peppers)—Not exempt—Case No. 18
Sauerkraut, pickled by keeping shredded cabbage in a barrel for 36-40 hours, thence in cold storage for about 36 hours, then packed in jars with water, sugar, and benzoate of soda (requires refrigeration)—Not exempt—Case No. 18
Sauerkraut, uncooked, pickled, in sealed plastic containers or sealed wooden barrels—Not exempt—Bureau
Shelled—Exempt—Law
Soup, frozen—Not exempt—Law
Soybean meal—Not exempt—Law
Tomato juice—Not exempt—Bureau
Tomato paste, consisting of tomatoes heated to 190°—Not exempt—Bureau
Tomato pomace (residue remaining after juice extraction)—Not exempt—Bureau
Tomato powder, dehydrated without cooking, (not the residue left after juice extraction)—Exempt—Bureau
Tomatoes, in salt brine, to preserve freshness while in transit—Exempt—Case No. 21
Washed, fresh, in cellophane bags—Exempt—Law
Water, and distilled water—Not exempt—Bureau
Wax, beeswax, crude, in cakes and slabs—Exempt—Law
Wax, carnauba, as imported in slabs and chunks—Not exempt—Law
Wax, crude candelilla, boiled in water to which some acid is added, purpose of which is not to change the wax in any way but to remove the wax scales from the leaves of the plant on which it forms, and the resulting residue boiled again to remove excess moisture and debris—Exempt—Bureau
Whale meat, see Fish
Wheat, see Grains
Wheat products, see Feeds, Flour
Whey, powdered or dried—Exempt—Case No. 23
Whey lactose—Exempt—Case No. 29
Whey powder—produced by separating liquid whey, removing butter fat, drying, steam rolling, cutting, bagging for further drying, grinding and packaging—Exempt—Bureau
Wood, see Forest products
Wool:
Cleaned and scoured after being imported—Not exempt—Bureau
Grease, as obtained from cleaning or scouring process—Exempt—Law
Imported from any foreign country—Not exempt—Law-Ruling 110
Mixture of blend of imported and domestic wool—Not exempt—Bureau
Pulled wool (wool removed from hides after slaughter)—Not exempt—Bureau
Raw, cleaned or scoured, but not including wool imported from any foreign country—Exempt—Law-Ruling 110
Scoured, origin unknown—Not exempt—Bureau
Tags of domestic wool and mohair (matted and ragged locks as shorn)—Exempt—Bureau
Waste (carded, spun, woven, or knitted)—Not exempt—Law-Ruling 110
Yarn—Not exempt—Law
Wreaths, see Forest products
Worms, blood (cultivated in a "farming" type operation in marshy soil)—Exempt—Bureau
Worms, sea, live (gathered from mud flats, for use as bait)—Exempt—Bureau
Yeast, brewers' residual, or "bottom yeast" (substance which settles to bottom of vat during fermentation of beer or liquors)—Not Exempt—Bureau
Zoo animals—Not exempt—Law

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 1004]

[Docket No. AO-160-A54]

MILK IN MIDDLE ATLANTIC MARKETING AREA

Hearing on Proposed Amendments to Tentative Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Public hearing on proposed rulemaking.

SUMMARY: The hearing is being held to consider changes in the order that have been proposed by cooperative associations, independent dairy farmers, and handlers. The principal issues to be considered are the appropriate method of pricing Class I milk and proposed changes in the pooling and diverted milk provisions of the order. Proponents maintain the requested order changes are needed to reflect current marketing conditions and to assure orderly milk marketing in the area.

DATE: October 4, 1977.

ADDRESS: Franklin Motor Inn, The Parkway at 22d Street, Philadelphia, Pa. 19130.

FOR FURTHER INFORMATION CONTACT:

Martin J. Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250 (202-447-7311).

SUPPLEMENTAL INFORMATION: Notice is hereby given of a public hearing to be held at the Franklin Motor Inn, The Parkway at 22d Street, Philadelphia, Pa. 19130 beginning at 9:30 a.m., on October 4, 1977, with respect to proposed amendments to the tentative marketing agreement and to the order, regulating the handling of milk in the Middle Atlantic marketing area.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The United States District Court for the Eastern District of Pennsylvania has ordered the Secretary of Agriculture to convene a hearing to consider the milk pricing method that should be applicable to the Middle Atlantic marketing area. Specifically at issue in the court order is the method for computing the Class I price. Responding to the order, the Department invited proposals for this and any other provisions of the order.

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions which relate to the proposed amendments, hereinafter set forth, and any appropriate modifications thereof, to the tentative marketing agreement and to the order.

The proposed amendments, set forth below, have not received the approval of the Secretary of Agriculture.

PROPOSED BY PENNMARVA DAIRYMEN'S FEDERATION, INC., AND BY EASTERN MILK PRODUCERS COOPERATIVE ASSOCIATION, INC.:

PROPOSAL NO. 1

The Class I price under Order 4 should continue to be determined by the provisions of §§ 1004.50(a) and 1004.51,

PROPOSED BY ABBOTTS DAIRIES DIVISION OF FAIRMONT FOODS COMPANY, INC.

PROPOSAL NO. 2

It is proposed that Federal Milk Marketing Order No. 4 (7 CFR Part 1004) as presently written be rewritten and amended to include bracketed pricing indexed so that producer prices for fluid milk move in 20-cent integers or in such other integers as the evidence may demonstrate to be appropriate.

PROPOSED BY SCP DAIRY INDUSTRY ASSOCIATION

PROPOSAL NO. 3

The Association proposes that the constant figure of $2.78, which is the add-on to the Minnesota-Wisconsin series, be corrected and be reduced by at least $1.00 per hundredweight.

PROPOSED BY MICHAELS DAIRIES, INC.

PROPOSAL NO. 4

Amend § 1004.7(a) (7 CFR, Chapter X) to add, after "50 percent" the following, "of its base milk receipts only" and delete "of its receipts", or

Amend § 1004.7(a) to add, after "50 percent" the following, "in the months of September through February, and 40 percent in the months of March through August".

PROPOSAL NO. 5

Amend § 1004.12(d) by deleting the phrase "in accordance with the conditions of subparagraphs (1) and (2) of this paragraph." and delete in their entirety subparagraphs (1) and (2) of § 1004.12(d), or

Amend § 1004.12(d) (2) by substituting "15 days" in place of "10 days".

PROPOSED BY DELMARVA INDEPENDENT PRODUCERS ORGANIZATION

PROPOSAL NO. 6

Amend § 1004.12(d) by deleting the phase "in accordance with the conditions of subparagraphs (1) and (2) of this paragraph." and delete in their entirety subparagraphs (1) and (2) of § 1004.12 (d).

PROPOSAL NO. 7

Amend § 1004.7(a) to insert after "month" "or in either of the two preceding months."

PROPOSED BY RICHFOOD, INC.

PROPOSAL NO. 8

Revise § 1004.7(a) as follows:

§ 1004.7 Pool plant.

• • • • • •

(a) A plant from which during the month a volume not less than 50 percent of its receipts described in subparagraph (1) or (2) of this paragraph is disposed of as Class I milk (except filled milk) and a volume not less than 15 percent of such receipts is disposed of as route disposition (other than as filled milk) in the marketing area;

• • • • • •

PROPOSED BY THE DAIRY DIVISION, AGRICULTURAL MARKETING SERVICE

PROPOSAL NO. 9

Make such changes as may be necessary to make the entire marketing agreement and the order conform with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and the order may be procured from the Market Administrator, P.O. Box 710, Alexandria, Va. 22313, or from the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250 or may be there inspected.

Signed at Washington, D.C. on September 1, 1977.

WILLIAM T. MANLEY,
Deputy Administrator
Program Operations.

COMMUNITY SERVICES ADMINISTRATION

[45 CFR Part 1067]

[CSA Instruction 7000–1]

FUNDING OF CSA GRANTEES

Federal Register; Access to Daily Publications

AGENCY: Community Services Administration.

ACTION: Proposed rule.

SUMMARY: The Community Services Administration is proposing a policy which will make the FEDERAL REGISTER the exclusive formal system used to communicate proposed rules and regulations to grantees and will require grantees to have access to the daily publication of the FEDERAL REGISTER either through direct subscription or a circulating copy. The current system of mailing drafts to grantees is cumbersome and time-consuming in addition to being duplicative since CSA is required by statute to file all rules and regulations in the FEDERAL REGISTER 30 days prior to becoming effective. For grantees, access to the daily issues of the FEDERAL REGISTER will mean that they will receive timely notification of proposed rules and regulations published by CSA and other relevant Federal grant-making agencies thus giving them sufficient time to analyze and respond to the proposals. For CSA it will mean replacing a cumbersome system with a faster more efficient one thereby enabling the agency to produce timely and responsive policy statements which reflect responses received from grantees and the public.

DATES: CSA welcomes comments on the proposed regulations.

Comments received on or before November 7, 1977, will be considered prior to publishing this policy as a final rule.

ADDRESS: Send all comments to Jacqueline G. Lemire, Community Services Administration, Office of Operations, Policy Development and Review Division, 1200 19th Street NW., Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT:

Jacqueline G. Lemire
202–254–5670.

SUPPLEMENTARY INFORMATION: The Community Services Administration formally communicates with its grantees through a structured system known as the CSA Issuance System which consists of CSA Instructions (policy statements), CSA Notices (announcements of temporary concern including interim policies), and CSA Guidances (material designed to help people do their job better).

In the past the system we used to get input on draft policy statements was to print copies of the draft and mail copies to each grantee. However, because there is no in-house capability to print this material it had to be sent to the Government Printing Office or to a private contractor and then returned to CSA's Warehouse for packaging and mailing. This proved to be a time-consuming process frequently taking up to three weeks before the draft was in the mail. Added to this was the time needed by grantees to review the draft and develop comments, plus mailing time and subsequent time required by CSA staff to analyze comments received and to revise the draft when warranted.

Obviously this system could not produce timely and responsive policy statements. Recently we have been using the FEDERAL REGISTER to request comments on proposed regulations and have found that it is much faster and more efficient and, since we already are required by legislation to file all rules, regulations, instructions, guidelines and application forms in the FEDERAL REGISTER 30 days prior to their effective date, we have decided to use this system exclusively. However, we know that not all grantees currently have access to this publication. Therefore, we are proposing a policy which would require that each grantee subscribe to the FEDERAL REGISTER for the period covered by its grant(s) from CSA if the grantee does not have daily access to the FEDERAL REGISTER.

Of course, final rules and regulations will continue to be published in the form of CSA Instructions and distributed directly to grantees.

GRACIELA (GRACE) OLIVAREZ,
Director.

45 CFR 1067 is proposed to be amended as follows:

Subpart—Federal Register; Access To Daily Publication

Sec.
1067.1 Applicability.
1067.6–2 Policy.
1067.6–3 Procedures.
1067.6–4 Allowable Cost.

§ 1067.6–1 Applicability.

This subpart applies to all grants funded under Titles II, III–B, and VII of the Economic Opportunity Act of 1964, as amended, when the assistance is administered by the Community Services Administration.

§ 1067.6–2 Policy.

Since CSA publishes all proposed rules in the FEDERAL REGISTER exclusively, the Agency is requiring that grantees have access to daily publications of this document for the duration of their grants which are funded by CSA. Therefore, if grantees do not have access to the FEDERAL REGISTER either through a direct subscription or a circulating copy, they must take immediate steps to purchase a subscription.

§ 1067.6–3 Procedures.

The FEDERAL REGISTER is furnished by mail to subscribers free of postage, for $5.00 per month or $50 per year, payable in advance. Remit check or money order, made payable to:

Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

§ 1067.6–4 Allowable Cost.

This is an allowable charge to grant funds. It should be included under "Other Costs" on the budget form.

(Sec. 602, 78 Stat. 530; 42 U.S.C. 2942.)

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 21383; RM–2814]

FM BROADCAST STATIONS IN CAMP LEJEUNE AND CHERRY POINT, N.C.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission proposes to add FM Channel 253 to Camp Lejeune, N.C., or if interest in such a proposal is expressed, in the alternative, to add FM Channel 252A at Cherry Point, N.C. The document invites comments on these proposals and on a series of questions regarding the Camp Lejeune proposal, including the appropriateness of the assignment of a Class C channel when the Commission had refused earlier to assign another channel to nearby Jacksonville, N.C.

DATES: Comments must be received on or before October 17, 1977, and reply comments on or before November 7, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Carol Fox Foelak, Broadcast Bureau, 202–632–7792.

SUPPLEMENTARY INFORMATION:

Adopted: August 30, 1977.

Released: September 7, 1977.

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (Camp Lejeune, N.C.), Docket No. 21383, RM–2814.

1. *Petitioner, Proposal, and Comments.* (a) Francon, Inc. ("petitioner") filed a petition proposing the assignment of Channel 253 to Camp Lejeune, N.C. Public Notice was given January 18, 1977 (Report No. 1026). Comments opposing the petition were timely filed by Seaboard Broadcasting Corp. ("Seaboard"), licensee of WLAS, Jacksonville, N.C.; Marine Broadcasting Corp. ("Marine"), licensee of WXOR–FM, Jacksonville, N.C.; and Beasley Broadcast Group of Jacksonville, Inc. ("Beasley"), licensee of WJNC and WRCM(FM), Jacksonville, N.C. Petitioner timely filed reply comments.[1]

(b) Petitioner states that the channel could be assigned in conformity with the mileage separation requirements of the FM rules. The opponents question the proposal in several respects: whether Camp Lejeune is a community; whether intermixture would result; and whether a proper Roanoke Rapids showing has been made. Also they cite a decision of several years ago in which the Commission declined to add Channel 253 to nearby Jacksonville, under allegedly similar circumstances, FM Table of Assignments (Jacksonville, N.C.), 37 F.C.C. 2d 50 (1972).

(c) Petitioner states that if the channel is assigned, it will promptly file an application to construct a station.

2. *Community Data*—(a) *Location.* Camp Lejeune is a Marine Corps reservation located in Onslow County on the coast of North Carolina, 176 kilometers (110 miles) southeast of Raleigh and 320 kilometers (200 miles) east of Charlotte. Camp Lejeune is located southeast of Jacksonville, N.C., and has a common boundary with it.

(b) *Population.* Camp Lejeune, 34,549; Onslow County, 103,126; both figures from U.S. Census, 1970.

(c) *Present Aural Services.* Camp Lejeune—none. Nearby Jacksonville, N.C.—fulltime AM Stations WJNC, 1240 kHz, and WLAS, 910 kHz; daytime-only AM Station WBBS, 1290 kHz; FM Stations WRCM, Channel 221A and WXQR–FM, Channel 228A.

3. *Preclusion Considerations.* Preclusion will be caused as follows to various communities with over 1,000 population in the State of North Carolina: Jacksonville (pop. 16,289) (contained in U.S. Census Reports 135–6); Swansboro (pop. 1,207); Morehead City (pop. 5,233); Beaufort (pop. 3,368); Hankers Island (pop. 1,633); Bellhaven (pop. 2,259); Newport (pop. 1,735); Havelock (pop. 5,283); James City (pop. 2,577); and Cherry Point (pop. 12,029). Except for Cherry Point and James City, each community with over 2,000 population has at least one FM channel allocation (Beaufort has no exclusive FM allocation but shares unused, but applied for, Channel 277 with Morehead City). The precluded communities with less than 2,000 population, Swansboro, Harkers Island and Newport, have neither FM or AM assignments. In view of the preclusion at Cherry Point, a fairly sizable community, and of the problems discussed below in paragraphs 13–16, we request comments on the appropriateness of the proposed assignment as well as the alternative of adding Channel 252A at Cherry Point, instead of Channel 253 at Camp Lejeune.

4. *Is Camp Lejeune a Community?* Petitioner states that Camp Lejeune has a substantial population, 35,549, according to the 1970 U.S. Census, and that the population has remained the same or increased since then. Petitioner's data,[2] were not challenged as to numbers by the opponents. According to petitioner there are five elementary schools and a junior and a senior high school, a hospital and a substantial payroll in the community. Camp Lejeune has well defined boundaries and a common interest in its military mission.

5. The opponents state that there are no commercial enterprises at Camp Lejeune which might advertise on a station, citying Outer Banks Radio Co., 15 F.C.C. 2d 994 (1964), for the proposition that a lack of potential advertising revenues from a locality is fatal to a finding of community.

6. In our view, Outer Banks is inapposite. In that case, the Commission added a "suburban community" issue[3] in a proceeding involving an applicant for a new AM station at Midway Park, a housing area near Camp Lejeune and Jacksonville. The opponents note that the Commission found that there was only one small business in Midway Park and stated that there was a serious question as to whether there would be sufficient advertising revenues from Midway Park, without reliance on Jacksonville, which had a several times larger population. In addition, the Commission referred to allegations that Midway Park's population was smaller than the applicant had represented and that it was dependent on Jacksonville for civic, social and business activities and lacked schools, banks, newspapers, and police and fire departments, thus raising a question of its existence as an independent entity.

7. The reasoning behind the "suburban community" Policy Statement, which applied to applications for new and changed AM facilities, has been applied to FM applications, Berwick Broadcasting Corporation, 20 F.C.C. 2d 393 (1969). Thus, under Berwick, an applicant could not specify a small town to meet the priority of bringing a first service to it while really intending to serve a nearby larger town. However, the Policy Statement and Berwick apply to applications for facilities which would serve a community *larger* than the specified community. Here, Camp Lejeune, the specified community, is larger than Jacksonville. Further, an adverse finding on a suburban community (or Berwick) issue would not constitute a finding that the smaller locality is not a community but only that the applicant's proposal was designed to serve the nearby larger community.

8. As to the suggestion in Outer Banks that Midway Park was not a community, Camp Lejeune is clearly distinguishable. It has schools, employment and other functions whereas Midway Park was apparently only a housing area. Therefore, based on these factors and the others stated above in paragraph 4, we conclude that Camp Lejeune is a separate community, and the lack of potential advertising revenues does not disturb our conclusion about its status. A lack of advertisers in a particular community is a matter which would have significance in connection with a possible Berwick issue if it were to be of concern at all in these circumstances.

9. The opponents cite Jacksonville, supra, in which the Commission declined to add Channel 253 as a third FM authorization to Jacksonville on the grounds of intermixture, preclusion, and lack of need for the service in view of the size of Jacksonville's population. They argue that this petitioner's proposal is essentially the same as that rejected in Jacksonville and that it has shown no basis for disturbing the Commission's earlier ruling.

10. The opponents' reliance on Jacksonville is misplaced. In fact, the Commission specifically found in that case that Camp Lejeune was a separate community, noting that its population is much larger than that of Jacksonville, 37 F.C.C. 2d at 51, and we have again found that Camp Lejeune is a separate community. Therefore, petitioner's proposal is not the same as that rejected in Jacksonville.

11. The opponents also complain that the petition contains more information on Onslow County than Camp Lejeune and suggests that petitioner really intends to serve the former. However, the question of whether petitioner would actually provide sufficient service to Camp Lejeune does not have to be resolved at this stage. Petitioner has shown that Camp Lejeune is a community, and the information before us does not raise a question of whether it actually intends to serve Camp Lejeune.

12. Seaboard and Beasley state that since Camp Lejeune is a military base, its population could fluctuate drastically, and it could even be closed entirely. While this might be a pertinent matter, we have no information to indicate that Camp Lejeune is likely to be closed but

[1] In addition, Capital Radio, Inc., licensee of WRNB and WRBK–FM, New Bern, N.C., filed an untimely opposition almost three months late. It did not seek an extension of time within which to file or give any reason for the late filing. This pleading which was opposed by petitioner will be stricken because of its untimeliness ad failure to state any cause for the untimeliness. We also note that this dismissal will have no practical effect since the pleading offers no argument not otherwise before us.

[2] Petitioner's population data for Camp Lejeune are muddled by including residents, employees and even some retired military, who would not be expected to live on the post. We expect petitioner to provide the information necessary to clarify this matter.

[3] Under the Policy Statement on Section 307(b) Considerations for Standard Broadcast Facilities Involving Suburban Communities, 2 F.C.C. 2d 190 (1965), if an applicant's proposed 5 mV/m daytime contour would penetrate a community with a population over 50,000, and at least twice the size of the specified community, a presumption would arise that the applicant really intended to serve the larger community. To overcome the presumption the applicant would have to sow the suburban community's separate program needs and the extent to which its program proposal would meet unmet needs, and would also be expected to adduce evidence that advertising revenues from the specified community would be adequate to support its proposal, although this aspect would not necessarily be determinative. The presumption was subsequently limited to apply only in comparative hearings, but the Commission's concern that applicants intend to serve the communities they specify remains. AM Assignment Standards, 54 F.C.C. 2d 1, 21–22 (1975).

V 42 174
SEP 8 77
UMI

would welcome comments on this point.

13. Finally, Seaboard asserts that a station could not be physically located in Camp Lejeune, a military reservation. This is not a bar to assigning an authorization there, although an applicant would have to make a showing of good cause for locating its main studio outside the principal community to be served, pursuant to § 73.210(a)(3) of the Commission's rules, 47 C.F.R. 73.210(a)(3). There is precedent for licensing a station to a military reservation in the case of WSAC–FM, Ft. Knox, Ky. (waiver of § 73.210(a)(3), to permit locating the main studio outside the principal community to be served, granted July 22, 1964).[4] Similarly, WSAC–AM was granted a waiver of § 73.20(a), the AM main studio rule, when it was permitted to change its AM station location to Ft. Knox in December 1959.

14. In view of the size of Camp Lejeune's population and our finding it to be a community, we would have no hesitation in proposing a Class A assignment there. However, petitioner proposes a Class C channel,[5] and although it would provide a first local service for a community which is, after all, larger than Jacksonville, there are questions which would need to be resolved before the assignment could be made. Because of the apparent interrelationship between Camp Lejeune and Jacksonville, there is some question about whether to treat this case as the equivalent of one involving intermixture of classes of channels in a particular community. We need further support for the Class C assignment especially in view of the fact that it would provide only a small amount of first or second FM service. We seek comment on these problems, which are discussed in the following paragraphs:

15. *Intermixture.* The two Jacksonville stations are Class A stations, and the opponents state that petitioner's proposed Class C assignment would violate the Commission's policy against intermixture of wide coverage and limited coverage stations. They note that one of the reasons for denying assignment of Channel 253 in Jacksonville, supra, was intermixture.

16. We have found that Camp Lejeune is a separate community, and the policy against intermixture generally applies to assignments within the same community. FM Table of Assignments (Paso Robles, Calif.), 35 R.R. 2d 639 (1975). However, Camp Lejeune, which is adjacent to Jacksonville, would provide no advertising revenues on its own and therefore is more closely tied to Jacksonville economically than would ordinarily be the case with two adjacent communities. One of the purposes of the policy against intermixture is to foster competition among stations in a particular locality with equivalent facilities. Here, one station would be at a decided competitive advantage since it would have an opportunity for superior facilities not available to the others so there might be reason to apply the policy in this unusual situation. We seek comment on this point.

17. *Roanoke Rapids/Anamosa Comments.* While the petitioner estimated the first and second FM service that its proposed facilities would provide, the opponents state that it did not make a Roanoke Rapids[6] showing. Seaboard states that a proper Roanoke Rapids showing, assuming "reasonable" facilities for all FM channels assigned in the area would show first and second FM services to 217 persons in an area of eight square miles and 455 persons in an area of 41 square miles, respectively. In reply, petitioner states that it is not required to make a Roanoke Rapids showing at this stage and will do so in the event a Notice of Proposed Rule Making is issued. We expect petitioner to do so and to take into account nighttime AM service—see Anamosa, Iowa, 40 F.C.C. 2d 520 (1974).

18. *Conclusion.* Accordingly, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of its rules, 47 CFR 73.202(b) as follows:

City	Channel No.	
	Present	Proposed
Camp Lejeune, N.C.		253
or, in the alternative		
Cherry Point, N.C.		252A

19. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures; and filing requirements are contained below and are incorporated herein.

NOTE:—A showing of continuing interest is required by paragraph 2 below before a channel will be assigned.

20. Interested parties may file comments on or before October 17, 1977, and reply comments on or before November 7, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in this Notice of Proposed Rule Making.

2. *Showings required.* Comments are invited on the proposal(s) discussed in this Notice of Proposed Rule Making. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420 (d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date of filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply coments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in this Notice of Proposed Rule Making. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompaniedb y a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission's rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's rules and regulations, an original and four copies of all comments shall be accompanied by a certifi- or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[Docket No. 20954; RM–2684; RM–2772]

FM BROADCAST STATIONS IN AMHERST AND CROZET, VIRGINIA

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION. Memorandum opinion and order and further notice of proposed rulemaking.

[4] The Commission also required that its station identification make clear that the station is not connected with the U.S. Government.

[5] Petitioner maintains that there is no Class A assignment which is available here, and this was confirmed by our staff after a search. If petitioner subsequently discovers a way to make a Class A assignment here, it can, of course, institute proceedings to that end.

[6] FM Table of Assignments, 9 F.C.C. 2d 672 (1967), setting forth assumptions to be used in calculating the extent of such service which an FM proposal would provide.

SUMMARY: This action reconsiders the denial of the assignment of Class B FM Channel 300 to Amherst, Va., and joins this proposal with one to assign a channel to Crozet, Va. The action consolidates the two because both involve the claim that assignment of a Class B channel at either community would provide a first aural service to the same area. A Further Notice was issued to provide the parties an opportunity to provide comparative data for both Class B proposals and alternatively to consider a Class A rather than Class B channel for Crozet.

DATES: Comments are due on or before October 14, 1977, and reply comments on or before November 3, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

James J. Gross, Broadcast Bureau 202–632–7792.

SUPPLEMENTARY INFORMATION:

MEMORANDUM OPINION AND ORDER AND FURTHER NOTICE OF PROPOSED RULE MAKING

Adopted: August 29, 1977.

Released: September 1, 1977.

In the matter of Amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (Amherst and Crozet, Va.), Docket No. 20954, RM–2684, RM–2772.

1. The Commission has before it the Notice of Proposed Rulemaking, 41 FR 46350 (published October 20, 1976), proposing the assignment of Class B FM Channel 259 to Crozet, Va., and the filings in response to this Notice, as well as a petition for reconsideration of the Commission's Memorandum Opinion and Order[1] denying the assignment of Class B FM Channel 300 to Amherst, Virginia. The Amherst petition was filed well before issuance of the Crozet Notice.

2. The Crozet Notice was issued at the petitioning of Lee Garlock. In the Notice, we pointed out that a town the size of Crozet would ordinarily be assigned a Class A station but that we were willing to consider a Class B assignment because of the possibility it might provide service to unserved and underserved areas. Oppositions to the Crozet proposed assignment were filed by Clay Realty Company ("Clay"), licensee of Stations WCHV(AM) and WCCB–FM, Charlottesville, Va., and WANV, Inc. ("WANV"), licensee of WANV, Waynesboro, Virginia. Other comments to the Notice were filed by Amherst Broadcasting Associates, Inc., licensee of Station WKYY(AM) ("WKYY"), Amherst, Va. (the party seeking reconsideration of the denial of its petition to assign Channel 300 to Amherst, Va.), and by Radio Harrisonburg, Inc. ("Harrisonburg"), licensee of Station WHBG, Harrisonburg, Va.

3. As with the Crozet proposal, the Amherst request for a Class B assignment to a small town rested on the assertion that service would be provided to unserved and underserved areas. Although data in support of this assertion was provided, petitioner had failed to provide all of the requested engineering showing relating to the extent to which existing AM stations already provided aural service to the areas it proposed to serve. In its petition for reconsideration, WKYY has rectified this omission and provided a showing which indicates that existing AM stations do not provide service at night to the area in which WKYY said it would provide a first FM service. Thus, the area appears to be one where it would offer a first aural service, a matter which is given high priority. In our view, this is sufficient to demonstrate that it would be in the public interest to reopen the Amherst proceeding. Ordinarily, that judgment would have no bearing on the Crozet proposal, but the facts here indicate that the proposals should be given joint consideration. This is the case because the first and second aural service areas of each proposal overlaps that of the other. When such is the case, the action in one has an important bearing on the other, and we do not believe it appropriate to act on the proposals separately without taking this fact into account. This is particularly true here since in each case, a Class A assignment would ordinarily be assigned to such small communities. Thus, the first (or second) service arguments are crucial to the possible assignment of wide-coverage Class B channels.

4. Crozet (1970 pop. 1,433) is located approximately 177 kilometers (110 miles) southwest of Washington, D.C., and 16 kilometers (10 miles) west of Charlottesville, Virginia. Crozet is an unincorporated community which has one daytime-only AM station, WPED (Class II–D). Information regarding Crozet's ability to support an FM assignment is contained in the original Notice and need not be repeated here. Although Crozet is located within a "radio quiet zone" in which radio astronomy is conducted by the National Radio Astronomy Observatory at Greenback, W. Va., and by the Naval Radio Research Observatory at Sugar Grove, W. Va., both observatories have approved the proposed assignment but, as provided by § 73.215(a) of our rules, have reserved the right to later object to any application filed.

5. Amherst (1970 pop. 1,108), seat of Amherst County (1970 pop. 26,072), is located approximately 88 kilometers (55 miles) west of Richmond, 56 kilometers (35 miles) northeast of Roanoke, and 25 kilometers (15 miles) north of Lynchburg, Va. Although there are currently no aural services operating in Amherst, a new AM station (BP–20013) is now under construction. Additionally, Amherst is located within the 1 mV/m contours of two Class A FM stations at Lynchburg, Va. Petitioner has furnished extensive data which would indicate that Amherst could support an FM assignment. There are currently approximately 400 businesses in the county with an annual payroll of $50,000,000, and petitioner claims that there has been a steady increase in both the number of workers and jobs in the area. A new shopping center has been built near the town to encourage new industry to locate in the community.

6. Although Amherst is also located within the Radio Quiet Zone, petitioner has indicated its proposed transmitter site lies outside the Zone, approximately 20 kilometers (12 miles) southeast of Amherst. Further, there appears to be a substantial area 52 square kilometers (20 square miles) outside the Zone within which the transmitter site could be located. Petitioner has indicated that it has informed the National Radio Astronomy Observatory about the proposed transmitter site, but in its Supplemental Engineering Report, petitioner indicated that "No claim is made that it will actually be possible to locate a transmitter at the coordinates shown as a reference point," and petitioner indicated that it would negotiate with the National Radio Astronomy Observatory if it became necessary to locate the transmitter site within the Quiet Zone. Before making this assignment we would expect petitioner to offer more definitive information regarding its intended transmitter location.

7. The Crozet Notice indicated that a Channel 259 assignment there would preclude future assignments to Channels 257A and 259 to five communities in Virginia, but that each of these communities presently had local radio service, as well as alternative FM channels available for assignment. Clay argues that Crozet is too small to merit a Class B assignment, and that fairer use of the channel could be made by assigning it to one of the precluded Virginia communities of Waynesboro (pop. 15,708), Bridgewater (pop. 2,828) or Staunton (pop. 25,504).[2] The Crozet petitioner attempts to demonstrate that these cities are already precluded from assignments by the Radio Quiet Zone. However, even if these places are within the Quiet Zone, the possibility remains that a particular site outside the Zone might be found which would permit the assignment. However, in the absence of a counterproposal, this is not a matter we need to resolve here, as Waynesboro has two local fulltime AM stations and other Class A FM channels available for assignment. Bridgewater has an alternative Class B channel and two Class A channels available for assignment. Staunton has two AM stations, one FM station, an alternative Class B channel and two Class A channels available for assignment. The only interest that has been expressed in this proceeding for assignments at any of these communities is that of WANV, the AM licensee at Waynesboro, which states that it is interested in an FM assignment to

[1] 42 FR 24312 (pub. May 13, 1977).

[2] Harrisonburg, Va. (pop. 14,605), also mentioned by Clay, is just east of the area precluded by the Crozet proposal. Harrisonburg presently has two applications pending for use of Channel 282 assigned to that community. WHBG at Harrisonburg states that it would oppose the assignment of Channel 259 to Harrisonburg, as suggested by Clay. No definitive interest in the use of the channel at any of these communities has yet been expressed.

V 42 I 174 SEP 8 77 UMI

Waynesboro or Staunton if approval is obtained from the Naval Radio Research Observatory (Sugar Grove) of a proposed transmitter site. This falls short of the required statement of intent required by the Commission in making FM assignments to particular communities.

8. WKKY's preclusion study for Amherst indicates that preclusion would occur only on the co-channel (Channel 300) in a limited area. Three cities with populations greater than 1,000 persons would be precluded if Channel 300 were assigned to Amherst. These cities are Lexington (pop. 7,597), Buena Vista (pop. 6,425), and Glasgow, Virginia (pop. 1,304). Buena Vista and Glasgow presently have no local aural service and Lexington is served by fulltime AM Station WREL. Channel 244A would be available for assignment to one of these communities.

9. In the Crozet Notice, the Commission asked Garlock to demonstrate that his proposal was designed to serve Crozet rather than the nearby and far larger community of Charlottesville. In its opposition, WANV argues that sufficient advertising revenue for an FM station could not be generated within Crozet, and states that the Crozet AM station depends on other communities for its revenues. Clay asserts that the petitioner, Garlock, has not addressed the issue adequately in its comments. Garlock's response is that he became aware of the need for the proposed FM service in Crozet through his residence and employment in the area. He states that he intends to join in an application for the channel with the licensee of Crozet's AM Station WPED to bring service to Crozet and western Albermarle County. Additionally, petitioner argues that this is not a Charlottesville proposal, since Charlottesville is adequately served presently. Petitioner incorporates the information filed earlier in support of the theory that Crozet has community needs distinct from those of Charlottesville. That information indicates that the Census Bureau has delineated arbitrary boundaries for the community, that two industrial plants have home offices and corporate headquarters in Crozet and employ over 3,000 persons there, that increased population growth is projected for Crozet by the Albermarle County Planning Commission, that a new high school is being built in Crozet for western Albermarle County, and that additional development is expected in the future. Petitioner states that Crozet has a business district of various retail stores, a bank, a farm supply cooperative, and a shopping center. Although this information establishes Crozet's status as a community and the appropriations of assigning a channel to it, it does not entirely resolve the Berwick issue raised by the proposal to assign a Class B channel. A Class A assignment would not raise such a problem. Such a channel is available and for the reasons to be discussed we wish to consider its assignment.

10. As mentioned, the Commission's usual policy is to assign Class A channels to small communities like Crozet and Amherst rather than wide coverage Class B channels, unless a showing is made of special circumstances such as first aural service to a significant population. Garlock was therefore given an opportunity by the Notice to justify his proposal for a Class B assignment as an exception to our general policy. He submitted a showing of first nighttime aural service to 10,400 people and a second nighttime aural service to 9,500 persons. A Class A assignment at Crozet would not provide any first service.

11. The Amherst proposed Class B station, operating with maximum facilities, would be able to provide a first aural service to 11,660 persons in an area of 1,264 square kilometers (488 square miles) and a second aural service to 22,930 persons in an area of 1,585 square kilometers (612 square miles). A Class A station with maximum facilities would provide a first service to 3,515 persons in a 339 square kilometer (131 square mile) area and a second service to 3,791 persons in an area of 390 square kilometers (112 square miles).

12. A comparison of the respective showings indicates that the Amherst station could provide service to virtually the entire first service area of Crozet but that the Crozet proposal would not be able to serve the Amherst first service area. With this in mind it appears that the first service argument does not support making two Class B assignments, and the data now on hand argue in favor of a Class B assignment to Amherst. As to Crozet where there does appear to be a need for a local FM outlet, we believe consideration of a Class A assignment is warranted and have determined that Class A Channels 232A and 272A are available for this purpose. In order to make a final determination, we shall allow the parties to submit any additional first aural service showings, if they so desire. Any comparisons of first aural service that could be offered by each of the two proposals should be in accordance with Roanoke Rapids, 9 F.C.C. 2d 672 (1967) and Aanmosa-Iowa City, 40 F.C.C. 2d 520 (1974). The coverage of existing FM stations should be based on actual or reasonable facilities, whichever is greater, and all vacant assignments should be considered to be operating with reasonable facilities. AM coverage should be that obtaining at night and employ the prediction method unless measurement data is available. One final point needs to be mentioned. The Crozet proponent should state its willingness to construct a Class A FM station in the event its request for a Class B channel is denied.

13. Accordingly, comments are invited on proposals to amend the FM Table of Assignments (§ 73.202(b) of the Commission's rules and regulations) for the following communities (to be considered in conjunction with and as an alternative to the original proposal to assign Channel 259 to Crozet, Va.):

City:	Channel No. Present	Proposed
Amherst, Va		300
Crozet, Va		232A or 272A

14. The Commission's authority to institute rulemaking proceedings; showings required; cut-off procedures; and filing requirements are contained and are incorporated herein.

15. Interested parties may file comments on or before October 14, 1977, and reply comments on or before November 3, 1977.

16. *It is ordered*, That the petition for reconsideration filed by Amherst Broadcasting Associates, Inc., is granted to the extent indicated and in other respects is denied.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and section 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in this notice of proposed rulemaking.

2. *Showings required.* Comments are invited on the proposal(s) discussed in this notice of proposed rulemaking. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in this notice of proposed rulemaking. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[47 CFR Part 87]

[Docket No. 19699; FCC 77-584]

AVIATION SERVICES

Providing for Procedures to Notify Commission of Aircraft Operating Under a Fleet License

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This proceeding is being terminated without adopting the proposed rule amendment providing for notification procedures concerning aircraft operating under a fleet license. It was determined from the negative comments received and further investigation that such rulemaking is unnecessary and would be a burden on both the public and the Commission.

EFFECTIVE DATE: Non-applicable.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Robert H. McNamara, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION: James C. McKinney, Field Operations Bureau, 202-632-7200.

REPORT AND ORDER—Proceeding Terminated

Adopted: August 24, 1977.

Released: September 1, 1977.

In the matter of amendment to Part 87 of the rules to provide for procedures to notify the Commission of the aircraft operating under a fleet license, Docket No. 19699.

1. A notice of proposed rulemaking (FCC 73-253) in the above-captioned matter was released on March 12, 1973, and published in the FEDERAL REGISTER on March 21, 1973 (38 FR 7402). The specified time for filing comments and reply comments has expired.

2. The proposed amendment was designed to provide the Commission a means of readily determining what aircraft are under a fleet licensee's control by requiring fleet licensees to notify the Commission within ten days of a change in the composition of their aircraft fleet. Comments were received from the Aerospace and Flight Test Radio Coordinating Council (AFTRCC), the Aircraft Owners and Pilots Association (AOPA), the Central Committee on Communications Facilities of the American Petroleum Institute (API), the General Aviation Manufacturers Association (GAMA), the National Air Transportation Conferences, Inc. (NATC), the National Business Aircraft Association (NBAA), New Haven Airways, Inc., and Progressive Aviation, Ltd.

3. All of the above-mentioned commenters generally opposed the proffered rule amendment. In essence the commenters indicated that the proposed notification requirements would be burdensome and costly, and would eliminate the administrative advantage of fleet licensing for both the licensee and Commission.

4. In view of the comments received and upon further examination, the Commission is persuaded that the proposed rule amendment would impose an undue inconvenience and hardship on the public. In addition, the administrative burden on the Commission's licensing procedures would be increased, thus producing an unfavorable backlog impact. Therefore, while we have not resolved the identification problems inherent in fleet licensing, we conclude it is not in the public interest to amend the rules as proposed in the notice of proposed rulemaking in this docket.

5. In view of the foregoing: *It is ordered*, That this proceeding is terminated.

FEDERAL COMMUNICATIONS COMMISSION,[1]
VINCENT J. MULLINS,
Secretary.

[Docket No. 77-CE-18-AD]

BEECH 55, 56, 58, AND 95 SERIES AIRPLANES

Propcsed Airworthiness Directive

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to add an Airworthiness Directive (AD) that would require repetitive inspection of aileron, rudder, and elevator trim tab control systems for excessive free play and repair as necessary to preclude inflight vibration that could affect aircraft control.

DATES: Comments must be received on or before November 11, 1977.

ADDRESS: Send comments on the proposal to: FAA Central Region, Office of the Regional Counsel, ACE-7, Attention: Rules Docket Clerk, Docket No. 77-CE-18-AD, 601 East 12th Street, Kansas City, Mo. 64106.

Beechcraft Service Instructions No. 0846-152, Revision I, applicable to this proposal may be obtained from Beech Aircraft Corp., Commercial Service Department, 9709 East Central, Wichita, Kans. 67201. A copy of the service instructions cited above is contained in the Rules Docket, Room 916, 800 Independence Avenue SW., Washington, D.C., and Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Mo. 64106.

FOR FURTHER INFORMATION CONTACT:

William L. Schroeder, Aerospace Engineer, Engineering and Manufacturing Branch, FAA, Central Region, 601 East 12th Street, Kansas City, Mo. 64106; telephone 816-374-3446.

V 42 174 SEP 8 77 UMI

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons are invited to participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the AD Docket Number, and be submitted in duplicate to the address specified above. All comments received on or before the closing date for comments will be considered by the Administrator before action is taken on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. All comments received will be available before and after the closing date for comments in Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA has received one report on a Model 56 TC and two reports on Model 58 Airplanes showing the occurrence of incidents involving inflight vibration of elevator controls. Investigation following the incidents revealed that the vibration was caused by excessive free play of elevator trim tabs. The excessive free play is caused by wear of various components in trim tab control systems. If the wear is not detected and corrected, it could lead to a tab developing excessive free play or becoming completely disconnected from its control system thereby endangering the airplane and its occupants. The manufacturer has determined acceptable free play limits for aileron, rudder, and elevator trim tabs and these limits, along with procedures for measuring free play and elimination of excessive free play, are included in Beechcraft Service Instructions No. 0846-152, Revision I which will be issued on or about August 1, 1977. Results of FAA inspection of approximately 61 Beech 55, 56, 58, and 95 series airplanes show that aileron, elevator, and rudder trim tabs on in service airplanes have excessive free play that must be corrected. The FAA has concluded that trim tab excessive free play on in service airplanes is an unsafe condition that is likely to exist or develop in other airplanes of the same type design. Accordingly, an AD is being proposed that would require repetitive inspection of aileron, rudder, and elevator trim tabs for excessive free play, and if necessary correction of any excessive free play detected, on certain Beech 55, 56, 58, and 95 series airplanes in accordance with Beechcraft Service Instructions No. 0846-152, Revision I. In addition, the proposed AD would allow continued operation of airplanes having a limited amount of excessive free play in one or more trim tab systems at reduced never exceed speed (Vne) for 25 hours time in service to allow owners/operators time to obtain new parts that may be required to eliminate excessive free play in these systems. Accomplishment of the inspections and repair or replacement proposed herein will correct existing and prevent development of unsafe conditions, caused by excessive free play in aileron, rudder, and elevator trim tab systems.

DRAFTING INFORMATION

The principal authors of this document are: William L. Schroeder, Flight Standards Division, Central Region, and John L. Fitzgerald, Jr., Office of the Regional Counsel, Central Region.

THE PROPOSED AMENDMENT

Accordingly, the FAA proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

BEECH.—Applies to the following models and serial number airplanes certified in all categories:

Model	Serial Numbers
95-55, 95-A55, 95-B55, and 95-B55A	TC-1 through TC-349 and TC-351 and on.
95-C55, 95-C55A, D55, D55A, E55, and E55A	TC-350 and TE-1 and on.
56TC and A56TC	TG-2 through TG-94.
58 and 58A	TH-1 and on.
58P and 58PA	TJ-2 and on.
58TC and 58TCA	TK-1 and on.
95, B95, B95A, D95A, and E95	TD-2 through TD-721.

COMPLIANCE: Required as indicated unless already accomplished.

To detect and if necessary correct excessive free play that may exist or develop in aileron, rudder, and elevator trim tab control systems, within 100 hours time in service after the effective date of this AD for those aircraft with 300 or more hours total time in service or upon accumulation of 400 hours time in service for those aircraft with less than 300 hours time in service and thereafter each 300 hours time in service or once each 12 months, whichever occurs first, accomplish the following in accordance with Beechcraft Service Instructions No. 0846-152, Revision I or later approved revisions:

(A) Using a dial indicator measure the free play, at locations designated in the above noted service instructions, of aileron (if installed), rudder, and elevator trim tabs. If measured free play does not exceed maximum limits of 0.165 inches for aileron tabs, 0.105 inches for rudder tabs (except 0.044 inches for rudder tabs on Models 95, B95, B95A, D95A and E95), and 0.084 inches for elevator tabs no further action is required until the next repetitive inspection in accordance with this AD.

(B) Visually inspect linkage systems of trim tabs that exceed free play limits shown in Paragraph (A) of this AD, determine the cause of the excessive free play and accomplish Paragraph (C) of this AD prior to the next flight, except as provided in Paragraph (D).

(C) Repair or replace worn components in the trim tab linkage systems as necessary to reduce tab free play measurements down to or below maximum limits shown in Paragraph (A) of this AD.

(D) Airplanes having one or more trim tabs with excessive free play that does not exceed 0.248 inches for aileron tabs, 0.158 inches for rudder tabs (except 0.066 inches for rudder tabs on Models 95, B95, B95A, D95A, and E95), and 0.126 inches for elevator tabs may be operated for 25 hours time-in-service after the determination in accordance with Paragraph (A) of this AD that excessive free play exists provided the following conditions are complied with:

(1) Fabricate, for each airspeed indicator installed on the instrument panel, a temporary placard having 3/16 inch or larger letters restricting never exceed speed (Vne) to 20 knots, or if applicable 23 MPH, less than the Vne published for the airplane in question. The placards will read as follows:

(a) For airplanes having airspeed indicators marked in knots—

"Vne RESTRICTED TO * KNOTS".

*Enter published Vne—20 knots.

(b) For airplanes having airspeed indicators marked in miles per hour—

"Vne RESTRICTED TO ** MPH".

**Enter published Vne—23 MPH.

(2) Install a placard fabricated in accordance with Paragraph (D)(1) (a) or (b) of this AD adjacent to each airspeed indicator on the instrument panel and operate the airplane in accordance with said placard. Upon compliance with Paragraph (C) of this AD (not to exceed 25 hours time-in-service) the restriction on Vne no longer applies and the placards are to be removed.

(E) Compliance time intervals for the 300 hour or annual repetitive inspections required by this AD may be extended up to 330 hours or 400 days to allow compliance at previously scheduled maintenance periods.

(F) Any equivalent method of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821 as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Kansas City, Mo., on August 26, 1977.

JOHN E. SHAW,
Acting Director, Central Region.

[Airspace Docket No. 77-WE-23]

TRANSITION AREA

Proposed Designation; Ukiah, Calif.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate a 700 foot transition area at Ukiah, Calif., to provide protection for aircraft executing a new instrument approach procedure (RNAV-B) to the Ukiah Municipal Airport.

DATES: Comments must be received on or before October 12, 1977.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Chief, Airspace and Procedures Branch, AWE-530, 15000 Aviation Boulevard, Lawndale, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, Calif. 90261. Telephone: 213-536-6182.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the Airspace Docket Number and be submitted in triplicate to the Chief, Airspace and Procedures Branch, Federal Aviation Administration, 1500 Aviation Boulevard, Lawndale, Calif. 90261. All communications received on or before October 12, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Chief, Airspace and Procedures Branch, 1500 Aviation Boulevard, Lawndale, Calif. 90261, or by calling 213-536-6180. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate the Ukiah, Calif., 700 foot transition area. This action will provide additional controlled airspace to accommodate aircraft executing the RNAV-B approach procedure to the Ukiah Municipal Airport.

DRAFTING INFORMATION

The principal authors of this document are Thomas W. Binczak, Air Traffic Division, and De Wittee T. Lawson, Jr., Esquire, Regional Counsel.

Accordingly, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by adding the following:

UKIAH, CALIF.

That airspace extending upward from 700 feet above the surface within a five mile radius of the Ukiah Municipal Airport (latitude 39°07'36" N., longitude 123°12'00" W.).

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)). Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE: The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif., on August 29, 1977.

HERMAN C. BLISS,
Acting Deputy Director, Western Region.

[FR Doc.77-25905 Filed 9-7-77;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 77-SW-35]

TRANSITION AREA

Proposed Designation; Tallulah, La.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate a transition area at Tallulah, La., to provide controlled airspace for aircraft executing a proposed instrument approach procedure to the Scott Airport, using the newly established NDB located on the airport.[1]

DATES: Comments must be received on or before October 11, 1977.

ADDRESSES: Send comments on the proposal to: Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101.

The official docket may be examined at the following location: Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Rd. Fort Worth, Tex. 76106.

An informal docket may be examined at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

John A. Jarrell, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101; telephone: 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: Subpart G 17.181 (42 FR 440) of FAR Part 71 contains the description of transition areas designated to provide controlled airspace for the benefit of aircraft conducting IFR activity. Designation of the transition area at Tallulah, La., will necessitate an amendment to this subpart.

[1] Map filed as part of the original document.

COMMENTS INVITED

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. All communications received on or before October 11, 1977, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, or by calling 817-624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should contact the office listed above.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a transition area at Tallulah, La. The FAA believes this action will enhance IFR operations at Scott Airport by providing controlled airspace for aircraft executing a proposed instrument approach procedure using the newly established NDB on the airport. Subpart G of Part 71 was republished in the FEDERAL REGISTER on January 3, 1977 (42 FR 440).

DRAFTING INFORMATION

The principal authors of this document are John A. Jarrell, Airspace and Procedures Branch, and Robert C. Nelson, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 440) by adding the Tallulah, La., transition area as follows:

TALLULAH, LA.

That airspace extending upward from 700 feet above the surface within a 5.5-mile

V 42 174 SEP 8 77 UMI

radius of the Scott Airport (Latitude 32°25'00" N., Longitude 91°00'00" W.), and within 3 miles either side of the Tallulah NDB 005° bearing from the Tallulah NDB (Latitude 32°24'44" N., Longitude 91°09'00" W.) extending from the 5.5-mile radius area to 8.5 miles northeast of the NDB.

(Sec. 307(a), Federal Aviation Act of 1958 (40 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on August 26, 1977.

PAUL J. BAKER,
Acting Director,
Southwest Region.

[FR Doc.77-25906 Filed 9-7-77;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 77-SW-37]

TRANSITION AREA

Proposed Alteration; Buffalo, Okla.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Buffalo, Okla., transition area to provide controlled airspace for aircraft executing the new NDB-A instrument approach procedure to the Buffalo Municipal Airport.[1]

DATES: Comments must be received on or before October 11, 1977.

ADDRESSES: Send comments on the proposal to: Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101.

The official docket may be examined at the following location: Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101.

An informal docket may be examined at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

John A. Jarrell, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101; telephone: 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: In Subpart G 71.181 (42 FR 440) of FAR Part 71, the description of the Buffalo, Okla., transition area reflects the controlled airspace provided for the present instrument approach procedure to the Buffalo Municipal Airport. The new NDB-A instrument approach procedure will require alteration of the transition area to provide the necessary controlled airspace for this procedure.

[1] Map filed as part of the original document.

COMMENTS INVITED

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. All communications received on or before October 11, 1977, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, or by calling 817-624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should contact the office listed above.

THE PROPOSAL

The FAA is considering an amendment to subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Buffalo, Okla., transition area. The FAA believes this action will enhance IFR operations at the Buffalo Municipal Airport by providing controlled airspace for aircraft executing the new NDB-A instrument approach procedure established for the airport. Subpart G of Part 71 was republished in the FEDERAL REGISTER on January 3, 1977 (42 FR 440).

DRAFTING INFORMATION

The principal authors of this document are John A. Jarrell, Airspace and Procedures Branch, and Robert C. Nelson, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 440) by altering the Buffalo, Okla., transition area as follows:

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Buffalo Municipal Airport, Buffalo, Okla., (latitude 36°51'45" N, longitude 99°37'00" W) within 3.5 miles each side of the 290° bearing from the Buffalo NDB (latitude 36°51'48" N, longitude 99°37'05" W.) extending from the six-mile radius to 11.5 miles east of the NDB.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on August 26, 1977.

PAUL J. BAKER,
Acting Director,
Southwest Region.

[14 CFR Part 71]

[Airspace Docket No. 77-SW-39]

TRANSITION AREA

Proposed Alteration; New Mexico

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice to alter the New Mexico transition area to provide additional controlled airspace for the radar vectoring of aircraft north of Holloman AFB in the interest of aviation safety and to allow greater flexibility in the control of aircraft within the Holloman Radar Approach Control (RAPCON) area of responsibility.[1]

DATES: Comments must be received on or before October 11, 1977.

ADDRESSES: Send comments on the proposal to: Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101.

The official docket may be examined at the following location: Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101.

An informal docket may be examined at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

John A. Jarrell, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101; telephone: 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: In Subpart G 71.181 (42 FR 440) of FAR Part 71, the description of the New Mexico transition area reflects the controlled airspace now provided in the State of New Mexico upward from 1,200 feet above the surface, excluding certain areas and some airspace below 11,500 feet MSL. It is that excluded airspace below 11,500 feet MSL that needs to be changed to provide the necessary additional controlled airspace for radar vectoring purposes.

[1] Map filed as part of the original document.

COMMENTS INVITED

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. All communications received on or before October 11, 1977, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, or by calling 817-624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should contact the office listed above.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the New Mexico transition area. The FAA believes this action will enhance safety and allow greater flexibility in the control of aircraft within the Holloman RAPCON area of responsibility by providing additional controlled airspace for radar vectoring purposes. Subpart G of Part 71 was republished in the FEDERAL REGISTER on January 3, 1977 (42 FR 440).

DRAFTING INFORMATION

The principal authors of this document are John A. Jarrell, Airspace and Procedures Branch, and Robert C. Nelson, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 440) by altering the New Mexico transition area as follows:

Delete the last portion, that reads: "and excluding that airspace below 11,500 feet MSL bounded by a line beginning at latitude 33°57'00" N., longitude 105°27'00" W., thence to latitude 33°12'50" N., longitude 105°27'00" W., to latitude 33°10'20" N., longitude 105°38'00" W., thence counterclockwise along the arc of a 35-mile radius circle centered at latitude 32°51'04" N., longitude 106°06'05" W. to and along longitude 106°04'00" W. to and along the south boundary of V-264 to longitude 106°50'30" W., thence to point of beginning."

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on August 9, 1977.

PAUL J. BAKER,
Acting Director,
Southwest Region.

[Airspace Docket No. 77-EA-60]

PROPOSED TEMPORARY RESTRICTED AREAS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to designate temporary restricted areas identified as R-5201A, R-5201B, R-5201C, and R-5201D in the vicinity of Fort Drum, N.Y., to contain military joint readiness exercise called "EMPIRE GLACIER 78." These proposed actions will provide for the safe and efficient use of the navigable airspace by prohibiting unauthorized flight operations of nonparticipating aircraft within the area during the proposed designation period.[1]

DATES: Comments must be received on or before September 29, 1977.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Eastern Region, Attention: Chief, Air Traffic Division, Docket No. 77-EA-60, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430.

The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket, (AGC-24), Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: 202-426-3715.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. All communications received on or before September 29, 1977, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering amendments to Subpart D of Part 71 and Subpart B of Part 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) to designate temporary restricted areas identified as R-5201A, R-5201B, R-5201C, and R-5201D in the vicinity of Fort Drum, N.Y., to contain military joint readiness exercise called "Empire Glacier 78." These restricted areas would also be included in the contiental control area for the duration of its time of designation. This training exercise, "Empire Glacier

[1] Map filed as part of the original document.

V 42 I 174 SEP 8 77 UMI

78" will involve close air support, interdiction, reconnaissance, electronic warfare, air combat tactics, tactical airlift, airborne drops, air-to-air refueling, search and rescue, and airborne command center operations. Total air traffic associated with this exercise is expected to exceed 100 sorties per day. Restricted Area is specified airspace within which the flight of aircraft, while not wholly prohibited, is subject to restriction. Most restricted areas are designated joint use and IFR/VFR operations in the areas may be authorized by the controlling ATC facility when it is not being utilized by the using agency. The controlling agency for R-5201A/B/C and D would be the FAA Boston ARTCC and the using agency would be 9th Air Force/DOX, Shaw AFB, Sumter, S.C.

DRAFTING INFORMATION

The principal authors of this document are Mr. Richard Huff, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) as republished (42 FR 345 and 689) and amended (42 FR 29475) as follows:

In § 71.151 the following temporary restricted areas would be added for the duration of their times of designation from 0001 January 24, 1978, through 2400 hours, local time, February 1, 1978: R-5201A Fort Drum, N.Y.; R-5201B Fort Drum, N.Y.; R-5201C Fort Drum, N.Y.; R-5201D Fort Drum, N.Y.

In § 73.52 the following temporary restricted areas would be added:

R-5201A Fort Drum, N.Y.

Boundaries. Beginning at Lat. 44°10'00" N., Long. 75°39'00" W.; to Lat. 44°28'00" N., Long. 75°21'00" W.; to Lat. 44°28'00" N., Long. 75°13'00" W.; to Lat. 44°26'00" N., Long. 75°09'00" W.; to Lat. 44°20'00" N., Long. 75°15'00" W.; to Lat. 44°11'00" N., Long. 75°17'00" W.; to Lat. 44°03'00" N., Long. 75°33'30" W.; to Lat. 44°11'15" N., Long. 75°25'00" W.; to Lat. 44°15'15" N., Long. 75°31'00" W.; to point of beginning.

Designated altitudes. Surface up to but not including Flight Level 180.

Time of designation. Continuous 0001 January 24, 1978, through 2400 hours, local time, February 1, 1978.

Controlling agency. Federal Aviation Administration, Boston ARTCC.

Using agency. 9th Air Force/DOX, Shaw AFB, Sumter, S.C.

R-5201B Fort Drum, N.Y.

Boundaries. Beginning at Lat. 44°03'00" N., Long. 75°33'30" W.; to Lat. 43°51'15" N., Long. 75°33'30" W.; to Lat. 43°51'15" N., Long. 75°47'07" W.; to Lat. 44°05'47" N., Long. 75°44'30" W.; to Lat. 44°03'25" N., Long. 75°39'30" W.; to Lat. 44°00'45" N., Long. 75°37'25" W.; to point of beginning.

Designated altitudes. 6,000 feet MSL up to but not including Flight Level 180.

Time of designation. Continuous 0001 January 24, 1978, through 2400 hours, local time, February 1, 1978.

Controlling agency. Federal Aviation Administration, Boston ARTCC.

Using Agency. 9th Air Force/DOX, Shaw AFB, Sumter, S.C.

R-5201C Fort Drum, N.Y.

Boundaries. Beginning at Lat. 44°33'00" N., Long. 75°21'00" W.; to Lat. 44°36'00" N., Long. 74°40'00" W.; to Lat. 43°53'30" N., Long. 74°41'00" W.; to Lat. 43°45'00" N., Long. 74°46'50" W.; to Lat. 43°45'00" N., Long. 75°48'00" W.; to Lat. 43°51'15" N., Long. 75°47'07" W.; to Lat. 43°51'15" N., Long. 75°33'30" W.; to Lat. 44°03'00" N., Long. 75°33'30" W.; to Lat. 44°11'00" N., Long. 75°17'00" W.; to Lat. 44°20'00" N., Long. 75°15'00" W.; to Lat. 44°26'00" N., Long. 75°09'00" W.; to Lat. 44°28'00" N., Long. 75°13'00" W.; to Lat. 44°28'00" N., Long. 75°21'00" W.; to Lat. 44°10'00" N., Long. 75°39'30" W.; to Lat. 44°05'47" N., Long. 75°44'30" W.; to point of beginning.

Designated altitudes. 3,000 feet MSL up to but not including Flight Level 180.

Time of designation. Continuous 0001 January 24, 1978, through 2400 hours, local time, February 1, 1978.

Controlling agency. Federal Aviation Administration, Boston ARTCC.

Using agency. 9th Air Force/DOX, Shaw AFB, Sumter, S.C.

R-5201D Fort Drum, N.Y.

Boundaries. Beginning at Lat. 44°36'00" N., Long. 74°40'00" W.; to Lat. 44°36'00" N., Long. 74°34'00" W.; to Lat. 44°21'30" N., Long. 74°30'00" W.; to Lat. 44°08'00" N., Long. 74°30'00" W.; to Lat. 43°53'30" N., Long. 74°41'00" W.; to point of beginning.

Designated altitudes. 6,000 feet MSL up to but not including Flight Level 180.

[Airspace Docket No. 77-WE-2]

PROPOSED ESTABLISHMENT OF A WAYPOINT AND ALTERATION OF RNAV ROUTES

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish waypoint AROSE at Lat. 30°00'00" N., Long. 125°00'00" W.; realign J938R in part from waypoint PALIS to waypoint AROSE, and also realign J964R in part from waypoint MERLE to waypoint AROSE. These proposed RNAV route realignments will more accurately define these routes and waypoints for trans-Pacific flights to use in conjunction with the existing Pacific composite routes.[1]

DATES: Comments must be received on or before October 12, 1977.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Western Region, Attention: Chief, Air Traffic Division, Docket No. 77-WE-2, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009.

The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket, (AGC-24), Room 916, 800 Independence Ave., SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.
[77-WE-2]

FOR FURTHER INFORMATION CONTACT:

Mr. David F. Solomon, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Ave. SW., Washington, D.C. 20591; telephone: 202-426-8530.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Western Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009. All communications received on or before October 12, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Ave. SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

[1] Map filed as part of the original document.

THE PROPOSAL

The FAA is considering an amendment to Subpart D of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to establish waypoint AROSE at Lat. 37°00'00" N., Long. 125°00'00" W.; realign J938R in part from waypoint PALIS to waypoint AROSE and also realign J964R in part from waypoint MERLE to waypoint AROSE. These actions will establish area navigation waypoint and route definition for trans-Pacific flights to use in conjunction with Pacific Composite Route R-64. A pending amendment to Part 75 of the Federal Aviation Regulations (42 FR 39379) effective October 6, 1977, will change the names of waypoints "LEAFS" to "ALCOA" and "FRUIT" to "CLUKK". Accordingly, the actions proposed herein are predicated on these waypoint name changes.

ICOA CONSIDERATIONS

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in consonance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of and Annex 11 to the Convention on International Civil Aviation, pertains to the establishment of air navigation facilities and services necessary to promoting the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting State, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting State accepting such responsibility may apply the International Standards and Recommended Practices to civil aircraft in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, State aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting State, the United States agreed by Article 3(d) that its State aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since these actions involve, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

DRAFTING INFORMATION

The principal authors of this document are Mr. David F. Solomon, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 75.400 of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as republished (42 FR 722) and amended (42 FR 39379 and 55864) as follows:

J938R Title "ALCOA" would be deleted and "AROSE" substituted therefor. Text "ALCOA 37°50'00" N. 125°50'00" W. Ukiah, Calif." would be deleted and "AROSE 37°00'00" N. 125°00'00" W. Oakland Calif." substituted therefor.

J964R Title "CLUKK" would be deleted and "AROSE" substituted therefor. Text "CLUKK 36°05'00" N. 124°50'00" W. Oakland, Calif." would be deleted and "AROSE 37°00'00" N. 125°00'00" W. Oakland, Calif." substituted therefor.

(Secs. 307(a), 313(a), 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), 1510); Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.65.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on September 2, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

CIVIL AERONAUTICS BOARD

[Order No. 77-9-5; Docket No. 31331]

ASSOCIATED AIR FREIGHT, INC.

Order of Suspension and Investigation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 1st day of September 1977.

By tariff revisions[1] issued August 3 and marked to become effective September 5, 1977, Associated Air Freight, Inc. (Associated), an air freight forwarder, proposes to refuse acceptance for transportation of certain types of shipments.[2] Associated justifies its proposal on the grounds that the classes of shipments it proposes not to accept are the same as those not accepted in effective tariffs of other carriers; that the direct carriers to whom it must tender consolidated shipments publish similar restrictions; and that, in order to facilitate the transportation transaction between the forwarder, the shipper, and the airline, it is necessary to provide for the acceptability of shipments.

The Board finds that Associated's proposal may be unlawful, and should be investigated. The Board further concludes that it should be suspended pending investigation.

Nonacceptance of the listed shipments would constitute a significant reduction in the forwarder's common-carrier responsibility to provide transportation service, without adequate justification. Contrary to Associated's justification, each of the types of shipments is acceptable for transportation by direct carriers.

Our action in suspending these proposals of both direct and indirect carriers which refuse to accept certain shipments for transportation absent justifiable reasons for such action.[3]

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002 thereof,

It is ordered, That:

1. An investigation be instituted to determine whether the provisions in Rule No. 25 A, B, C, D, and F, on 3d Revised Page 5 of CAB No. 16 issued by Associated Air Freight, Inc., and rules, regulations, or practices affecting such provisions, are, or will be, unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and, if found to be unlawful, to determine and prescribe the lawful provisions and rules, regulations, or practices affecting such provisions;

2. Pending hearing and decision by the Board, Rule No. 25 A, B, C, D, and F, on 3d Revised Page 5 of CAB No. 16 issued by Associated Air Freight, Inc., is suspended and its use deferred to and including December 3, 1977, unless otherwise ordered by the Board, and that no changes be made during the period of suspension, except by order or special permission of the Board;

3. The proceeding here designated Docket 31331, be assigned for hearing before an administrative law judge of the Board at a time and place hereafter to be designated; and

4. Copies of this order shall be filed with the tariff and served upon Associated Air Freight, Inc., which is hereby made a party to Docket 31331.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[Order No. 77-9-4; Docket Nos. 30182 and 30788]

IOWA/ILLINOIS-ATLANTA ROUTE PROCEEDING; APPLICATION OF NORTHWEST AIRLINES, INC.

Order on Petition for Reconsideration and Motion to Consolidate

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 1st day of September 1977.

By Order 77-4-6, adopted April 1, 1977, served April 5, 1977, the Board instituted the Iowa/Illinois-Atlanta Route Proceeding to consider whether the public convenience and necessity require the certification of an air carrier or air carriers to engage in air transportation between Atlanta, Ga., on the one hand, and Des Moines, Iowa, Quad Cities (Iowa-Illinois,[1] and/or Peoria, Ill., on the other hand, and if so, to determine which air carrier(s) should be authorized to provide such service and under what conditions.

The only relevant application then pending before the Board was that of Ozark Air Lines. Ozark seeks nonstop authority for a new segment consisting of the terminal point Des Moines, Iowa, intermediate points Quad Cities (Iowa-Illinois), and Peoria, Ill., and the terminal point Atlanta, Ga. Ozark contemplates one daily nonstop DC-9 round trip between Atlanta and each of the other above-named locations. Order 77-4-6 provided that petitions for reconsideration and motions to consolidate had to be filed within 20 days from the April 5 service date, and that answers had to be filed within 10 days after that.

On April 25, Northwest Airlines petitioned for reconsideration of the instituting order and on the same day filed an application for a certificate (Docket 30788) to engage in air transportation between the terminal point Atlanta, Ga., and the co-terminal points Des Moines, Iowa, Quad Cities (Iowa-Illinois), Peoria, Ill., Minneapolis/St. Paul, Minn., Rochester, Minn., and Madison, Wisc.; all flights on the proposed segment would be subject to a restriction that they serve the Atlanta terminal point and one or the other of Des Moines, Quad Cities, and Peoria. Northwest's route and application in Docket 30788 goes far beyond the route application in issue in Docket 30182. Northwest filed a concurrent motion to consolidate its application (Docket 30788) with Docket 30182, alleging that the law compels consolidation under the principles set forth in *Ashbacker Radio Corporation* v. *FCC*, 326 U.S. 327 (1945).

[1] Moline, East Moline, and Rock Island, Ill., and Davenport, Iowa.

Northwest's petition for reconsideration and motion for consolidation is supported by timely answer of the Peoria Parties.[4] Timely answers in opposition were filed by the Bureau of Operating Rights, and by the Cedar Rapids Parties.[5]

By its May 10 motion to file an answer as a late-filed document, Ozark opposed Northwest's effort at expanding the proceeding. The Iowa Department of Transportation (Iowa) filed a similar motion and answer in opposition, received May 27.[6] Subsequently, the Peoria Parties, on June 13, and the Illinois Department of Transportation (Illinois), on June 15, filed motions for leave to file replies to the late-filed answer of the Iowa Department of Transportation.[7]

The Board has decided not to expand the scope of the case. Northwest's petition for reconsideration will, therefore, be denied.[8]

First, expansion of the case to include Minneapolis/St. Paul, Madison, and Rochester is not required as a matter of law. In its motion to consolidate Northwest asserts that the *Ashbacker* doctrine[9] requires simultaneous consideration of its expanded application and Ozark's Atlanta-Des Moines/Quad Cities/Peoria application. Northwest is wrong. It has long been the Board's position, sustained by the courts, that *Ashbacker* does not require the structuring of proceedings in such a way as to make beyond-segment opportunities equal for all applicants.[10] In accordance with our usual practice, however, Northwest will be permitted to introduce evidence on the issue of mutual exclusivity. In addition, parties are free to present evidence showing the need for the imposition of service restrictions on any authority that may be awarded in this case.

Second, the Board has determined as a matter of discretion not to include the additional points sought by Northwest. As currently framed, the proceeding contemplates consideration of first single-plane, single-carrier service in three Atlanta markets. Expansion of the case to include consideration of Minneapolis/St. Paul, Minn., Rochester, Minn., and Madison, Wis., would inject more controversial questions of competitive service in relatively small, well-served markets.[11] These additional markets would likely draw additional applicants, substantially delay the proceeding, and divert the focus of the case from its original purpose: to examine the needs of Des Moines, Peoria, and the Quad Cities for direct air service to Atlanta.[12]

Finally, the Chambers of Commerce of Champaign and Urbana, Ill., filed a petition for leave to intervene which also seeks to expand the case to include direct service between Champaign/Urbana, on the one hand, and Dallas/Fort Worth or Houston, Tex., the Twin Cities, Detroit, and Atlanta, on the other hand. Petitions for intervention are not the proper vehicle for filing requests for modification of the scope of proceedings. Such requests should have been set forth in a timely filed petition for reconsideration. Since the request to enlarge the case is both improperly filed and over two months late, we will deny it.[13]

Accordingly, *it is ordered*, That:

1. The petition of Northwest Airlines for reconsideration of Order 77-4-6 be denied.

2. The application of Northwest Airlines in Docket 30788, to the extent that it requests amendment of its certificate so as to authorize it to engage in single-plane service between Atlanta, Ga., on the one hand, and Des Moines, Iowa, Quad Cities (Iowa-Illinois), and/or Peoria, Ill., on the other hand, is consolidated for hearing and decision with the *Iowa/Illinois-Atlanta Route Proceeding*, Docket 30182.

3. The motion of Northwest Airlines to consolidate with Docket 30182 its application in Docket 30788 be denied except to the extent stated in ordering paragraph 2 above.

4. The application of Northwest Airlines in Docket 30788, except to the extent that it is consolidated above into Docket 30182, be dismissed without prejudice.

5. Ozark's Motion To File Answer As Late Filed Document and the Iowa Department of Transportation Motion To File Answer As Late Filed Document are granted; the Motion For Leave To File Reply of the Peoria Parties and the Motion For Leave To File Reply of the Illinois Department of Transportation are denied, and the Champaign/Urbana Chambers of Commerce prayers to enlarge the scope of the proceeding and to petition for a general investigation are denied.

6. Except to the extent granted, all requests in the petitions, motions, and answers discussed in this order are denied.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-26185 Filed 9-7-77;8:45 am]

[4] The Greater Peoria Airport Authority, the Peoria Area Chamber of Commerce, and the City of Peoria, Ill.

[5] Cedar Rapids Airport Commission and Cedar Rapids-Marion Area Chamber of Commerce.

[6] We will grant Ozark's and the Iowa Transportation Department's motions for leave to answer out of time. Each motion contains good cause shown, and each is unopposed, although Iowa's answer opposing Northwest's pleadings is, in turn, opposed on the merits by the Peoria Parties and by Illinois.

[7] The motions for leave to file replies will be treated as motions for leave to file otherwise unauthorized documents which we do not find contain sufficient good cause to warrant consideration. In view of the disposition in this order of Northwest's pleading, the position of Iowa complained of in these reply documents is in any case mooted.

[8] Northwest's motion to consolidate will be dismissed to the extent that it does not conform to the scope of the case as framed by Order 77-4-6.

[9] *Ashbacker Radio Corp.* v. *FCC*, 326 U.S. 372 (1945).

[10] Remanded Additional Service to San Diego Case, Order 71-7-34 (July 7, 1971), at page 2: "* * * nothing in the *Ashbacker* doctrine requires that the scope of the issues in a case be expanded through consolidation of applications so as to place all applicant-carriers on an equal footing with respect to beyond-segment service possibilities." See also, *Delta Airlines et al.* v. *Civil Aeronautics Board*, 497 F. 2d 608, 613-614 (D.C. Cir. 1973), cert denied 417 U.S. 930 (1974); *National Airlines* v. *Civil Aeronautics Board*, 392 F. 2d 504, 508 (D.C. Cir., 1968).

[11] Granting Northwest's motion would place in issue first competitive nonstop service in the Minneapolis/St. Paul- Peoria/Moline markets and third competitive nonstop service in the Minneapolis/St. Paul-Des Moines market. Minneapolis/St. Paul-Peoria generated 13,800 O&D plus connecting passengers (year ended June 1976) and receives daily nonstop, two-stop and three-stop service by Ozark. Minneapolis/St. Paul-Moline generated 33,330 O&D plus connecting passengers and receives nonstop, one-stop and two-stop service by Ozark. Minneapolis/St. Paul-Des Mones generated 80,180 O&D plus connecting passengers and receives multiple daily nonstop service by Ozark and Braniff. In addition, Rochester-Des Moines generated 3,060 O&D plus connecting passengers and receives one daily one-stop round trip by Ozark. Rochester-Moline generated 1,900 O&D plus connecting passengers and receives daily one-stop service by Ozark. Madison-Moline/Peoria/Des Moines generated, in the aggregate, only 4,620 O&D plus connecting passengers.

[12] The Board notes that Northwest already has one stop authority in the Rochester-Atlanta market via Chicago or Milwaukee and provides nonstop service in the Minneapolis/St. Paul-Atlanta market (Eastern also provides nonstop service) and one stop service in the Madison-Atlanta market. Official Airline Guide, August 1, 1977.

[13] Even if the request were properly filed, including all of the markets and issues which Champaign/Urbana wishes to hear would expand this case beyond manageable proportions.

[Docket No. 29058]

NORFOLK-ATLANTA SUBPART M PROCEEDING

Postponement of Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that the hearing in this proceeding, now scheduled to be held on September 13, 1977 (42 FR 38928, August 1, 1977), is hereby postponed to October 4, 1977, at 9:30 a.m. (local time), in Room 1003, Hearing Room B, Universal North Building, 1875 Connecticut Avenue NW., Washington, D.C., before Administrative Law Judge Ronnie A. Yoder.

Dated at Washington, D.C., August 30, 1977.

RONNIE A. YODER,
Administrative Law Judge.

[Order No. 77-9-1; Docket No. 30885]

NORTHWEST AIRLINES, INC.

Order to Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 1st day of September, 1977.

V 42 174 SEP 8 77 UMI

By Order 77–4–153, April 29, 1977, the Board proposed to grant authority to three carriers to transport persons, property, and mail in interstate air transportation between certain domestic points which are served on flights operated in foreign or overseas air transportation. While that order did not propose such "fill-up" authority for Northwest Airlines between Washington and Chicago, we indicated that we would be receptive to a request for a further show-cause order to consider such authority upon a reasonable prima facie showing of a specific need for the strengthening of international services, without serious injury to other carriers.

In response to this order, Northwest has filed an application and petition for show-cause order for Washington-Chicago fill-up authority. The carrier asserts that this market compares favorably with the other markets in which fill-up authority was proposed in Order 77–4–153. Specifically, three other carriers provide 25 daily nonstop round trips between Washington and Chicago, and the market had 651,390 true O&D plus interline connecting passengers in 1975.[1] The international passengers on Northwest's daily westbound Washington-Chicago flight gave the carrier a load factor of only 20.26% in 1975, and Northwest argues that, because its Washington service departs from Dulles Airport, fill-up authority for that flight will not seriously affect any other carrier. In addition, Northwest points out that it has carried local traffic on its daily westbound Washington-Chicago-Orient flight since May 1974, pursuant to exemptions granted by the Board.[2]

The Commonwealth of Virginia supports Northwest's petition for show-cause order, arguing that Washington-Chicago fill-up authority will result in substantial improvements in service to Chicago for Dulles passengers. United Air Lines and American Airlines answered in opposition. United's analysis of the facts is limited to Dulles-Chicago where, the carrier points out, United provides the only service (other than that provided by Northwest pursuant to its exemption), which amounts to only one daily round trip. United argues, therefore, that fill-up rights for Northwest would severely harm United and that it should not be penalized for its dedication to the Dulles-Chicago market by the addition of a competitor which is not concerned with the economics of that local operation.

American argues that, since Northwest has Washington-Chicago fill-up authority pursuant to an exemption, there is no need for expeditious processing of this application through show-cause procedures. The carrier also contends that Northwest's Washington-Chicago flight may not be operated primarily to serve the needs of international traffic since it offers many on-line connections at Chicago and since Northwest has never operated its Washington-Chicago-Orient flight without local traffic rights over the domestic segment. Finally, American argues that since Washington-Chicago is a medium-haul market of almost 600 miles, the revenues involved in a haul of this length only increase Northwest's incentives to operate service for the purpose of carrying local traffic. Both American and United object to the grant of fill-up authority by show-cause procedures.

Northwest filed a motion for leave to file an unauthorized document, accompanied by a reply to the answers of American and United. We have decided to deny Northwest's motion. We are becoming increasingly concerned about the number of unauthorized replies being filed by applicants merely because they want to have the last word. In this period of intensive route activity, these replies only increase the Board's workload; and where, as here, adequate justification for receiving the reply has not been shown (for example, Northwest has not demonstrated that the answers contained new material which it could not have anticipated), we will not accept it.

In our view, the information submitted by Northwest demonstrates that the fill-up authority it requests would be in the public interest. As detailed in Northwest's petition, international traffic fills a small percentage of the seats on its daily westbound frequency between Washington and Chicago, and we tentatively conclude that the grant of fill-up authority will benefit Northwest and the public without substantially harming any other carriers in the market. The Washington-Chicago market is quite large (over 1700 daily true O&D plus interline connecting passengers in 1975) and is served with a substantial number of frequencies. We cannot limit our analysis of this market to Dulles-Chicago service. Both National and Dulles airports serve Washington passengers, and it is very unlikely that a significant number use Dulles airport exclusively. This is particularly apparent with respect to the Washington-Chicago market, since the Dulles service is so limited. Undoubtedly, the travel needs of those passengers for whom Dulles would be more convenient do not necessarily coincide with the schedules offered. Thus, any fluctuations in the traffic carried by United in the past between Dulles and Chicago could easily be attributed to a shift of passengers to and from National Airport, rather than to Northwest's fill-up service provided pursuant to the exemptions granted by the Board. It is also significant that the fill-up service provided by Northwest has never been operated within less than two hours of a United Dulles-Chicago flight, further minimizing the likelihood that any appreciable amount of traffic has been diverted.

Any suggestion that Northwest's service between Washington and Chicago would be geared to the needs of the local rather than international traffic is unrealistic. The minimum distance Northwest must operate west of Chicago on its international route is 6300 miles (nonstop Chicago-Tokyo distance) or more than ten times the haul between Washington and Chicago.

Finally, we do not believe that an award of this limited authority to Northwest can give rise to legitimate claims for consideration of Chicago-Washington authority for other carriers on *Ashbacker* grounds.[3] The premise on which the *Ashbacker* doctrine is based is that mutually exclusive cases must be decided together. The extreme long-haul requirement beyond any Northwest Washington-Chicago flights coupled with the limited amount of international traffic available to Northwest economically dictates the provision of very limited service between Chicago and Washington. Thus, just as this award to Northwest will not hurt carriers already serving the market, it will not lessen the chances for success of other carriers who may seek authority in the market.

Interested persons will be given 30 days following adoption of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained. In this connection, we note that it is not enough merely to state that one objects to the grant of a certain type of authority by show-cause procedures. The necessity of an evidentiary hearing must be demonstrated.[4]

Accordingly, *it is ordered*, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and authorizing Northwest Airlines, Inc. to transport persons, property, and mail in interstate air transportation in the Washington-Chicago market on flights operated in foreign and/or overseas air transportation pursuant to its certificate for Route 129;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendment set forth here shall, within 30 days after the date of adoption of this order, file with the Board and serve on all persons listed in paragraph 6 below, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied on to support the stated objections; answers may be filed 15 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;[5]

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived, and the case will be submitted to the Board for final action;

5. The motion of Northwest Airlines, Inc., for leave to file an unauthorized document be denied; and

6. A copy of this order be served upon American Airlines, Inc., Northwest Airlines, Inc., United Air Lines, Inc., and the Commonwealth of Virginia.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77–26166 Filed 9–7–77;8:45 am]

[1] These figures exclude Baltimore flights and traffic.

[2] Orders 74–5–150, 74–11–157, 75–4–106, and 76–3–140.

[3] *Ashbacker Radio Corporation* v. *F.C.C.*, 326 U.S. 327 (1945).

[4] We have considered Northwest's representations as to the environmental effect and gross transport revenue increase resulting from an award of Chicago-Washington "fill-up" rights. On the basis of these representations, we find that such an award will not be a major Federal action significantly affecting the quality of the environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, and that, for purposes of a license fee, the resulting increase in gross transport revenues will be between $1 million and $5 million.

[Order No. 77–9–6; Docket No. 31166]

TRANS WORLD AIRLINES, INC.

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 1st day of September, 1977.

By Order 77–6–68, served June 14, 1977, the Board issued a foreign air carrier permit to Laker Airways Limited (Laker), authorizing the carrier to operate its low-fare, no-frills Skytrain service between New York and London for a period of one year. Laker plans to begin its Skytrain service on September 26, 1977, with eleven round-trip flights per week in the New York-London market (seven flights per week, October through March) at a round-trip fare of $236.48. Laker filed its initial Skytrain tariff on July 8, 1977.[1]

In a complaint filed July 19, 1977, Trans World Airlines, Inc. (TWA), alleges that the initial Skytrain tariff issued by Laker Airways is inconsistent with the terms of Laker's operating authority, and should, therefore, be suspended or rejected.[2] Specifically, TWA takes exception to the definition of "immediate family" provided in Rule 5 of Laker's tariff, and the statement, in Rule 50, that all Laker seats will be available for sale. Both of TWA's objections pertain to alleged violations of Laker's United Kingdom license; TWA does not contend that Laker's Skytrain tariff contravenes any provision of the Federal Aviation Act of 1958, the Board's regulations, or Laker's foreign air carrier permit.

The British-imposed ticketing restrictions which are incorporated in Rule 25 of Laker's tariff stipulate, in part, that tickets must be purchased by the passenger himself or by a member of his immediate family, subject to passport identification; while a passenger may also purchase a ticket for only one other, unrelated person traveling on the same flight, no limit is placed on the number of tickets a passenger may purchase for his immediate family.

Rule 50 of Laker's taiff defines "immediate family" as "the spouse, children, parents, parents of the spouse, children of the parents and children of the parents of the spouse." According to TWA, Laker's definition could eliminate the standby characteristics of Skytrain service by allowing passengers to circumvent one of the ticketing restrictions imposed by Laker's U.K. license. TWA argues that family membership cannot generally be confirmed by passport identification, since the last names and addresses of immediate family members will not necessarily match the last name and address of the ticket purchaser. Unless Laker's definition is revised to include only those family members whose last name and address correspond to those of the ticket purchaser, TWA contends, "* * * there will be no control and the standby feature of Skytrain could be eliminated by persons who for a fee would stand in line to purchase large numbers of tickets for persons who would be claimed as immediate family members."

TWA also objects to the statement, in Rule 50 of Laker's tariff, that no seats will be withheld from sale. Rule 50 indicates that Laker will operate 345-seat DC–10 equipment with no seat restrictions. TWA notes that Laker's U.K. license stipulates that no more than 189 passengers may be carried on any one flight during the months of October through March, and argues that the Board should require Laker to state this restriction in Rule 50.

Answering TWA's complaint on July 27, 1977, Laker asserts that there is no legal basis for the Board to suspend or reject Laker's initial tariff, and that the tariff itself is fully consistent with the requirements of the Act and the Board's regulations. In response to TWA's first objection, Laker maintains that control of its ticket sales is not a proper tariff matter; that it is Laker's obligation to comply with the conditions of its U.K. license, and no further restrictions need be devised by the Board to ensure such compliance; that TWA's proposed definition of "immediate family" is unduly restrictive; that Laker's definition is identical to that provided in section 372.2 of the Board's Economic Regulations, and is clear, conventional, and enforceable; that Laker will be able to control its ticket sales, since a person buying tickets for members of his immediate family must present the passports of the persons for whom the tickets are purchased, and passports are valuable documents, not likely to be entrusted to an entrepreneur who would stand in line for a fee; and that, in any event, the standby feature of Skytrain is not eliminated, since no tickets will be sold more than six hours before scheduled departure of the flight. With regard to TWA's second objection, Laker notes that the capacity restriction limiting Skytrain to a maximum of 189 passengers per flight does not take effect until October 1, 1977. Consequently, Laker contends, Rule 50 is correct in its present form: As of September 7, 1977, the effective date of the tariff, all 345 seats on each Skytrain flight will be available for sale.

The Board finds no basis in TWA's complaint for suspension or rejection of Laker's Skytrain tariff. Laker's tariff definition of "immediate family" conforms exactly to the definition given in section 372.2 of the Board's Economic Regulations, and is comparable to the standard definitions published in several widely used tariffs.[3] TWA's own definition of "immediate family," in C.A.B. No. 37, includes spouse, children, parents, brothers, and sisters, with no requirement that family members share the same last name and address. TWA has not demonstrated that a more stringent definition is required in Laker's case. As TWA suggests, family relationships may be difficult to verify by means of passport identification; it is possible, therefore, that an entrepreneur might take advantage of the terms of Laker's tariff to purchase a block of tickets by claiming a number of unrelated passengers as immediate family members. This would in no way eliminate the standby feature of Skytrain; however, it would simply allow passengers who are willing to entrust their passports to an entrepreneur to avoid the inconvenience of standing in line themselves. Neither legitimate family members nor entrepreneurs will be able to obtain tickets more than six hours before scheduled departure. While we expect Laker Airways to be vigilant and to comply fully with all of its tariff conditions, it is the provision prohibiting ticket sales more than six hours before departure, not Laker's ability to distinguish legitimate family members from unrelated passengers, that determines the standby character of Skytrain service.

TWA's second objection is equally unfounded. As Laker states in its Answer, the tariff provision in question is correct as it stands. Until October 1, 1977, the

[5] All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[1] Laker Airways Limited, Local Passenger Tariff No. 1, C.A.B. No. 2, issued July 8, 1977, to be effective September 7, 1977.

[2] The complaint against Laker's tariff filed by the Port Authority of New York and New Jersey in Docket 31262 was dismissed by Order 77–9–94, August 19, 1977. The low-fare transatlantic fare filings by other carriers will be considered by the Board in a subsequent order.

[3] ATC and Sampson tariffs, for example, define "immediate family" to include not only the persons specified by Laker's definition, but grandparents, sons-in-law, and daughters-in-law as well.

V 42 174 SEP 8 77 UMI

date the capacity restriction takes effect, Laker is authorized to operate 345-seat DC-10 aircraft with no seats withheld from sale, as Rule 50 indicates. If Laker operates 345-seat DC-10's on and after October 1, 1977, an amended tariff filing which reflects the capacity restriction will be in order at that time.

Accordingly, *It is ordered*, That:

1. The complaint filed by Trans World Airlines, Inc., in Docket 31166 be hereby dismissed; and

2. Copies of this order be served upon Laker Airways Limited and Trans World Airlines, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] PHYLLIS T. KAYLOR, *Secretary.*

All Members concurred.

DEPARTMENT OF COMMERCE

Economic Development Administration

SONGO SHOE MANUFACTURING CORP.

Petition for a Determination of Eligibility To Apply for Trade Adjustment Assistance

A petition by Songo Shoe Manufacturing Corp., 34 Diamond Street, Portland, Maine 04101, a producer of footwear for men and women, was accepted for filing on August 31, 1977, pursuant to section 251 of the Trade Act of 1974 (Pub. L. 93-618) and section 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the U.S. Department of Commerce has initiated an investigation to determine whether increased imports into the United States of articles like or directly competitive with those produced by the firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of the petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

[Docket S-576]

GULF OIL CORP.

Application for Participation by Vessels Built With CDS in the Carriage of Alaskan Oil in the Domestic Trade

Notice is hereby given that Gulf Oil Corporation has applied for written permission under section 506 of the Merchant Marine Act, 1936, as amended, for the temporary employment of its U.S. flag tanker, the SS *American Independence*, in the carriage of Alaskan oil in the domestic trade. The vessel is to commence making voyages from Alaska to Panama on or about November 1, 1977. The SS *American Independence*, of 265,000 DWT, was built with construction-differential subsidy and will be under time charter to the Sohio Petroleum Company of Cleveland, Ohio, for a period of about 26 months. Sohio Petroleum Company intends to use the *American Independence* for approximately 12 voyages during two six-month periods commencing on or about November 1977. During the intervening periods, the vessel would be otherwise employed in accordance with the charter agreement. In acordance with the provisions set forth in Part 250 of Chapter II, Title 46, of the Code of Federal Regulations as published in the FEDERAL REGISTER issue of June 29, 1977 (42 FR 33035), the SS *American Independence* will be permitted to engage in the carriage of Alaskan oil in the Alaska-Panama trade for a period not exceeding six months in any consecutive 12-month period, commencing with the entry date of the vessel in the Alaska-Panama trade.

Interested parties may inspect the application in the Office of the Secretary, Maritime Administration, Room 3099-B, Department of Commerce Building, 14th and E Streets NW., Washington, D.C. 20230.

Any person, firm, or corporation who is a "competitor," as defined in section 250.2 of the regulations and desires to protest such application should submit such protest in writing, in triplicate, to the Secretary, Maritime Administration, Washington, D.C. 20230. Protests must be received within five working days after the date of publication of this Notice in the FEDERAL REGISTER. If a protest is received, the applicant will be advised of such protest by telephone or telegram and will be allowed three working days to respond in a manner acceptable to the Assistant Secretary for Maritime Affairs. Within five working days after the due date for the applicant's response, the Assistant Secretary will advise the applicant, as well as those submitting protests, of the action taken, with a concise written explanation of such action. If no protest is received concerning the application, the Assistant Secretary will take such action as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 11.500 Construction-Differential Subsidies (CDS).)

By Order of the Assistant Secretary for Maritime Affairs.

Dated: September 1, 1977.

JAMES S. DAWSON, Jr.,
Secretary.

National Oceanic and Atmospheric Administration

ISSUANCE OF PERMIT FOR MARINE MAMMALS

On June 3, 1977, notice was published in the FEDERAL REGISTER (42 FR 28566), as amended on July 7, 1977 (42 FR 34905), that an application had been filed with the National Marine Fisheries Service by Dr. Donald B. Siniff, Associate Professor, Department of Ecology and Behavioral Biology, 223 Snyder Hall, University of Minnesota, St. Paul, Minn. 55101, for a Scientific Research Permit to take by tagging up to 500 crabeater seals (*Lobodon carcinophagus*), 50 leopard seals (*Hydrurga leptonyx*), 825 Weddell seals (*Leptonychotes weddelli*), 10 Ross seals (*Ommatophoca rossii*), 10 southern elephant seals (*Mirounga leonina*), and 20 southern fur seals (*Arctocephalus* sp.), and to take by killing 110 crabeater seals (*Lobodon carcinophagus*), 10 leopard seals (*Hydrurga leptonyx*), 5 Weddell seals (*Leptonychotes weddelli*), 2 Ross seals (*Ommatophoca rossii*), 2 southern elephant seals (*Mirounga leonina*), and 2 southern fur seals (*Arctocephalus* sp.) in the Antarctic region for scientific research.

Notice is hereby given that, on August 29, 1977, and as authorized by the provisions of the Marine Mammal Protection of 1972 (16 U.S.C. 1361-1407) the National Marine Fisheries Service issued a permit for the above taking to Dr. Donald B. Siniff, subject to certain conditions set forth therein.

The permit is available for review by interested persons at the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and
Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.

Dated: August 29, 1977.

JOSEPH W. SLAVIN,
Acting Associate Director, National Marine Fisheries Service.

[FR Doc.77-26073 Filed 9-7-77;8:45 am]

ISSUANCE OF PERMIT TO TAKE MARINE MAMMALS

On July 14, 1977, notice was published in the FEDERAL REGISTER (42 FR 36280), that an application had been filed with the National Marine Fisheries Service, by Mr. John Slater, 3054 Gordon Drive, Naples, Fla. 33940, for a permit to take two (2) California sea lions (*Zalophus californianus*); two (2) Atlantic bottlenosed dolphins (*Tursiops truncatus*), and two (2) beached/stranded harbor seals (*Phocavitulina*), for the purpose of public display.

The National Marine Fisheries Service has determined that it would be in the best interest of the two (2) rehabilitated harbor seals to remain in captivity and, therefore, authorized the Permit Holder to maintain the animals.

Notice is hereby given that on August 30, 1977, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a permit for the requested taking to Mr. John Slater, subject to certain conditions set forth therein. The Permit is available for review by interested persons in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.;
Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731;
Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Fla. 33702; and
Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.

Dated: August 30, 1977.

JOSEPH W. SLAVIN,
Acting Associate Director, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

CERTIFICATE OF EXEMPTION

Receipt of Applications

Notice is hereby given that the following applicants have applied in due form for a Certificate of Exemption under Pub. L. 94-359, and the regulations issued thereunder (50 CFR Part 222, Subpart B), to engage in certain commercial activities with respect to pre-Act endangered species parts or products.

APPLICANTS

1. Leonard F. Porter, Inc., 600 Prefontaine Bldg., Third and Yesler Sts., Seattle, Wash. 98104.

Period of exemption. The applicant requests that the period of time to be covered by the Certificate of Exemption begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

Commercial activities exempted. (i) The prohibition, as set forth in section 9(a)(1)(A) of the Act, to export any such species part from the United States;

(ii) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity any such species part;

(iii) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

Parts or products exempted. Finished scrimshaw products to be made from approximately 3,250 pounds of sperm whale teeth, 575 pounds of sperm whale tooth pieces and scrap, 842 pounds of whale bone and 220 pounds of baleen.

3. Scott Krieger, 29 Fairway E., Sayville, N.Y. 11782.

Period of exemption. The applicant requests that the period of time to be covered by the Certificate of Exemption begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

Commercial activities exempted. (i) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity any such species part;

(ii) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

Parts or products exempted. Finished scrimshaw products to be made from approximately 2,000 pounds of sperm whale teeth and 2,800 pounds of sperm whale tooth pieces and scrap.

2. Heinz Lange, d.b.a. Northwest Arts and Crafts, 2408 Seventh Ave. W., Seattle, Wash. 98119.

Period of exemption. The applicant requests that the period of time to be covered by the Certificate of Exemption begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

Commercial activities exempted. (i) The prohibition, as set forth in section 9(a)(1)(A) of the Act, to export any such species part from the United States;

(ii) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity any such species part;

(iii) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

Parts or products exempted. Finished scrimshaw products to be made from approximately 310 sperm whale teeth, 120 pounds of sperm whale pan bone and 5 pieces of baleen.

4. Leo E. Begin, d.b.a. Olde Windjammer, Little Clear Pond, Plymouth, Mass. 02360.

Period of exemption. The applicant requests that the period of time to be covered by the Certificate of Exemption begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

Commercial activities exempted. (i) The prohibition, as set forth in section 9(a)(1)(A) of the Act, to export any such species part from the United States;

(ii) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity any such species part;

(iii) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

Parts or products exempted. Finished scrimshaw products consisting of approximately seven whale bone carvings and finished scrimshaw products to be made from approximately 30 large whale teeth, an additional 20 pounds of whale teeth and 30 pounds of whale teeth pieces and scrap.

5. Martin David Dubin, 239 Park Ave., Highland Park, Ill. 60035.

Period of exemption. The applicant requests that the period of time to be covered by the Certificate of Exemption begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

Commercial activities exempted. (i) The prohibition, as set forth in section 9(a)(1)(A) of the Act, to export any such species part from the United States;

(ii) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity any such species part;

(iii) The prohibition, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

Parts or products exempted. Finished scrimshaw products consisting approximately 106 etched whale teeth and 13 items carved from whale teeth, and finished scrimshaw products to be made from approximately 80 whale teeth, 654 individual pieces of whale teeth, one half of the jaw bone of a sperm whale and 20 pieces of whale bone.

6. Werner G. Smith, Inc., 1730 Train Ave., Cleveland, Ohio 44113.

Period of exemption. The applicant requests that the period of time to be covered by the Certificate of Exemption begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

Commercial activities exempted. (i) The prohibition, as set forth in section 9(a)(1)(A) of the Act, to export any such species part from the United States;

(ii) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity any such species part;

(iii) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

Parts or products exempted. Approximately 8,282 pounds of methylated sperm whale oil and 20,460 pounds of hydrogenated sperm whale oil

Written comments on these applications may be submitted to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before October 11, 1977.

Dated: September 2, 1977.

MORRIS M. PALLOZZI,
Acting Assistant Director, for Fisheries Management.

FEDERAL COMMUNICATIONS COMMISSION

CANADA—U.S.A. TELEVISION

AUGUST 3, 1977.

In the matter of Amendment of Table A of the Canada-U.S.A. Television Agreement of 1952 (TIAS–2594), *supplement No. 6* to the table of Canadian television channel assignments and allocations within 250 miles of the Canada-U.S.A. border, dated August 1, 1977, as revised to April 12, 1977.

Pursuant to exchange of correspondence between the Department of Communications of Canada and the Federal Communications Commission, Table A of the Canada-U.S.A. Television Agreement has been amended as set forth in the attached list. It is to be noted that those representing assignments will indicate call signs plus parameters.

Further additions, changes, and deletions will be issued as reported to the Commission by the Canadian Department of Communications.

Copies of the basic Table of Allocations may be obtained from Downtown Copy Center, 1730 K Street NW., Washington, D.C. 20036, telephone (202) 452–1422.

WALLACE E. JOHNSON,
Chief, Broadcast Bureau,
Federal Communications Commission.

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

AUGUST 29, 1977.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (See § 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. [See §§ 1.227(b)(3) and 21.30(b) of the Commission's Rules.]

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

21976–CD–TC–77 Ram Broadcasting of Oregon, Inc., Consent to Transfer of Control from Ram Broadcasting of Oregon, Inc., Transferor to Paul A. Matschiner, Transferee. Station: KUC874, Portland, Oreg.

21977–CD–AL–77 Martha M. Hahn d/b as St. Cloud and Loop Answering Service, Consent to Assignment of License from Martha M. Hahn d/b as St. Cloud and Loop Answering Service, Assignor to Answer Iowa, Inc., Assignee. Station: KLF580, St. Cloud, Minn.

21978–CD–P–(2)–77 Airphone Company, Inc. (KCC206), C.P. for additional facilities to operate on 35.58 MHz at a new site described at Loc. No. 3 to be located at Shelburne Mountain, Shelburne; 75.96 MHz Control to be located at Loc. No. 2: Near WHYN–TV Tower, Mt. Tom, Mass.

21979–CD–P–77 M M Answering Service, Inc. (new), C.P. for a new 1-Way station to operate on 152.24 MHz to be located Approximately 1.5 miles West of Bradford, Pa.

21980–CD–P–77 Dr. Robert Casey & Dr. Robert Wynia (new), C.P. for a 2-Way station to operate on 454.050 MHz to be located 0.5 mile North of Great Falls, Mont.

21981–CD–MP–77 Westchester Mobilfone System, Inc. (KAA281), C.P. for additional facilities to operate on 152.24 MHz to be located at a new site described as Loc. No. 2: Westchester Community College, Rte. 100, Valhalla, N.Y.

21983–CD–P–77 Radio Paging, Inc. (KKI445), C.P. to relocate facilities operating on 35.58 MHz to be located 1.3 Miles SE of intersection of Hwy. No. 523 and County Road 792, Oyster Creek, Tex. (loc. No. 8).

21984–CD–P–77 Harold's Radio Service, Inc. (new), C.P. for a new 2-Way station to operate on 152.06 MHz to be located on Hwy. No. 136, 12 Miles S. of Henderson, Ky.

21985–CD–P–77 Jackson Mobilphone Company, Inc. (KWT944), C.P. to relocate facilities operating on 152.03 MHz to be located: Hwy. 51–S, 2 miles East of Dyersburg, Tenn.

21986–CD–P–(8)–77 David R. Williams d/b as Industrial Communications (new), C.P. for a new 2-Way station to operate on 152.03 152.06 152.15 MHz (Base) to be located at Medicine Butte, 7 Miles NNE of Evanston: 2178.0 MHz (Control) and 2185.2 MHz (Repeater) to be located at Marsh Peak, 23 Miles Northwest of Vernal; 2128.0 MHz (Repeater) to be located at Medicine Butte, 7 Miles of Evanston, Wyo.

21987–CD–P–(3)–77 Beep Communication Systems, Inc. (KAA283), C.P. for additional facilities to operate on 152.24 MHz at a new site described as Loc. No. 4 to be located at North Tower, World Trade Center, New York; 152.24 MHz at a new site described as Loc. No. 5 to be located 901 Ocean Avenue, Asbury Park; 152.24 MHz at a new site described as Loc. No. 6 to be located at West Gate Drive, Huntington, N.Y.

21988–CD–P–77 Grand Forks Telephone Answering Service (KDN400), C.P. to change antenna system and relocate facilities operating on 152.03 MHz to be located 101 N. 3rd Street, Grand Forks, N. Dak.

21989–CD–P–77 Airsignal of California, Inc. (KMA219), C.P. for additional facilities to operate on 152.06 MHz to be located at 2904 Fine Avenue, Modesto, Calif.

21990–CD–P–77 Waco Communications, Inc. (KLB498), C.P. to change antenna system and relocated facilities operating on 152.03 MHz Loc. No. 1 to be located at 1200 Block of North 46th Street, Waco, Tex.

21991–CD–P–(2)–77 Dakota Radio Paging, Inc. (KQK777), C.P. for additional facilities to operate on 454.050 MHz at Loc. No. 1: 18th and Bahanson Avenue; 454.025 MHz at Loc. No. 2: Water Tower, 2 Miles SSW of Sioux Fall, S. Dak.

21992–CD–P–(2)–77 Prospect Communications (new), C.P. for a new 2-Way station to operate on 454.125 MHz Loc. No. 1 to be located West of Yell Rd., 4.3 Miles S. of Lewisburg, 454.300 MHz Loc. No. 2 to be located on Route 6, 2 miles S. of Fayetteville, Tenn.

21994–CD–P–77 Wilson J. Trahan and Ralph E. Antles d/b as Western Electronic and Communications (new), C.P. for a new 1-Way station to operate on 158.70 MHz to be located at 0.5 mile North of Kingman, Ariz.

21995–CD–P–77 Southwestern Bell Telephone Co. (KKB860), C.P. to relocate facilities operating on 152.57 MHz to be located 4 miles SW of Beeville, Tex.

22000–CD–P–(4)–77 Grants Radiotelephone Service, Inc. (KKT397), C.P for additional facilities to operate on 454.100, 454.200, 454.300, 454.350 MHz at Loc. No. 1: La Mosca Peak, 16 miles N.E. of Grants, Milan. N. Mex.

CORRECTION

21905–CD–P–77 Grants Radiotelephone Service. Inc. (KKT397), Correct to Add 2123.6 Repeater at Loc. No. 4. All other particulars remain as reported on PN No. 871. dated 8/15/77.

INFORMATIVE

The following applications is a Major Action as defined by Section 1.1305 of the Commission's Rules concerning the implementation.

22001–CD–P–77 Prospect Communications (KWU365), Loc. No. 2: Rt. 31, 2.5 Miles N.E., Pulaski, Tenn., Loc. No. 1: 1000 Ft. W. of Fall River and Marable Roads Inter., Lawrenceburg, Tenn.

INFORMATIVE

A petition for Reconsideration has been filed regard to the Commission's Action Granted in Part the Application of Tel Star Communication's, Inc. (21291–CD–P–77). Action on PN No. 867–A dated July 18, 1977. The Application has been returned to Pending Status.

MAJOR AMENDMENT

21721–CD–P–(2)–77 Adirondack Mobile Telephone Co., Inc. Lake Placid, N.Y. (new), amend base frequency 152.06 and 152.18 MHz to read 454.125 and 454.350 MHz. All other particulars are to remain the same as reported on PN No. 867 dated, July 18, 1977.

POINT TO POINT MICROWAVE RADIO SERVICE

3460–CF–P–77 The Mountain States Telephone and Telegraph Co. (KY085), Misonry Rdg. 8 miles NE of Durango, Colorado (lat. 37°21'53'' N., long. 107°46'56'' W.), C.P. to add a new point of communication on frequencies 11245H, 11485H MHz toward Coal Bank, Colo. on azimuth 6 degrees.

3461–CF–P–77 Same (new), Coal Bank 9.5 miles SE of Silverton, Colo. (lat. 37°41'46'' N., long. 107°46'41'' W.), C.P. for a new station on ferquencies 10875V, 11115V MHz toward Silverton PR on azimuth 47.9 degrees, from the passive reflector to Silverton JC on azimuth 311.7 degrees and 10795V, 11035V MHz toward Misonry Rdg. on azimuth 180.6 degrees.

3462–CF–P–77 Same (new), Silverton J. C. Highway U.S. 550 and Colorado 110, Silverton, Colo. (lat. 37°48'23'' N., long. 107°40'24'' W.), C.P. for a new station on frequencies 11325H, 11565H MHz toward Silverton PR on azimuth 131.7 degrees and from passive reflector to Coal Bank on azimuth 228.0 degrees.

3467–CF–P–77 The Pacific Northwest Bell Telephone Co. (KOC65), Portland 819 SW. Oat St. Portland, Oreg. (lat. 45°31'22'' N., long. 122°40'42'' W.), C.P. to change polarization from horizontal to vertical on frequencies 3750, 3830, 3910, 3990, 4070 MHz toward Livingston.

3468–CF–P–77 Same (KOU55), Livington 6.3 miles NE of Camas, Wash. (lat. 45°40' 45'' N., long. 122°21'58'' W.), C.P. to change polarization from horizontal to vertical on frequencies 3710, 3790, 3870, 3950, 4030 MHz toward Portland.

3493–CF–P–77 Navajo Communications Co., Inc. (WPY28), Dilkon. Ariz. (lat. 35°22' 15'' N., long. 110°19'37'' W.), C.P. to increase structure height and add a new point communication on frequency 2164H MHz toward Newberry, Ariz. on azimuth 273.1 degrees.

3494–CF–P–77 Same (new), Newberry Mesa 9.75 miles NE. of Leupp, Ariz. (lat. 35°23' 40'' N., long. 110°52'56'' W.), C.P. for a new station on frequencies 2114.0V MHz toward Dilkon, Ariz. on azimuth 92.6 degrees and 2122.0H MHz toward Leupp, Ariz. on azimuth 226.4 degrees.

3495–CF–P–77 Same (new), Leupp School Leupp, Ariz. (lat. 35°17'40'' N., long. 111° 00'26'' W.), for a new station on frequency 2172. 0V MHz toward Newberry Mesa, Ariz. on azimuth 46.4 degrees.

3510–CF–P–77 American Telephone and Telegraph Co. (KPY99), 4.8 miles SW. of Athanum, Wash. (lat. 46°30'15'' N., long. 120°41'06'' W.), C.P. to change polarization from vertical to horizontal on frequency 10795 MHz toward Yakima.

3448–CF–P–77 Pacific Northwest Bell Telephone Co. (KOQ80), 8.0 miles West of Condon, Oreg. (lat. 45°14'06'' N., long. 120° 18'18'' W.), C.P. to change coordinates and add a new point of communication on frequency 2172.4V MHz toward Bald Mtn. % on azimuth 31.9 degrees and from passive reflector to fossil.

CORRECTION

3243–CF–P–77 South Central Bell Telephone Co. (KYS48), corrected states name to read Wellington, Ky. and frequency 3730H. All other particular remain as reported on PN No. 870 dated 8–8–77.

3245–CF–P–77 Same (KIV66), corrected to add replace transmitters on frequencies 11525V and 11605V MHz toward Paintsville. All other particular remain as reported on PN No. 870 dated 8–8–77.

3246–CF–P–77 Same (KJW75), corrected to read move and replace antenna on frequencies 10915V MHz toward Hagerhill and replace transmitters on 11075V and 11155V MHz toward Hagerhill.

3262–CF–P–77 General Telephone Co. of Wisconsin (WBF52), corrected latitude to read 44°57'40'' N. All other particulars remain as reported on PN No. 870 dated 8–8–77.

3385–CF–MP–77 Eastern Microwave, Inc. (KFN 21), NYC–GWB, 15 Columbus Circle, New York, N.Y. (lat. 40°46'09'' N, long. 73°58''55'' W.), modification of construction permit to change frequencies to 6271.4H MHz toward Bergenfield, N.J. and Yonkers. N.Y., via power split.

3433–CF–P–77 Mountain Microwave Corp. (KZI51), Medicine Butte, 6.0 miles North of Reliance, S. Dak. (lat. 43°57'55'' N., long. 99°36'11'' W.), construction permit to add 5945.2V MHz toward Chamberlin, S. Dak., via power split.

3434–CF–MP–77 Eastern Microwave, Inc. (KFN 21), NYC–GWB, 15 Columbus Circle, New York, N.Y. KSBR MISSION VIEJO, CALIF.

Noncommercial Educational FM Broadcast Application Ready and Available for Processing

Adopted: August 30, 1977.

Released: September 1, 1977.

Notice is hereby given, pursuant to Section 1.573(d) of the Commission's Rules, that on October 17, 1977, the noncommercial educational FM broadcast application listed below, which is being processed expeditiously since it is potentially eligible for funding in this fiscal year from the Department of Health, Education, and Welfare, will be considered as ready and available for processing. Pursuant to Section 1.227(b)(1) and Section 1.591(b) of the Commission's Rules, an application, in order to be considered with the application below or with any other application on file by the close of business on October 14, 1977, which involves a conflict necessitating a hearing with the application below must be substantially complete and tendered for filing at the offices of the Commission in Washington, D.C., by the close of business on October 14, 1977. The attention of prospective applicants is directed to the fact that some contemplated proposals may not be eligible for consideration with the application below by reason of conflicts between the application below and applications appearing in previous notices published pursuant to Section 1.573(d) of the Commission's Rules.

BPED-2545 (KSBR), Mission Viejo, Calif. Saddleback Community College District Has: 88.5 MHz; Channel No. 203D; TPO: .01 kW (Llc), Req: 88.5 MHz; Channel No. 203A, ERP: .6 kW; HAAT: 600 FT.

The attention of any party in interest desiring to file pleadings concerning any pending noncommercial educational FM broadcast application, pursuant to Section 309(d)(1) of the Communications Act of 1934, as amended, is directed to Section 1.580(i) of the Commission's Rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

RADIOTELEGRAPH OPERATOR LICENSE CERTIFICATES TO BEAR PHOTOGRAPHS

AUGUST 31, 1977.

The Federal Communications Commission announced today that all commercial Radiotelegraph Operator Certificates issued after January 1, 1978 must bear the photograph of the holder, in accordance with the requirements of a Rule adopted in 1974 by the International Telecommunications Union of which the United States is a member.

Applicants for new or renewed Radiotelegraph First, Second, and Third Class Operator Licenses will be required to furnish two passport size photographs with their applications. Approximately 2000 of these certificates are issued annually.

Action by the Commission August 31, 1977. Commissioners Lee, Quello, Washburn and White with Commissioners Wiley (Chairman), and Fogarty dissenting.

FEDERAL COMMUNICATIONS COMMISSION.
VINCENT J. MULLINS,
Secretary.

FEDERAL ENERGY ADMINISTRATION

STRATEGIC PETROLEUM RESERVE

Availability of the Draft Environmental Impact Statement for the Sulphur Mines Storage Site

Pursuant to Section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C), the Federal Energy Administration (FEA) has prepared a draft environmental impact statement (EIS) on the proposed storage of crude oil at the Sulphur Mines site.

The Sulphur Mines storage site has been proposed as an element of the Strategic Petroleum Reserve. The Reserve (mandated by Part B of Title I, Energy Policy and Conservation Act, 42 U.S.C. 6231-6246) has been created for the storage of crude oil and/or petroleum products for use in the event of a Presidential determination of a severe energy supply interruption and to meet the obligations of the United States under the International Energy Program.

Single copies of the draft Sulphur Mines EIS (DES 77-6) may be obtained from the National Energy Information Center, Room 1404, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Copies of this draft EIS will also be available for public review in the FEA Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Interested persons are invited to submit data, views and arguments with respect to this EIS to Executive Communications, Box PE, Room 3317, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on the documents submitted to FEA Executive Communications with the designation "Sulphur Mines Draft EIS (DES 77-6)." Fifteen copies should be submitted.

All comments should be received by FEA by October 21, 1977, in order to receive full consideration.

Any information or data, submitted in response to the draft Sulphur Mines EIS, considered by the person furnishing it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washingon, D.C., September 1, 1977.

ERIC J. FYGI,
Acting General Counsel, Federal Energy Administration.

[Docket No. ER77-521]

ARIZONA PUBLIC SERVICE CO.

Extension of Time

AUGUST 31, 1977.

On August 25, 1977, Arizona Public Service Co. filed a motion to extend the time for filing responses to the motion for reconsideration filed in the above-designated docket on August 17, 1977, by Maricopa County Municipal Water Conservation District No. 1 (Maricopa). The motion states that Staff Counsel and

counsel for Maricopa do not object to the requested extension.

Upon consideration, notice is hereby given that the date for filing responses to the August 17, 1977, motion for reconsideration is extended to and including September 8, 1977.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-26168 Filed 9-7-77;8:45 am]

[Docket No. ER77-535]

ARKANSAS POWER AND LIGHT CO.

Order Accepting for Filing and Suspending Proposed Rates and Establishing Procedures

On July 29, 1977, Arkansas Power and Light Co. (AP&L) submitted a proposed superseding interconnection agreement with Arkansas Electric Cooperative Corp. (AECC).[1] AP&L currently provides wheeling service to AECC under a transmission agreement (Rate Schedule FPC No. 52) and wheeling and other services under a power coordination, interchange and transmission agreement (Rate Schedule FPC No. 67). The power that is wheeled is supplied by Southwestern Power Administration. These agreements are being superseded by a single agreement in recognition of the changing nature of AECC's bulk power resources. AP&L requests an effective date of September 1, 1977.

Public notice of the filing was issued on August 9, 1977, with comments, protests or petitions to intervene due on or before August 19, 1977. No such filings have been received.

A review of AP&L's filing indicates that the proposed increase in rates and charges have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential or otherwise unlawful. Based on this review of the filing we will accept for filing the proposed increased rates and will suspend their effectiveness for one day, i.e., to September 2, 1977, at which time they will become effective subject to refund, and will require that AP&L prior to implementation of proposed annual adjustments submit complete support of its proposed rates in accordance with section 35.13 of the Commission's Regulations (18 CFR).

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Federal Power Act that the Commission enter upon a hearing concerning the lawfulness of the proposed increased rates and charges tendered by AP&L on July 29, 1977, establishing procedures for that hearing, and that the proposed increased rates and charges be accepted for filing, suspended, and the use thereof deferred, all as hereinafter ordered.

The Commission orders: (A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Federal Power Act, particularly sections 205, 206, 301, 308, and 309 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the Regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of the rates proposed by AP&L in this proceeding.

(B) Pending such hearing and decision thereon, the proposed increased rates and charges filed by AP&L on July 29, 1977 are hereby accepted for filing, suspended and the use thereof deferred until September 2, 1977, when they shall become effective, subject to refund.

(C) AP&L shall prior to implementation of proposed annual adjustments submit complete support of its proposed rates in accordance with section 35.13 of the Commission's regulations (18 CFR, Chapter I).

(D) The Staff shall prepare and serve top sheets on all parties for settlement purposes on or before January 16, 1978.

(E) A Presiding Administrative Law Judge to be determined by the Chief Administrative Law Judge for that purpose shall preside at a prehearing conference in this proceeding to be held on January 31, 1978, at 10:00 A.M. (ET) in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. Said Law Judge is authorized to establish all procedural dates and to rule upon all motions (except petitions to intervene, motions to consolidate and sever, and motions to dismiss), as provided for in the Commission's Rules of Practice and Procedure.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26177 Filed 9-7-77;8:45 am]

[Docket No. CI77-724]

C AND K PETROLEUM INC., ET AL.

Limited-Term Application

SEPTEMBER 1, 1977.

Take notice that on August 10, 1977, C&K Petroleum, Inc. et al.[1], 2500 First City National Bank Bldg., Houston, Tex. 77002, filed in Docket No. CI77-724 an application pursuant to section 7(c) of the Natural Gas Act for a limited-term certificate of public convenience and necessity, with pregranted abandonment, authorizing the sale for resale of natural gas in interstate commerce to Transcontinental Gas Pipe Line Corp. (Transco) for a limited term of three (3) years. The initial price Applicant is seeking is $2.03 per Mcf, plus adjustments. The gas to be covered by the certificate is Applicant's interest in natural gas to be produced from the Jefferson Island Field, Iberia Parish, La., and will be sold under the terms of a gas purchase contract dated July 30, 1977.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protests with reference to said application should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene n accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-561]

CONNECTICUT LIGHT AND POWER CO.

Transmission Agreement

AUGUST 26, 1977.

Take notice that on August 22, 1977, Connecticut Light and Power Co. (CL&P) tendered for filing a proposed rate schedule with respect to the Transmission Agreement dated June 29, 1977 between (1) CL&P, the Hartford Electric Light Co. (HELCO) and Western Massachusetts Electric Light (WMECO) and (2) Littleton Electric Light and Water Department (LELWD).

CL&P states that the Transmission Agreement provides for a transmission service to LELWD during the period from July 1, 1977, to October 31, 1977.

CL&P indicates that the transmission charge rate is a monthly rate equal to one-twelfth of the annual average cost of transmission service on the Northeast Utility system determined in accordance with sections 13.9 (Determination of Amount of Pool Transmission Facilities (PTF) Costs) of the New England Power Pool (NEPOOL) Agreement and the uniform rules adopted by the NEPOOL Executive Committee, multiplied by the number of kilowatts which LELWD is entitled to receive.

CL&P requests an effective date of July 1, 1977, for the Transmission Agree-

[1] Designated as: *Arkansas Power & Light Company*, Rate Schedule FPC No. 72 (Supersedes Rate Schedule FPC Nos. 52 and 67 as supplemented).

[1] The et al. parties referred to are C&K-AA, 76 Ltd.; C&K 1976 Ltd.; C&K-AC Venture; C&K-CKC 1976 Ltd.; Mr. Harding A. Orren; Mr. Solly Robins; Mr. Julius E. Davis; KHS Associates; Mr. John Lawrence; Mr. Arthur L. Owen; Vanguard Petroleum Corporation; and Mr. Jack Webre. KHS Associates has not yet signed the contract; however, they have indicated that they will sign in the near future. A fully executed copy of the contract will be filed at that time.

V 42 174 SEP 8 77 UMI

ment, and therefore, requests waiver of the Commission's notice requirements.

HELCO and WMECO have filed certificates of concurrence in this docket.

CL&P states that copies of this rate schedule have been mailed or delivered to HELCO, Hartford, Conn., WMECO, West Springfield, Mass. and LELWD, Littleton Mass.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 14, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

FRED L. CLAYTON

Application

SEPTEMBER 1, 1977.

Take notice that on August 23, 1977, Fred L. Clayton, Jr., Senior Vice President, Alabama Power Co., filed an application pursuant to section 305(b) of the Federal Power Act for authorization to hold the following positions:

Senior Vice President, Alabama Power Co., public utility.
Senior Vice President and Director, Southern Electric Generating Co., public utility.

Any person desiring to be heard or to make any protest with reference to said Application should on or before September 27, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The Application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26174 Filed 9-7-77;8:45 am]

[Docket Nos. ER77-411, ER77-412, ER77-413, ER77-414, ER77-415, and ER77-416]

ILLINOIS POWER CO.

Order Granting Intervention and Reconsideration

AUGUST 31, 1977.

On June 30, 1977, Illinois Power Co. (the Company) tendered for filing proposed increases in its demand charges short-term firm capacity and for Maintenance Power Capacity for service to the Illinois Municipalities of Highland, Mascoutah, Freaburg, Princeton, Peru, Breese, and Carlyle (Cities). The filing was initially submitted on May 31, 1977, but was found to be deficient in its omission to notify its State commission. This deficiency was corrected on June 30, 1977. This filing would increase the Company's revenues for this service by $151,148 or 16.67 percent based on the 12-month period ending April 30, 1977.

Public notice of the Company's filings was given with all protest and petitions to intervene due on or before August 1, 1977. By order issued July 26, 1977, we accepted the filing, waived the notice requirements, and suspended it for one day. The increase became effective July 2, 1977, subject to refund.

On August 1, 1977, the Cities tendered for filing a Petition for Reconsideration or Rehearing, Motion to Reject, Motion to Intervene, Complaint, and Motion to Consolidate. The Cities state that they are customers of the company and are served under the Interconnection Agreements that are the subject of these proceedings. They allege that they have a direct interest in these proceedings which cannot adequately be protected by any other party.

On August 18, 1977, the Company filed an answer to the Cities' filing. The Company states that it does not oppose consolidation, but the filing argues against Cities' Motion to Reject and answers Cities' Complaint.

In light of the complex arguments of fact and law raised by the pleadings, the Commission shall grant the Cities' petition for reconsideration. This action does not constitute a grant or denial of the issues raised in the Cities' filings on the merits in whole or in part.

The Commission finds: (1) In order to afford the Commission additional time for the consideration of the issues discussed in Illinois Power and the Cities' pleadings, it is appropriate and proper in the administration of the Federal Power Act and in the public interest to grant reconsideration of the July 26 order as provided below.

(2) Participation by the Cities in these proceedings may be in the public interest.

The Commission orders: (A) Reconsideration of the Commission's order of July 26, 1977, is hereby granted for the limited purpose of further consideration.

(B) The Cities are hereby permitted to intervene in this proceeding subject to the Rules and Regulations of the Commission; *Provided, however,* That participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in their respective petitions to intervene; and *Provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26178 Filed 9-7-77;8:45 am]

[Docket No. RP77-122]

LOCUST RIDGE GAS PROCESSING CO.

Proposed Change in Rates

SEPTEMBER 1, 1977.

That notice that on August 12, 1977, Locus Ridge Gas Processing Co. ("Locust Ridge") tendered for filing a notice of change in rates for sales to Michigan Wisconsin Pipe Line Co. ("Michigan Wisconsin"), pursuant to Locust Ridge's gas sales contract with Michigan Wisconsin, filed at Locust Ridge FPC Gas Tariff Original Volume 3. Inasmuch as the change in rate proposed by Locust Ridge is provided for by the terms of its FPC Gas Tariff Original Volume 3, no revised tariff sheets were tendered with the notice of change in rates. The proposed change would increase revenues from jurisdictional sales and services by approximately $18,000.

Locust Ridge states that the proposed change in rate is for the purpose of implementing the periodic increase in rate provided for by Locus Ridge's gas sales contract with Michigan Wisconsin. Pursuant to the terms of this contract, Locust Ridge is entitled to receive an increase of $0.025 per Mcf commencing on September 11, 1977. No other change in rates has been proposed. Locust Ridge proposes an effective date for the rate change of September 11, 1977.

Locust Ridge requests waiver of certain of the filing requirements of Section 154.63 of the Commission's regulations. Locust Ridge states that the rate increase proposed by it is akin to a rate increase by an independent producer, and, therefore, the detailed filing requirements of the Commission's regulations should not be applied to it.

Copies of the filing were served upon Michigan, Wisconsin and interested state regulatory commissions.

Any person desiring to be heard or to protest said notice should file a petition to intervene or protest with the Federal Power Commission, Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 9, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken in this proceeding. Any person wishing to become a party must file a petition to intervene. Locust Ridge's rate filing is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26180 Filed 9-7-77;8:45 am]

[Docket No. RP77-124]

McCULLOCH INTERSTATE GAS CORP.

Proposed Rate Increase

AUGUST 31, 1977.

Take notice that on August 10, 1977, McCulloch Interstate Gas Corp. (McCulloch) tendered for filing a proposed increase in rates for natural gas service rendered under its rate schedules PL-1 and X-1. McCulloch requests that the increased rates be permitted to become effective on June 1, 1977. In its letter of transmittal, McCulloch states as follows:

"McCulloch proposes to increase its presently effective PL-1 rate[1] to 127.68 cents per MMBtu (14.65 psia). This proposed change in rate is made to recover increases in the cost of service on sales of gas in the Powder River Basin, Wyo., to Colorado Interstate Gas Co. ("CIG"), due to diminishing gas reserves, and to insure a reasonable rate of return.

McCulloch proposes to increase its presently effective X-1 rate[2] to 7.67 cents per Mcf (14.65 psia). This rate represents an annual increase in revenue of approximately $43,800.00 over that amount agreed approved by the Commission's order dated April 25, 1977, in Docket No. RP 76-66. This proposed change in rate is made to recover the same increase in cost referred to hereinabove for PL-1 rates for the transporting of gas through McCulloch facilities to CIG in the Powder River Basin, and to insure a reasonable rate of return.

McCulloch previously tendered this revised filing * * * [in Docket No. RP77-61] * * * on April 29, 1977, proposing a change in rates under the said PL-1 and X-1 rate schedules and requesting that said rates be made effective June 1, 1977 (hereinafter the "original filing"). The original filing sought to increase the effective PL-1 rate charged to CIG from 128.24 cents per MMBtu to 132.66 cents per MMBtu (14.65 psia) and to increase the effective X-1 rate to 7.67 cents per Mcf (14.65 psia) from 7.0 cents per Mcf. The two proposed rate changes in the original filing would have resulted in an annual increase in revenue to McCulloch of approximately $68,600.

On May 27, 1977, the Commission issued its order in this [Docket No. RP77-61] proceeding rejecting McCulloch's original filing herein without prejudice to its right to file proposed increased rates with supporting data conforming to the Commission's regulations (Paragraph A). The Commission found that McCulloch had not fully supported the proposed sales rate of 132.66 cents per MMBtu in the original filing. It further found that * * *. "Data accompanying the filing together with the claimed surcharge in McCulloch's PGA filing dated February 14, 1977, indicate the following unit costs:

	Cents per million Btu
Transmission	30.13
Gas cost	74.92
PGA surcharge	21.63
Total supported cost	[1]126.68

[1] The 1 cent per MMBtu difference between this 126.68 cents per MMBtu rate and the 127.68 cents per MMBtu revised proposed rate filed herein, results from McCulloch's recovery of a carrying surcharge of nine percent (9%) permitted under Ordering Paragraph (D) of Opinion 770.

Compared with the proposed rate of 132.66 cents, the cost data filed and claimed falls short of justifying the proposed rate by 5.98 cents per MMBtu." The Commission further found that "* * * McCulloch shows the present cost of gas in its proposed rate [of 132.66 cents] at 102.53 cents per MMBtu, but the data submitted * * * will support an overall gas cost of only 96.55 cents per MMBtu, including the surcharge of 21.63 cents per MMBtu included in its February 14 PGA filing." Again, a difference of 5.98 cents between the cost of gas in the proposed rate and the data filed in support thereof.

While McCulloch does not agree with, ratify, or acquiesce in the validity or propriety of the principles, procedures or methodology utilized by the Commission as a basis for its order rejecting McCulloch's original filing herein, without prejudice; nevertheless, McCulloch, solely for the purposes of the revised filing herein, has complied with the direction of the Commission's May 27, 1977, order and adjusted its proposed rate increase to reflect submitted support data as discussed in said order.

Pursuant to Section 154.63 of the Commission's Regulations, McCulloch tenders herewith for filing with the Commission ten (10) copies of the following:

1. Revised tariff sheets (Eleventh Revised Sheet No. 32 and Second Revised Sheet No. 38, FPC Gas Tariff, Original Volume No. 1).

2. A Statement of Nature, Reason and Basis for the proposed change in rates.

3. Statements "A" through "M" and Statements "O" and "Q".

4. A representation by McCulloch's chief accounting officer and an opinion of an independent public accountant, as required by Section 154.63 (e)(5) and (e)(6) of the Commission's Regulations.

The schedules set forth on the foregoing statements are for the actual results of McCulloch's operations for the calendar year, 1976, and are adjusted for known and measurable changes for the following nine months, through September 30, 1977, for the test year.

Statement "P" (the prepared testimony of McCulloch's witnesses) which supported the proposed changes in rates in the original filing were forwarded for filing with the Commission herein on May 12, 1977. Said prepared testimony remains unchanged and properly supports the adjusted proposed rates in the revised filing herein.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 9, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-568]

PENNSYLVANIA POWER AND LIGHT CO.

Filing of New Contract Between Pennsylvania Power & Light Co., and the Borough of Mifflinburg Relating to a Proposed Change in Resale Service

AUGUST 31, 1977.

Take notice that on August 26, 1977, Pennsylvania Power & Light Co. ("PP&L") filed, pursuant to section 35 of the Commission's Rules and Regulations, a new contract, lower rate schedule, fuel adjustment clause material information and supporting data relating to a proposed change in the resale service to the Borough of Mifflinburg, Union County, Pa.

PP&L indicates that the purpose of this filing is to reflect a change in rate and service conditions to Mifflinburg. PP&L further indicates that currently, Mifflinburg receives resale service under PP&L's system rate for service at a supply voltage of less than 55 KV but not less than 12 KV at FPC Rate Schedule No. 55. PP&L states that Mifflinburg has determined to take service at 66 KV/138 KV. PP&L had indicated its willingness to

[1] The presently effective PL-1 rate is subject to final Commission action in Docket No. RP 75-98 and McCulloch's pending PGA filing in Docket No. RP 73-91.

[2] The presently effective X-1 rate was approved by the Commission in Docket No. RP 76-66.

V 42 174 SEP 8 77 UMI

provide service at that voltage and the new contract has been executed.

Any person desiring to be heard or to protest this filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

[Docket No. CP77-579]

SOUTHERN NATURAL GAS CO.

Application

AUGUST 31, 1977.

Take notice that on August 22, 1977, Southern Natural Gas Co. (Applicant), P.O. Box 2563, Birmingham, Ala. 35202, filed in Docket No. CP77-579 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas in interstate commerce for Austell Natural Gas System (Austell) of Austell, Ga., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport natural gas on a best efforts basis for Austell to Chattanooga Gas Co. (Chattanooga) in Tennessee to implement an arrangement between Austell and Chattanooga whereby Chattanooga will liquefy natural gas for Austell. The LNG whould then be transported by an appropriate carrier back to Austell for storage. Applicant says that Austell and Chattanooga have executed an agreement with Applicant dated August 9, 1977, which provides that during the summer season Applicant will transport, using existing facilities, up to 750 Mcf of gas per day for liquefaction by Chattanooga for the account of Austell.

Applicant says that the gas to be transported pursuant to the authority requested in the instant application is part of the gas allocated to Austell pursuant to Applicant's approved curtailment plan. Applicant also says that approval of its application will not result in any new or additional sales of natural gas in interstate commerce.

Applicant notes that the agreement of August 9, 1977, will end on October 31, 1979. This can be extended by consent of the parties, however, and Applicant therefore requests a certificate that is unlimited in time so that the agreement can be expeditiously extended.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 22, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-585]

TEXAS EASTERN TRANSMISSION CORP.; CONSOLIDATED GAS SUPPLY CORP.

Application

SEPTEMBER 1, 1977.

Take notice that on August 24, 1977, Texas Eastern Transmission Corp. (Texas Eastern), Post Office Box 2521, Houston, Tex. 77001, and Consolidated Gas Supply Corp. (Consolidated), 445 West Main St., Clarksburg, W. Va. 26301 (hereinafter referred to jointly as Applicants), filed in Docket No. CP77-585 a joint application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and delivery of up to 15,000 dekatherms (dths) equivalent of natural gas per day for the account of UGI Corp. (UGI) all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants state that UGI and Amoco Production Co. have developed certain gas supplies of approximately 15,000 dths per day in Somerset County, Pa., and that in order to receive this gas supply into its system, UGI proposes to construct a pipeline to transport and deliver the gas to Peoples Natural Gas Co. (Peoples), an intrastate company, which in turn would reduce its receipts from its supplier, Consolidated, by an equivalent amount. Applicants assert that the gas delivered by UGI to Peoples would be utilized by Peoples wholly within the Commonwealth of Pennsylvania. Applicants state further that Consolidated would then reduce its receipts from Texas Eastern at Rockwood, Somerset County, Pa., for the account of UGI, and that Texas Eastern would in turn transport and deliver the stated quantities to Columbia Gas Transmission Corp. at an existing point of interconnection in Dauphin County, Pa., for redelivery to UGI.

Applicants state that in accordance with an agreement between Consolidated and UGI dated July 18, 1977, Consolidated would not charge UGI for the proposed service and that Texas Eastern would provide the transportation service to UGI pursuant to the terms of its Rate Schedule TS-2. Applicants indicate that under the terms of Rate Schedule TS-2, Texas Eastern would transport and deliver the stated quantities on an interruptible, best efforts basis, and would charge an amount equal to Texas Eastern's rate for deliveries in the particular zone at which the proposed delivery would be made, based on the 100 percent daily contract quantity load factor level rate, less Texas Eastern's purchased gas and fuel costs.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 23, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required,

further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26175 Filed 9-7-77;8:45 am]

[Docket No. CP76-185]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Petition to Amend

AUGUST 31, 1977.

Take notice that on August 19, 1977, Transcontinental Gas Pipe Line Corp. (Petitioner), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP76-185 a petition to amend the Commission's order issued February 6, 1976, in this docket pursuant to section 7(c) of the Natural Gas Act so as to authorize the transportation and delivery of natural gas from a new source for Lithium Corp. of America (LCA), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

By order issued February 6, 1976, in this proceeding, Petitioner is authorized to transport on an interruptible basis up to 1,500 Mcf of natural gas per day for LCA for use in LCA's plant at Bessemer City, N.C. It is stated that the gas transported pursuant to this authority is purchased by LCA from Glenda Petroleum Corp. (Glenda) in the Monroe Field, Ouachita, Union, and Morehouse Parishes, La., and delivered to United Gas Pipe Line Co. (United) in Union Parish for transportation and delivery to Petitioner, for LCA's account, at existing authorized exchange points.

It is stated that declining deliverability of the Glenda production has forced LCA to acquire a supplemental gas supply of up to 500 Mcf per day from certain wells owned by Weiser-Brown Oil Company, et al. (Weiser-Brown), in Winn Parish, La. Petitioner requests authority to transport and deliver the Weiser-Brown gas for LCA and states that it would receive the gas from United, for LCA's account, at existing authorized exchange points for transportation and delivery to Public Service Co. of North Carolina, Inc., for redelivery to LCA at the Bessemer City plant.

Petitioner states that no increase in the maximum authorized transportation volume of 1,500 Mcf per day is proposed, and that no additional facilities would be required to transport the Weiser-Brown gas. It is asserted that the proposed transportation would continue for the balance of the two-year term authorized by the February 6, 1976, order.

Petitioner states that it is currently charging LCA 29.8 cents per dekatherm of gas transported and delivered and is retaining 3.8 percent of the quantities received for compressor fuel and line loss.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 21, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26172 Filed 9-7-77;8:45 am]

[Docket No. CP76-496]

WESTERN TRANSMISSION CORP.

Application

AUGUST 31, 1977.

Take notice that on August 22, 1977, Western Transmission Corp. (Applicant), 2700 Fidelity Union Tower, Dallas, Tex. 75201, filed in Docket No. CP76-496 an application pursuant to section 7(c) of the Natural Gas Act and section 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the construction, during the twelve-month period commencing with the issue date of the requested budget-type certificate, and operation of facilities to enable Applicant to take into its certificated interstate pipeline system natural gas which would be purchased from producers and oher similar sellers hereof, or, in the alternative, to amend its present budget-type authority issued in said Docket on December 15, 1976, all as more fully set forth in the application on file with the Commission and open to public inspection.

By order issued December 15, 1976, in this docket, Applicant was granted budget-type authority to construct and operate gas-purchase facilities of $150,000 total cost and $37,500 cost per project. Applicant states that the total amount presently authorized is insufficient to enable it to connect to its pipeline system supplies of natural gas which are or may become available from various producers in the general area of its pipeline system and requests that the certificate issued by order of December 15, 1976, be amended to authorize total budget expenditures of $500,000, or in the alternative, that it be issued a new budget-type certificate authorizing total expenditures of up to $500,000.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in connecting to its pipeline system supplies of natural gas which are or may become available from various producing areas generally co-extensive with its pipeline system or the systems of other pipeline companies which may be authorized to transport gas for the account of or exchange gas with Applicant.

Applicant states that it anticipates higher than average construction costs due to the remoteness of the area served by its pipeline and the adverse weather conditions in the area. Due to the high costs anticipated in the construction of its gas-purchase facilities, Applicant asserts that its present budget authority, which is limited to a total of $150,000 and $37,500 for a single project, would be inadequate to construct the facilities necessary to connect its system to the facilities of others, but that a total authorization of $500,000 and $125,000 for a single project would be adequate. Applicant states further that $500,000 is in excess of two percent of its plant account, and accordingly requests that the Commission waive the cost limitations of section 157.7(b) (1) of the Regulations under the Natural Gas Act to permit total expenditures of up to $500,000 and expenditures of up to $125,000 for any single project.

Applicant states that the total cost of the proposed facilities would not exceed $500,000, and that the cost of any single project would not exceed $125,000. The application indicates that the proposed capital expenditures would be made from cash on hand, from cash generated from normal internal sources, and from short-term bank loans.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 23, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if not petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to interevene is timely filed, or if the Commission on its own motion believes that a formal hearing is

V 42 174 SEP 8 77 UMI

required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

Board of Governors of the Federal Reserve System, August 26, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-26089 Filed 9-7-77;8:45 am]

AMERIBANC, INC., ST. JOSEPH, MO.

Order Approving Acquisition of Bank

Ameribanc, Inc., St. Joseph, Mo. ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 80 percent or more of the voting shares of Morgan County Bank, Versailles, Mo. ("Bank").

The application has been processed by the Federal Reserve Bank of Kansas City, pursuant to authority delegated by the Board of Governors of the Federal Reserve System under the provisions of section 265.2(f)(24) of the Rules Regarding Delegation of Authority.

Notice of the application affording an opportunity for interested persons to submit comments and views has been given in accordance with section 3(b) of the Act (42 FEDERAL REGISTER 35699 (1977)). The time for filing comments and views has expired, and the Reserve Bank has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act.

Applicant, the ninth largest banking institution in Missouri, controls 14 banks with aggregate deposits of $313.4 million,[1] representing 1.65 percent of the total deposits in commercial banks in the State. Acquisition of Bank, ranked 348th in the State, would increase Applicant's share of deposits to 1.71 percent, and would result in no significant increase in concentration of banking resources in Missouri.

Consummation of the proposed acquisition would neither eliminate any significant existing competition nor foreclose the development of future competition between any of Applicant's subsidiary banks and Bank. Bank ($11.41 million in deposits) is the second largest of three banks in the relevant banking market, defined as Morgan County, and controls 32.78 percent of deposits herein. None of Applicant's subsidiary banks are located in the relevant market. Applicant's nearest subsidiary bank is First State Bank in Rolla, Mo., which is approximately 85 road miles from Versailles. It has been determined that no significant competition would be eliminated as a result of the proposed acquisition. Current population per banking office ratios suggest that *de novo* entry is unlikely. Overall, competitive considerations are consistent with approval.

The financial and managerial resources and future prospects of Applicant, its subsidiaries and Bank are regarded as satisfactory and consistent with approval.

Affiliation with Applicant should enable Bank to offer expanded services, especially in the areas of lending. These factors, as they relate to the convenience and needs of the community to be served, are consistent with approval of this application. It is the Reserve Bank's judgement that consummation of the proposed acquisition is in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order, or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City, pursuant to delegated authority.

WILBUR T. BILLINGTON,
Senior Vice President.

AUGUST 26, 1977.

[FR Doc.77-26090 Filed 9-7-77;8:45 am]

[1] Unless otherwise indicated, all banking data are as of December 31, 1976, and have been adjusted to reflect all acquisitions to date.

AMERICAN STATE BANCSHARES, INC.

Order Approving Formation of Bank Holding Company

American State Bancshares, Inc., Osawatomie, Kans., has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company by acquiring 80 percent or more of the voting shares of The American State Bank, Osawatomie, Kans. ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, a nonoperating corporation with no subsidiaries, was organized for the purpose of becoming a bank holding company by acquiring Bank (deposits of $4.6 million).[1] Upon acquisition of Bank, Applicant will control the 447th largest bank in Kansas, with approximately 0.05 percent of total deposits of commercial banks in the State.

Bank is the smallest of six banks competing in Miami County, Kans., the relevant banking market, holding approximately 5.3 percent of the total deposits in commercial banks therein. Since the instant proposal is essentially a corporate reorganization, and since Applicant and Applicant's principals do not control any other banks, consummation of the proposal would neither eliminate existing or potential competition nor increase the concentration of banking resources in any relevant area. Thus, the Board concludes that the competitive effects of the proposal are consistent with approval of the application.

Although Applicant will incur debt in connection with the proposal, the projected income from Bank should provide sufficient revenue to service the debt without impairing the financial condition of Bank. Therefore, the financial resources of Applicant and Bank are satisfactory and consistent with approval. Both the managerial resources and the future prospects of Applicant and Bank are considered satisfactory and consistent with approval.

Although consummation of the proposal would have no immediate effect on services offered by Bank, considerations relating to the convenience and needs of the community to be served are also consistent with approval.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[2] effective August 31, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

CHARTER TECHNY BANCORPORATION, INC.

Formation of Bank Holding Company

Charter Techny Bancorporation, Inc., Northfield, Ill., has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares of Charter Bank of Techny, Northbrook, Ill., a proposed new bank. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 26, 1977.

Board of Governors of the Federal Reserve System, August 29, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

CONSUMER ADVISORY COUNCIL

Notice of Meeting

Notice is hereby given that the Consumer Advisory Council will meet on Thursday, September 15, 1977. The meeting, which will be open to public observation, will take place in Terrace Room E of the Martin Building beginning at 9:30 a.m. and concluding at approximately 4 p.m. The Martin Building is located on C Street NW., between 20th and 21st Streets in Washington, D.C.

The Council's function is to advise the Board on the exercise of the Board's responsibilities with regard to consumer credit legislation and regulation. It is anticipated that the September 15 meeting of the Council will include consideration of the following topics:

1. *Regulatory and legislative actions since June 2 meeting.* Brief summaries by staff, followed by opportunity for comment by members of Council, of policy decisions made by the Board of Governors since the last meeting of the Council on changes in Regulation Z and B and significant official interpretations, on Board recommendations to Congress for changes in legislation, and any relevant actions taken by congressional committees or subcommittees since June 2.

2. *Open discussion.* Any topics initiated by Council members.

3. *Compliance guidelines for banking institutions.* Report from staff, followed by Council discussion, of proposals jointly prepared by staffs of the Federal Reserve Board, Comptroller of the Currency, Federal Home Loan Bank Board, and Federal Deposit Insurance Corporation to unify compliance policies for violations of consumer credit laws by banking institutions, including provisions for restitution to consumers of overcharges resulting from violation of disclosure requirements.

4. *Residential area discrimination.* Discussion of pending legislation on which the Board's views have been requested prohibiting the use of residential location ("redlining by zip code") or of occupation or title in credit scoring systems or as criteria for refusal of credit.

Information with regard to this meeting may be obtained from Mr. Joseph R. Coyne, Assistant to the Board, at 202-452-3204.

Board of Governors of the Federal Reserve System, September 1, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

COMMERCIAL NATIONAL CORP.

Formation of Bank Holding Company

Commercial National Corp., Brady, Tex., has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company by acquiring 81 percent or more of the voting shares of Commercial National Bank of Brady, Brady, Tex. The

V 42 174 SEP 8 77 UMI

factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 27, 1977.

Board of Governors of the Federal Reserve System, August 31, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

[FR Doc.77-26093 Filed 9-7-77;8:45 am]

DAVENPORT BANK AND TRUST CO.

Order Approving Acquisition of Assets

Davenport Bank and Trust Co., Davenport, Iowa, a State member bank of the Federal Reserve System, has applied, pursuant to the Bank Merger Act (12 U.S.C. 1828(c)), for the Board's prior approval to acquire certain assets and assume certain liabilities of Donahue Savings Bank, Donahue, Iowa ($5 million in deposits[1]), and, as an incident thereto, to operate the present office of Donahue Savings Bank as a branch office.

Published notice of the proposed acquisition of assets and assumption of liabilities and requests for reports on the competitive factors involved therein have been dispensed with as authorized by the Bank Merger Act.

The Board has considered all relevant material contained in the record in the light of the factors set forth in the Act, including the effect of the proposal on competition, the financial and managerial resources and prospects of the banks involved, and the convenience and needs of the communities to be served and finds that:

On the basis of the information before the Board, it is apparent that an emergency situation exists so as to require that the Board act immediately pursuant to the provisions of the Bank Merger Act in order to safeguard depositors of Donahue Savings Bank.

Such anticompetitive effects as may be attributable to consummation of the transaction are clearly outweighed in the public interest by considerations relating to and involved in the emergency situation found to exist. From the record in the case, it is the Board's judgment that any disposition of the application other than approval would be inconsistent with the best interests of the depositors of Donahue Savings Bank, and the Board concludes that the proposed transaction should be approved on a basis that would not delay consummation of the proposal.

It is hereby ordered, on the basis of the record, that the application be and hereby is approved and that the acquisition of assets and assumption of liabilities and the establishment of a branch office may be consummated immediately but in no event later than three months after the date of this Order unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors,[2] effective August 29, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc. 77-26094 Filed 9-7-77; 8:45 am]

[1] Deposit data are as of December 31, 1976.

FIRST CITY BANCORPORATION OF TEXAS, INC.

Order Approving Acquisition of Bank

First City Bancorporation of Texas, Inc., Houston, Tex. ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire 100 percent (less directors' qualifying shares) of the voting shares of the successor by merger to The City National Bank of Bryan, Bryan, Tex. ("Bank"). The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the largest banking organization in Texas, controls 28 banks with aggregate deposits of $4.14 billion, representing 7.81 percent of total deposits in commercial banks in the State.[1] Acquisition of Bank, which holds deposits of $54.8 million, would increase Applicant's share of total deposits in commercial banks in the State by 0.1 percent.

Bank is the second largest of six banks in the relevant geographic market.[2] Its $54.8 million in deposits represent 25.1 percent of market deposits. The largest bank in the market holds 27 percent of the market deposits. The third, fourth, and fifth largest banks in the market hold, respectively, 19.6 percent, 14.1 percent, and 13.2 percent of market deposits. The smallest bank in the market, organized in 1976, controls just under 1 percent of market deposits. It appears that none of the banks in the market is currently held by a bank holding company.

Applicant's nearest subsidiary is located 80 miles south of Bank in Wallis, Tex. Several subsidiaries of Applicant derive only marginal amounts of business from the relevant market and none derives any substantial amounts. Thus, and in view of the local nature of banking markets, consummation of Applicant's proposal would not have any significant adverse effects on existing competition within the relevant market.

Although the market's ratio of population to banking offices is 1.4 times the State average, per capita deposits in the market are only 67 percent of the State average. The market has experienced considerable population growth since 1970. The market, on balance, appears slightly attractive for de novo entry. Although Applicant may be considered a potential entrant into this market, it should be noted that no other bank holding companies are represented in the Bryan market. Thus, the loss of Applicant as a potential entrant is not considered significant in view of the relatively large number of remaining bank holding companies that are potential entrants into the market. Bank holds approximately $12 million more in market deposits (5.5 percent of market deposits) than the third largest bank and approximately $4 million less (about 2 percent) than the largest bank in the market. The similarity in size of the five largest of the six banks in the market suggests the absence of alternative foothold means of entry into the market since it does not appear that the smallest bank in the market is available for acquisition. For the foregoing reasons, approval of this application will have only a slightly adverse effect, if any, on potential competition.

The financial and managerial resources of Applicant and its subsidiaries and of Bank are considered generally satisfactory and the future prospects of all appear favorable. Thus, the Board believes that the banking factors involved in the proposal are consistent with approval.

Information contained in the record indicates that most of the banking needs of the area are currently being met. However, the growth in the area has created demands for new services not currently available within the market. Applicant through Bank has the capability of providing these services. Bank has maintained a quite conservative loan to deposit ratio; Applicant intends to infuse capital into Bank to increase commercial and consumer lending. It plans within two years of acquisition to provide credit related insurance through Applicant's subsidiary, First City Life Insurance Co., at rates less than those currently charged by an affiliate of Bank. Applicant also intends to expand mortgage lending services. In light of these factors the Board regards considerations

[1] Deposit data are as of December 31, 1976.

[2] Voting for this action: Vice Chairman Gardner and Governors Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governors Wallich and Coldwell.

[1] All banking data are as of December 31, 1976 and reflect bank holding company formations and acquisitions approved through June 30, 1977.

[2] The relevant geographic market is approximated by the Bryan-College Station Standard Metropolitan Statistical Area which encompassea all of Brazos County. The January 1, 1977 population estimated for the market was 76,700 persons, an increase of 32.2 percent over 1970. The recent expansion of Texas A&M University, located at College Station, contributed significantly to this increase. Texas population growth Statewide was estimated at 12 percent for the same period.

of the convenience and needs of the community to be served as lending weight in favor of approval of the application.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors,[1] effective September 1, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

[FR Doc.77-26095 Filed 9-7-77;8:45 am]

HUNTINGTON BANCSHARES INC.

Order Approving Acquisition of Bank

Huntington Bancshares Inc., Columbus, Ohio ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire 100 percent of the voting shares (less directors' qualifying shares) of the successor by merger to Bellefontaine National Bank, Bellefontaine, Ohio ("Bank"). The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those of the Department of Justice, in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the seventh largest banking organization in Ohio, controls twelve banking subsidiaries with aggregate deposits of approximately $1.4 billion, representing 4.1 percent of total commercial bank deposits in Ohio.[1] Acquisition of Bank ($29.9 million in deposits) would increase Applicant's share of Statewide commercial bank deposits by only 0.2 percent and would have no appreciable effect upon the concentration of banking resources in Ohio.

Bank is the largest of seven banking organizations located in the Logan County banking market,[2] and controls approximately 35.6 percent of the total deposits in commercial banks in the market. Applicant's closest subsidiary bank, Huntington First National Bank of Kenton, ("Kenton Bank"), is located in the separate Hardin County banking market, which adjoins Logan County to the north. Bank operates four offices, the closest of which is located in Belle Center and is 13.3 miles from the nearest Kenton Bank office and in a different banking market. In light of all the evidence of record, including the fact that Bank and Kenton Bank are located in separate banking markets, it appears that no meaningful amount of existing competition would be eliminated. Furthermore, acquisition of Bank would not have any significant adverse effects upon potential competition, since it is unlikely Applicant would enter the Logan County banking market de novo, and after consummation of this proposal four independent banks would remain as entry vehicles for outside bank holding companies. Accordingly, on the basis of the above and other facts of record, it is concluded that consummation of the proposed transaction would not have any significant adverse competitive effects.

In arriving at this conclusion, the Board has also considered the comments by the Department of Justice that consummation would have adverse competitive effects. While consummation of the proposal may have some slight adverse effects on potential competition, in light of the Board's findings described above, it does not appear that such effects would be significant, and, balanced against the convenience and needs considerations discussed below, the Board is of the view that denial of the subject application is not warranted.

Considerations relating to the financial and managerial resources and future prospects of Bank and Applicant and its subsidiaries are regarded as satisfactory. Managerial succession at Bank will be furnished by Applicant, therefore, banking factors are consistent with approval.

Applicant has indicated that affiliation will enable Bank to increase services currently offered to its customers, including business checking accounts, expanded checking services to include Applicant's "All-in-One Account", bank credit card services, data processing services, and specialized commercial loan services and overdraft protection. Considerations relating to the convenience and needs of the community to be served lend some weight toward approval of the application and outweigh any slightly adverse competitive effects that approval may have. Accordingly, it has been determined that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, and for the reasons summarized above, the application is approved. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Cleveland pursuant to delegated authority.

By order of the Board of Governors,[1] effective August 31, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

[FR Doc.77-26096 Filed 9-7-77;8:45 a.m.]

MARYVILLE BANCSHARES, INC.

Order Approving Formation of Bank Holding Company

Maryville Bancshares, Inc., Kansas City, Mo., has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through acquisition of 94 percent or more of the voting shares of Citizens State Bank of Maryville, Maryville, Mo. ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those of the Office of the Missouri Commissioner of Finance, in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, a nonoperating corporation with no subsidiaries, was organized for the purpose of becoming a bank holding company through the acquisition of Bank. Bank, with deposits of $37.5 million,[1] is the second largest of six banks and controls approximately 32.5 percent of the total deposits in commercial banks in the relevant banking market.[2] Upon acquisition of Bank, Applicant would control the 92nd largest of 702 banking organizations in Missouri, holding 0.2 percent of the total deposits in commercial banks in the State. One of Applicant's principals is associated with four other Missouri banks, none of which is in the relevant banking market. Consummation of the proposal would not eliminate existing or potential competition nor would it increase the concentration of banking resources in the relevant market. Therefore, competitive considerations are consistent with approval of the application.

The financial resoures of Applicant, which are dependent upon those of Bank, and the managerial resources of Ap-

[1] Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Jackson, Partee and Lilly. Absent and not voting: Chairman Burns.

[1] All banking data are as of December 31, 1976, and reflect bank holding company formations and acquisitions approved as of June 30, 1977.

[2] The relevant geographic market for purposes of analyzing the competitive effects of the proposed transaction is approximated by Logan County, Ohio.

[1] Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Jackson, Partee and Lilly. Absent and not voting: Chairman Burns.

[1] Unless otherwise indicated, all banking data are as of December 31, 1976.

V 42 174
SEP 8 77
UMI

plicant are considered to be satisfactory, and their future prospects appear favorable. Although Applicant will incur some debt as a result of this proposal, it appears that income and dividends from Bank, as well as savings resulting from the filing of consolidated tax returns, should provide Applicant with sufficient revenues to meet its debt service requirements without adversely affecting the financial condition of Bank. The financial and managerial resources of the banks with which one of Applicant's principals is associated are regarded as consistent with approval of this application. Accordingly, considerations relating to banking factors are consistent with approval of the application. While no major changes are contemplated in Bank's services, considerations relating to the convenience and needs of the community to be served are consistent with approval of the application. Accordingly, it is the Board's judgment that consummation of the proposed transaction would be consistent with the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[3] effective August 30, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

[FR Doc.77-26097 Filed 9-7-77;8:45 am]

NATIONAL CITY CORP.

Acquisition of Bank

National City Corp., Cleveland, Ohio, has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire 100 percent (less directors' qualifying shares) of the voting shares of the successor by merger to The First National Bank, Dayton, Ohio. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Cleveland. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than September 29, 1977.

[3] Voting for this action: Vice Chairman Gardner and Governors Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governors Wallich and Coldwell.

Board of Governors of the Federal Reserve System, September 1, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

NORTHWEST BANCORPORATION

Order Granting Reconsideration

Northwest Bancorporation, Minneapolis, Minn. ("Northwest"), has requested reconsideration of the Order of May 2, 1977 (63 Fed. Res. Bull. 585 (1977)), whereby the Board of Governors denied the application of Northwest for prior approval of the acquisition of First National Bank, Fort Dodge, Iowa, pursuant to section 3(a)(3) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. § 1842(a)(3)).

The request for reconsideration is filed pursuant to section 262.3(g)(5) of the Board's Rules of Procedure (12 CFR § 262.3(g)(5)), which provides that the Board will not grant any request for reconsideration "unless the request presents relevant facts that, for good cause shown, were not previously presented to the Board, or unless it otherwise appears to the Board that reconsideration would be appropriate." The Board finds that the request for reconsideration presents relevant facts and issues which appear appropriate in the public interest for the Board to consider. Accordingly, the request for reconsideration is hereby approved.

In order to facilitate such consideration, comments regarding the proposed acquisition may be filed with the Board not later than September 23, 1977. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The application, as supplemented by Northwest's request for reconsideration, may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis.

By order of the Board of Governors,[1] effective August 29, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary to the Board.

[FR Doc.77-26099 Filed 9-7-77;8:45 am]

OTTAWA BANCSHARES, INC.

Order Approving Formation of Bank Holding Company and Performance of Insurance Agency Activities

Ottawa Bancshares, Inc., Ottawa, Kans., has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company by acquiring 100 percent (less directors' qualifying shares) of the voting shares of The Kansas State Bank, Ottawa, Kans. ("Bank"). The factors that are considered in acting on this application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)). Applicant has also applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire the assets of Credit Life Insurance Agency, Ottawa, Kans. ("Agency") and thereby to engage in the sale of insurance directly related to extensions of credit by Bank. Such activities have been determined by the Board to be closely related to banking (12 CFR § 225.4(a)(9)(ii)(a)).

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with §§ 3 and 4 of the Act (42 FR 31839 (1977)). The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)), and the considerations specified in § 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)).

Bank, with deposits of $6.1 million,[1] is the fourth largest of six banks in the relevant market[2] and controls approximately 10.3 percent of total deposits in commercial banks in the market. Upon acquisition of Bank, Applicant would control the 388th largest banking organization in Kansas, holding approximately 0.1 percent of the total deposits in commercial banks in the State.

Principals of Applicant, through various trusts, control The First National Bank of Louisburg, Louisburg, Kans., and Parsons Commercial Bank, Parsons, Kans. Applicant's president is president and director of Louisburg Bank and vice chairman of the board of directors of Parsons Bank. These banks are located considerable distances from Bank and operate in different banking markets. Accordingly, consummation of the proposal would neither eliminate existing or potential competition nor increase the concentration of banking resources in the relevant market. Accordingly, on the basis of the facts of record, the Board concludes that competitive considerations are consistent with approval of the bank holding company formation application.

The financial resources of Applicant, which are dependent upon Bank, are considered to be satisfactory and future prospects appear favorable. Although Applicant will incur debt in connection with the subject proposal, it appears that Applicant will be able to meet its debt service requirements without adversely affecting the financial position of Bank. Furthermore, managerial resources of

[1] Voting for this action: Vice Chairman Gardner and Governors Wallich, Jackson and Partee. Present and Abstaining: Governor Lilly. Absent and not voting: Chairman Burns and Governor Coldwell.

[1] All banking data are as of December 31, 1976.

[2] The relevant market is approximated by Franklin County.

Applicant and Bank are considered to be satisfactory. Thus, considerations relating to banking factors are consistent with approval. In addition to maintaining Bank's current services, Applicant intends to increase Bank's lending activity resulting in an increase in the availability of credit in the community. Applicant also plans to have Bank construct a detached facility which would provide greater convenience to customers of Bank. Thus, considerations relating to convenience and needs lend weight toward approval of the bank holding company formation application. Accordingly, it is the Board's judgment that Applicant's proposal to form a bank holding company would be consistent with the public interest and that the application should be approved.

In connection with the application to become a bank holding company, Applicant has also applied, pursuant to § 225.4(a)(9) of Regulation Y, to acquire the assets of Credit Life Insurance Agency, Ottawa, Kans., and thereby to engage in the sale of the following types of insurance: decreasing term single life insurance; decreasing term joint life insurance and disability insurance on installment loans; level term single life insurance on single payment loans; and insurance to protect collateral securing extensions of credit by Bank. Applicant's acquisition of Agency would maintain an existing relationship between Agency and Bank and, accordingly, it does not appear that approval of Applicant's proposal would have any significant effect on existing or potential competition. Approval of the application would, however, assure customers of Bank of a convenient source of such insurance services. Furthermore, there is no evidence in the record indicating that consummation of the proposal would result in any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects on the public interest.

Based upon the foregoing and other considerations reflected in the record, the Board has determined, in accordance with the provisions of section 4(c)(8) of the Act, that consummation of this proposal can reasonably be expected to produce benefits to the public that outweigh possible adverse effects and that the application to engage in credit-related insurance agency activities should be approved.

Accordingly, the applications are approved for the reasons summarized above. The acquisition of Bank shall not made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City pursuant to delegated authority. The approval of Applicant's insurance activities is subject to the conditions set forth in section 225.4(c) of Regulation Y and to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,[3] effective August 25, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-26100 Filed 9-7-77;8:45 am]

SOUTHERN BANK HOLDING CO.

Order Approving Formation of Bank Holding Company

Southern Bank Holding Co., Savannah, Ga. ("Applicant"), has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) ("Act") of the formation of a bank holding company through acquisition of 54.7 percent or more of the voting shares of Southern Bank and Trust Co., Savannah, Ga. ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant is a nonoperating corporation organized for the purpose of becoming a bank holding company by acquiring Bank, which holds deposits of $3.9 million.[1] Upon acquisition of Bank, Applicant would control one of the smaller commercial banking organizations in the State of Georgia, holding approximately 0.03 percent of total deposits in commercial banks in that State.

Bank is the 10th largest commercial banking organization in the relevant banking market and holds approximately 0.78 percent of the total commercial bank deposits in the market.[2] Since Applicant has no subsidiaries and Applicant's principals do not control any other banks, it appears unlikely that consummation of the proposal would have any adverse effect upon existing or potential competition or increase the concentration of banking resources in any relevant area.[3]

[3] Voting for this action: Vice Chairman Gardner and Governors Wallich, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Coldwell.

[1] All banking data are as of December 31, 1976.

[2] The relevant banking market is approximated by all of Chatham and Effingham Counties, Ga., and those portions of Liberty and Bryan Counties, Ga., east of Fort Stewart.

[3] Applicant's principals do control several nonbanking corporations. However, none of these corporations is engaged to any significant extent in the provision of any of the services provided by Bank. Thus, the Board concludes that the competitive effects of the proposal are consistent with approval of the application.

The financial resources and future prospects of Applicant and Bank are generally satisfactory. Since the proposed transaction will be accomplished through an exchange of stock, there is no acquisition debt associated with the proposal.

Bank was originally chartered as a building and loan association by the State of Georgia with the name Southern Savings and Loan Co. ("Southern Savings"). Approximately 40 percent of that institution's outstanding voting shares were owned directly and indirectly by Atlantic Insurance and Investment Co., Savannah, Ga. ("Atlantic"). Atlantic's principal officers are also principal officers of Applicant and Atlantic's five largest stockholders will become Applicant's principal owners as a result of the proposed transaction.[4]

In May of 1975 Southern Savings was granted a commercial banking charter by the State and its name was changed to that of Bank. The conversion of South Southern Savings' charter may have caused Atlantic to become a bank holding company without the Board's prior approval in contravention of section 3(a)(1) of the Act. However, in a recently filed request for a "prior certification" under the Bank Holding Company Tax Act of 1976 (26 U.S.C. § 1101 et seq.), Atlantic contends that Southern Savings was a "bank" within the meaning of section 2(c) of the Act since at least as early as July 7, 1970. The Board does not decide this issue at this time, but rather reserves it for consideration in the context of Atlantic's tax certification request. In considering Applicant's managerial resources, the Board does note, however, that even Atlantic's view of the law and the facts would compel the conclusion that Atlantic has violated the Act in that it would have become a bank holding company upon the enactment of the 1970 amendments to the Act and thereafter have failed to register as a bank holding company as required by section 5(a) of the Act. Accordingly, the Board concludes that Atlantic has violated the Act without reaching the issue of whether section 3(a)(1) or section 5(a) of the Act has been violated.

It is the Board's view, however, on the basis of the facts and circumstances of the subject application, that Atlantic's violation of the Act was inadvertent. Additionally, the Board notes that Atlantic, upon becoming aware of the existence of the violation, took steps to conform its operations to the Act by agreeing to terminate its direct and indirect ownership of Bank's shares. The

[4] Atlantic's direct and indirect interest in Bank will be transferred to Atlantic's shareholders as part of the proposed transaction. Atlantic's shareholders will then exchange those and other shares of Bank for Applicant's shares. The Board's approval of the instant application does not represent a determination that the proposed transaction will terminate Atlantic's control of Bank.

V 42 174 SEP 8 77 UMI

officers of Atlantic and Applicant have taken steps to prevent further violations from occurring by establishing procedures for centralized internal review of all of Applicant's and Atlantic's activities for compliance with the substantive and procedural requirements of the Act and the Board's Regulation Y. The Board expects that these actions will assist Applicant and Atlantic in avoiding a recurrence of similar violations. In consideration of the above and other information in the record of this application, the Board has determined that the circumstances of the above violations do not warrant denial of the application.

Considerations relating to the convenience and needs of the community to be served are consistent with approval. It is the Board's judgment that consummation of the proposed transaction would be consistent with the public interest and the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,[1] effective August 31, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

[FR Doc.77-26101 Filed 9-7-77;8:45 am]

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on August 31, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FEA request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before September 26, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

FEDERAL ENERGY ADMINISTRATION

The FEA requests clearance of the new form FEA-P135-M-O, Monthly Statement of Accounts. The Office of Oil Imports, FEA, which administers the Mandatory Oil Import Program pursuant to Presidential Proclamation 3279, as amended, has developed a fully computerized accounting system which will track accounts receivable and payments as received as a result of the importation of petroleum products. This computerized system will utilize the form FEA-P135-M-O, Monthly Statement of Accounts. This form will replace two currently active forms FEA-P114-M-O, Monthly Remittance Advice, and the FEA-P116-S-O, Request for Refund of Oil Import Fees. The FEA-P116-S-O will become an optional form to be filed at the discretion of the respondents.

The mandatory monthly form FEA-P135-M-O has been designed to be filed by any importers of crude oil, unfinished oils and finished petroleum products. Two copies of this form will be mailed monthly to importing firms for which FEA records show fees to be due. One copy will be for the firm's records and the second copy will be a "turnaround" document to be used by the importer to indicate to FEA how cash payments and credits shall be applied against the importer's fees due account.

The form FEA-P135-M-O will be mailed to all firms which actually imported crude oil, unfinished oils and finished petroleum products during the current monthly reporting period. The firms which actually import oil are required to submit a form FEA-P135-M-O for those imports made during the reporting period, and which have not been billed by FEA. The FEA estimates that approximately 600 firms come within the reporting universe and that approximately 150 firms actually import oil in any given month. FEA estimates reporting burden to average 8 hours monthly per report.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

[FR Doc.77-26124 Filed 9-7-77;8:45 am]

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on August 31, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER. is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed ICC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before September 26, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW, Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

INTERSTATE COMMERCE COMMISSION

ICC Orders No. 36445 and No. 36511, which were decided on November 9, 1976, and June 8, 1977, respectively, promulgated revised accounting regulations which govern all carriers subject to ICC accounting rules. Order No. 36445 concerns "Reclassification of Long-Term Debt Discount and Premium" and Order No. 36511 concerns "Accounting for Marketable Equity Securities". These changes were adopted to be effective January 1, 1977. For purposes of this notice, these changes apply to the Annual Report—Class I Railroads (Form R-1) and to the Annual Report—Class II Railroads (Form R-2).

Although the reporting deadline for the forms is March 31, 1978, the ICC expects the reporting companies to apply the changes to their accounting records and procedures as of January 1, 1977. However, this reporting deadline and the effective date for the changes is contingent upon ICC's compliance with 44 U.S.C. 3512 which precludes the collection of information from 10 or more persons until the Comptroller General has had the opportunity to advise that the information is not presently available from other Federal sources and that the proposed plans or report forms are consistent with the provisions of section 3512. This notice represents the beginning of the GAO review.

ICC requests clearance of revisions to Annual Report Form R-1 required to be filed by some 87 Class I line-haul railroads, switching and terminal companies, and railroad holding companies, pursuant to Section 20 of the Interstate Commerce Act. Data collected by Form R-1 are used for economic regulatory purposes. Revisions made in this annual report form resulted from changes in the Uniform System of Accounts (49 CFR Part 1201), adopted through orders issued by the Commission. Reports are mandatory and available for use of the public. ICC estimates reporting burden for the approximately 87 Class I carriers to average 1,277 hours per annual report.

ICC requests clearance of revisions to Annual Report Form R-2 required to be filed by some 409 Class II line-haul railroads, switching and terminal companies, and stockyard companies, pursuant to Section 20 of the Interstate Commerce Act. Data collected by Form R-2 are used for economic regulatory purposes. Revisions made in this annual report form resulted from changes in the Uniform System of Accounts (49 CFR Part 1201), adopted through orders issued by the Commission. Reports are mandatory and available for use of the public. ICC estimates reporting burden for the approximately 409 Class II carriers to average 175 hours per annual report.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

SECTION 212 OF THE IMMIGRATION AND NATIONALITY ACT

Section 601 of the Health Professions Educational Assistance Act of 1976 (Pub. L. 94-484) amended section 212 of the Immigration and Nationality Act to, among other things, provide that certain aliens who are graduates of a medical school and are coming to the United States principally to perform services as members of the medical profession or who are coming to participate in a program under which they will receive graduate medical education shall be excluded from entering the United States unless, in addition to other requirements, they have passed Parts I and II of the National Board of Medical Examiners' examination or an equivalent examination as determined by the Secretary of Health, Education, and Welfare.

Notice is hereby given that the Visa Qualifying Examination described in the summary below prepared by the National Board of Medical Examiners (NBME) has been determined by the Secretary of Health, Education, and Welfare to be an equivalent examination (for purposes of this Act) to Parts I and II of the National Board of Medical Examiners' examination. This examination covers topics identical to those encompassed in Parts I and II of the National Board of Medical Examiners' examination with all questions chosen from questions written by test committees of the NBME for the purpose of measuring the achievement of medical students in United States schools. It is a two day written examination made up of approximately 950 multiple choice questions: approximately 500 from the basic science disciplines of anatomy, behavioral science, biochemistry, microbiology, pathology, pharmacology, and physiology; and approximately 450 questions from the clinical science disciplines including internal medicine, obstetrics and gynecology, pediatrics, preventive medicine and public health, psychiatry, and surgery. The scoring standards used are the same as those used for Parts I and II: the basic science component and clinical science component have to be passed separately.

Persons interested in obtaining information concerning the scheduling of this Visa Qualifying Examination as well as any other questions concerning this Notice should contact: Darl W. Stephens, Acting Director, Office of International Affairs, Health Resources Administration, Room 9-03, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-1834).

Dated: June 29, 1977.

JAMES F. DICKSON,
Acting Assistant Secretary for Health.

Approved: September 6, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. D-77-492]

COMMUNITY DEVELOPMENT BLOCK GRANTS; INNOVATIVE PROJECTS

Delegation of Authority

AGENCY: Department of Housing and Urban Development.

ACTION: Delegation of Authority.

SUMMARY: This delegation of authority transfers the administrative functions and exclusive responsibility for administering the "Innovative Projects" from the Assistant Secretary for Policy Development and Research to the Assistant Secretary for Community Planning and Development. This action will make it possible for the Community Block Grant and the Innovative Projects Program to operate in a more coordinated fashion.

EFFECTIVE DATE: June 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Betsy Tibbs, or William Tantum, Deputy Director, Management Support Division, 202-755-6186, U.S. Department of Housing and Urban Development, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Title I of the Housing and Community Development Act of 1974, establishes the Community Development Block Grant Programs. Section 107(a) of the Act provides that funds shall be reserved and set aside in a special discretionary fund for use by the Secretary in making grants for the purposes set forth in the subsections. In order to achieve a more appropriate management of a portion of those funds, the power and authority of the Secretary with respect to discretionary grants under section 107(a)(4) for Innovative Community Development Projects originally delegated concurrently to the Assistant Secretary for Policy Development and Research and the Assistant Secretary for Community Planning and Development is now being delegated exclusively to the Assistant Secretary for Community Planning and Development. This delegation thus rescinds the delegation of authority published at (40 FR 30306), of July 18, 1975, and as amended and published at (41 FR 15360), of April 12, 1976, and amends the delegation of authority published at (40 FR 5385), of February 5, 1975, and as amended and published at (40 FR 37074), of August 25, 1975 (40 FR 54606) November 25, 1975, and (41 FR 15359), April 12, 1976, by rewriting Section B3.

Accordingly, the Delegation of Authority to the Assistant Secretary for Community Planning and Development published February 5, 1975, 40 FR 5385, is amended by changing paragraph b3 to read as follows:

3. The power and authority of the Secretary with respect to discretionary grants from the Secretary's Fund under section 107 (a)(1) of Title I of the Housing and Community Development Act of 1974 in behalf of new communities, except that initial proposed and final regulations with respect to such grants shall be issued by the Assistant Secretary for Community Planning and Development (42 U.S.C. 5307).

(Sec. 7(d) Department of HUD Act, 42 U.S.C. 3535(d)).

Issued at Washington, D.C., August 2[illegible] 1977.

PATRICIA ROBERTS HARRIS,
Secretary of Housing and Urban Development.

PENNSYLVANIA

Determinations Concerning the Administering of the Temporary Housing Programs in Major Disaster Areas

AGENCY: Federal Disaster Assistance Administration.

ACTION: Notice.

SUMMARY: This is a notice of certain determinations to the Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, relating to the administering of temporary housing programs under the provisions of Section 404(a), Pub. L. 93-288, in the major disaster in Pennsylvania (FDAA-537-DR).

DATED: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Hugh F. Richardson, Individual Assistance Office, Federal Disaster Assistance Administration, Washington, D.C. 20410 (202-634-7860).

NOTICE: Pursuant to the authority vested in me to exercise certain of the powers and authorities of the President with respect to Federal disaster assistance pursuant to Section 1 of the

V 42-174 SEP 8 77 UMI

Executive Order entitled, "Delegating Disaster Relief Functions Pursuant to the Disaster Relief Act of 1974" (EO 11795, 39 FR 25939, dated July 11, 1974), and the delegation from the Secretary of Housing and Urban Development (39 FR 28227, dated August 5, 1974), I made the following determinations to the Assistant Secretary for Housing—Federal Housing Commissioner in administering the temporary housing programs under the provisions of Section 404(a), Pub. L. 93-288, in the major disaster in Pennsylvania, FDAA-537-DR:

On July 29, a determination that "the following actions are in the public interest:

"(1) Waiver of the cost limitation formula contained in 24 CFR 2205.45(h)(4). The Minimal Repair Program (MRP) cost limitation is $4,000 per dwelling repaired using the scope of work authorized in 24 CFR 2205.45(h)(3), with the exceptions contained in (2)

"(2) Suspension of the 'repair only' provision relating to wells contained in the MRP scope of work (24 CFR 2205.45(h)(3)(i)). You may authorize the digging of new wells and install new septic systems, where required, to make an MRP dwelling sanitary and provide water. You may authorize the repair or replacement of the heating system. The cost of each of these items shall not exceed $1,500, and is in addition to the $4,000 limitation established above."

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

NEW MEXICO

Application

AUGUST 29, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Co. has applied for one 4½-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 27 N., R. 9 W.,
Sec. 14, S½NW¼.

This pipeline will convey natural gas across 0.045 of a mile of public land in San Juan County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

NEW MEXICO

Application

AUGUST 29, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Llano, Inc., has applied for one 4½-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 21 S., R. 27 E.,
Sec. 15, SW¼NW¼, W½SW¼ and SE¼SW¼;
Sec. 16, E½NE¼;
Sec. 22, NE¼NW¼.

This pipeline will convey natural gas across 1.06 miles of public land in Eddy County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

FRED E. PADILLA, *Chief,*
Branch of Lands and Minerals Operations.

[U-37933]

UTAH

Application

AUGUST 30, 1977.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Northwest Pipeline Corp. has applied for a natural gas pipeline right-of-way across the following lands:

SALT LAKE MERIDIAN, UTAH

T. 20 S., R. 22 E.,
Sec. 14, NW¼NW¼;
Sec. 15, NE¼NE¼.

The needed right-of-way is for a portion of applicant's gas gathering system located in Grand County, Utah.

The purpose of this notice is to inform the public that the Bureau will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved, and if so, under what terms and conditions.

Interested persons should express their interest and views to the Moab District Manager, Bureau of Land Management, P.O. Box 970, Moab, Utah 84532.

PAUL L. HOWARD,
State Director.

COLORADO

Partial Termination of Proposed Withdrawal and Reservation of Lands

AUGUST 30, 1977.

Notice of a Forest Service, U.S. Department of Agriculture application, Colorado 16210, for withdrawal and reservation of lands for public purposes, was published as FR Doc. 72-9347, on page 12245 of the issue of June 21, 1972. The applicant agency has cancelled its application insofar as it affects the following described lands:

SAN JUAN NATIONAL FOREST
NEW MEXICO PRINCIPAL MERIDIAN
Deer Campground Site Addition

T. 40 N., R. 13 W.,
Sec. 24, W½SW¼SW¼.

The above described area contains 20 acres. Therefore, pursuant to the regulations contained in 43 CFR, Part 2310, such lands, at 10 a.m., on otober 3, 1977, will be relieved of the segregative effect of the above-mentioned applications.

THOMAS N. HARDIN,
Chief, Branch of Adjudication.

[Colorado 25122-F]

NORTHWEST PIPELINE CORP.

Notice of Pipeline Application

AUGUST 22, 1977.

Pursuant to section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Northwest Pipeline Corp., P.O. Box 1526, Salt Lake City, Utah 84110, has applied for right-of-way for natural gas pipeline for the Lawrence Barker Gathering System in Rio Blanco, Blanco County, Colo.

The above-named system is comprised of over 16 miles of natural gas pipelines 4½" o.d. and 8⅝" o.d., across the following public lands:

RIO BLANCO COUNTY

T. 3 S., R. 102 W., 6th P.M.
Sec. 34: SE¼NW¼, W½SE¼, S½SE¼.
Sec. 36: S½SW¼.
T. 3 S., R. 101 W., 6th P.M.
Sec. 32: S½SW¼, SW¼SE¼.
T. 4 S., R. 101 W., 6th P.M.
Sec. 3: NW¼NE¼, E½NW¼, SW¼NW¼.
Sec. 4: S½N½, N½SE¼.
Sec. 5: Lots 5, 9, SW¼NE¼, SE¼NW¼, E½SW, SW¼SW¼.
Sec. 6: SW¼NW¼, N½SW¼, SW¼SE¼, SE¼SE¼.
Sec. 7: S½SW¼, SW¼SE¼.
Sec. 17: S½NW¼.
Sec. 18: N½NE¼, SW¼NE¼, N½SE¼, SE¼SE¼.
Sec. 19: NE¼NE¼.
Sec. 20: W½NW¼.
T. 4 S., R. 102 W., 6th P.M.
Sec. 1: Lots 7, 8, S½N½, NE¼SE¼, S½SE¼, NE¼SE¼.
Sec. 2: S½NE¼, SE¼NW¼, N½S½, SE¼SE¼.
Sec. 3: Lots 5-8, SW¼NE¼, SE¼NW¼, NW¼SE¼.
Sec. 11: NE¼.
Sec. 12: NW¼NE¼, SE¼NE¼, NW¼NW¼.
Sec. 24: NE¼SE¼, W½SE¼.
Sec. 25: NW¼NE¼, N½NW¼.

The above-named system will enable the applicant to expand its natural gas gathering and transportation systems and thereby meet the demands of its customers.

The purpose of this notice are: To inform the public that the Bureau of Land Management will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should or should not be approved and, if so, under what terms and conditions; to allow all parties asserting claims to the lands of having bona fide objections to the proposed natural gas pipeline right-of-way to file their claims and/or objections in this office. All comments, claims and objections must be identified with the specific lands involved by Township and Range and portions thereof along with the name and number of this right-of-way.

Any person asserting a claim to the lands or having bona fide objections must include evidence that a copy thereof has been served on the applicant.

Any comment, claim or objections must be filed with the Chief, Branch of Adjudication, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colo. 80202, as promptly as possible after publication of this notice.

THOMAS N. HARDIN,
Chief, Branch of Adjudication.

[FR Doc.77-26052 Filed 9-7-77;8:45 am]

Office of Hearings and Appeals

[Docket No. M 77-251]

THE IMPERIAL COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), The Imperial Coal Co., 1010 Western Federal Savings Bldg., Denver, Colo. 80202, has filed a petition to modify the application of 30 CFR 75.326, Aircourses and belt haulage entries, to its Lincoln Mine, located in Weld County, Colo.

The substance of Petitioner's statement is as follows:

1. The present ventilation system (see map No. 1 attached [1]) consists of an exhaust return by coursing exhaust air through a separate entry and crosscut system. The belt line is currently ventilated as required by law with a separate ventilation split.

2. The proposed system would eliminate the separate return and utilize the belt haulage entry for the return airway. (See map No. 2 attached.[1]) The area of the mine currently utilized for the exhaust return would be sealed by approved seals and then abandoned.

3. The reasons for the proposed modification of the existing ventilation system are as follows:

a. The present return system has deteriorated and is a safety hazard to personnel.

b. Maintenance of the present return would expose personnel to undue and unnecessary hazards during inspection and maintenance periods.

c. Necessity mandates the requested modification since it would be impossible to drive a new exhaust return entry because the mine areas adjacent to the entry system under consideration have been worked out. Any new mining would only create additional hazards and diminish the integrity of the mine.

4. The details of the existing belt system and entry are as follows: The belt system consists of two "flights" powered by 20 h.p. and 30 h.p., 440V, 3 phase, A.C. nonpermissible motor drives A small drainage water pump located in the belt haulage entry is powered by a 3 h.p., 440V, 3 phase, A.C. nonpermissible motor. No other electrical equipment is used or will be used on this belt line entry except for routine maintenance. The belt entry has been and is maintained in a good, safe condition. This system, including the nonpermissible motors, has been used without incident since the belt system was installed years ago. Approval for use of nonpermissible motors on this belt system was obtained from the United States Department of the Interior January 10, 1973 (Docket No. M 72-6—See Approval Letter attached.[2]

5. Petitioner submits that safety protection to miners in the Lincoln Mine as a result of this proposed modification will not be diminished because of the following:

a. The Lincoln Mine has never been classified as gassy, and "past history of this mine shows very little, if any, methane gas liberation."

b. The belt haulage entry is and will be maintained in excellent condition including required rock dusting.

c. All motors on the belt entry return are and will be maintained in good repair including existing current overload prevention devices.

d. The belt system itself is and will be maintained in good repair.

e. A methane monitor will be installed and maintained in good repair at a location depicted on map No. 2 attached.[2] Such methane detector will be monitored by a certified person at the beginning of every working shift and at intervals thereafter not to exceed 2 hours.

f. Certified persons shall make frequent methane tests at the working faces throughout all working shifts.

[1] The enclosed maps are available for inspection at the address listed in the last paragraph of this notice.

[2] The enclosed maps and letter are available for inspection at the address listed in the last paragraph of this notice.

V 42 174
SEP 8 77
UMI

g. Escape by mine personnel can be achieved via entries ventilated with intake air obviating the need to utilize the belt haulage entry for escape from the Lincoln Mine.

REQUESTS FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before October 11, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

AUGUST 29, 1977.

[FR Doc.77-26054 Filed 9-7-77;8:45 am]

[Docket No. M 77-252]

YOUGHIOGHENY AND OHIO COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Youghiogheny and Ohio Coal Co., P.O. Box 460, Martins Ferry, Ohio 43935, has filed a petition to modify the application of 30 CFR 75.1100-2(b), Quantity and location of firefighting equipment, belt conveyors, to its Nelms No. 2 Mine, located in Harrison County, Ohio.

The substance of Petitioner's statement is as follows:

1. As an alternative method to the mandatory safety standard all 1¼-inch dry pipe firefighting systems with hose outlets at 300-foot intervals with adequate fire hose will be installed parallel to slope belt which will be activated by an electric valve that would automatically charge the waterline when the fire sensoring system is activated.

2. A by-pass system with manual valve will be installed at the electric valve so that the water line can be charged during a power failure.

3. All employees who work in the vicinity of the hoist and/or supply house shall be instructed in the location and operation of the manual valve.

4. The water for the dry line will be supplied from a storage tank located at an elevated position approximately 250 feet from the mouth of the slope. The tank capacity is 3020 gallons and it is a gravity flow tank.

5. The slope belt drive will not be equipped with a deluge system since it is located 175 feet outby slope mouth.

6. The automatic sensor system will be inspected weekly and a functional test of the complete system will be made at least once annually.

7. Functional tests shall consist of charging the waterline with water by activating the electric valve. A record of weekly inspection and annual functional tests will be maintained by the operator.

8. The most important reason for having a dry pipe system is to keep it from freezing due to the large volume of air going in the mine. Secondly, in a fully charged line the standing water would have a tendency to corrode the pipe and cause damage. The dry pipe can be activated automatically and manually and is as effective as a fully charged line.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before October 11, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. Copies of the petition are available for inspection at that address.

AUGUST 29, 1977.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

National Park Service

NORTH CASCADES NATIONAL PARK SERVICE COMPLEX

Public Workshops

Notice is hereby given that three public workshops will be held concerning the management and development plan for Stehekin Valley in the North Cascades National Park Service Complex. The plan will include proposals related to land use, transportation, visitor use, and resource management.

The first workshop will be held at Campbell's Conference Room on Woodin Avenue in Chelan, Wash., on Monday, October 3, 1977, at 7:30 p.m. The second workshop will be held at the Chelan Public Utility District Building Auditorium, 327 North Wenatchee Ave., in Wenatchee, Wash., on Tuesday, October 4, 1977, at 7:30 p.m. The third workshop will be held at the Golden West Building in Stehekin, Wash., Thursday, October 6, 1977, at 7:30 p.m.

Anyone interested in obtaining a list of the issues to be discussed at the workshops should contact the Superintendent. Written statements may be submitted to the Superintendent, North Cascades National Park Service Complex, 800 State St., Sedro Woolley, Wash. 98284, up to 30 days following the final workshop.

EDWARD J. KURTZ,
Acting Regional Director,
Pacific Northwest Region.

DEPARTMENT OF JUSTICE

Attorney General

OWENS-CORNING FIBERGLAS CORP.

Proposed Consent Judgment in Action To Enjoin Discharge of Pollutants

In accordance with Departmental Policy, 28 C.F.R. 50.7, 38 Fed. Reg. 19029, notice is hereby given that on or about August 19, 1977, a proposed consent order in *United States of America v. Owens-Corning Fiberglas Corporation*, Civil No. 77-3131-HP (C.D. Cal.), was lodged with the United States District Court for the Central District of California in Los Angeles. The proposed consent order requires Owens-Corning Fiberglas Corp. to install emission control equipment adequate to bring its asphalt roofing plant at 1501 North Tamarind in Compton, Calif., into compliance with Regulation IV, Rule 50 of the Los Angeles County Air Pollution Control District, now known as Rule 401 of the South Coast Air Quality Management District (hereinafter "Rule 401"), and thereby achieve compliance with Rule 401 by July 1, 1978.

The Department of Justice will receive written comments relating to the proposed consent order for thirty days from the date of publication of this notice. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Deparetment of Justice, Washington, D.C. 20530 and should refer to *United States of America v. Owens-Corning Fiberglas Corporation*, D. J. Ref. 90-5-2-5-15.

The proposed consent order may be examined at the office of the United States Attorney, 312 North Spring Street, Los Angeles, Calif.; at the office of the Clerk of the District Court, Central District of California, 312 North Spring Street, Los Angeles, Calif.; at the office of the Environmental Protection Agency, Region IX, Enforcement Division, 100 California Street, San Francisco, Calif.; and at the office of the Pollution Control Section, Land and Natural Resources Division, Room 2625, Department of Justice Building, Ninth Street and Pennsylvania Avenue NW., Washington, D.C. 20530. A copy of the proposed consent order may be obtained in person or by mail from the Pollution Control Section.

SANFORD SAGALKIN,
Acting Assistant Attorney General, Land and Natural Resources Division.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (77-57)]

NASA AEROSPACE SAFETY ADVISORY PANEL

Meeting

The Aerospace Safety Advisory Panel will meet on October 12, 1977, in Room 7002, Federal Office Building 6, 400 Maryland Ave. SW., Washington, D.C. The meeting is open to the public and will be held from 2 p.m. to 3:30 p.m. The seating capacity of the room is about 40 persons, including Council members and other participants. Visitors will be requested to sign a visitor's register.

At this time the Panel will summarize its fact-finding activities, conclusions and recommendations to date on the Shuttle program for the Administrator. The Panel will also present a brief written report to the Administrator for further detailed consideration.

The Panel is chartered by Congress "to review safety studies and operations plans referred to it and shall make reports thereon, shall advise the Administrator with respect to the hazards of proposed or existing facilities and proposed operations and with respect to the adequacy of proposed or existing safety standards, and shall perform such other duties as the Administrator may request."

Pursuant to carrying out its statutory duties, the Panel reviews, evaluates and advises on those program management policies, management systems, procedures and practices that contribute to risk identification and assessment by management. Priority is given to those programs that involve the safety of manned flight.

Chairman of the Panel is Mr. Howard K. Nason. The contact for further information is Carl R. Praktish, Executive Secretary, Aerospace Safety Advisory Panel, 400 Maryland Ave. SW., Washington, D.C. 20546. Phone: Area Code 202-755-8436.

KENNETH R. CHAPMAN,
Assistant Administrator for Department of Defense and Interagency Affairs.

[Notice (77-58)]

APPLICATIONS STEERING COMMITTEE SPACE PROCESSING AD HOC ADVISORY SUBCOMMITTEE

Meeting

The Space Processing Ad Hoc Advisory Subcommittee of the Applications Steering Committee will meet at NASA Headquarters, 600 Independence Ave. SW., Washington, D.C., on October 4-5, 1977. The meeting will be held in Room 226A of FOB 10B from 8 a.m. to 4:30 p.m. on each day. The Subcommittee will discuss, evaluate, and categorize the proposals submitted to NASA in response to the Announcement of Opportunity for Materials Processing Investigations on the Space Processing Application Rocket (SPAR) Project. Discussion of the professional qualifications of the proposers and their potential scientific contributions to Materials Technology would invade the privacy of the proposers and the other individuals involved. Since the Subcommittee sessions will be concerned throughout with matters listed in 5 U.S.C. 552b(c)(6), as described above, it has been determined that the sessions should be closed to the public.

For further information, please contact Mr. Joseph F. Turtil, NASA Headquarters, Washington, D.C. 20546, area code 202-755-3848.

KENNETH R. CHAPMAN,
Assistant Administrator for Department of Defense and Interagency Affairs.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-302]

FLORIDA POWER CORP., ET AL.

Issuance of Amendment to Facility Operating License and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 7 to Facility Operating License No. DPR-72, issued to the Florida Power Corp., City of Alachua, City of Bushnell, City of Gainesville, City of Kissimmee, City of Leesburg, City of New Smyrna Beach and Utilities Commission, City of New Smyrna Beach, City of Ocala, Orlando Utilities Commission and City of Orlando, Sebring Utilities Commission, Seminole Electric Cooperative, Inc., and the City of Tallahassee (the licensees) which revised Technical Specifications for operation of the Crystal River Unit No. 3 Nuclear Generating Plant located in Citrus County, Fla. The amendment is effective as of the date of issuance.

This amendment waives a maximum discharge temperature limit during the three days in August 1977 that the required thermal plume study is conducted. The limit waived is that the maximum discharge temperature may not exceed 103° F for more than three consecutive hours. In addition, the requirement that all Crystal River Units be operated at greater than or equal to 80% capacity during this study has been changed to require a site loading no less than 70%.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has prepared an environmental impact appraisal for the revised Technical Specifications and has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the action other than that which has already been predicted and described in the Commission's Final Environmental Statement for the facility.

For further details with respect to this action, see (1) the application for amendment dated August 1, 1977, (2) Amendment No. 7 to License No. DPR-72, and (3) the Commission's related Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Crystal River Public Library, Crystal River, Fla. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 26th day of August 1977.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc.77-26143 Filed 9-7-77;8:45 am]

[Docket No. 50-285]

OMAHA PUBLIC POWER DISTRICT

Granting of Relief from ASME Section XI Inservice Inspection (Testing) Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for In-

V 42 174 SEP 8 77 UMI

service Inspection of Nuclear Power Plant Components" to Omaha Public Power District. The relief relates to the inservice inspection (testing) program for the Fort Calhoun Unit No. 1 (the facility) located in Washington County, Nebraska. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of its date of issuance.

The relief consists of exemption from: (1) Certain pump parameter measurements, (2) certain valve tests, and (3) certain pressure vessel weld inspections.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letter granting relief. Prior public notice of this action was not required since the granting of this relief from ASME Code requirements does not involve a significant hazards consideration.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5 (d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the request for relief dated March 23, 1977 as amended on August 22, 1977, (2) the Commission's letter to the licensee dated August 31, 1977.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Blair Public Library, 1665 Lincoln Street, Blair, Nebr. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 31st day of August 1977.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 3.4, Revision 1, "Nuclear Criticality in Safety Operations with Fissionable Materials Outside Reactors," provides guidance for complying with the Commission's regulations for the prevention of criticality accidents in the handling, storing, processing, and transporting of fissionable materials outside of nuclear reactors. The original issuance of this guide endorsed ANSI Standard N16.1–1969, "American National Standard for Nuclear Criticality Safety in Operations with Fissionable Materials Outside Reactors." Revision 1 of the guide endorses the revision of that standard, ANSI Standard N16.1–1975.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 3.4 will, however, be particularly useful in evaluating the need for an early revision if received by November 7, 1977.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington D.C. 20555, Attention: Director, Division of Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Md., this 31st day of August 1977.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director, Office of Standards Development.

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 7.7, "Administrative Guide for Verifying Compliance with Packaging Requirements for Shipments of Radioactive Materials," describes a method acceptable to the NRC staff for licensees to verify compliance with certain regulations for shipping radioactive material. This guide endorses ANSI Std N14.10.3–1975, "Administrative Guide for Verifying Compliance with Packaging Requirements for Shipments of Radioactive Materials."

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 7.7 will, however, be particularly useful in evaluating the need for an early revision if received by November 4, 1977.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington D.C. 20555, Attention: Director, Division of Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Md., this 30th day of August 1977.

For the Nuclear Regulatory Commission.

RAY G. SMITH,
Acting Director, Office of Standards Development.

[Docket No. 50-59]

TEXAS A&M UNIVERSITY

Proposed Renewal of Facility Operating License

The Nuclear Regulatory Commission (the Commission) is considering renewal of Facility Operating License No. R–23 issued to Texas A&M University (the licensee) for operation of its AGN–201M research reactor (the facility) located on the campus of Texas A&M University in College Station, Tex., and used for educational training. The facility has been operated by the licensee since 1957 and is currently licensed to operate at 5 watts.

The renewal would extend the expiration date of Facility Operating License No. R–23 to August 26, 1997, in accordance with the licensee's timely application for renewal dated May 20, 1977, and the supplement thereto dated August 18, 1977.

Prior to renewal of Facility Operating License No. R–23, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By October 11, 1977, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to renewal of the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of Section 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and § 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions. A petition for leave to intervene which is not timely will not be entertained absent a determination by the Commission or the Licensing Board designated to rule on the petition that the petitioner, in addition to the matters specified in 10 CFR 2.714(d), has made a substantial showing of good cause for failure to file on time. The reasons for the tardiness in filing a petition to intervene, as well as the factors specified in 10 CFR 2.714(a)(1)–(4), shall be considered in making a determination as to whether there has been a substantial showing of good cause by the petitioner.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for license renewal dated May 20, 1977, the transmittal letter dated May 31, 1977, and the supplement thereto dated August 18, 1977, each of which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555.

Dated at Bethesda, Md., this 31st day of August 1977.

For the Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc 77-26145 Filed 9-7-77;8:45 am]

[Dockets Nos. 50-280, 50-281]

VIRGINIA ELECTRIC & POWER CO. SURRY POWER STATION, UNITS NOS. 1 AND 2

Order for Modification of License

I. Virginia Electric & Power Co. (the Licensee) is the holder of Facility Operating Licenses Nos. DPR–32 and DPR–37 which authorizes the operation of two nuclear power reactors known as Surry Power Station, Units Nos. 1 and 2 (the facility) at steady state reactor power levels not in excess of 2,441 thermal megawatts (rated power). The reactors are pressurized water reactors (PWR) located at the Licensee's site in Surry County, Va.

II. By letter dated August 24, 1977, the Commission authorized the Licensee to install flow-limiting orifices in the discharge of the outside recirculation spray pumps for the facility. In addition, the Commission ordered the following limits on operating parameters for the facility effective August 24, 1977:

> Service water temperature, 55° F to 65° F.
> Containment temperature, 100° F to 125° F.
> Containment air partial maximum pressure, 9.3 PSIA at 85° F service water temperature and 45° F RWST temperature. This value will vary in a manner similar to existing Technical Specification 3.8.

This Order is supplementary and confirmatory to the August 24, 1977, Order and provides the bases, as follows, for our actions.

As a result of the ongoing operating license review of the North Anna Station it appeared that the net positive suction head (NPSH) available to the containment recirculation spray pumps might be insufficient for the post loss-of-coolant accident (LOCA) operation of the recirculation spray system. A review of this matter for the North Anna Station is being conducted by the staff. The Surry Station Units Nos. 1 and 2 are operating plants with a design similar to North Anna.

To determine whether a similar problem may exist at Surry, we requested that the licensee and their architect/engineer, Stone and Webster, meet with the staff on August 19, 1977.

At the meeting held on August 19 1977, and reported in their letter dated August 20, 1977, VEPCO and their architect engineer, Stone and Webster, reported that they have reanalyzed the containment pressure transient response and associated available NPSH in the recirculation cooling pumps. This reanalysis was performed using new considerations in the overall thermodynamic model. The new modeling assumptions minimize the calculated containment pressure and maximizes the containment sump water temperature, thereby minimizing the NPSH. Information was provided from the pump manufacturer which concluded that the pumps would continue to pump reliably at the minimum NPSH available however at reduced flow.

All four recirculation spray pumps were determined to be operable through recent tests. Considering reduced flow, but with all four pumps in service, the containment would depressurize in less than one hour, meeting the original design requirements. The licensee agreed not to remove any of these pumps from service prior to August 24, 1977, and to submit additional information by August 24, 1977, to justify continued operation beyond August 24, 1977. Based on the short time involved, and the availability of all four recirculation spray pumps the staff concluded that continued operation until August 24, 1977, would not pose an undue threat to the health and safety of the public.

The staff met with the licensee on August 24, 1977, to discuss the above cited submittal. Based on the staff's review of the licensee's submittal and on the discussions cited above, the staff found the licensee's proposed modifications and accompanying restrictions acceptable to permit continued operation. While such continued operation was authorized without requiring that all four recirculation spray pumps be continually available for use, the staff concluded that installation of orifices on two of the pumps, as authorized by the August 24 letter, and imposition of the restrictions ordered by that letter, would provide reasonable assurance that continued plant operation would not pose an undue threat to the health and safety of the public. Additional assurance was provided by the test results discussed below.

The calculated pressure of the containment and the temperature of the water that accumulates in the containment sump are important parameters in determining recirculation spray pump operability following a LOCA with regard to available NPSH. These terms in combination with the pump static head and associated line losses establish available NPSH during the transient.

At the meeting held on August 24, 1977, and in their letter dated August 24, 1977, VEPCO presented a pump performance curve of the minimum NPSH required to prevent cavitation as a function of flow rate. The curve is based on tests per-

V 42 174
SEP 8 77
UMI

formed on August 22, 1977, with a North Anna Unit No. 2 recirculation spray pump, which is the same model as installed in the Surry Units Nos. 1 and 2. Test results preliminarily reported by the licensee indicate that the pumps can be operated in the cavitating mode, though with loss of performance (flow rate and developed head), for periods of time significantly longer than potential periods of cavitation calculated for Surry, without damage to the pump. For a flow rate of 3,300 gpm as assumed in the containment depressurization analyses, the minimum required NPSH is approximately 10.2 feet. The specified NPSH of the pump is 15 feet.

Using the new modeling assumptions an available NPSH of greater than 11 feet is calculated for the two recirculation pumps inside containment, except for the time from 700 to 2,100 seconds after the postulated accident. This NPSH assures satisfactory pump operation. During the 700 to 2,100 second time interval the available NPSH reaches a minimum of 8.4 feet and the pump could potentially operate in a cavitating mode for about 23 minutes with a reduced flow rate of 3,000 gpm.

For the two recirculation pumps located outside containment the friction losses in the suction piping are substantially larger and therefore result in a smaller available NPSH. To assure satisfactory pump operation the licensee has installed a flow limiting orifice, in discharge, reducing the flow to 2,000 gpm with a required NPSH of approximately 6.4 feet compared to an available NPSH of 7.3 feet. This flow reduction assures continued pump operation without cavitation.

On the basis of the above flow as input to the containment response calculation, the licensee stated that the containment spray system pumps will still adequately function and the containment depressurization time requirements are not exceeded for the design basis LOCA.

While we have not been provided with the details of the recent analyses for our review, we believe that the results appear reasonable and are acceptable until additional details have been provided.

The analyses summarized above for plant operations with flow restricting orifices in the discharge piping of the outside recirculation pumps indicate that additional information is required on certain plant operating parameters. These information requirements are given in Section III of this Order.

The licensee has also committed to provide additional detailed analyses to further confirm the operability of the recirculation spray pumps and low head safety injection pumps during potential cavitating modes and to develop a permanent solution eliminating pump operation in a cavitating mode. At the August 24, 1977, meeting the licensee stated that he concluded there was still adequate NPSH margin for the low head safety injection pumping system, a part of the ECCS, while operating in the recirculation mode. Confirmatory calculations are to be provided in subsequent discussions, and as stated in Section III of this Order.

Based on the discussions at our meeting with the licensee on August 19 and 24, 1977, and on their submittals of August 20 and 24, 1977, we conclude, due to the ability of the containment recirculation spray pumps to operate under very adverse NPSH conditions, that operation of Surry Units Nos. 1 and 2, with the modifications detailed above, and until permanent modifications are implemented, will not pose an undue threat to the health and safety of the public.

Copies of the following documents are available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Swem Library, College of William and Mary, Williamsburg, Va., (1) Letters from licensee dated August 20, 1977, August 24, 1977, and August 25, 1977, (2) NRC letter dated August 24, 1977, and (3) This Order for Modification of License, In the Matter of Virginia Electric and Power Co., Surry Power Station Units Nos. 1 and 2, Dockets Nos. 50-280 and 50-281.

III. Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 50; *it is ordered*, That Facility Operating Licenses Nos. DPR-32 and DPR-37 are hereby amended by adding the following new provisions:

1. The Licensee shall submit by August 29, 1977, an interim evaluation concerning the performance of the low head safety injection pumps.

2. The Licensee shall submit by September 12, 1977, the following additional information:

(a) Analyses of the low head safety injection pump performance including input from the pump manufacturer.

(b) The net positive suction head time-history for the inside and outside recirculation spray pumps and the low head safety injection pumps for all modes of operation.

(c) Inspection results of the tests which were conducted on the North Anna recirculation spray pump with additional information on the similarity of the North Anna pump to the Surry pumps.

(d) A description of the bases for the acceptability of operation for these pumps in the cavitating mode.

3. The Licensee shall submit within 90 days from August 24, 1977, their plans and schedules for implementing any required modifications.

4. In order to demonstrate that condition 2.b is complied with the analysis shall include the following containment cooling conditions:

(a) Full containment cooling (i.e., two quench spray pumps and four recirculation spray pumps);

(b) Minimum containment cooling (i.e., one diesel generator operating);

(c) Single failure of a recirculation spray pump; and

(d) Single failure of a quench spray pump.

For each analysis, curves shall be provided to show the responses of containment total pressure, containment vapor pressure, available NPSH, sump water level, and sump water vapor pressure.

Analyze the available NPSH for smaller break sizes in the hot leg and cold leg to demonstrate that the conditions of break location and size which result in the lowest available NPSH have been determined. Provide the mass and energy release rates as a function of time throughout the blowdown, reflood, and post reflood phases.

For each analysis, specify the containment evaluation parameters in a manner similar to that previously reported in your letter dated August 24, 1977. Also, provide a description of the recirculation spray heat exchanger characteristics; e.g., UA and type, parallel flow/counter flow.

Dated in Bethesda, Md., this 24th day of August 1977.

For the Nuclear Regulatory Commission.

EDSON G. CASE,
Acting Director, Office of Nuclear Reactor Regulation.

[Docket No. 50-423A]

NORTHEAST NUCLEAR ENERGY CO., CENTRAL MAINE POWER CO., AND MASSACHUSETTS MUNICIPAL WHOLESALE ELECTRIC CO.

Receipt of Attorney General's Advice and Time for Filing of Petitions To Intervene on Antitrust Matters

The Commission has received, pursuant to section 105c of the Atomic Energy Act of 1954, as amended, the following additional advice from the Attorney General of the United States, dated August 25, 1977.

You have requested our further advice pursuant to Section 105c of the Atomic Energy Act of 1954, as amended, in regard to the above-captioned application.

On August 10, 1973, we advised you that there appeared to be no need for an antitrust hearing concerning this nuclear unit. You have now provided us with antitrust information submitted by Central Maine Power Company, a new participant which plans to obtain a 2.5 percent interest in the facility. Massachusetts Municipal Wholesale Electric Company (MMWEC), which proposed to increase its participation from 1.603 to 2.942 percent, also provided information for our review. In addition, Montaup Electric Company, one of the original applicants, plans to increase its ownership interest from 2.372 to 4.009 percent.

Our review of the information submitted by Central Maine and MMWEC, as well as other relevant information, has not disclosed any basis upon which to change our earlier conclusion that an antitrust hearing will not be necessary in this matter.

Any person whose interest may be affected by this proceeding may, pursuant to § 2.714 of the Commission's rules of practice, 10 CFR Part 2, file a petition for leave to intervene and request a hearing on the antitrust aspects of the application. Petitions for leave to intervene and requests for hearing shall be filed by October 8, 1977, either (1) by delivery to the NRC Docketing and Service Section at 1717 H Street, NW, Washington, D.C., or (2) by mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, ATTN: Docketing and Service Section.

For the Nuclear Regulatory Commission.

JEROME SALTZMAN,
Chief, Antitrust and Indemnity Group, Nuclear Reactor Regulation.

[FR Doc.77-25802 Filed 9-7-77;8:45 am]

[Docket No. 50-72]

UNIVERSITY OF UTAH

Proposed Renewal of Facility Operating License

The Nuclear Regulatory Commission (the Commission) is considering renewal of Facility Operating License No. R-25 issued to The University of Utah (the licensee) for operation of its AGN-201 research reactor located on the licensee's campus in Salt Lake City, Utah, and used for educational training. The facility has been operated by the licensee since 1957 and is currently licensed to operate at 5 watts.

The renewal would extend the expiration date of Facility Operating License No. R-25 to September 12, 1997, in accordance with the licensee's timely application for renewal dated July 8, 1977.

Prior to renewal of Facility Operating License No. R-25, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By October 11, 1977, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to renewal of the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and section 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions. A petition for leave to intervene which is not timely will not be entertained absent a determination by the Commission or the Licensing Board designated to rule on the petition that the petitioner, in addition to the matters specified in 10 CFR 2.714 (d), has made a substantial showing of good cause for failure to file on time. The reasons for the tardiness in filing a petition for leave to intervene, as well as the factors specified in 10 CFR 2.714(a)(1)-(4), shall be considered in making a determination as to whether there has been a substantial showing of good cause by the petitioner.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for license renewal dated July 8, 1977, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Dated at Bethesda, Md., this 31st day of August, 1977.

For the Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc.77-25882 Filed 9-7-77;8:45 am]

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 77-36]

RESPONSES TO SAFETY RECOMMENDATIONS

Receipt

The National Transportation Safety Board announces the receipt of letters, summarized below, which are in response to or concern certain aviation and railroad safety recommendations issued by the Board in the past several years.

From the Federal Aviation Administration—

Re A-74-105 through 114.—RAA's letter of August 18 is in answer to the Safety Board's request of July 28 (42 FR 39515, August 4, 1977) for a written status report on the ten recommendations issued as a result of the Board's 1974 special study, "Safety Aspects of Emergency Evacuation from Air Carrier Aircraft."

FAA reports regarding A-74-105 that Project No. AFS-230-123 was established in June 1976 to review/revise reporting requirements of FAR's 121.703/705 and 127.313. FAA is evaluating numerous comments from the regions and data from its Maintenance Analysis Center to justify a rule change; estimated completion date is December 1977. Re A-74-106, a training course on emergency evacuation slide systems was commenced on May 5, 1975, at PICO, San Francisco, Calif.

Recommendation A-74-108 was considered in the First Biennial Operations Review, FAA said, and the proposal will be included in Operations Review Notice No. 10, to be published by December 1. FAA reports that the subject of recommendation A-74-110 was proposed in the Biennial Operations Review as Proposal No. 427; the Committee removed the proposal from consideration. FAA notes that present airline practices make it unnecessary to designate the flight attendant responsible for using the megaphone. FAA does not consider it necessary to tell carriers that they must use new, light and compact megaphones and plans no further action at this time.

Recommendation A-74-112 was transferred to the Biennial Operations Review as Proposal No. 586. As a result of Committee recommendation, FAA published Notice of Proposed Rule Making 77-12 on July 21, at 42 FR 37417. Re A-74-113, Advisory Circular AC-121-24, Passenger Safety Information Briefing and Briefing Cards, was forwarded for publication and distribution on June 23.

Recommendations A-74-107, 109, 111, and 114 were transferred to the Biennial Operations Review as Proposals Nos. 3/429, 4/434, 452, and 513/514, respectively. The proposals are being considered for rulemaking action, but FAA is unable to estimate a date for completion of the evaluations. Results of the evaluations will be published in the FEDERAL REGISTER, FAA said.

Re A-75-63.—FAA, by letter of August 19, considers action completed with regard to the recommendation issued following Board investigation into the Beechcraft Model 99 gear-up landing accident at Spokane, Wash., which occurred April 6, 1975. (See 40 FR 36628, August 21, 1975.) The recommendation asked FAA to issue an Airworthiness Directive requiring removal and internal inspection of the Beechcraft Model 99 landing gear motor controller, P/N MC-815-AS-1.

FAA reports that a proposal to issue an AD was published in the FEDERAL REGISTER on January 27, 1976. Subsequently, endurance testing by the motor controller manufacturer established that this part should operate satisfactorily on the affected planes. FAA states, "These testing results, coupled with in-service performance records, led the FAA to con-

V 42 174 SEP 8 77 UMI

clude that the one failure which prompted the NPRM was an isolated case." After determining that the proposed AD was not required, FAA last September 24 issued a "Withdrawal of Notice of Proposed Airworthiness Directive." FAA considers action completed with regard to this recommendation.

Re A–75–70.—Letter dated August 18 references another Beechcraft accident—a BE–55 which crashed in the dark during an instrument approach to the Lawrenceburg (Tenn.) Municipal Airport. (See 40 FR 40879, September 4, 1975.) The Safety Board recommended that FAA change the wording of restrictions of National Ocean Survey instrument approach charts where night approaches are not authorized so that restrictions are clearly understood.

On September 26, 1975, FAA indicated that Handbook 8260.19 would be revised. FAA now reports that letters were sent to its field offices on June 9, 1976, transmitting draft copies of revised Chapter 10, Handbook 8260.19, providing interim guidance pending issuance of Change 14 to the Handbook; a copy of this draft was furnished informally to the Safety Board staff. FAA reports that Change 14 is being printed, issuance expected late this September. In the interim, FAA field offices are operating in accord with the draft and are, therefore, currently fulfilling recommendation A–75–70, FAA said.

Re A–76–97 through 100.—FAA's August 17 letter updates its response of last March 18 (42 FR 17197, March 31, 1977). The recommendations concern light twin-engine aircraft that fail to recover from apparently unintentional spins.

FAA reports that a meeting was held with the General Aviation Manufacturers Association to discuss the promulgation of a V... speed for general aviation aircraft. The meeting indicated that each manufacturer had a different criteria for establishing V... for his aircraft, and, in light of those discussions and related problems brought up at that meeting, FAA feels that it must not require the use of V... speed at this time. FAA states:

> The basic problem appears to be the need for an acceptable criteria for determining a V... and what is expected to be accomplished by the pilot at this speed since required performance velocities are already defined in the certification of the aircraft. We still feel, however, that something of value may be gained by pursuing the subject of V... To this end, we are continuing to work with industry in the areas of airman and aircraft certification, flight testing, and flight training to secure answers.

FAA states that it hopes to have some positive results in this area by July 1978.

Re A–77–38 and 39.—FAA's letter of August 19 provides rationale for rejecting the two recommendations issued after Board investigation of the crash last March 31 of a Bell Model 214B–1 helicopter during a logging operation near Liberty, Wash. The tail boom fin installation separated from the tail boom of the helicopter. (See 42 FR 29579, June 9, 1977.)

FAA does not believe that an emergency AD or an immediate adopted rule affecting all Model 214B and 214B–1 helicopters is warranted at this time and therefore rejects recommendation A–77–38. FAA reports that as a result of the subject accident, Bell initiated a reevaluation of the tail-boom-fin/tail-boom analysis by conducting a flight strain survey of the particular logging operation. No significant stresses in the tail boom and fin have been found. Completion of the reevaluation is expected by November 1. Also, Bell Service Bulletin No. 214–77–8 was issued June 15, requiring a daily inspection of several areas of the tail fin and boom on the approximately 32 Model 214 series helicopters in civil operations. No other reports of cracks have been received to date, FAA said.

FAA rejects A–77–39 because Bell's assessment completed thus far indicates that the maximum gross weight of 16,000 pounds for external loads, and the torque requirements, do not cause significant stresses in the tail boom and fin. FAA said that when the reevaluation is completed in November, all significant factors will be considered, and the possible need for lower gross weight and/or torque limitations will be decided.

Re A–77–40 through 42.—Leter of August 19 responds to recommendations issued following investigation of the crash last October 17 of a new Bell 212 helicopter after it lost directional control during a landing approach to Natrona County Airport at Casper, Wyo. Failure of the No. 4 section of tail rotor drive shaft P/N 204–040–620–3, caused by torsional overstress, was found to be the cause of the loss of directional control. (See 42 FR 31851, June 23, 1977.)

Recommendation A–77–40 asked FAA to issue an Operations Bulletin to all operators of Bell 212 helicopters and all other Bell models with P/N's 204–040–620–3 or 204–040–620–5 tail rotor drive shafts installed warning them to use caution when operating in flight regimes conducive to main rotor overspeed, and A–77–41 recommended issuance of a Maintenance Alert Bulletin to inspect the tail rotor drive system installation for evidence of shaft yield or tail-cone structure contact if the main rotor speed has exceeded 110 percent.

FAA rejects these two recommendations. FAA notes that Maintenance Alert Bulletins and Operations Alert Bulletins are primarily internal FAA communications to alert FAA inspectors of problem areas. Using this method would require the inspectors to recommunicate the information, resulting in delay and risking less than complete dispersal of the information, FAA said. Further, FAA states:

> The problem is one in which, at critical speed of approximately 115.5 percent, the shaft enters a whirl condition and contacts rivets in the cowling. The contact results in shaft scoring and subsequent shaft failure. It is unlikely that the shaft could operate at the critical speed and mark or be marked by surrounding structure and not fail because of the high loads on the shaft. Operation below the critical speed, or above that speed within the shaft's structural limits, does not result in visible evidence. Operation at the critical speed results in severe damage obvious to all.

FAA believes that the problem is more one of proper operation than one of maintenance or inspection. The manufacturer, FAA notes, has recognized this with the issuance of Operations Safety Notice 212–77–1, which, together with the Rotorcraft Flight Manual limitations, will if adhered to prevent operation at the critical speed except in the case of fuel control failures that result in overspeed.

Recommendation A–77–42 asked FAA to revise FAR 29.923 and 29.931 to require manufacturers to demonstrate 120 percent rotor system overspeed by driving the power train with an external power source, if installed engine power turbine speed (N_2) limits preclude meeting this requirement. FAA comments that Notice of Proposed Rule Making 75–31 would transfer the overspeed test from 29.923 (endurance test) to 29.927 (additional tests) and would also permit use of test facilities, in lieu of testing on the actual rotorcraft, if these facilities closely simulate the conditions that would exist during a test on the actual rotorcraft. The present rule which allows using less than 120 percent will no longer apply. FAA expects to complete final action by January 1, 1978.

With regard to A–77–42 relative to 29.931, FAA points out that 120 percent overspeed is not a representative test where critical speed is involved. The critical speed could be lower or higher, depending on the overall system. FAA says that the Bell 212 tail rotor drive system, on which the recommendation is based, has a critical speed of 115.5 percent plus or minus 0.5 percent, and testing at 120 percent to meet 29.931 would be meaningless. Therefore, FAA rejects the Board's recommendation to revise 29.931.

Re A–77–23 and 44.—In its letter of August 19 responding to these recommendations, which concern failures in the Teledyne Continental Motors (TCM) IO–520 series engine crankshaft (42 FR 33391, June 30, 1977), FAA reports that its Engineering personnel have been working closely with TCM to determine the cause of these crankshaft failures. Metallurgical examination of the fractured crankshafts revealed that material or processing defects were not evident. The fractures involve low-stress, high-cycle fatigue in bending; but, to date, the investigation has failed to disclose the cause of this specific type of fractufre.

FAA says that operators of aircraft which have experienced failures are being contacted to determine if there is any operational pattern that might lead to cause of failure. Findings will be correlated with engine endurance tests now in progress. FAA is investigating maintenance and operational factors that could contribute to crankshaft failures, and FAA will provide advisory information to the public suggesting maintenance and

operational techniques that could help preclude crankshaft failures on all engines.

In rejecting recommendation A–77–43, FAA says that, basically, maintenance alert bulletins would not be used by FAA to alert overhaul shops or manufacturers—other methods would be more suited to this problem. FAA states:

> The IO–520 crankshafts have failed from subsurface fatigue cracks. The present method of inspecting crankshafts is magnaflux, a procedure which is not capable of detecting subsurface cracks. The use of an ultrasonic inspection procedure for detecting subsurface cracks is presently under investigation at TCM. Accordingly, it is premature to issue instructions to inspect the IO–520 series crankshaft for incipient or developed cracks of the type under investigation until such time as an adequate inspection means is identified.

FAA also rejects A–77–44, commenting that a directed safety investigation is used to gather data about a specific problem utilizing the FAA field force of inspectors. In the case of the factured cheeks on crankshafts, FAA states, it would be of little help to gather further information as to the number of failures. From the number of known failures, FAA agrees that there is a problem which needs corrective action but says that the real problem lies in identifying the cause of the failures and the proper corrective action. FAA believes that the continued joint effort of its personnel and TCM Engineering is the best course of action.

From General Aviation Manufacturers Association—

Re A–75–47 through 49.—Letter of August 19 is in response to recommendations issued by the Safety Board in 1975 with a view to further enhancing the accident prevention potential of GAMA's "Specification for Pilots Operating Handbook." The recommendations asked GAMA to supplement the performance section of its handbook by (1) specifying on takeoff distance chart or tables, where applicable, fuel mixture leaning requirements and procedures (A–75–47); (2) specifying a precautionary note on takeoff distance charts or tables indicating the importance, particularly at the higher altitudes and temperatures, or complying with certificated gross weight and center of gravity limitations (A–75–48); and (3) specifying that climb-airspeed data include the indicated airspeed necessary to achieve an airplane's best angle of climb (A–75–49). (See 40 FR 25107, June 12, 1975.)

GAMA reports that recommendation A–75–47 has been adopted. Paragraph 5.15, Associated Conditions, on page 5–2 of the specification, will be amended to include: "(h) Leaning instructions." Although a formal revision has not been issued, GAMA says that most manufacturers are now including leaning instructions, such as "Lean to appropriate fuel flow," on Takeoff Distance Charts.

With reference to A–75–48, GAMA's Handbook Committee considered that present information on gross weight and center of gravity limitations is adequate. Takeoff Distance Charts now incorporate limits of temperature and altitude where performance in the takeoff configuration is marginal, and center of gravity limits are clearly stated in the Weight and Balance section. GAMA states that the suggested precautionary note "would add no new information but might imply that compliance with gross weight and center of gravity limitations was not too important at low altitudes and temperatures."

In answer to recommendation A–75–49, GAMA states:

> The Committee considered that present climb speed information is adequate. Both the 'best rate of climb' and 'best angle of climb' speeds are given under 'Speeds for Normal Operation' under the Normal Procedures Section. Charts in the Performance Section are predicated on best *rate* which is the normal speed for maximum performance climbs. Best *angle* speeds are used only briefly for obstruction clearance and are not intended for sustained use.

From the Federal Railroad Administration—

Re R–76–24 through 32.—These recommendations resulted from the Safety Board's investigation of the rear end collision of two Penn Central Transportation Co. passenger trains near Wilmington, Del., on October 17, 1975. (See 41 FR 32794, August 5, 1976.) FRA's response letter is dated August 22, 1977.

In answer to recommendation R–76–24, which asked FRA to establish regulations on mainlines used by passenger trains that will require trains to stop if the block in front of them is occupied, FRA states that an analysis of accident investigation data concerning rear end collisions for the period 1965–1974 indicate that the vast majority of rear end collisions are caused by failure of crewmembers to comply with operating rules. FRA believes that failure of operating personnel to comply with operating rules indicates a need for training and testing programs to ensure compliance with existing operating rules, rather than a need for additional regulations to prohibit train operation in occupied blocks. Therefore, FRA is analyzing carrier training and testing programs submitted under Part 217—Railroad Operating Rules. Upon completion of the analysis, FRA will determine what training and testing regulations are necessary to ensure adequate carrier programs.

Recommendation R–76–25 asked FRA to establish standards for rear end visibility of trains. FRA reports publication in the FEDERAL REGISTER last January 11 of a regulation dealing with highly visible markers and rear end conspicuity. After December 31, 1977, each train to which this regulation applies, i.e., one that occupies or operates on a main track, shall be equipped with marking devices on the trailing end of the rear car of the train.

Recommendation R–76–26 asked FRA to require that trains are equipped with emergency flagging equipment, and R–76–27 recommended establishment of regulations for the protection by flagging of the rear end of all stopped trains in passenger territory. FRA reports that last January 27 section 218.37—Flag Protection was published in the FEDERAL REGISTER; the regulation prescribes the instances in which flag protection must be provided, as well as the types of flagman's signals to be used. Whether a train is stopped in passenger or nonpassenger territory, FRA believes that the regulation provides the protection necessary to ensure safe train operation. "Any additional requirement for flagging the rear end of all stopped trains in passenger territory would impose superfluous restrictive procedures that could not be justified with available data," FRA said.

With reference to R–76–28, which asked FRA to require carriers to provide emergency lighting and communication systems on passenger cars and to provide for predeparture inspection to assure their operability, FRA notes that three carriers provide the majority of rail passenger service in the United States: National Railroad Passenger Corporation (Amtrak), Southern Railway Co., and Denver and Rio Grande Western Railroad Co. FRA believes that these carriers' extant lighting and communication systems provide adequate service under emergency conditions and that requiring the installation of additional emergency standby power sources for emergency lighting and communication facilities is economically unjustifiable.

Recommendation R–76–29 called for FRA to require carriers to train employees in emergency procedures to be used after an accident, to establish priorities for emergency action, and to conduct accident simulations to test the effectiveness of the program, inviting civic emergency personnel participation. R–76–39 asked FRA to require railroads to include emergency procedures for cab evacuation in its training program for operating employees. According to the August 22, FRA is analyzing carrier training and testing programs under Part 217, as noted above. Emergency procedures to be used following an accident will be one of many items under consideration.

In accord with recommendation R–76–31, which asked FRA to observe a statistically adequate sample of trains equipped with cab signals to establish the reliability of this system, FRA regional personnel will observe operation of the cab signal system to determine its reliability in a special sample of trains.

In response to R–76–32 and the requirement that trains be equipped with reasonably accurate speed indicators, FRA has published an Advance Notice of Proposed Rule Making concerning installation and use of speed indicators. Recognizing the widespread use of speed indicators and their unquestioned safety benefits in higher speed operations, FRA says that mandatory installation may be warranted. FRA is planning an accompanying cost/benefit impact analysis.

V 42 174 SEP 8 77 UMI

NOTE.—Copies of the full text of the above letters in response to recommendations may be obtained at a cost of $4 for service and 10 cents per page for reproduction. All requests must be in writing, identified by the recommendation number and date of publication of this notice in the FEDERAL REGISTER. Address inquiries to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

(Sec. 307 of the Independent Safety Board Act of 1974 (Pub. L. 93-633, 88 Stat. 2172 (49 U.S.C. 1906)).)

MARGARET L. FISHER,
Federal Register Liaison Officer.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on August 31, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

NEW FORMS

DEPARTMENT OF COMMERCE

Domestic and International Business Administration, Ethylene oxide, DIB-996, single time, producers of ethylene oxide, C. Louis Kincannon, 395-3211.

National Fire Prevention, fire department survey, single time, fire departments, economics and General Government Division, Ellett, C.A., 395-3451.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service, needs assessment for natural family planning, single time, title X grantees in the 10 DHEW regions, Richard Eisinger, 395-6140.

Social Security Administration, 1978 survey of widows without benefits, SSA-3584, single time, widows who received lump-sum death benefits in January 1977, Sunderhauf, M. B., 395-6140.

Food and Drug Administration, blood sample identification card, FD 3059, other (see SF-83), volunteer blood donors, Richard Eisinger, 395-6140.

Office of Human Development:
Questionnaire for evaluation of OHD transportation demonstration program, other (see SF-83), agencies providing transportation, service, and individuals receiving it, human resources division, Raynsford, R., 395-3532.

Interview Guides Developmental Assessment: survey and identification of head start practices and needs, single time, Head Start teachers, directors, parents, professional staff, Sunderhauf, M. B., 395-6140,

DEPARTMENT OF LABOR

Departmental and other, the 1977 quality of employment survey, ASPER-3, single time, national sample of households, Strasser, A., 395-5867.

REVISIONS

VETERANS ADMINISTRATION

Financial statement (of ability to handle a loan), 26-6807, on occasion, borrower, Caywood, D. P., 395-3443.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration, new animal drug application (drugs for animal use), FD356V, on occasion, pharmaceutical drug manufacturing, premix and feed manufacturing, Richard Elsinger, 395-6140.

DEPARTMENT OF LABOR

Bureau of Labor Statistics, monthly report on employment (payroll and hours) and industry class supplements, BLS 790, monthly, industrial establishments, Strasser, A., 395-5867.

EXTENSIONS

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration, purchases from fishing vessels (Chesapeake States), NOAA 88-29, on occasion, wholesale dealers of fishery products and fishermen, Caywood, D. P., 395-3443.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Services Administration:
Progress report for HMO planning and development activities, HSA-254, quarterly, HMO planning and development grantees, Richard Eisinger, 395-6140.
Reporting requirements for HMO feasibility grantees, 0927, quarterly, HMO feasibility grantees, Richard Eisinger, 395-6140.

PHILLIP D. LARSEN,
Budget and Management Officer.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-13913]

CERTAIN FOREIGN SECURITIES

List of Foreign Issuers Which Have Submitted Information Required by Exemption

Foreign issuers with total assets in excess of $1,000,000 and a class of equity securities held of record by 500 or more persons, of which 300 or more shareholders reside in the United States, are subject to the registration, reporting, proxy and insider trading provisions of the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) (the "Act").[1]

Rule 12g3-2(b) (17 CFR 240.12g3-2(b) provides an exemption from registration under section 12(g) of the Act for a foreign issuer which submits on a current basis material specified in the Rule to the Commission. Such required material includes that information about which investors ought reasonably to be informed with respect to the issuer and its subsidiaries and which the issuer (1) has made public pursuant to the law of the country of its domicile or in which it is incorporated or organized, (2) has filed with a stock exchange on which its securities are traded and which was made public by such exchange and/or (3) has distributed to its security holders.

When it adopted Rule 12g3-2 and other rules relating to foreign securities (see Securities Exchange Act Release No. 8066, April 28, 1967), the Commission indicated that from time to time it would issue lists containing those foreign issuers which have obtained exemptions from the registration provisions of section 12(g) of the Act by providing the information specified in Rule 12g3-2(b). The purpose of the present release is to call to the attention of brokers, dealers, and investors that some form of relatively current information concerning the foreign issuers included on the attached list is available in the public files of the Commission. The attached list includes those foreign issuers which, as of July 31, 1977, appear to be current in furnishing information under Rule 12g3-2(b). There is a total of 141 foreign issuers on the list.

The Commission also wishes to bring to the attention of brokers, dealers, and investors the fact that current information concerning certain foreign issuers may not be available in the United States. The Commission continues to expect that brokers and dealers will consider this fact in connection with their obligations under the federal securities laws to have a reasonable basis for recommending these securities to their customers. The Commission will continue to review activity in the markets for foreign securities to determine whether the present rules are achieving their purpose and whether further rules or rule revisions are necessary in the public interest or for the protection of investors.

Any questions regarding Rule 12g3-2 or the list included herein should be directed to Carl T. Bodolus or Charles L. Evans, Office of International Corporation Finance, Division of Corporation Finance, Securities and Exchange Commission, Washington, D.C. 20549 (202-755-1506).

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 31, 1977.

[1] Foreign issuers may also be subject to such requirements of the Act by reason of having securities registered and listed on a national securities exchange in the United States or subject to the reporting requirements by reason of having registered securities under the Securities Act of 1933 (15 U.S.C. 77a et seq., as amended by Pub. L. 94-29 (June 4, 1975)).

Foreign issuers which are current in submitting material pursuant to the provisions of rule 12g3-2(b) as of July 31, 1977

[File No. 1-7089]

FREQUENCY SOURCES, INC.

Application To Withdrawal From Listing and Registration

AUGUST 31, 1977.

The above named issuer has filed an application with the Securities and Exchange Commission, pursuant to section 12(d) of the Securities Exchange Act of 1934 and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the Boston Stock Exchange.

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

As a result of low trading volume on the Exchange, the management of the Company has concluded that the expenses of maintaining the listing on the Exchange outweigh the benefits to be derived therefrom.

The Company will be subject to section 12(g) reporting requirements.

Any interested person may, on or before September 8, 1977, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission will, on the basis of the application and any other information submitted to it, issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[File No. 1-4729]

HAWAIIAN TELEPHONE CO.

Application To Withdraw From Listing and Registration

AUGUST 31, 1977.

The above named issuer has filed an application with the Securities and Exchange Commission, pursuant to section 12(d) of the Securities Exchange Act of 1934 and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the Honolulu Stock Exchange.

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

As a result of no trading volume on the Exchange, the Company has concluded that no purpose would be served in maintaining the listing on the Exchange. Further, the Company will no longer be subject to the reporting requirements under the Securities Exchange Act of 1934.

The Honolulu Stock Exchange has not objected to this application.

Any interested person may, on or before September 28, 1977, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission will, on the basis of the application and any other information submitted to it, issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to the delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 13904; SR-MSRB-77-11]

MUNICIPAL SECURITIES RULEMAKING BOARD

Filing of Proposed Rule Change and Order Approving Proposed Rule Change

AUGUST 31, 1977.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act"), as amended by Pub. L. No. 94-29, section 16 (June 4, 1975), notice is hereby given that on August 29, 1977, the Municipal Securities Rulemaking Board ("MSRB"), Suite 507, 1150 Connecticut Avenue NW., Washington, D.C. 20036, filed with the Commission copies of a proposed rule change. The proposed rule change would delay the effective date of subparagraphs (a)(xi)(G) and (a)(xi)(K) of the MSRB rule G-8, filed with the Commission on June 6, 1977 (File No. SR-MSRB-77-5). The text of the proposed rule change is as follows (*italics* indicate new language; [brackets] indicate deletions):

Rule G-8. *Books and Records To Be Made by Municipal Securities Brokers and Municipal Securities Dealers.*

(g) Effective date: The requirements of this rule shall become effective on April 25, 1977, and nothing herein contained shall be construed to require the making of the records specified in paragraph (a) of this rule for events occurring prior to such effective date. The customer account records required by subparagraph (a)(ii) and customer account information required by subparagraph (a)(xi) shall be required only for customers for whom transactions in municipal securities are effective on or after such date. Notwithstanding the foregoing, subparagraphs (a)(xi)(G) and (a)(xi)(K) shall not become effective until [September 1, 1977] *October 15, 1977.*

Interested persons are invited to submit written data, views, and arguments concerning the proposed rule change on or before September 29, 1977. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR-MSRB-77-11.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the MSRB and, in particular, the requirements of Section 15B and the rules and regulations thereunder.

Further, the Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, since the delayed effective date will provide the Commission with additional time to consider proposed substantive amendments to MSRB rule G-8.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-26149 Filed 9-7-77;8:45 am]

[Release No. 13905; SR-MSRB-77-10]

MUNICIPAL SECURITIES RULEMAKING BOARD

Filing of Proposed Rule Change and Order Approving Proposed Rule Change

AUGUST 31, 1977.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act"), as amended by Pub. L. No. 94-29, section 16 (June 4, 1975), notice is hereby given that on August 29, 1977, the Municipal Securities Rulemaking Board ("MSRB"), Suite 507, 1150 Connecticut Avenue NW., Washington, D.C. 20036, filed with the Commission copies of a proposed rule change. The proposed rule change would delay the effectiveness of the principal substantive provisions of MSRB rule G-7 until October 15, 1977. The text of the proposed rule change is as follows (*italics* indicate new language; [brackets] indicate deletions):

Rule G-7(h): The requirements of paragraphs (b), (c), and (f) of this rule shall not become effective until *October 15, 1977* [September 1, 1977], and shall apply with respect to each person who is an associated person on, or becomes an associated person after, such date. The requirements of paragraph (d) of this rule shall apply only with respect to each person who becomes an associated person on or after December 3, 1976.

Interested person are invited to submit written data, views, and arguments concerning the proposed rule change on or before September 29, 1977. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR-MSRB-77-10.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the MSRB and, in particular, the requirements of Section 15B and the rules and regulations thereunder.

Further, the Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, since the delayed effective date will provide the federal bank regulatory agencies with sufficient time for the publication and implementation of regulations designating a form for use by bank dealers in complying with MSRB rule G-7.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

NATIONAL MARKET ADVISORY BOARD

Renewal

I, Harold M. Williams, Chairman of the Securities and Exchange Commission, with the concurrence of the members of the Commission, have renewed an advisory committee under the Federal Advisory Committee Act designated as the National Market Advisory Board (the "Board") and hereby certify that I have considered the renewal of this Board and, with the concurrence of the members of the Commission, find the renewal of this Board to be in the public interest in connection with the performance of duties of the Commission as stated in the Federal securities laws, particularly the Securities Exchange Act of 1934 as amended by the Securities Acts Amendments of 1975.

The Commission was directed to establish the Board by section 11A(d)(1) of the Securities Exchange Act of 1934 as added by the Securities Acts Amendments of 1975 and did so establish it on September 30, 1975. The Board will continue to operate on a continuous basis subject to that provision and section 14 of the Federal Advisory Committee Act: *Provided, however,* That the Board shall terminate at such time as the terms for which its members are appointed shall all have expired and no further appointments shall have been made. The terms of current Board members are being extended until December 31, 1977.

The Charter of the Board shall be filed with me and with the House Committee on Interstate and Foreign Commerce and with the Senate Committee on Banking, Housing and Urban Affairs. A copy of the Charter shall be furnished to the Library of Congress and a copy shall be furnished to the Office of Public Affairs of the Commission and will be available for public inspection.

HAROLD M. WILLIAMS,
Chairman,
Securities and Exchange Commission.

SMALL BUSINESS ADMINISTRATION

[License No. 05-05-5089]

CHICAGO COMMUNITY VENTURES, INC.

Filing of Application for Approval of Conflict of Interest Transaction Between Associates

Notice is hereby given that Chicago Community Ventures, Inc. (CCVI), 19 South LaSalle, Chicago, Ill. 60603, a Federal licensee under section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 et seq.), has filed an application pursuant to 13 CFR 107.1004 (1977) for approval of a conflict of interest transaction.

CCVI was licensed by the Small Business Administration (SBA) on June 14, 1972. The licensee's voting stock is owned by 17 large Chicago-based businesses.

CCVI is currently considering financing the Washington National Bank (in organization) by purchasing $74,000 of the bank's common stock. Mr. Arthur R. Velasquez is a director and holder of 5 percent of Washington National Bank's common stock. Mr. Velasquez is also a director of CCVI.

The proposed transaction falls within the purview of section 107.1004 by reason of fact that Mr. Velasquez is an associate of the licensee through his dual directorships.

Notice is hereby given that any interested person may submit to SBA written comments, no later than September 23, 1977, on this proposed financing. Any such communication should be addressed to: Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published by the licensee in a newspaper of general circulation in Chicago, Ill.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: August 31, 1977.

PETER F. MCNEISH,
Deputy Associate
Administrator for Investment.

[FR Doc.77-26121 Filed 9-7-77;8:45 am]

[Application No. 02-02-5332]

KING SMALL BUSINESS INVESTMENT CO.

Application for a License to Operate as a Small Business Investment Co.

On June 17, 1977, notice of the filing of an application for license under section 301(d) of the Small Business Investment Act of 1958, as amended (the Act), (15

V 42 174 SEP 8 77 UMI

U.S.C. 661 et seq.) by King Small Business Invesement Corp. (Applicant) was published by the Small Business Administration pursuant to 13 CFR 107.102 (1977) in Volume 42 of the FEDERAL REGISTER at page 30958 on June 17, 1977.

Since that time, Richard M. Mancuso, president, general manager, director and 47 percent stockholder named in said notice has withdrawn from the applicant and his ownship of 47 percent of applicant's stock has been acquired by Mr. Neil Ritz, named in the notice above mentioned as vice president, treasurer, director and owner of 22 percent of applicant's stock.

As a result of Mr. Mancuso's withdrawal from the applicant, the officers, directors and stockholders of the applicant will be as follows:

Neil Ritz, President, Treasurer, General Manager, Director and 69 percent Stockholder 32 Longleat Parkway, Eggertsville, N.Y. 14226.

Dr. Lawrence M. Murphy, Vice President, Director and 16 percent Stockholder. 257 E. Ferry St., Buffalo, N.Y. 14208.

Dr. Thomas V. Gullo, Secretary, Director and 10 percent Stockholder. 19 Middlesex Rd., Buffalo, N.Y. 14216.

F. Rene Alvarez, Jr., Assistant Treasurer and 5 percent stockholder--Apartado 354, Valencia, Venezuela.

The Applicant, a New York corporation, authorized to operate in the State of New York, will maintain an office at 110 Pearl Street, Buffalo, N.Y. 14202, and will begin operations with $500,000 of paid-in capital and paid-in surplus derived from the sale of common stock to the above individuals.

As a small business investment company under section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owner and management and the probability of successful operations of the Applicant under this management, including adequate profitability and financial soundness, in accordance with the Act and SBA Rules and Regulations.

Any person may, not later than September 23, 1977, submit to SBA written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Buffalo, N.Y.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: August 31, 1977.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

[Proposal No. 05-05-0122]

77 CAPITAL CORP.

Application for a License as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration (SBA) pursuant to § 107.102 of the SBA regulations (13 CFR 107.102 (1977)) by 77 Capital Corp., 777 East Wisconsin Ave., Suite 3060, Milwaukee, Wis. 53202 for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. 661 et seq.).

The proposed officers, directors and shareholders are:

Name and address	Title and relationship	Percent of voting ownership
Sheldon B. Lubar, 8160 North Green Bay Rd., Milwaukee, Wis. 53209.	Chairman, President, and director.	0
James C. Rowe, 3058 North Stowell Ave., Milwaukee, Wis. 53211.	Vice President and treasurer.	----
Richard A. Van Deuren, 1800 Marine Plaza, Milwaukee, Wis. 53202.	Secretary and director.	0
James F. Junge, c/o Pitcairn Inc., Jenkintown Plaza, 101 Greenwood Ave., Jenkintown, Pa. 19046.	Director	2
Lubar & Co. Inc., 211 West Wisconsin Ave., Milwaukee, Wis. 53202.	Manager	45

There are 14 additional owners of voting stock with none owning as much as 10 percent of said stock.

Lubar & Co. Inc. is a private investment, management, advisory firm concentrating on providing capital for corporate acquisitions and corporate growth.

The Applicant will begin operations with a capitalization of $2,520,000 and will be a source of equity capital and long term loan funds for qualified small business concerns.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness, in accordance with the Act and regulations.

Notice is further given that any person may, not later than September 23, 1977, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L St., N.W., Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in Milwaukee, Wis.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: September 1, 1977.

DEPARTMENT OF STATE

Agency for International Development

[No. 111-1.1]

DEPUTY ASSISTANT SECRETARY OF STATE FOR FOREIGN BUILDINGS

Redelegation of Authority

Pursuant to the Authority delegated to me by Redelegation of Authority No. 111-1 dated April 21, 1964 (29 F.R. 5354), as amended, and the provisions of section 636(a)(10) of the Foreign Assistance Act of 1961, as amended, I hereby redelegate to the Deputy Assistant Secretary of State for Foreign Buildings, as agent for A.I.D., authority to lease, purchase, renovate and furnish housing and office space in Cairo, Egypt, as may be required in support on the USAID Egypt Mission, as determined in consultation with the USAID Mission, and subject to the availability of funds under the provisions of the Supplemental Appropriations Act of 1977 (Pub.L. 95-26), and allotments from A.I.D. operating expense funds. This delegation is subject to the provisions of all other applicable laws and regulations, including A.I.D. right to audit use of its funds under this delegation.

This redelegation of authority supplements the functions authorized under provisions of 66 Stat. 140 (22 U.S.C. 297), an amendment to the Foreign Service Buildings Act of 1926, and is executed in compliance with provisions of the Supplemental Appropriations Act of 1977.

The authority delegated herein may be redelegated as necessary to implement

the program at post in accordance with FBO administrative procedures.

This redelegation of authority shall be effective August 31, 1977, and shall remain in effect only through September 30, 1977.

Dated: August 23, 1977.

DEPARTMENT OF TRANSPORTATION

U.S. Coast Guard

[CGD 77-159]

EQUIPMENT, CONSTRUCTION, AND MATERIALS

Approval Notice

1. Certain laws and regulations (46 CFR Chapter I) require that various items of lifesaving, firefighting and miscellaneous equipment, construction, and materials used on board vessels subject to Coast Guard inspection, on certain motorboats and other recreational vessels, and on the artificial islands and fixed structures on the outer Continental Shelf be of types approved by the Commandant, U.S. Coast Guard. The purpose of this document is to notify all interested persons that certain approvals have been granted as herein described during the period from May 5, 1977 to June 22, 1977 (List No. 12-77). These actions were taken in accordance with the procedures set forth in 46 CFR 2.75-1 to 2.75-50.

2. The statutory authority for equipment, construction, and material approvals is generally set forth in sections 367, 375, 390b, 416, 481, 489, 520p, and 1333 of Title 46, United States Code, section 1333 of Title 43, United States Code, and section 198 of Title 50, United States Code. The Secretary of Transportation has delegated authority to the Commandant, U.S. Coast Guard with respect to these approvals (49 CFR 1.46(b)). The specifications prescribed by the Commandant, U.S. Coast Guard for certain types of equipment, construction, and materials are set forth in 46 CFR Parts 160 to 164.

3. The approvals listed in this document shall be in effect for a period of 5 years from the date of issuance, unless sooner cancelled or suspended by proper authority.

COMPASSES, LIFEBOAT

Approval No. 160.014/1/1, Type LMC-101D, compensating mariners liquid-filled magnetic lifeboat compass with mounting, assembly drawing No. D-1 dated July 18, 1945, arranged for chemical light illumination, manufactured by John E. Hand & Sons Co., Beechwood and Birch Avenues, Cherry Hill, N.J. 08034, effective June 7, 1977. (It supersedes Approval No. 160.014/1/0 dated August 5, 1974 to show addition of chemical light.)

LIFEBOAT WINCHES FOR MERCHANT VESSELS

Approval No. 160.015/117/0, Type 7.9 lifeboat winch; approval limited to mechanical components only and for a maximum working load of 17,696 lbs. pull at the drums (8,848 lbs. per fall); identified by Schat Davits, Ltd. drawings S-750144/145 revision A dated April 19, 1977, and drawing list dated May 17, 1977, trackway-mounted unit, manufactured by Watercraft America, Inc., P.O. Box 307, Mims, Fla. 32754, effective June 8, 1977.

BUOYANT CUSHIONS, UNICELLULAR PLASTIC FOAM

Approval No. 160.049/47/0, special approval for 15" x 15" x 3" rectangular unicellular plastic foam buoyant cushion with vinyl dip coating, dwg. No. 62D976 and Bill of Materials dated June 24, 1962, Type IV PFD, manufactured by Guntex Corp., Carbondale, Pa. 18407, effective June 2, 1977. (It is an extension of Approval No. 160.049/27/0 dated May 8, 1972.)

BUOYS, LIFE, RING, UNICELLULAR PLASTIC

Approval No. 160.050/17/3, 30-inch unicellular plastic ring life buoy, U.S.C.G. Specification Subpart 160.050 and dwg. No. 12988, revision 6 dated July 28, 1965, dwg. No. 12988-A dated August 23, 1967, Coast Guard letter, file No. 5946/160.050/17 dated March 24, 1976, Hype IV PFD, manufactured by Atlantic-Pacific Manufacturing Corp., 124 Atlantic Ave., Brooklyn, N.Y. 11201, effective June 6, 1977. (It is an extension of Approval No. 160.050/17/3 dated June 5, 1972.)

Approval No. 160.050/18/3, 24-inch unicellular plastic ring life buoy, U.S.C.G. Specification Subpart 160.050 and dwg. No. 12988, revision 6 dated July 28, 1965, dwg. No. 12988-A dated August 23, 1967, Type IV PFD, manufactured by Atlantic-Pacific Manufacturing Corp., 124 Atlantic Ave., Brooklyn, N.Y. 11201, effective June 6, 1977. (It is an extension of Approval No. 160.050/18/3 dated June 5, 1972.)

Approval No. 160.050/19/3, 20-inch unicellular plastic ring life buoy, U.S.C.G. Specification Subpart 160.050 and dwg. No. 12988, revision 6 dated July 28, 1965, dwg. No. 12988-A dated August 23, 1967, Type IV PFD, manufactured by Atlantic-Pacific Manufacturing Corp., 124 Atlantic Ave., Brooklyn, N.Y. 11201, effective June 6, 1977. (It is an extension of Approval No. 160.050/19/3 dated June 5, 1972.)

HYDRAULIC AND MANUAL RELEASES FOR LIFESAVING EQUIPMENT

Approval No. 160.062/2/0, Model 404 hydraulic and manual releases for lifesaving equipment; for buoyant loads of 200 to 3,750 pounds; identified by assembly drawing BH-2-501, revision B dated June 30, 1969 and drawing list dated September 19, 1969, to be used in accordance with installation and pretensioning details shown on tension gripe assembly drawing BH-4-501, revision C dated September 2, 1969, manufactured by Arrow Manufacturing, Inc., 139 Townsend St., San Francisco, Calif. 94107, effective June 2, 1977. (It is an extension of Approval No. 160.062/2/0 dated August 15, 1972.)

MARINE BUOYANT DEVICE

Approval No. 160.064/17/0, adult, Model No. (s) GP-1 and 712-VH-17-5, vinyl dipped unicellular plastic foam "Sport Fishing or Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL/MD report file No. MQ 16, Type II PFD, Model 7.2-VH-17.5 has additional marking "Work Vest for Merchant Vessels" and "Repeated Wettings will not injure", manufactured by Gentex Corp., Carbondale, Pa. 18407, effective June 2, 1977. (It is an extension of Approval No. 160.064/17/0 dated May 23, 1972.)

Approval No. 160.064/46/1, Model No. 770D or 8426 cloth covered unicellular plastic foam horseshoe life buoy, manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 7, Type IV PFD, manufactured by Atlantic-Pacific Manufacturing Corp., 124 Atlantic Ave., Brooklyn, N.Y. 11201, effective June 8, 1977. (It is an extension of Approval No. 160.064/46/1 dated May 9, 1972.)

(It is an extension of Approval No. 160.064/318/0 dated May 11, 1972 and change of address of manufacturer and distributor.)

Approval No. 160.064/319/0, adult medium, Model No. 16260, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 27, and approval 160.064/309 (MQ 28, Sec. 1), Type III PFD, manufactured by Buddy Schoellkopf Products, Inc., 4949 Joseph Hardin Dr., Dallas, Tex. 75236, for Red Head Brand Corp., 4949 Joseph Hardin Dr., Dallas, Tex. 75236, effective June 7, 1977. (It is an extension of Approval No. 160.064/319/0 dated May 11, 1972 and change of address of manufacturer and distributor.)

Approval No. 160.064/320/0, adult large, Model No. 16260, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 27, and approval 160.064/316 (MQ 28, Sec. 1), Type III PFD, manufactured by Buddy Schoellkopf Products, Inc., 4949 Joseph Hardin Dr., Dallas, Tex. 75236, for Red Head Brand Corp., 4949 Joseph Hardin Dr., Dallas, Tex. 75236, effective June 7, 1977. (It is an extension of Approval No. 160.064/320/0 dated May 11, 1972 and change of address of manufacturer and distributor.)

Approval No. 160.064/321/0, adult X-large, Model No. 16260, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 27, and approval 160.064/317 (MQ 28, Sec. 1) Type III PFD, manufactured by Buddy Schoellkopf Products, Inc., 4949 Joseph Hardin Dr., Dallas, Tex. 75236, for Red Head Brand Corp., 4949 Joseph Hardin Dr., Dallas, Tex. 75236, effective June 7, 1977. (It is an extension of Approval No. 160.064/321/0

V 42 174 SEP 8 77 UMI

dated May 11, 1972 and change of address of manufacturer and distributor).

Approval No. 160.064/1246/0, adult small, cloth covered unicellular plastic foam, Model No. 725 or 750 "Boating & Ski Vest", or Model 751 "Competition Ski Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL/MD report file No. MQ 16, factory location: Main St., Simpson, Pa., Type III PFD, manufactured by Gentex Corp., Carbondale, Pa. 18407, effective June 22, 1977.

Approval No. 160.064/1247/0, adult medium, cloth covered unicellular plastic foam, Model No. 725 or 750 "Boating & Ski Vest", or Model 751 "Competition Ski Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL/MD report file No. MQ 16, factory location: Simpson, Pa., Type III PFD, manufactured by Gentex Corp., Carbondale, 18407, effective June 22, 1977.

Approval No. 160.064/1248/0, adult large, cloth covered unicellular plastic foam, Model No. 725 or 750 "Boating & Ski Vest", or Model 751 "Competition Ski Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL/MD report file No. MQ 16, factory location: Simpson, Pa., Type III PFD, manufactured by Gentex Corp., Carbondale, Pa. 18407, effective June 22, 1977.

Approval No. 160.064/1249/0, adult X-large, cloth covered unicellular plastic foam, Model No. 725 or 750 "Boating & Ski Vest", or Model 751 "Competition Ski Vest" manufactured in accordance with U.S.C.G. Specification subpart 160.064 and UL/MD report file No. MQ 16, factory location: Simpson, Pa., Type III PFD, manufactured by Gentex Corp., Carbondale, Pa. 18407, effective June 22, 1977.

Approval No. 160.064/1250/0, adult small, cloth covered unicellular plastic foam, Model No. 730 or 731 "Boating & Ski Vest", or Model 750 "Sportsman Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL/MD report file No. MQ 16, factory location: Simpson, Pa., Type III PFD, manufactured by Gentex Corp., Carbondale, Pa., 18407, effective June 22, 1977.

Approval No. 160.064/1251/0, adult medium, cloth covered unicellular plastic foam, Model No. 730 or 731 "Boating & Ski Vest", or Model 740 "Sportsman Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL/MD report file No. MQ 16, factory location: Simpson, Pa., Type III PFD, manufactured by Gentex Corp., Carbondale, Pa. 18407, effective June 22, 1977.

Approval No. 160.064/1252/0, adult large, cloth covered unicellular plastic foam, Model No. 730 or 731 "Boating & Ski Vest", or Model 740 "Sportsman Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL/MD report file No. MQ 16, factory location: Simpson, Pa., Type III PFD, manufactured by Gentex Corp., Carbondale, Pa. 18407, effective June 22, 1977.

Approval No. 160.064/1253/0, adult X-large, cloth covered unicellular plastic foam, Model No. 730 or 731 "Boating & Ski Vest", or Model 740 "Sportsman Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL/MD report file No. MQ 16, factory location: Simpson, Pa., Type III PFD, manufactured by Gentex Corp., Carbondale, Pa. 18407, effective June 22, 1977.

PROTECTING COVER FOR LIFEBOATS

Approval No. 160.065/4/2, "Sea-Jay Anti-Exposure lifeboat cover", Type I, protecting cover for the occupants of all types of aluminum, steel, and fibrous glass reinforced plastic (FRP) lifeboats for lengths 22' through 37' lifeboats identified by general arrangements dwg. CJH/EC/003, Alt. 1 dated June 1972, modifications to the cover and supports may be necessary in the case of some motor-propelled lifeboats equipped with vertical (dry) exhaust lines, radio cabins and antenna masts, manufactured by C. J. Hendry Co., 139 Hendry Company, San Francisco, Calif. 94107, effective June 2, 1977. (It is an extension of Approval No. 160.065/4/2 dated August 2, 1972.)

SOUND-POWERED TELEPHONE STATION

Approval No. 161.005/51/0, sound-powered telephone station, selective ringing, common talking, 19 stations maximum, bulkhead mounting, splash-proof, with internal hand generator bell, Model SW, dwg. No. 50, Alt. 0 dated April 1957, for use in locations not exposed to the weather and where a loud ringing bell is not necessary, manufactured by Hose-McCann Telephone Co., Inc., 524 W. 23rd Street, New York, N.Y. 10011, effective June 7, 1977. (It is an extension of Approval No. 161.005/51/0 dated August 1, 1972.)

Approval No. 161.005/56/0, sound-powered telephone station, selective ringing, common talking, 19 stations maximum, bulkhead mounting, with separately mounted 6" or 8" bell, Model SWT, dwg. No. 56, Alt. 0 dated May 1957, manufactured by Hose-McCann Telephone Co., Inc., 524 W. 23rd Street, New York, N.Y. 10011, effective June 7, 1977. (It is an extension of Approval No. 161.005/56/0 dated August 1, 1972.)

Approval No. 161.005/57/0, sound-powered telephone station, selective ringing, common talking, 19 stations maximum, pedestal mounting, with attached 6" bell, Model SWTP, dwg. No. 58, Alt. 0 dated May 1957, manufactured by Hose-McCann Telephone Co., Inc., 524 W. 23rd Street, New York, N.Y. 1011, effective June 7, 1977. (It is an extension of Approval No. 161.005/57/0 dated August 1, 1972.)

STRUCTURAL INSULATIONS FOR MERCHANT VESSELS

Approval No. 164.007/38/0, "BX-Spintex Type 643" mineral wool type structural insulation identical to that described in Underwriters Laboratories Report R6797-1, 71NK-5638 dated July 6, 1972, bats and blankets approved for use without other insulating material to meet A-60 Class requirements in a 3-inch (75 mm) thickness at 6 pounds per cubic foot (96KG per cubic meter) density, manufactured by Roclaine S. A., 7, Rue Du Cirque, Paris—VIII, France, effective May 5, 1977. (It is an extension of Approval No. 164.-007/38/0 dated July 20, 1972.)

Approval No. 164.007/43/0, "BX-Spintex Type 693" mineral wool type structural-insulation identical to that described in Underwriters Laboratories Report R6797-1, 71 NK5638 dated July 6, 1972, bats and blankets approved for use without other insulating material to meet A-60 Class requirements in a 3-inch (75 mm) thickness at 3.2 pounds per cubic foot (52KG per cubic meter) density, manufactured by Roclaine S. A. 7, Rue Du Cirque, Paris—VIII, France, effective May 5, 1977. (It is an extension of Approval No. 164.007/43/0 dated July 20, 1972.)

Approval No. 164.007/44/0, "BX-Spintex Type 693" mineral wool type structural insulation identical to that described in Underwriters Laboratories Report R6797-1, 71NK563B dated July 6, 1972, bats and blankets approved for use without other insulating material to meet A-60 Class requirements in a 4-inch (102 mm) thickness at 3.2 pounds per cubic foot (52KG per cubic meter) density, manufactured by Roclaine S. A., 7, Rue Du Cirque, Paris—VIII, France, effective May 5, 1977. (It is an extension of Approval No. 164.007/44/0 dated July 20, 1972.)

Approval No. 164.007/51/1, "Ceramospray," sprayed asbestos free fiber type structural insulation, identical to that described in Underwriters Laboratories, Inc., report 65C7000, File R2923-23-24, dated April 29, 1966, approved for use without other insulating material to meet Class A-60 requirements in a 1¾ inch thickness and 11 pounds per cubic foot density, manufactured by Sprayerraft Corp., 2508 Coney Island Avenue, Brooklyn, N.Y. 11223, effective June 10, 1977. (It supersedes Approval No. 164.007/51/0 dated February 11, 1977 to show correct material and identifying data.)

INTERIOR FINISHES FOR MERCHANT VESSELS

Approval No. 164.012/4/0, "Micarta" laminated plastic interior finish type PFR-1, identical to that described in Westinghouse Corp. letter dated March 24, 1972, and Underwriters' Laboratories, Inc., report file R4301, assignment 69NK6512 dated July 21, 1970, bonded with Borden Chemical Cascophen RS-216 adhesive in accordance with instructions accompanying the adhesive, manufactured by Westinghouse Electric Corp., Decorative Micarta Division, Hampton, S.C. 29924, effective June 16, 1977. (It reinstates and supersedes Approval No. 164.012/4/0 terminated May 17, 1977.)

Dated: August 25, 1977.

H. G. LYONS,
Captain, U.S. Coast Guard, Acting Chief, Office of Merchant Marine Safety.

[CGD 77-158]

EQUIPMENT, CONSTRUCTION, AND MATERIALS

Termination of Approval Notice

1. Certain laws and regulations (46 CFR Chapter I) require that various items of lifesaving, firefighting and miscellaneous equipment, construction, and materials used on board vessels subject to Coast Guard inspection, on certain motorboats and other recreational vessels, and on the artificial islands and fixed structures on the Outer Continental Shelf be of types approved by the Commandant, U.S. Coast Guard. The purpose of this document is to notify all interested persons that certain approvals have been terminated as herein described during the period from July 17, 1977, to July 19, 1977 (List No. 13-77). These actions were taken in accordance with the procedure set forth in 46 CFR 2.75-1 to 2.75-50.

2. The statutory authority for equipment, construction, and material approvals is generally set forth in sections 367, 375, 390b, 416, 481, 489, 526p, and 1333 of Title 46, United States Code, section 1333 of Title 43, United States Code, and section 198 of Title 50, United States Code. The Secretary of Transportation has delegated authority to the Commandant, U.S. Coast Guard with respect to these approvals (49 CFR 1.46(b)). The specification prescribed by the Commandant, U.S. Coast Guard for certain types of equipment, construction, and materials are set forth in 46 CFR Parts 160 to 164.

3. Notwithstanding the termination of approval listed in this document, the equipment affected may be used as long as it remains in good and serviceable condition.

GAS MASKS, SELF-CONTAINED BREATHING APPARATUS, AND SUPPLIED-AIR RESPIRATORS, FOR MERCHANT VESSELS

The SurvivAir, Division of U.S. Divers Co., 3323 W. Warner Avenue, Santa Ana, Calif. 92704, no longer manufactures certain self-contained breathing apparatus and Approval No. 160.011/32/0 was therefore terminated effective July 18, 1977.

MARINE BUOYANT DEVICE

The L. S. Brown Co., 228 Margaret Street SE., Atlanta, Ga. 30315, no longer manufactures certain marine buoyant devices and Approval Nos. 160.064/677/0 and 160.064/678/0 were therefore terminated effective July 18, 1977.

The A. B. Sea, Ltd., 3596 Geddes Avenue, Littleton, Colo. 80121, no longer manufactures certain marine buoyant devices for the High Performance Products, Inc., 25-Industrial Park, Hingham, Mass. 02043, and Approval Nos. 160.064/679/0, 160.064/680/0, and 160.064/681/0 were therefore terminated effective July 18, 1977.

SAFETY VALVES (POWER BOILERS)

The MIPCO Division, of Clark-Reliance Corp., 15901 Industrial Parkway, Cleveland, Ohio 44135, Approval Nos. 162.001/91/2, 162.001/92/2, 162.001/94/2, 162.001/95/2, 162.001/98/2, 162.001/99/2, 162.001/177/1, 162.001/178/1, 162.001/179/1, 162.001/180/1, 162.001/181/1, and 162.001/182/1 were expired and were terminated effective July 17, 1977.

SAFETY VALVES (STEAM HEATING BOILERS)

The MIPCO Division of Clark-Reliance Corp., 15901 Industrial Parkway, Cleveland, Ohio 44136, no longer manufacture certain safety valves and Approval Nos. 162.012/3/2, 162.012/4/2, 162.012/5/2, 162.012/6/2, 162.012/10/2, 162.012/11/2, 162.012/12/2, 162.012/13/2, and 162.012/14/2 were therefore terminated effective July 19, 1977.

INCOMBUSTIBLE MATERIALS FOR MERCHANT VESSELS

The Eastern Cold Storage Insulation Co., Inc., 730 3rd Avenue, New York, N.Y. 10017, no longer manufactures certain incombustible materials and Approval Nos. 164.009/105/1, 164.009/113/1, 164.009/150/0, 164.009/157/0, and 164.009/161/0 were therefore terminated effective July 18, 1977.

Dated: August 25, 1977.

H. G. LYONS,
Captain, U.S. Coast Guard, Acting Chief, Office of Merchant Marine Safety.

NEW YORK HARBOR VESSEL TRAFFIC SERVICE ADVISORY COMMITTEE

Open Meeting

The New York Harbor Vessel Traffic Service Advisory Committee will conduct an open meeting on Wednesday, September 28, 1977, in the Community Center, Building 301, Governors Island, N.Y. The meeting is scheduled to begin at 10:30 a.m.

The agenda for this meeting of the New York Harbor Vessel Traffic Service Advisory Committee is as follows:

1. Introduction of Commander P. C. SHEARER, U.S. Coast Guard, the Project Officer and prospective Commanding Officer of the New York Vessel Traffic Service.

2. Status Report on the implementation of the New York Vessel Traffic Service given by the Vessel Traffic Service Staff.

3. Comments or questions from the floor.

The New York Harbor Vessel Traffic Service Advisory Committee was established by the Commander, Third Coast Guard District to advise on the need for, and development, installation and operations of a Vessel Traffic Service for New York Harbor.

Members of the Committee serve voluntarily without compensation from the Federal Government, either travel or per diem.

Interested persons may obtain additional information or the summary of the minutes of the meeting by writing to:

Commander P. C. Shearer, USCG, Project Officer, Vessel Traffic Service, Building 400, Section N, Third Coast Guard District, Governors Island, N.Y. 10004.

or by calling 212-264-0409.

This notice is issued under section 10(a) of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770, 5 U.S.C. App. 1).

Dated: August 17, 1977.

W. F. REA III,
Vice Admiral, U.S. Coast Guard, Commander, Third Coast Guard District.

DEPARTMENT OF THE TREASURY

Office of the Secretary

PORTLAND HYDRAULIC CEMENT FROM CANADA

Antidumping Proceeding Notice

AGENCY: United States Treasury Department.

ACTION: Initiation of antidumping investigation.

SUMMARY: This notice is to advise the public that a petition in proper form has been received and an antidumping investigation is being initiated for the purpose of determining whether or not imports of portland hydraulic cement from Canada are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act of 1921, as amended. Sales at less than fair value generally occur when the prices of the merchandise sold for exportation to the United States are less than the prices in the home market.

EFFECTIVE DATE: September 8, 1977.

FOR FURTHER INFORMATION CONTACT:

Vincent P. Kane, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On August 2, 1977, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of Glens Falls Division of the Flintkote Co., Glens Falls, N.Y., a domestic producer of the subject merchandise, indicating a possibility that portland hydraulic cement from Canada is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

For purposes of this notice the term "portland hydraulic cement" refers to portland hydraulic cement, other than white non-staining cement.

There is evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States. This evidence indicates that losses of sales, production and employment have occurred during the last three years. Further, there is information indicating that the margin by which domestic producers are being undersold by Canadian importers would be eliminated were the price differential between prices in the Canadian home market and for export to the United States eliminated.

Having conducted a summary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29) and having determined that there are grounds for doing so, the United States Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

A summary of information received from all sources is as follows:

The information received tends to indicate that the prices of the merchandise sold for exportation to the United States are less than the prices for home consumption.

This notice is published pursuant to § 153.30 of the Customs Regulations (19 CFR 153.30).

ROBERT H. MUNDHEIM,
General Counsel.

Office of the Secretary

ELEMENTAL SULPHUR FROM MEXICO

Tentative Determination To Modify or Revoke Dumping Finding

AGENCY: U.S. Treasury Department.

ACTION: Tentative modification or revocation of finding of dumping.

SUMMARY: This notice is to advise the public that it appears that Azufrera Panamericana, S.A. (Azufrera), of Mexico is no longer selling elemental sulphur from Mexico at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the price of merchandise sold for exportation to the United States is less than the price of

V 42 174 SEP 8 77 UMI

such or similar merchandise sold in the home market or to third countries. In addition, Azufrera has given assurances that future sales will not be at less than fair value. If this action is made final, imports of this merchandise from Azufrera on or after the effective date of this notice, will no longer be liable for special duties under the Antidumping Act, 1921. Interested persons are invited to make comments.

EFFECTIVE DATE: September 8, 1977.

FOR FURTHER INFORMATION CONTACT:

David P. Mueller, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–5492).

SUPPLEMENTARY INFORMATION: A finding of dumping with respect to elemental sulphur from Mexico was published as Treasury Decision 72–179 in the FEDERAL REGISTER of June 28, 1972 (37 FR 12727).

After due investigation, it has been determined tentatively that elemental sulphur produced and sold by Azufrera, from Mexico, is no longer being, nor likely to be, sold in the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

STATEMENT OF REASONS ON WHICH THIS TENTATIVE DETERMINATION IS BASED

The investigation indicated that all sales of elemental sulphur by Azufrera for a period of two years prior to this determination have been made at not less than fair value, and written assurances have been given that future sales of elemental sulphur to the United States will not be made at less than fair value.

Accordingly, notice is hereby given that the Department of the Treasury intends to modify the finding with respect to elemental sulphur from Mexico, to exclude shipments of sulphur produced and sold by Azufrera.

In accordance with section 153.40, Customs Regulations, (19 CFR 153.40), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Avenue NW., Washington, D.C. 20229, in time to be received by his office not later than September 19, 1977. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than October 11, 1970.

This notice is published pursuant to section 153.44(c) of the Customs Regulations (19 CFR 153.44(c)).

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

SEPTEMBER 1, 1977.

INTERSTATE COMMERCE COMMISSION

[Notice No. 476]

ASSIGNMENT OF HEARINGS

SEPTEMBER 2, 1977.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

AB 18 (Sub-No. 21), Chesapeake & Ohio Railway Co. Abandonment of Carferry Service Across Lake Michigan Between Ludington, Mich., and Kewaunee, Milwaukee, and Manitowoc, Wis., and AB 31 (Sub-No. 5), Grand Trunk Western Railroad Co. and The Grand Trunk Milwaukee Carferry Co. Abandonment Of Its Lake Michigan Carferry Operation, From Eastern Port Of Muskegon To Western Port of Milwaukee in Muskegon County, Mich., and Milwaukee County, Wis., now being assigned October 17, 1977, at the Offices of the Interstate Commerce Commission in Washington, D.C.

MC 140908 (Sub-No. 4), Commercial & Package Delivery Service, Inc., now being assigned November 28, 1977 (1 week), at Charlotte, N.C., in a hearing room to be later designated.

MC 121240 (Sub-No. 4), ABC Truck Line, Inc., application dismissed.

MC 142207 (Sub-No. 8), Gulf Coast Truck Services, Inc., now being assigned November 8, 1977 (2 days), for hearing in Memphis, Tenn., in a hearing room to be later designated.

MC 114334 (Sub-No. 35), Builders Transportation Co., now being assigned November 10, 1977 (2 days), for hearing in Memphis, Tenn., in a hearing room to be later designated.

MC 82063 (Sub-No. 72), Klipsch Hauling Co., now being assigned November 14, 1977 (1 week), for hearing in Little Rock, Ark., in a hearing room to be later designated.

MC 125551 (Sub-No. 13), K&W Trucking Co., Inc., now being assigned October 31, 1977 (1 week), at Anchorage, Alaska, in a hearing room to be later designated.

MC 60066 (Sub-No. 11), Bee Line Motor Freight, Inc., now being assigned November 1, 1977 (3 days), at Lincoln, Nebr., in a hearing room to be later designated.

H. G. HOMME, JR.,
Acting Secretary.

IRREGULAR ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Letter Notices

SEPTEMBER 2, 1977.

The following letter notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minmizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before September 19, 1977. A copy must also be served upon applicant or its representative Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter notices by number.

No. MC 2607 (Sub-No. E96), filed June 4, 1974. Applicant: BERRY VAN LINES, 747 N. Dupont Highway, Dover, Del. 19901. Applicant's representative: Robert J. Gallagher, Suite 1200, 1000 Connecticut Avenue NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned or preserved foodstuffs* (except commodities in bulk), from points in New Jersey on, north and east of a line beginning at the Delaware River, thence along U.S. Highway 322 to junction New Jersey Highway 77, thence along New Jersey Highway 77 to Bridgeton, N.J., thence along New Jersey Highway 533 to Newport, N.J., near the Delaware River, to points in Queen Annes County, Md. The purpose of this filing is to eliminate points in Caroline County, Md.

No. MC 2607 (Sub-No. E97), filed June 4, 1974. Applicant: BERRY VAN LINES, 747 N. Dupont Highway, Dover, Del. 19901. Applicant's representative: Robert J. Gallagher, Suite 1200, 1000 Connecticut Avenue NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned or preserved foodstuffs* (except commodities in bulk), from points in Kent and Sussex Counties, Del., to points in Connecticut. The purpose of this filing is to eliminate points in Caroline County, Md.

No. MC 2607 (Sub-No. E98), filed June 4, 1974. Applicant: BERRY VAN LINES, 747 N. Dupont Highway, Dover, Del. 19901. Applicant's representative: Robert J. Gallagher, Suite 1200, 1000 Connecticut Avenue NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned or preserved foodstuffs* (except commodities in bulk), from points in New Jersey on, north and east of a line beginning at the Delaware River, thence along U.S. Highway 322 to junction New Jersey Highway 77, thence along New Jersey Highway 77 to Bridgeton, N.J., thence along New Jersey Highway 533 to Newport, N.J., near the Delaware River, to points in Queen Annes County, Md. The purpose of this filing is to eliminate points in Caroline County, Md.

No. MC 2607 (Sub-No. E99), filed June 4, 1974. Applicant: BERRY VAN LINES, 747 N. Dupont Highway, Dover, Del. 19901. Applicant's representative: Robert J. Gallagher, Suite 1200, 1000 Connecticut Avenue NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned or preserved foodstuffs* (except commodities in bulk), from points in Kent and Sussex Counties, Del., to points in Pennsylvania. The purpose of this filing is to eliminate the gateway of points in Caroline County, Md.

No. MC 2607 (Sub-No. E100), filed June 4, 1974. Applicant: BERRY VAN LINES, 747 N. Dupont Highway, Dover, Del. 19901. Applicant's representative: Robert J. Gallagher, Suite 1200, 1000 Connecticut Avenue, NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned or preserved foodstuffs* (except commodities in bulk), from points in Kent and Sussex Counties, Del., to Wilmington, Del. The purpose of the filing is to eliminate the gateway of points in Caroline County, Md.

No. MC 44735 (Sub-No. E2), filed May 9, 1977. Applicant: KISSICK TRUCK LINES, INC., 7101 East 12th Street, Kansas City, Mo., 64126. Applicant's representative: John E. Jandera, 641 Harrison Street, Topeka, Kans. 66603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel and iron and steel articles* (except commodities in bulk and commodities requiring special equipment), between points in Indiana within the commercial zone of Chicago, Ill., on the one hand, and, on the other, points in Kansas City, Mo. The purpose of this filing is to eliminate the gateway of Chicago, Ill.

No. MC 61825 (Sub-No. E1025), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORP., P.O. Box 385 Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth Street NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, except commodities of unusual value, commodities in bulk, household goods as defined by the Commission, between the District of Columbia and points in Maryland on and south of a line beginning at the Pennsylvania-Maryland State line, and extending east along U.S. Highway 40 to junction U.S. Highway 40 Alternate, to junction U.S. Highway 40 near Frederick, Md., thence to junction Maryland Highway 144, thence along Maryland Highway 144 to Baltimore, Md., thence along the shores of the Chesapeake Bay and Elk River to the Chesapeake and Delaware Canal, and to the Maryland-Delaware State line, and points in West Virginia on and east of a line beginning at the Virginia-West Virginia State line, and extending west along U.S. Highway 60 to junction U.S. Highway 219, to junction West Virginia Highway 72, to junction West Virginia Highway 26, and thence to the West Virginia-Pennsylvania State line, on the one hand, and, on the other, points in Mississippi. The purpose of this filing is to eliminate the gateways of Lynchburg, Va., and a point in Smyth County, Va.,

No. MC 78228 (Sub-No. E193) (correction), filed August 26, 1975, published in the FEDERAL REGISTER issue of July 7, 1977, and republished, as corrected, this issue. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Alloys, ores, and metals*, in dump vehicles, from points in New York bounded by a line beginning at Buffalo, N.Y., thence along New York Highway 5 to Silver Creek, N.Y., thence along New York Highway 428 to junction New York Highway 39, thence along New York Highway 39 to junction New York Highway 16, thence along New York Highway 16 to the place of beginning, to points in Delaware. The purpose of this filing is to eliminate the gateway of Niagara Falls, N.Y.

NOTE.—The purpose of this correction is to state the correct territorial description.

No. MC 114019 (Sub-No. E483), filed May 31, 1974. Applicant MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 South Pulaski Road, Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such general merchandise as is dealt in by chain grocery stores, and supplies machinery, fixtures, and equipment*, incidental to the production warehousing and sale thereof (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) from Akron, Ohio, to points in that part of Illinois on, south and west of a line beginning at the Indiana-Illinois State line, thence west along Illinois Highway 33 to junction Illinois Highway 128, thence north along Illinois Highway 128 to junction Illinois Highway 16, thence west along Illinois Highway 16 to junction Illinois Highway 29, thence north along Illinois Highway 29 to junction Illinois Highway 104, thence west along Illinois Highway 104 to junction Illinois Highway 78, thence north along Illinois Highway 78 to junction U.S. Highway 67, thence north along U.S. Highway 67 to junction U.S. Highway 136, thence west along U.S. Highway 136 to the Illinois-Iowa State line. The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Company at Jef-

V 42 174 SEP 8 77 UMI

fersonville, Ind. (which is located in the Louisville, Ky., commercial zone). (2) From Cincinnati, Ohio, to points in that part of Minnesota, on, north and west of a line beginning at the Iowa-Minnesota State line and extending north along U.S. Highway 63 to junction U.S. Highway 52, thence north along U.S. Highway 52 to junction Minnesota Highway 50, thence north along Minnesota Highway 50 to junction Interstate Highway 35, thence north along Interstate Highway 35 to junction Interstate Highway 494, thence north along Interstate Highway 494 to junction Minnesota Highway 152, thence north along Minnesota Highway 152 to junction U.S. Highway 169, thence north along U.S. Highway 169 to junction Minnesota 18, thence north along Minnesota Highway 18 to junction Minnesota Highway 371, thence north along Minnesota Highway 371 to junction U.S. Highway 71, thence north along U.S. Highway 71 to the Minnesota-Canada Line.

The purpose of this filing is to eliminate the gateways of the warehouse and other storage facility of the Colgate-Palmol Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone), and points in Illinois within the commercial zone of Muscatine, Iowa. (3) From Cleveland, Ohio, to points in that part of Illinois on, west and south of a line beginning at the Illinois-Indiana State line, thence west along Illinois Highway 33 to junction Illinois Highway 128, thence north along Illinois Highway 128 to junction Illinois Highway 16, thence west along Illinois Highway 16 to junction Illinois Highway 29, thence north along Illinois Highway 29 to junction Illinois Highway 104, thence west along Illinois Highway 104 to junction U.S. Highway 67, thence north along U.S. Highway 67 to junction Illinois Highway 99, thence north along Illinois Highway 99 to junction U.S. Highway 24, thence west along U.S. Highway 24 to the Illinois-Missouri State line. The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Company at Jeffersonville, Ind. (which is located in the Louisville, Ky. commercial zone). (4) From Columbus, Ohio, to points in that part of Illinois on, south and west of a line beginning at the Indiana-Illinois State line, thence west along U.S. Highway 50 to junction Illinois Highway 127, thence north along Illinois Highway 127 to junction Interstate Highway 55, thence north along Interstate Highway 55 to junction Illinois Highway 108, thence west along Illinois Highway 108 to junction Illinois Highway 106, thence north along Illinois Highway 106 to junction U.S. Highway 36, thence west along U.S. Highway 36 to junction Illinois Highway 100, thence north along Illinois Highway 100 to junction Illinois Highway 99, thence north along Illinois Highway 99 to junction U.S. Highway 24, thence west along U.S. Highway 24 to the Illinois-Missouri State line. The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone). (5) From Dayton, Ohio, to points in that part of Illinois on and south of U.S. Highway 50. The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone). (6) From Detroit, Mich., to points in that part of Illinois on, south and west of a line beginning at the Illinois-Indiana State line, thence west along Illinois Highway 33 to junction Illinois Highway 128, thence north along Illinois Highway 128 to junction Illinois Highway 16, thence west along Illinois Highway 16 to the Illinois-Missouri State line.

The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone). (7) From Grand Rapids, Mich., to points in that part of Illinois on and south of Illinois Highway 15 and U.S. Highway 460. The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone). (8) (a) From Evansville, Ind., to points in Ohio (except Cincinnati, Dayton, Columbus, Toledo, and Cleveland), the lower Peninsula of Michigan and points in that part of Wisconsin, on and north of U.S. Highway 10. The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone). (8) (b) From Evansville, Ind., to points in that part of Minnesota on, north and west of a line beginning at the North Dakota-Minnesota State line and extending east along U.S. Highway 10 to junction Minnesota Highway 34, thence east along Minnesota Highway 34 to junction Minnesota Highway 371, thence north along Minnesota Highway 371 to junction U.S. Highway 2, thence east along U.S. Highway 2 to unnumbered highway, thence north along unnumbered highway to Minnesota Highway 72, to the Minnesota-Canada line. The purpose of this filing is to eliminate the gateways of the warehouse and other storage facility of the Colgate-Palmolive Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone), and points in Illinois within the commercial zone of Muscatine, Iowa. (9) From Madison, Wis., to points in that part of Ohio on and south of a line beginning at the Indiana-Ohio State line and extending east along Interstate Highway 74 to junction Interstate Highway 275, thence east along Intersetate Highway 275 to junction U.S. Highway 50, thence east along U.S. Highway to junction Ohio Highway 124, thence east along Ohio Highway 124 to junction Ohio Highway 93, thence north along Ohio Highway 93 to junction Ohio Highway 327, thence east along Interstate Highway 275 to along U.S. Highway 50 to junction Ohio east along Ohio Highway 327 to junction Ohio Highway 124, thence east along Ohio Highway 124 to the Ohio-West Virginia State line (except Cincinnati, Ohio).

The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone). (10) From Pittsburgh, Pa., to points in that part of Illinois on, south and west of a line beginning at the Indiana-Illinois State line and extending west along U.S. Highway 150 to junction Illinois Highway 133, thence west along Illinois Highway 133 to junction Illinois Highway 32, thence north along Illinois Highway 32 to junction Illinois Highway 48, thence north along Illinois Highway 48 to junction U.S. Highway 136 to junction U.S. Highway 67, thence north along U.S. Highway 67 to junction U.S. Highway 34, thence west along U.S. Highway 34 to the Illinois-Iowa State line. The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone). (11) From St. Louis, Mo., to points in that part of Ohio on, south and east of a line beginning at the Ohio-Michigan State line, thence south along U.S. Highway 23 to junction Interstate Highway 475, thence south along Interstate Highway 475 to junction Interstate Highway 75, thence south along Interstate Highway 75 to junction Ohio Highway 129 thence west along Ohio Highway 129 to the Indiana-Ohio State line (except Cincinnati, Ohio), points in that part of Michigan on and east of a line beginning at the Ohio-Michigan State line and extending north along Michigan Highway 52 to junction Michigan Highway 46, thence west along Michigan Highway 46 to junction Michigan Highway 30, thence north along Michigan Highay 55, thence along Michigan Highway 55 to junction Michigan Highway 33, thence north along Michigan Highway 33 to Lake Huron. The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone). (12) From Carbondale, Ill., to points in Ohio (except Dayton, Cincinnati, Cleveland, and Columbus).

The purpose of this filing is to eliminate the gateway of the warehouse and other storage facility of the Colgate-Palmolive Co. at Jeffersonville, Ind. (which is located in the Louisville, Ky., commercial zone). *Foodstuffs*, raw and manufactured, from New York, N.Y., and points within 30 miles of New York, N.Y., to points in that part of Minnesota on and west of a line beginning at the

Iowa-Minnesota State line and extending north along U.S. Highway 218 to junction Interstate Highway 35, thence north along Interstate Highway 35 to junction Interstate Highway 494, thence west along Interstate Highway 494 to junction Minnesota Highway 152, thence north along Minnesota Highway 152 to junction U.S. Highway 10, thence north along U.S. Highway 10 to junction Minnesota Highway 371, thence north along Minnesota Highway 371 to junction U.S. Highway 71, thence north along U.S. Highway 71 to the Canada-Minnesota State line, and points in Missouri, on, north and west of a line beginning at the Iowa-Missouri State line and extending west along U.S. Highway 136 to junction Missouri Highway 15, thence south along Missouri Highway 15 to junction Missouri Highway 11, thence west along Missouri Highway 11 to junction U.S. Highway 36, thence west along U.S. Highway 36 to junction U.S. Highway 69, thence south along U.S. Highway 69 to the Missouri-Kansas State line. The purpose of this filing is to eliminate the gateway of points in Illinois within the commercial zone of Muscatine, Iowa. *Foodstuffs*, raw and manufactured (except commodities in bulk and commodities requiring special equipment), (1) from Philadelphia, Pa., and points within 30 miles thereof, and Baltimore, Md., to points in that part of Minnesota on and west of a line beginning at the Iowa-Minnesota State line and extending north along U.S. Highway 218 to junction Interstate Highway 35, thence north along Interstate Highway 35 to junction Interstate Highway 494, thence west along Interstate Highway 494 to junction Minnesota Highway 152, thence north along Minnesota Highway 152 to junction U.S. Highway 10, thence north along U.S. Highway 10 to junction Minnesota Highway 371, thence north along Minnesota Highway 371 to junction U.S. Highway 71, thence north along U.S. Highway 71 to the Canada-Minnesota State line, and points in Missouri, on, north and west of a line beginning at the Iowa-Missouri State line and extending west along U.S. Highway 136 to junction Missouri Highway 15, thence south along Missouri Highway 15 to junction Missouri Highway 11, thence west along Missouri Highway 11 to junction U.S. Highway 36, thence west along U.S. Highway 36 to junction U.S. Highway 69, thence south along U.S. Highway 69 to the Missouri-Kansas State line. The purpose of this filing is to eliminate the gateway of points in Illinois within the commercial zone of Muscatine, Iowa. *Foodstuffs*, raw and manufactured (except commodities in bulk and commodities requiring special equipment), (1) from Philadelphia, Pa., and points within 30 miles thereof, and Baltimore, Md., to points in that part of Minnesota on and west of a line beginning at the Iowa-Minnesota State line and extending north along U.S. Highway 218 to junction Interstate Highway 35, thence north along Interstate Highway 35 to junction Interstate Highway 494, thence west along Interstate Highway 494 to junction Minnesota Highway 152, thence north along Minnesota Highway 152 to junction U.S. Highway 10, thence north along U.S. Highway 10 to junction Minnesota Highway 371, thence north along Minnesota Highway 371 to junction U.S. Highway 71, thence north along U.S. Highway 71 to the Canada-Minnesota State line, and points in Missouri, on, north and west of a line beginning at the Iowa-Missouri State line and extending south along U.S. Highway 63 to junction Missouri Highway 11, thence south along Missouri Highway 11 to junction U.S. Highway 36, thence west along U.S. Highway 36 to junction U.S. Highway 69, thence south along U.S. Highway 69 to junction Missouri Highway 116, thence west along Missouri Highway 116 to the Kansas-Missouri State line.

The purpose of this filing is to eliminate the gateways of points in Ohio and points in Illinois within the commercial zone of Muscatine, Iowa. (2) From points in West Virginia within two miles of the Ohio River extending north from Sistersville, W. Va., to junction West Virginia-Ohio-Pennsylvania State lines, to points in that part of Minnesota, on, north and west of a line beginning at the Iowa-Minnesota State line and extending north along U.S. Highway 59 to the Minnesota-Canada line. The purpose of this filing is to eliminate the gateways of points in Ohio and points in Illinois within the commercial zone of Muscatine, Iowa. *Foodstuffs*, raw and manufactured, from points in Ohio within two miles of the Ohio River extending north from Fly, Ohio, to junction West Virginia-Ohio-Pennsylvania State lines, to points in that part of Minnesota, on, north, and west of a line beginning at the Iowa-Minnesota State line and extending north along U.S. Highway 59 to the Minnesota-Canada line. The purpose of this filing is to eliminate the gateways of points in Illinois within the commercial zone of Muscatine, Iowa.

No. MC 124211 (Sub-No. E94), filed August 14, 1977. Applicant: HILT TRUCK LINE, INC., P.O. Box 988, D.T.S., Omaha, Nebr. 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: *Meats, meat products, meat by-products, and articles distributed by meat packinghouses*, as described in sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), (a) Between points in Nebraska (except Richardson County), on the one hand, and, on the other, points in Louisiana. *(Lincoln, Nebr.); (b) between points in Richardson County, Nebr., on the one hand, and, on the other, points in Louisiana on and east of the Mississippi River, and on and south of Interstate Highway 12. *(Lincoln, Nebr.); (c) from points in Louisiana, to points in North Dakota, South Dakota, and Wyoming. *(Lincoln, Nebr. and points in Saunders County, Nebr.); (d) from points in Louisiana, to points in Iowa on, north and west of a line beginning at the Iowa-Nebraska State line, thence over U.S. Highway 6 to junction U.S. Highway 71, thence over U.S. Highway 71 to junction U.S. Highway 20, thence over U.S. Highway 20 to junction U.S. Highway 169, thence over U.S. Highway 169 to the Iowa-Minnesota State line. *(Lincoln, Nebr. and points in Saunders County, Nebr.); (e) from points in Louisiana on and south of U.S. Highway 80, to Austin, Minn., and points in Minnesota on and west of U.S. Highway 61, and to points in Wisconsin on, west and north of a line beginning at Ashland, Wis., thence over U.S. Highway 63 to junction U.S. Highway 10, thence over U.S. Highway 10 to the Minnesota-Wisconsin State line. *(Lincoln, Nebr. and points in Saunders County, Nebr.). The purpose of this filing is to eliminate the gateways indicated by the asterisks above.

No. MC 124211 (Sub-No. E95), filed August 16, 1977. Applicant: HILT TRUCK LINE, INC., P.O. Box 988, D.T.S., Omaha, Nebr. 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, by-products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), (1) From points in Nebraska (except points on and south of Nebraska Highway 2 and on and east of U.S. Highway 77), to points in Indiana, Michigan (except the upper peninsula), and Ohio, *(points in Saunders County, Nebr.); (2) From points in Nebraska on and west of a line beginning at the Nebraska-South Dakota State line, thence over U.S. Highway 81 to junction U.S. Highway 275, thence over U.S. Highway 275 to junction Nebraska Highway 32, thence over Nebraska Highway 32 to junction U.S. Highway 73, thence over U.S. Highway 73 to junction U.S. Highway 30, thence over U.S. Highway 30 to the Nebraska-Iowa State line (except points on and south of Nebraska Highway 2 and on and east of U.S. Highway 77), to points in Illinois *(points in Saunders County, Nebr.); (3) From points in Nebraska (except points on and south of Nebraska Highway 2 and on and east of U.S. Highway 77), to points in Illinois on and east of Interstate Highway 55 *(points in Saunders County, Nebr.); (4) From points in Nebraska on and south of U.S. Highway 30 and on and west of U.S. Highway 77, to points in the upper peninsula of Michigan *(points in Saunders County, Nebr.); (5) From points in Nebraska on and south of Nebraska Highway 2 (except points in Richardson County, Nebr.), to points in Michigan, and those points in Indiana and Ohio on and north of U.S. Highway 30 *(points in Saunders County, Nebr.). The purpose of this filing is to eliminate the gateways indicated by the asterisks above.

No. MC 124211 (Sub-No. E98), filed August 22, 1977. Applicant: HILT TRUCK LINE, INC., P.O. Box 988, D.T.S., Omaha, Nebr. 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Processed meats, meat products, meat. byproducts, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), (a) from Kansas City, Mo., to points in Nebraska on, west, and north of a line beginning at the South Dakota-Nebraska State line and extending along Nebraska Highway 14 to junction U.S. Highway 34, thence along U.S. Highway 34 to the Nebraska-Colorado State line *(Grand Island, Nebr.); (b) from Chicago, Ill., to points in Nebraska on and west of a line beginning at the Kansas-Nebraska State line, thence over Nebraska Highway 15 to junction Nebraska Highway 74, thence

V 42 174 SEP 8 77 UMI

over Nebraska Highway 74 to the junction U.S. Highway 81, thence over U.S. Highway 81 to junction Nebraska Highway 91, thence over Nebraska Highway 91 to junction U.S. Highway 281, thence over U.S. Highway 281 to the Nebraska-South Dakota State line °(Grand Island, Nebr.). The purpose of this filing is to elliminate the gateway indicated by the asterisks above.

No. MC 124211 (Sub-No. E105), filed August 23, 1977. Applicant: HILT TRUCK LINE, INC., P.O. Box 988, D.T.S., Omaha, Nebr. 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk and except liquid commodities in bulk, in tank vessels), (a) from points in Nebraska on and south of U.S. Highway 30, and on and east of U.S. Highway 81, to points in North Dakota °(points in Saunders County, Nebr.); (b) from points in Nebraska on and south of U.S. Highway 30, and on and east of U.S. Highway 281, to points in North Dakota on and north of U.S. Highway 10 °(points in Saunders County, Nebr.); (c) from points in Nebraska on and south of U.S. Highway 30, to points in North Dakota on and east of North Dakota Highway 18 °(points in Saunders County, Nebr.). The purpose of this filing is to elliminate the gateway indicated by asterisks.

By the Commission.

LIST OF INTERMEDIARIES

September 1, 1977.

The provision of the Canons of Conduct of the Interstate Commerce Commission relating to Intermediaries (49 C.F.R. § 1000.735-23) reads as follows:

Intermediaries. Members and employees of the Commission shall not recommend or suggest the use of any nongovernmental intermediary (individual, firm, corporation, or other entity) offering any service as consultant, agency representative, attorney, expeditor, or specialist for the purpose of assisting in any negotiations, transactions, or other business with or before this Commission: *Provided, however*, That making available general reference lists of such nongovernmental intermediaries, the use of which is authorized by the Secretary of the Commission shall not be deemed to be in violation of this section.

The following is a general reference list of nongovernmental intermediaries in the Washington area who regularly utilize the Commission's records in the Public Tariff File Room of its Bureau and others who engage in rate work, the preparation of tariff material, etc.

The list has been prepared solely for the information and convenience of the public. It does not constitute an endorsement by the Commission, nor is any responsibility for the services rendered assumed by the Bureau, its officers, supervisors or employees. Without designating any intermediary listed of the specialized qualifications of any, the entire list must be made available.

Changes and additions to the list will be considered upon request to the Director of the Bureau of Traffic, subject to authorization by the Secretary of the Commission.

H. G. Homme, Jr.,
Acting Secretary.

Alltran Associated, Mr. Lewis, Box 2018, Winchester, Va. 22601, (703-955-3025).

[Notice No. 109TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

September 1, 1977.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the office of the Secretary, Interstate Commerce Commis-

V 42 174 SEP 8 77 UMI

sion, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 20916 (Sub-No. 28TA), filed August 17, 1977. Applicant: JOHN T. SISK, Rt. 2, Box 182 B, Culpeper, Va. 22701. Applicant's representative: Frank B. Hand, Jr., P.O. Drawer C, Berryville, Va. 22611. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber*, from the plant facilities and sawmills of Taylor-Ramsey Corp., located (1) on Route 501 one-mile west of Big Island, Va., (2) on Route 130 in the village of Natural Bridge Station, Va., (3) on Virginia Highway 28 just south of Manassas, (4) on Route 250 two miles west of McDowell in Highland County, Va., and (5) on Rutherford Street in Lynchburg, Va., to points in N.C., for 180 days. Supporting shipper(s): Taylor-Ramsey Corp., P.O. Box 97, Lynchburg, Va. 24505. Send protests to: W. C. Hersman, District Supervisor, Interstate Commerce Commission, 12th and Constitution Ave., N.W., Room 1413, Washington, D.C. 20423.

No. MC 1977 (Sub-No. 27TA), filed August 15, 1977. Applicant: NORTHWEST TRANSPORT SERVICE, INC., 5231 Monroe St., Denver, Colo. 80216. Applicant's representative: Leslie R. Kehl, Suite 1600, Lincoln Center Bldg., 1660 Lincoln St., Denver, Colo. 80264. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, except household goods as defined by the Commission, between Boise, Pocatello, Idaho Falls and Blackfoot, Idaho, on the one hand, and, on the other, points in the Idaho Counties of Washington, Payette, Gem, Canyon, Ada, Boise, Elmoore, Owyhee, Gooding, Twin Falls, Lincoln, Jerome, Minidoka, Cassia, Power, Oneida, Bannock, Bingham, Caribou, Franklin, Bear Lake, Bonneville, Jefferson, Madison and Fremont, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: There are approximately one-hundred and seventy-four (174) statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Sent protests to: District Supervisor Roger L. Buchanan, Interstate Commerce Commission, 721 19th St., 492 U.S. Customs House, Denver, Colo. 80202.

No. MC 51146 (Sub-No. 519TA), filed August 19, 1977. Applicant: SCHNEIDER TRANSPORT, INC., P.O. Box 2298, Green Bay, Wis. 54306. Applicant's representative: Neil A. DuJarden, (Same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Metal containers and metal container ends*, from Memphis, Tenn., to Nashua, N.H., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): American Can Co., 915 Harger Rd., Oak Brook, Ill. 60521. (W. A. Frazier) Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building & Courthouse, 517 East Wisconsin Ave., Room 619, Milwaukee, Wis. 53202.

No. MC 51146 (Sub-No. 520TA), filed August 17, 1977. Applicant: SCHNEIDER TRANSPORT INC., P.O. Box 2298, Green Bay, Wis. 54306. Applicant's representative: Neil A. DuJardin, (Same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cellulose wood fiber insulation, materials, equipment, supplies, machinery parts and accessories* thereto utilized in the manufacture, production, packaging, installation, and distribution of cellulose wood fiber insulation, for 180 days. [NOTICE NO. 110TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

SEPTEMBER 2, 1977.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 109724 (Sub-No. 4TA), filed August 18, 1977. Applicant: PAUL J. SCHMIT, d.b.a. PAUL J. SCHMIT TRUCKING, 17755 Bedford Drive, Brookfield, Wis. 53005. Applicant's representative: Wm. C. [Volume No. 33]

PETITIONS, APPLICATIONS, FINANCE MATTERS (INCLUDING TEMPORARY AUTHORITIES), RAILROAD ABANDONMENTS, ALTERNATE ROUTE DEVIATIONS, AND INTRASTATE APPLICATIONS.

SEPTEMBER 2, 1977.

PETITIONS FOR MODIFICATION, INTERPRETATION, OR REINSTATEMENT OF OPERATING RIGHTS AUTHORITY

NOTICE

The following petitions seek modification or interpretation of existing operating rights authority, or reinstatement of terminated operating rights authority.

The Commission has recently provided for easier identification of substantive petition matters and all documents should clearly specify the "docket", "sub", and "suffix" (e.g. M1, M2) numbers identified by the FEDERAL REGISTER notice.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protest shall comply with Special Rule 247(d) of the Commission's General Rules of Practice (49 CFR 1100.247)[1] and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

No. MC 921 (Sub-No. 22), M1, filed July 25, 1977. (Notice of filing of petition to eliminate restriction). Petitioner: DEAN TRUCK LINE, INC., P.O. Box 631, Corinth, Miss. 38834, representative: A. Doyl Cloud, Jr., 2008 Clark Tower, 5100 Popular Ave., Memphis, Tenn. 38127. Petitioner holds a motor *common carrier* Certificate in No. MC 921 (Sub-No. 22), issued December 11, 1975, authorizing transportation, over regular routes, *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment);

(1) Between Birmingham, Ala., and Red Bay, Ala., as an alternate route for operating convenience only in connection with carrier's otherwise authorized regular-route operations, serving all intermediate points in Mississippi: From Birmingham over U.S. Highway 78 to Tupelo, Miss., thence over U.S. Highway 45 to Corinth, Miss., thence over U.S. Highway 72 to Iuka, Miss., thence over Mississippi Highway 25 to Belmont, Miss., thence over Mississippi Highway 366 to the Alabama-Mississippi State Line, thence over Alabama Highway 19 to Red Bay, and return over the same route.

(2) Between Belmont, Miss., and Fulton, Miss., as an alternate route for operating convenience only in connection with carrier's otherwise authorized regular-route operations, serving no intermediate points: From Belmont over Mississippi Highway 25 to Fulton, and return over the same route.

(3) Between Tremont, Miss., and Red Bay, Ala., as an alternate route for operating convenience only in connection with carrier's otherwise authorized regular-route operations, serving no intermediate points: From Tremont over Mississippi Highway 23 to the Alabama-Mississippi State Line, thence over Alabama Highway 24 to Red Bay, and return over the same route.

(4) Between Winfield, Ala., and Hackleburg, Ala., as an alternate route for operating convenience only in connection with carrier's otherwise authorized regular-route operations, serving no intermediate points; and serving Hackleburg for purposes of joinder only: From Winfield over Alabama Highway 57 to junction Alabama Highway 44, thence over Alabama Highway 44 to junction Alabama Highway 45, thence over Alabama Highway 45 to junction Alabama Highway 49, thence over Alabama Highway 49 to Hackleburg, and return over the same route.

(5) Between Hackleburg, Ala., and Red Bay, Ala., as an alternate route for operating convenience only in connection with carrier's authorized regular-route operations, serving no intermediate points; and serving Hackleburg for purposes of joinder only: From Hackleburg over Alabama Highway 172 to junction Alabama Highway 19, at or near Vina, Ala., thence over Alabama Highway 19 to Red Bay, Ala., and return over the same route.

(6) Between Hamilton, Ala., and Hackleburg, Ala., as an alternate route for operating convenience only in connection with carrier's authorized regular-route operations, serving no intermediate points: From Hamilton over U.S. Highway 43 to Hackleburg, and return over the same route.

(7) Between Birmingham, Ala., and Iuka, Miss., as an alternate route for operating convenience only in connection with carrier's authorized regular-route operations, serving no intermediate points: From Birmingham over U.S. Highway 31 to junction Alabama Highway 157, thence over Alabama Highway 157 to junction U.S. Highway 72 south of Muscle Shoals, Ala., thence over U.S. Highway 72 to Iuka, and return over the same route.

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423

V 42 174 SEP 8 77 UMI

The authority granted above may not be tacked or joined with, any other authority now held by carrier.

By the instant Petition, Petitioner seeks to delete the restriction "the authority granted above may not be tacked or joined with, any other authority now held by carrier."

No. MC 129455 and (Sub-Nos. 2, 5 and 6) M1 (Correction) (Notice of Filing of Petition to Broaden Commodity Description and Add Origin Points), filed June 13, 1977, as published in the FEDERAL REGISTER issue of August 18, 1977, and republished, as corrected, this issue. Petitioner: CARRETTA TRUCKING INC., 301 Mayhill Street, Saddle Brook, N.J. 07662. Petitioner's representative: Martin M. Geffon, P.O. Box 154, Willingboro, N.J. 08046. Petitioner holds motor *contract carrier* Permits in No. MC 129455 and (Sub-Nos. 2, 5 and 6) issued July 10, 1970, November 10, 1969, September 27, 1974 and November 11, 1975, respectively, authorizing transportation in (1) No. MC 129455, as pertinent, over irregular routes, of *Materials and supplies* used in the manufacture of swimming pools and garden sheds, from St. Louis, Mo., and Bakerstown, Pa., to Paterson, N.J., and the plant site of Quaker City Industries at Carlstadt, N.J., with no transportation for compensation on return except as otherwise authorized. Restriction: The operation authorized herein are limited to a transportation service to be performed, under a continuing contract, or contracts, with Quaker City Industries of Carlstadt, N.J. (2) in MC 129455 (Sub-No. 2), as pertinent, over irregular routes of *Steel coils*, from McKeesport, Pa., to Paterson, N.J., with no transportation for compensation on return except as otherwise authorized. Restriction: The operations authorized herein are limited to a transportation service to be performed, under a continuing contract, or contracts with Quaker City Industries, Inc., of Carlstadt, N.J.; (3) in No. MC 129455 (Sub-No. 5), over irregular routes, of *Steel* used in the manufacturer of garden sheds, (a) from Youngstown, Ohio, to Saddle Brook, N.J., with no transportation for compensation on return except as otherwise authorized; (b) from Wheeling, W. Va., to Lyndhurst and Saddle Brook, N.J., with no transportation for compensation on return except as otherwise authorized. Restriction: The operations authorized herein are limited to a transportation service to be performed under a continuing contract, or contracts, with Quaker City Industries, Inc.; (4) in MC 129455 (Sub-No. 6), over irregular routes of (A) *Steel* used in the manufacture of garden sheds, (1) from Yorkville, Ohio, to Lyndhurst and Saddle Brook, N.J., and Allentown and Morrisville, Pa., with no transportation for compensation on return except as otherwise authorized; and (2) from Morrisville and Allentown, Pa., to Saddle Brook, N.J., with no transportation for compensation on return except as otherwise authorized; (B) *Steel*, in coils, from Philadelphia, Pa., to Allentown, Pa., and Lyndhurst and Saddle Brook, N.J., with no transportation for compensation on return except as otherwise authorized. Restriction: The operations authorized herein are limited to a transportation service to be performed under a continuing contract, or contracts, with Quaker City Industries, Inc., of Carlstadt, N.J. By the instant petition, petitioner seeks to include *materials and supplies used in the manufacture of swimming pools and garden sheds* and to add the origins points of Pennsylvania, West Virginia and Ohio, in the above-named authorities, under a continuing contract, or contracts, with Quaker City Industries, Inc., of Saddle Brook, N.J. The purpose of this correction is to clarify administrative matters in assigning the docket No. MC 129455 and (Sub-Nos. 2, 5 and 6) M1.

No. MC 129455 and (Sub-Nos. 2 and 3) M2 (Correction) (Notice of Filing of Petition to Broaden Commodity Description), filed June 20, 1977, as published in the FEDERAL REGISTER issue of August 18, 1977, and republished, as corrected, this issue. Petitioner: CARRETTA TRUCKING, INC., 301 Mayhill Street, Saddle Brook, N.J. 07662. Petitioner's representative: Martin M. Geffon, P.O. Box 154, Willingboro, N.J. 08046. Petitioner holds motor *contract carrier* Permits in No. MC 129455 and (Sub-Nos 2 and 3), issued July 10, 1970, November 10, 1969, and March 23, 1972, respectively, authorizing transportation (1) in No. MC 129455 as pertinent, over irregular routes, of *Swimming pools, garden sheds, and radiator enclosures*, from Paterson, N.J., and the plantsite of Quaker City Industries located at Carlstadt, N.J., to points in Arkansas, California, Illinois, Indiana, Kentucky, Michigan, Minnesota, Missouri, New York, Ohio, Oklahoma, Virginia (except Arlington and Fairfax Counties), and those points in that part of Pennsylvania west of the Susquehanna River, under a continuing contract, or contracts with Quaker City Industries of Carlstadt, N.J.; (2) in No. MC 129455 (Sub-No. 2) as pertinent over irregular routes, of *swimming pools, garden sheds, and radiator enclosures*, from Carlstadt and Paterson, N.J., to points in Georgia, Florida, South Carolina, North Carolina, Maryland, Delaware, Connecticut, Rhode Island, Massachusetts, Washington, Colorado, Utah, Arizona, Texas, Louisiana, Wisconsin, Tennessee, the District of Columbia, points in Arlington and Fairfax Counties, Va., and points in that part of Pennsylvania east of the Susquehanna River, under a continuing contract or contracts with Quaker City Industries, Inc., of Carlstadt, N.J.; and (3) in No. MC 129455 (Sub-No. 3), over irregular routes, of: *swimming pools, garden sheds, and radiator enclosures*, from Paterson, Carlstadt, and Saddle Brook, N.J., to points in Alabama, Idaho, Iowa, Kansas, Maine, Mississippi, Montana, Nebraska, Nevada, New Hampshire, New Mexico, North Dakota, Oregon, South Dakota, Vermont, West Virginia, and Wyoming, under a continuing contract or contracts with Quaker City Industries, Inc., of Saddle Brook, N.J. By the instant petition, petitioner seeks to broaden the commodity description of all three of the above Permits to include "redwood products." The purpose of this correction is to clarify administrative matters in assigning the docket No. MC 129455 and (Sub-Nos. 2 and 3) M2 in lieu of No. MC 129455 and (Sub-Nos. 2 and 3) M1.

REPUBLICATIONS OF GRANTS OF OPERATING RIGHTS AUTHORITY PRIOR TO CERTIFICATION

NOTICE

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the FEDERAL REGISTER.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such pleading shall comply with Special Rule 247(d) of the Commission's General Rules of Practice (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if not representative is named.

No. MC 119395 (Sub-No. 2) (Republication) (Notice of Filing of Petition to Modify Permit), filed November 30, 1976, published in the FEDERAL REGISTER issue of December 30, 1976, and republished this issue. Petitioner: WILLIAM'S CHEMICAL TRANSPORT, INC., 500 Lambson Lane, New Castle, Del. 19720. Petitioner's representative: E. Stephen Heisley, 805 McLachen Bank Building, 666 Eleventh Street NW., Washington, D.C. 20001. An Order of the Commission, Review Board Number 3, dated August 5, 1977, and served August 19, 1977, finds that modification of petitioner's Permit No. MC 119395 (Sub-No. 2), issued November 16, 1973 to read "(1) Drugs and chemicals, in containers, and materials, equipment, and supplies used in the manufacture and distribution of drugs and chemicals (except in bulk), between the facilities of ICI United States, Inc., at or near Newark, Del., on the one hand, and, on the other, points in Connecticut, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont and the District of Columbia; (2) drugs and chemicals, in containers, and materials, equipment, and supplies used in the manufacture and distribution of drugs and chemicals (except in bulk), from the facilities of ICI United States, Inc., at or near New Castle, Del., to points in Connecticut, Maine, Maryland (except Baltimore), Massachusetts, New Hampshire, New Jersey (except Trenton, Camden,

and points within 20 miles of New York, N.Y.), New York (except Beacon and points in the New York, N.Y., commercial zone, as defined by the Commission), Pennsylvania (except Ambler, Harrisburg, Philadelphia, Chester, Fernwood, and Marcus Hook), Rhode Island, and Vermont, and the District of Columbia; and (3) drugs and chemicals, in containers, and materials, equipment, and supplies used in the manufacture and distribution of drugs and chemicals (except in bulk), from points in the destination set forth in (2) above, including the excepted points, to the above described origin facilities in (1), (2), and (3) above under a continuing contract or contracts with ICI United States, Inc., of Wilmington, Del." will be consistent with the public interest and the national transportation policy; that petitioner is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to give notice of the broadening of the commodity description in (2) and (3) above in the modifications authorized to petitioner's Permit.

No. MC 126545 (Sub-No. 8) (Republication), filed January 14, 1976, published in the FEDERAL REGISTER issue of February 26, 1977, and republished this issue. Applicant: GLENERY, INC., 173 Hickory Street, Kearny, N. J. 07032. Applicant's representative: William J. Augello, 120 Main Street, P.O. Box Z, Huntington, N.Y. 11743. An Order by the Commission, Division 1, Acting as an Appellate Division, dated August 9, 1977, and served August 17, 1977, finds on reconsideration, that operation by applicant, in interstate or foreign commerce, as a *contract carrier* by motor vehicle, over irregular routes, of (1) *sanitary tissue paper*, from Milltown, N.J., to Holyoke, Mass., (2) *plastic film*, from Edison, N.J. to Holyoke, Mass., (3) *disposable surgical and clinical paper products*, from Holyoke, Mass. to New York, N.Y. and points in New Jersey and (4) *inter-office correspondence sales, accounting, and computer data*, and *materials, equipment* and *supplies* used in the manufacture, sale or distribution of sanitary paper products, between Milltown and Edison, N.J., on the one hand, and, on the other, Holyoke, Mass., in mixed loads with the commodities in (1), (2), and (3) above, under a continuing contract or contracts with Cel Fibe, a division of Johnson and Johnson, of Milltown, N.J., and Graham Manufacturing Co., a division of Cel Fibe, of Holyoke, Mass., will be consistent with the public interest and the national transportation policy; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the additional grant of authority in (4) above.

No. MC 128698 (Sub-No. 13) (Republication), filed September 21, 1976, published in the FEDERAL REGISTER issue of October 21, 1976, and republished this issue. Applicant: ERDNER BROTHERS, INC., Davidson Road, Swedesboro, N.J. 08085. Applicant's representative: Chester A. Zyblut, 366 Executive Bldg., 1030 15th St. NW., Washington, D.C. 20005. An Order of the Commission, Review Board Number 3, dated April 28, 1977, and served May 25, 1977, finds that operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of *materials, supplies, and equipment* used in the manufacture and distribution of foodstuffs (except salt, glass bottles and commodities in bulk), from points in Delaware, New Jersey, New York, Ohio, Pennsylvania, Michigan, Virginia, West Virginia, and the District of Columbia to Salisbury, Md., and Downington, Pa., restricted to the transportation of shipments originating at the above-named origin points and destined to the facilities of Campbell Soup Company and Pepperidge Farm, Incorporated, at or near Salisbury, Md., and Downingtown, Pa.; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to broaden the territorial description by the addition of Downingtown, Pa. as a destination point.

No. MC 138875 (Sub-No. 45) (Republication), filed February 16, 1977, published in the FEDERAL REGISTER issue of April 7, 1977, and republished this issue. Applicant: SHOEMAKER TRUCKING CO., a Corporation, 11900 Franklin Road, Boise, Idaho 83705. Applicant's representative: F. L. Sigloh (Same address as applicant). An Order of the Commission, Review Board Number 2, dated August 2, 1977, and served August 19, 1977, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of *doors and door hardware*, from the plantsite of Jim Walter Doors, located at Lindenhurst, N.Y., and Williamsport, Pa., to points in California, Colorado, Idaho, Nevada, Oregon, Utah and Washington. Applicant is fit and willing and able properly to perform the granted service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate the grant of authority of Lindenhurst N.Y. as an origin point in lieu of Lindenhurst, Pa. as originally published in the FEDERAL REGISTER.

No. MC 141241 (Sub-No. 1) (Republication), filed June 28, 1976, published in the FEDERAL REGISTER issue of August 5, 1976, and republished this issue. Applicant: PAUL BREWER, doing business as BREWER TRUCKING COMPANY, P.O. Box 1036, Dillon, S.C. 29536. Applicant's representative: William J. McLeod, 102 N. Third Avenue, Dillon, S.C. 29536. An Order of the Commission, Review Board Number 3, dated July 5, 1977, and served August 12, 1977, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of (1) *furniture and plywood*, from the facilities of Dillon Furniture and Plywood Co., Inc., at Dillon, S.C., to points in Arkansas, Connecticut, Florida, Georgia, Illinois, Iowa, Mississippi, Missouri, New Jersey, North Carolina, Pennsylvania, Tennessee, Virginia, and Wisconsin; and (2) *tires, tubes, and related articles*, from points in Tennessee, Alabama, Ohio, and Oklahoma, to the facilities of Dillon Tire Service, Inc., at Dillon, S.C.; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to give notice of the grant of common carrier authority in lieu of contract carrier authority, and also to give notice of the authority granted in (2) above.

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

NOTICE

The followng applications are governed by Special Rule 247 of the Commission's *General Rules of Practice* (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d) (3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularly the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if not representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

V 42 174 SEP 8 77 UMI

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the Federal Register of a notice that the proceeding has been assigned for oral hearing.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 2900 (Sub.-No. 311), filed August 3, 1977. Applicant: RYDER TRUCK LINES, INC., 2050 Kings Road, P.O. Box 2408, Jacksonville, Fla. 32203. Applicant's representative: S. E. Somers, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: General commodities (except household goods as defined by the Commission, commodities in bulk, commodities of unusual value and those requiring special equipment): Between the junction of U.S. Highway 41 and Interstate Highway 20 and the junction of U.S. Highway 75 and Interstate Highway 20 as an alternate route for operating convenience only; from junction U.S. Highway 41 and Interstate Highway 20 over Interstate Highway 20 to junction of U.S. Highway 75 and Interstate Highway 20, and return over the same route serving the termini and the junction of U.S. Highway 31 and Interstate Highway 20 for the purpose of joinder only.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Jacksonville, Fla., or Washington, D.C.

No. MC 2960 (Sub-No. 16), filed August 2, 1977. Applicant: ENGLAND TRANSPORTATION COMPANY OF TEXAS, (a corporation), 2301 McKinney Street, Houston, Tex. 77023. Applicant's representative: E. Larry Wells, P.O. Box 45538, Dallas, Tex. 75245. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting home furnishings, furniture and home accessories, crated, from the plantsite and storage facilities of Best Imports, Inc., located at Caldwell, Nacogdoches, Dallas, Fort Worth, and Odessa, Tex.; and Fort Smith, Ark., to Houston, Tex., restricted to traffic having a subsequent movement by water.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Dallas or Houston, Tex.

No. MC 3854 (Sub-No. 38), filed July 28, 1977. Applicant: BURTON LINES, INC., 815 Ellis Road, P.O. Box 11306, East Durham Station, Durham, N.C. 27703. Applicant's representative: Edward G. Villalon, 1032 Pennsylvania Bldg., Pennsylvania Ave. and 13th St. NW., Washington, D.C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of roofing materials from the plantsite of Johns-Manville Corp., in Chatham County, Ga., to points in Tennessee, Virginia, and West Virginia.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Raleigh, N.C., or Washington, D.C.

No. MC 8973 (Sub-No. 46), filed July 28, 1977. Applicant: METROPOLITAN TRUCKING, INC., 2424 95th Street, North Bergen, N.J. 07047. Applicant's representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street, NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) Aluminum articles, aluminum products, plastic articles, building materials, equipment and supplies used in the manufacture, sale, processing, distribution and installation of the commodities above (except commodities in bulk), between the plant site of and warehouse facilities utilized by Alcan Aluminum Corp. at or near Woodbridge, N.J., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C.

No. MC 8989 (Sub-No. 224), filed July 26, 1977. Applicant: HOWARD SOBER, INC., 5810 Moeller Road, P.O. Box 216, Fort Wayne, Ind. 46801. Applicant's representative: Gary Geiger (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Motor vehicles and motor vehicle chassis, in initial movements in driveway and truckaway service, and bodies, cabs, parts and accessories for each vehicle, from Harrisburg, Pennsylvania, to points in the United States, including Alaska, but excluding Hawaii.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Chicago, Ill.

No. MC 19227 (Sub-No. 239), filed July 26, 1977. Applicant: LEONARD BROS. TRUCKING CO., INC., 2515 Northwest 20th Street, P.O. Box 520602, Miami, Fla. 33152. Applicant's representative: Thomas A. Leonard, 2515 Northwest 20th Street, Miami, Fla. 33152. Authority is sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Construction, earth moving, excavating, hoisting and material handling machinery and equipment*, (2) *Attachments, accessories, and parts for (1) above when moving in the same shipment with (1) above*, (3) *Materials, supplies, and equipment used in the manufacture, assembly and distribution of commodities in (1) and (2) above (except commodities in bulk)*. Between the plantsite and facilities of ATO Construction Equipment Division at or near Goose Creek, South Carolina, on the one hand, and on the other, points in the United States (except Hawaii and Alaska).

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at either Charleston, S.C., Atlanta, Ga., or Washington, D.C.

No. MC 22229 (Sub-No. 117), filed July 21, 1977. Applicant: TERMINAL TRANSPORT COMPANY, INC., 48 Chester Avenue SE., Atlanta, Ga. 30316. Applicant's representative: Harold H. Clokey, 410 The Equitable Building, Atlanta, Ga. 30303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Paper and Paper Products, from Yulee, Florida, to points in Alabama, Georgia, Illinois, Indiana, Kentucky, and Tennessee.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the Applicant requests that it be held in Jacksonville, Fla., or Atlanta, Ga.

No. MC 25798 (Sub-No. 297), filed August 2, 1977. Applicant: CLAY HYDER TRUCKING LINES, INC., P.O. Box 1186, Auburndale, Fla. 33823. Applicant's representative: Tony G. Russell, Post Office Box 1186, Auburndale, Fla. 33823. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General Commodities* (except commodities in bulk, those which because of size or weight require the use of special equipment, household goods as defined by the Commission, articles of unusual value and Classes A and B Explosives) from the facilities of Drumtop Atlanta Shippers Association, Inc., at Smyrna, Ga., to points in Florida south and east of the Suwanee River. Restricted to shipments originating at and destined to the above described points.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Tampa, Fla., or Atlanta, Ga.

No. MC 26396 (Sub-No. 155), filed August 1, 1977. Applicant: POPELKA TRUCKING CO., doing business as THE WAGGONERS, P.O. Box 990, Livingston, Mont. 59047. Applicant's representative: Jacob P. Billig, 2033 K Street NW., Suite 300, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe, and fittings and accessories necessary for the installation thereof* (1) from the facilities of Certain-Teed Corp. located at or near McPherson, Kans., to points in Florida, Illinois, Oklahoma, and Texas, (2) from the facilities of Certain-Teed Corp. located at or near Social Circle, Ga., to points in Alabama, Arkansas, Colorado, Florida, Illinois, Indiana, Kansas, Kentucky, Maryland, Minnesota, Mississippi, Nebraska, North Carolina, North Dakota, South Carolina, South Dakota, Tennessee, Virginia, West Virginia, Wisconsin, and Wyoming; and (3) from the facilities of Certain-Teed Corp. located at or near Williamsport, Md., to points in Colorado, Illinois, Indiana, Kansas, Minnesota, Nebraska, North Dakota, South Dakota, Wisconsin, and Wyoming.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Washington, D.C.

No. MC 26739 (Sub-No. 97), filed July 22, 1977. Applicant: CROUCH FREIGHT SYSTEMS, INC., P.O. Box 1159, St. Joseph, Mo. 64502. Applicant's representative: Charles W. Singer, 2440 East Commercial Blvd., Fort Lauderdale, Fla. 33308. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in, or used by, agricultural equipment, industrial equipment and lawn and leisure products manufacturers and dealers (except commodities in bulk), (1) between the facilities of, or used by, International Harvester Co. at East Moline, Moline, and Rock Island, Ill., on the one hand, and, on the other, points in Arkansas, Kansas, Louisiana, Mississippi, Missouri, New Mexico, Oklahoma, Tennessee, and Texas; and (2) between the facilities of, or used by, an International Harvester Co. at Canton, Ill., on the one hand, and, on the other, points in Kansas, Missouri, New Mexico, Oklahoma, and Texas. Restrictions: The above authorities are restricted to the transportation of traffic (a) originating at the facilities of, or used by, International Harvester Co. at the points named in each of the respective paragraphs above and destined to points in the States named in said paragraphs, or (b) originating at points in the States named in each of the respective paragraphs above and destined to the facilities of, or used by International Harvester Co. at the points named in said paragraphs, except that the restrictions in (a) and (b) above shall not apply to traffic moving in foreign commerce.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C. Common control may be involved.

No. MC 35706 (Sub-No. 5), filed July 19, 1977. Applicant: ATSL, INC., 6801 State Street, Philadelphia, Pa. 19135. Applicant's representative: Richard Rueda, Suite 612, Two Penn Center Plaza, Philadelphia, Pa. 19102. Authority sought to operate as a *common carrier* by motor vehicle over irregular routes; transporting juvenile furniture and children's vehicles, and materials, supplies and parts used in the manufacture and packaging of such commodities between the plant site and warehouse facilities of Graco Children's Products located in Elverson, Pa., and Hellam, Pa., on the one hand, and, on the other, points in New Jersey, Delaware, Maryland, New York, Connecticut, and Virginia, and the District of Columbia.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Philadelphia, Pa. or Camden, N.J.

No. MC 35831 Sub-No. 13, filed July 28, 1977. Applicant: E. A. Holder, Inc., P.O. Box 69, Kennedale, Tex. 76060. Applicant's representative: Billy R. Reid, P.O. Box 9093, Fort Worth, Tex. 76107. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Lime and limestone, in bags, from the plantsites of Texas Lime Co., at or near Cleburne, Tex., to points in New Mexico, Oklahoma, Louisiana, Arkansas, Kansas, and Colorado.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Fort Worth, Tex., or Dallas, Tex.

No. MC 36509 (Sub-No. 29), filed July 22, 1977. Applicant: LOOMIS ARMORED CAR SERVICE, INC., 821 Sansome Street, San Francisco, Calif. 94111. Applicant's representative: George H. Hart, 1100 IBM Building, Seattle, Wash. 98101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *silver bullion*, between points in Owyhee County, Idaho, on the one hand, and, on the other, Portland, Oreg., under a continuing contract or contracts with Earth Resources Co., DeLamar Silver Mine.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at San Francisco, Calif., Portland, Oreg.; or Seattle, Wash. Common control may be involved.

No. MC 41404, Sub-No. 128, filed August 1, 1977. Applicant: ARGO-COLLIER TRUCK LINES CORPORATION, Post Office Box 440, Martin, Tenn. 38237. Applicant's representative: Mark L. Horne (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food, food products, and food ingredients*, in vehicles equipped with mechanical refrigeration, from the plant and storage facilities of Archer Daniels Midland Co., at Decatur, Ill., to points in Arkansas, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, and Wisconsin, restricted to shipments originating at the named origins.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Springfield, Ill., or St. Louis, Mo. Common control may be involved.

No. MC 43038 (Sub-No. 462), filed July 21, 1977. Applicant: COMMERCIAL CARRIERS, INC., 10701 Middlebelt Road, Romulus, Mich. 48174. Applicant's representative: Paul H. Jones, 29725 Shacket Ave., Madison Heights, Mich. 48071. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Motor Vehicles* (except trailers) in secondary movements, in driveaway service, between Sharonville, Cementdale, and Cincinnati, Ohio, on the one hand, and, on the other, points in Virginia and West Virginia, restricted to the transportation of shipments manufactured, assembled, imported, or distributed by Ford Motor Co.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Detroit, Mich., or Washington, D.C. Common control may be involved.

No. MC 43038 (Sub-No. 465), filed July 25, 1977. Applicant: COMMERCIAL CARRIERS, INC., 10701 Middlebelt Road, Romulus, Mich. 48174. Applicant's representative: Paul H. Jones, 29725 Shacket Ave., Madison Heights, Mich. 48071. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Motor Vehicles* (except trailers) in secondary movements, in truckaway service, between Sharonville, Cementdale, and Cincinnati, Ohio, on the one hand, and, on the other, points in Virginia and West Virginia, restricted to the transportation of shipments manufactured, assembled, imported, or distributed by Ford Motor Co.

NOTE.—Common control may be involved. If a hearing is deemed necessary the applicant requests it be held at either Detroit, Mich., or Washington, D.C.

No. MC 48017 (Sub-No. 9), filed: July 21, 1977. Applicant: CAMEL TRUCKING, INC., 7 Nay Street, East Boston, Mass. 02128. Applicant's representative: Ronald I. Shapss, 450 Seventh Avenue, New York, N.Y. 10001. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, in the transportation of *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Philadelphia, Pa., on the one hand, and, on the other, Haverhill, Boston, and Lowell, Mass., and points within 10 miles of Lowell, Mass.; (2) between Philadelphia, Pa., on the one hand, and, on the other, points in Morris, Passaic, and Somerset Counties, N.J.; and (3) Between Boston and Haverhill, Mass., on the one hand, and, on the other, points in that part of New Hampshire on and south of a line beginning at the Maine-New Hampshire state boundary line and extending along U.S. Highway 202 to junction New Hampshire Highway 9 thence along New Hampshire Highway 9 to the New Hampshire-Vermont state boundary line and those in Vermont on and south of Vermont Highway 9.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Boston, Mass., or New York, N.Y.

No. MC 48221 (Sub-No. 11), filed August 4, 1977. Applicant: W. N. MOREHOUSE TRUCK LINE, INC., 4010 Dahlman Avenue, Omaha, Nebr. 68107. Applicant's representative: Bruce A. Bullock, Suite 530, Univac Building, 7100 West Center Road, Omaha, Nebr. 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages, and advertising material and premiums*, from Golden, Colo., to points in Nebraska; and (2) *Empty malt beverage containers, packaging material, pallets, and scrap malt beverage containers, and packing dunnage*, from points in Nebraska to Golden, Colo.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Omaha, Nebr., or Denver, Colo.

V 42 174 SEP 8 77 UMI

No. MC 51146 (Sub-No. 511), filed July 25, 1977. Applicant: SCHNEIDER TRANSPORT, INC., P.O. Box 2298, Green Bay, Wis. 54306. Applicant's representative: Neil A. Du Jardin (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Stuffed toys* from Omaha, Nebr., to points in Colorado, Kansas, Missouri, Iowa, Wisconsin, Minnesota, Illinois, Indiana, and Michigan.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill.

No. MC 51146 (Sub-No. 512), filed July 28, 1977. Applicant: SCHNEIDER TRANSPORT, INC., P.O. Box 2298, Green Bay, Wis. 54306. Applicant's representative: Wayne Downing (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Frozen foodstuffs* (except commodities in bulk, in tank vehicles), and (2) *frozen meats and meat by-products*, unfit for human consumption (except commodities in bulk, in tank vehicles) from the facilities of Wiscold, Inc. at or near Beaver Dam and Milwaukee, Wis., to points in Georgia, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill.

No. MC 60014 (Sub-No. 52), filed August 4, 1977. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: John P. McMahon, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *lumber, particle-board, plywood, insulating board, hardboard, and accessories and supplies* used in the installation of the named products from the plant-sites and storage facilities of Georgia-Pacific Corp. at or near Citronelle, Hurtsboro, and Peterman, Ala.; Chiefland and Cross City, Fla.; Bellville, Camilla, Durand, Lithonia, McRae, Monticello, Port Wentworth, Savannah, Vienna, and Warrenton, Ga.; Ahoskie, Conway, Dudley, Enfield, Murfreesboro, Plymouth, and Whiteville, N.C.; Alcolu, Conway, Prosperity, Russellville, and Varnville, S.C.; and Emporia, Jarratt, and Vansant, Va., to points in Connecticut, Delaware, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Virginia, Vermont, West Virginia, Wisconsin, and the District of Columbia.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 61396 (Sub-No. 334), filed July 28, 1977. Applicant: HERMAN BROS. INC., 2565 St. Marys Avenue, P.O. Box 189, Omaha, Nebr. 68101. Applicant's representative: John E. Smith II (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquified petroleum gas*, in bulk, in tank vehicles, from (1) West Memphis, Ark., and (2) Arcadia, La., to Arkansas, Tennessee, Missouri, and Mississippi.

No. MC 116763 (Sub-No. 389), filed August 4, 1977. Applicant: CARL SUBLER TRUCKING, INC., North West Street, Versailles, Ohio 45380. Applicant's representative: H. M. Richters, P.O. Box 81, Versailles, Ohio 45380. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes transporting: Paper and paper products (except commodities in bulk), from Ludlow and Covington, Kentucky to points in the United States (except Alaska and Hawaii).

NOTE.—If hearing is deemed necessary, the applicant requests it be held at Columbus, Ohio.

No. MC 116913 (Sub-No. 7), filed: July 22, 1977. Applicant: RAYMOND BUIS doing business as BUIS TRUCKING, 110 Tandy Ave., Somerset, Ky. 42501. Applicant's representative: Robert H. Kinker, 314 W. Main St., P.O. Box 464, Frankfort, Ky. 40601. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer*, from the plantsite of C F Industries, Inc., Terre Haute Nitrogen Complex, near Terre Haute, Ind., to points in Kentucky, under a continuing contract or contracts with Southern States Cooperative, Inc. located at Richmond, Va.

NOTE.—If a hearing is deemed necessary applicant requests that it be held at Louisville, Ky.

No. MC 116915 (Sub-No. 31), filed August 1, 1977. Applicant: ECK MILLER TRANSPORTATION CORPORATION, P.O. Box 1365, Kokomo, Ind. 46901. Applicant's representative: Fred F. Bradley, P.O. Box 773, Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) mining equipment, and parts and attachments of such equipment and (2) equipment, materials and supplies (except in bulk) used in the manufacture of mining equipment: between the facilities of Reading U.S., Inc., located at or near Orange Park, Fla., on the one hand, and, on the other, points in the U.S. including Alaska but excluding Hawaii.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Jacksonville, Fla.

No. MC 116915 (Sub-No. 32) filed August 8, 1977. Applicant: ECK MILLER TRANSPORTATION CORP., 1830 South Plate Street, P.O. Box 1365, Kokomo, Ind. 46901. Applicant's representative: Fred F. Bradley, P.O. Box 773, Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting aluminum pipe, tubing, and accessories between the facilities of Consolidated Pipe & Tube Co. located at or near San Angelo and Lubbock, Texas, on the one hand, and on the other, points in the United States in and east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Lubbock, Tex.

No. MC 116915 (Sub-No. 34), filed August 8, 1977. Applicant: ECK MILLER TRANSPORTATION CORP., 1830 South Plate St., P.O. Box 1365, Kokomo, Ind. 46901. Applicant's representative: Fred F. Bradley, P.O. Box 773, Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Iron and steel and iron and steel articles, between the plantsite and facilities of Sheffield Southern located at or near Lenoir City, Tennessee, on the one hand, and, on the other, points in Alabama, Florida, Georgia, Kentucky, Illinois, Indiana, Michigan, Mississippi, North Carolina, Ohio, South Carolina, Tennessee, and West Virginia.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Knoxville, Tenn., Nashville, Tenn., or Louisville, Ky.

No. MC 116915 (Sub-No. 35), filed August 8, 1977. Applicant: ECK MILLER TRANSPORTATION CORP., 1830 South Plate Street, P.O. Box 1365, Kokomo, Ind. 46901. Applicant's representative: Fred F. Bradley, P.O. Box 773, Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: steel cryogenic storage vessels, parts and accessories and material used in manufacture thereof: between the plant site of Ryan Industries, located at Louisville, Ky., on the one hand, and, on the other, points and places in the United States (except Hawaii and Alaska).

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Louisville or Frankfort, Ky.

No. MC 116915 (Sub-No. 36), filed August 8, 1977. Applicant: ECK MILLER TRANSPORTATION CORP., 1830 South Plate St., P.O. Box 1365, Kokomo, Ind. 46901. Applicant's representative: Fred F. Bradley, P.O. Box 773, Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: general commodities (except in bulk, Classes A and B explosives, household goods as defined by the Commission, livestock and articles of unusual value.) Between the port site and facilities of the Paducah-McCracken County Riverport Authority, located at or near Paducah, Ky., on the one hand, and, on the other, points in Alabama, Arkansas, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Mississippi, Missouri, North Carolina, Ohio, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia, and Wisconsin.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Louisville, Ky., St. Louis, Mo., or Frankfort, Ky.

No. MC 117303 Sub-11, filed July 26, 1977. Applicant: HUDSON VALLEY CEMENT LINES, INC., 6 West Market Street, Hyde Park, N.Y. 12538. Applicant's representative: Norman Weiss, 2 West 45th Street, New York, N.Y. 10036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement* from Belchertown, Mass., to points in Connecticut, Massachusetts, New Hampshire, Vermont, Rhode Island and New York.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either New York, N.Y. or Albany, N.Y.

No. MC 118055 (Sub-No. 2), filed June 29, 1977. Applicant: ISLAND SEAFOODS, LTD., Borden, Prince Edward Island, Canada, COB 1XO. Applicant's representative: Lloyd E. Inman, 253 Coronation Avenue, Summerside, Prince Edward Island, Canada C1N 2E6. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fruit juices* in mixed loads with bananas and other fruits and vegetables, from Boston, Mass. to ports of entry on the International Boundary Line between the United States and Canada at or near Houlton and Calais, Maine.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Bangor, Maine or Portland, Maine.

No. MC 118142 (Sub-No. 154), filed July 28, 1977. Applicant: M. BRUENGER & CO., INC., 6250 North Broadway, Wichita, Kansas 67219. Applicant's representative: Lester C. Arvin, 814 Century Plaza Building, Wichita, Kans. 67202. Authority sought to operate as a *common carrier* by motor vehicle, over *irregular routes*, transporting: *Bananas, and agricultural commodities, otherwise exempt from economic regulation under Section 203(b)(6) of the Act, when transported in mixed loads with bananas, restricted to the transportation of traffic having immediately prior movement by water*, from Charleston, S.C., to points in Indiana, Illinois, Ohio, Wisconsin, Michigan, Minnesota, Kentucky, Tennessee, and West Virginia.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Wichita, Kans., or Kansas City Mo.

No. MC 118151 (Sub-No. 7), filed August 2, 1977. Applicant: R. L. LETSON, P.O. Box 57, Weatherford, Tex. 76086. Applicant's representative: E. Larry Wells, P.O. Box 45538, Dallas, Tex. 75245. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Bananas and agricultural commodities exempt from regulation under Section 203(b)(6) of the Interstate Commerce Act, when transported in mixed loads with bananas, from Galveston, Tex. to points in Washington, Wyoming, Oregon, and Idaho.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Dallas, Tex. or Miami, Fla.

No. MC 118159 (Sub-No. 217), filed August 1, 1977. Applicant: NATIONAL REFRIGERATED TRANSPORT, INC., P.O. Box 51366—Dawson Station, Tulsa, Okla. 74151. Applicant's representative: Warren Taylor (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat by-products and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates* 61 M.C.C. 209 and 766 from Omaha, Nebr. to points in Alabama, Connecticut, Delaware, District of Columbia, Florida, Georgia, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, and Ohio (restricted to traffic originating at the plantsite and storage facilities of Armour and Co. and facilities utilized by Armour and Co. at or near Omaha, Nebr.).

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill. Common control may be involved.

No. MC 118159 (Sub-No. 223), filed August 8, 1977. Applicant: NATIONAL REFRIGERATED TRANSPORT, INC., P.O. Box 51366—Dawson Station, Tulsa, Okla. 74151. Applicant's representative: Warren Taylor (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by-products*, and *articles distributed by meat packinghouses* from Lexington, Ky. to points in the United States (except Alaska and Hawaii).

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill.

No. MC 118202 (Sub-No. 74), filed August 2, 1977. Applicant: SCHULTZ TRANSIT, INC., P.O. Box 406, 323 Bridge Street, Winona, Minn. 55987. Applicant's representative: Thomas J. Beener, P.O. Box 5000, Waterloo, Iowa 50704. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Such commodities as are dealt in by electrical and plumbing wholesalers from points in the United States (except Alaska, Hawaii, and the District of Columbia), to points in Minnesota, South Dakota, and Wisconsin, restricted to shipments destined to the warehouses and job sites of the J. H. Larson Electrical Co. located in the named destination states.

NOTE.—Applicant holds motor contract carrier authority in No. MC-134631 (Sub-No. 4) and other subs, therefore dual operations may be involved. An application is now pending to convert this contract carrier authority to common carrier authority in MC-118202 (Sub.-No. 60). If a hearing is deemed necessary, the applicant requests it be held at Minneapolis-St. Paul, Minn.

No. MC 118318 (Sub-No. 30), filed August 1, 1977. Applicant: IDA-CAL FREIGHT LINES, INC., P.O. Drawer M, Nampa, Idaho 83651. Applicant's representative: Kenneth G. Bergquist, P.O. Box 1775, 910 Main St., Boise, Idaho 83701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting beer and wine from Alameda, Kern, Los Angeles, Madera, Marin, Napa, Orange, Solano, Sonoma, and Stanislaus Counties, Calif., to points in Idaho south of the southern boundaries of Adams, Valley, and Lemhi Counties, Idaho.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Boise, Idaho.

No. MC 118468 (Sub-No. 51), filed August 2, 1977. Applicant: UMTHUN TRUCKING CO., a Corporation, 910 South Jackson Street, Eagle Grove, Iowa 50533. Applicant's representative: William L. Fairbank, 1980 Financial Center, Des Moines, Iowa 50309. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe and fittings and accessories for plastic* pipe from Fairfield, Iowa to points in Arkansas, Colorado, Idaho, Illinois, Indiana, Kansas, Kentucky, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota, Tennessee, Utah, Washington, Wisconsin, and Wyoming, under a continuing contract, or contracts, with Plexco, a Division of Amsted Industries.

NOTE.—If a hearing is deemed necessary, applicant requests that the hearing be held at St. Paul, Minn. or Chicago, Ill. Applicant holds motor common carrier authority in No. MC 124813 (Sub-No. 1 and other subs); therefore dual operations may be involved.

No. MC 118776 (Sub-No. 23), filed July 25, 1977. Applicant: C. L. CONNORS, INC., 3820 Wisman Lane, Quincy, Ill. 62301. Applicant's representative: Frank W. Taylor, Jr., Suite 600, 1221 Baltimore Avenue, Kansas City, Mo. 64105. Authority sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: *Limestone, limestone products, trace minerals, and trace mineral ingredients*, (1) From the plantsite of Calcium Carbonate Co. located at Hannibal, Mo., to points in Alabama, Arkansas, Colorado, Delaware, Florida, Georgia, Louisiana, Maryland, Mississippi, Montana, New York, North Carolina, South Carolina, Virginia, and West Virginia; and (2) from the plantsite of Calcium Carbonate Co. located at Quincy, Ill., to points in North Carolina, South Carolina, and Florida.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held on a consolidated hearing with similar applications, at St. Louis, Mo.

No. MC 118806 (Sub-No. 56), filed August 2, 1977. Applicant: ARNOLD BROS. TRANSPORT LTD., 851 Lagimodiere Boulevard, Suite 200, Winnipeg, Manitoba, Canada R2S 3K4. Applicant's representative: Daniel C. Sullivan, 10 South LaSalle Street, Suite 1600, Chicago, Ill. 60603. Authority sought to operate as a *common carrier* by motor vehicle over irregular routes, transporting: (A) (1) Forestry and logging machinery and equipment; (2) Attachments and parts for the Commodities in (1): From Ports of Entry on the International Boundary Line between the United States and Canada in Michigan and New York to points in the United States (except Alaska and Hawaii); and (B) Equipment, materials and supplies used in the manufacture or distribution of the Commodities in A (1) and (2): From points in the United States (except Alaska and Hawaii) to the Ports of Entry on the International Boundary Line between the United States and Canada in Michigan and New York; restricted to traffic moving in foreign commerce in (A) and (B) above.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Detroit, Mich. or Chicago, Ill.

No. MC 119619 (Sub-No. 110) (correction), filed July 1, 1977, published in the FEDERAL REGISTER issue of August 11, 1977, and republished as corrected this issue. Applicant: DISTRIBUTORS SERVICE CO., INC., a Corporation, 2000 West 43rd St., Chicago, Ill. 60609. Applicant's representative: Arthur J. Piken, One Lefrak City Plaza, Flushing, N.Y. 11368. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Pneumatic tires and tire tubes*, from the facilities of Seiberling Tire and

V42174 SEP 8 77 UMI

Rubber Co., located in Akron and/or Barberton, Ohio, to points in the United States (except Alaska, Hawaii, Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut), (2) *antifreeze* (except in bulk in tank vehicles), from Pittsburgh, Pa., Wyandotte, Mich., Omaha, Nebr., Kansas City, Mo., Bayonne, N.J., Atlanta, Ga., St. Louis, Mo., Ludlow, Ky., West Memphis, Ark., Houston, Tex., Geismar, La., McKees Rocks, Pa., Minneapolis, Minn., Chicago, Ill., Los Angeles, Calif., San Francisco, Calif., and Vancouver, Wash. to points in the United States (except Alaska, Hawaii, Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut); and (3) batteries, from Fairfield, Conn., Atlanta, Ga., Memphis, Tenn., Minneapolis, Minn., Omaha, Nebr., Dallas, Tex., Denver, Colo., Logansport, Ind., and Richmond, Calif., to points in the United States (except Alaska, Hawaii, Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut).

NOTE.—The purpose of this republication is to indicate the correct exception in paragraph (2). If a hearing is deemed necessary, the applicant requests that it be held at Chicago, Ill.

No. MC 119670 (Sub-No. 29), filed August 2, 1977. Applicant: THE VICTOR TRANSIT CORP., 5250 Este Ave., P.O. Box 32115, Cincinnati, Ohio 45232. Applicant's representative: Robert H. Kinker, 314 W. Main St., P.O. Box 464, Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper, fibreboard, pulpboard and strawboard (except corrugated)*, from Carthage, Ind. to Illinois, Ohio, West Virginia, and Louisville, Ky. and its commercial zone.

NOTE.—If a hearing is deemed necessary applicant requests that it be held at Cincinnati, Ohio.

No. MC 119875 (Sub-No. 10), filed August 4, 1977. Applicant: WAR-HUNT TRUCKING CO., INC., Box 92A, R.D. No. 3, Allentown, Pa. 18104. Applicant's representative: John W Frame, Box 626, 2207 Old Gettysburg Road, Camp Hill, Pa. 17011. Authority sought to operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting: *Confectionery and confectionery products* in vehicles equipped with mechanical refrigeration (except in bulk), from the plantsite and storage facilities of M. & M./Mars, division of Mars, Inc., at or near Hackettstown, N.J. and Elizabethtown, Pa., to points in Ohio, restricted to traffic originating at the above-named origins and destined to points in the named destination state.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Harrisburg, Pa.

No. MC 119988 (Sub-No. 119), filed July 26, 1977. Applicant: GREAT WESTERN TRUCKING CO., INC., Highway 103 East, P.O. Box 1384, Lufkin, Tex. 75901. Applicant's representative: Clayte Binion, 1108 Continental Life Building, Fort Worth, Tex., 76102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Roofing asphalt*, in drums, from Memphis, Tenn., to points in Alabama, Arkansas, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, and Texas; and (2) *items utilized in the manufacture and distribution* of roofing asphalt, from points in Alabama, Arkansas, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, and Texas to Memphis, Tenn.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Memphis, Tenn., or Dallas, Tex.

No. MC 120761 (Sub No. 27), filed August 1, 1977. Applicant: NEWMAN BROS. TRUCKING CO., a Corporation, 6559 Midway Road, P.O. Box 13302, Fort Worth, Tex. 76118. Applicant's representative: Clayte Binion, 1108 Continental Life Building, Fort Worth, Tex. 76102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *Iron and steel, and iron and steel articles*, from the plantsite of Nucor Steel Corp., located at or near Jewett, Tex., to points in Alabama, Georgia, Florida and South Carolina.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Dallas, Tex. Common control may be involved.

No. MC 120981 (Sub-No. 22), filed July 21, 1977. Applicant: BESTWAY EXPRESS, INC., 905 Visco Dr., Nashville, Tenn. 37210. Applicant's representative: George M. Catlett, Suite 708, McClure Building, Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: General commodities, (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) (1) Between Nashville, Tenn. and Lexington, Ky.: From Nashville, Tenn. over Interstate Highway 65 to junction of Bluegrass Parkway, thence over Blue Grass Parkway to junction of U.S. Highway 60, thence over U.S. Highway 60, to Lexington, Ky., and return over the same route, serving no intermediate points, restricted against the transportation of traffic moving from or to points in the Louisville, Ky., commercial zone; and (2) between Lexington, Ky., and Delaplain, Ky.: From Lexington, Ky., over U.S. Highway 25 to junction of Ky. Highway 620, thence over Ky. Highway 620 to Delaplain, Ky., and return over the same route, serving all intermediate points, restricted against the handling of traffic originating at, or destined to, points in Connecticut, Delaware, Illinois, Indiana, Iowa, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Virginia, West Virginia, Wisconsin, and the District of Columbia.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Nashville, Tenn. or Lexington, Ky.

No. MC 121060 (Sub No. 47), Filed July 28, 1977. Applicant: ARROW TRUCK LINES, INC., P.O. Box 1416, Birmingham, Ala. 35201. Applicant's representative: William P. Jackson, Jr., 3426 North Washington Blvd., P.O. Box 1267, Arlington, Va. 2210. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: Pipe, valves, fittings, hydrants and parts and accessories for the foregoing commodities (except in bulk), from the facilities of United States Pipe and Foundry Co., at or near Birmingham and Bessemer, Ala., to points in Iowa, Wisconsin, Illinois, Indiana, Michigan, Ohio, Kentucky and Missouri.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Birmingham, Ala.

No. MC 123048 (Sub-No. 361), filed: August 1, 1977. Applicant: DIAMOND TRANSPORTATION SYSTEM, INC., 5021–21st St., Post Office Box 1557, Racine, WI 53401. Applicant's representative: Paul C. Gartzke, 121 West Doty St., Madison, WI 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Bus Bodies and Attachments, Accessories and Parts, from Woodlawn, Tex. to Ports of Entry on the International Boundary between the United States and

Canada in Michigan and New York; restricted to movements destined to Canada.

No. MC 123048 (Sub-No. 362), filed: August 1, 1977. Applicant: DIAMOND TRANSPORTATION SYSTEM, INC., 5021–21st Street, Post Office Box 1557, Racine, WI 53401. Applicant's representative: Paul C. Gartzke, 121 West Doty St., Madison, WI 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Truck Cabs, from St. Joseph County, Ind. to Woodlawn, Tex.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held either at Chicago, Ill. or Washington, D.C.

Smith, Suite 2465, One Indiana Square, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting (1) *Plastic resin*, from Trenton, N.J., to points in Michigan, Illinois, Indiana, Ohio, Tennessee, and Arkansas; and (2) *scrap plastic*, from points in Michigan, Illinois, Indiana, Ohio, Tennessee, and Arkansas to Trenton, N.J.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 135457 (Sub-No. 5), filed August 2, 1977. Applicant: COMMERCIAL CARTAGE CO., a corporation, 343 Axminster Drive, Fenton (St. Louis County), Mo. 63026. Applicant's representative: R. A. Wilson, P.O. Box 777, Bridgeton, Mo. 63044. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, in bulk, in tank vehicles, from the plantsite of Williams Pipe Line Co., located at or near St. Charles, Mo., to points in Illinois.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at either St. Louis, Mo., Springfield, Ill., or Kansas City, Mo.

No. MC 135639 (Sub-No. 7), filed July 28, 1977. Applicant: QUEENSWAY, INC., 105 North Keyser Avenue, Old Forge, Pa. 18518. Applicant's representative: John W. Frame, Box 626, 2207 Old Gettysburg Road, Camp Hill, Pa. 17011. Authority sought to operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting: (a) *Plastic dishwashing machine racks, and shelving, wire*, including *materials, parts, and accessories* necessary for the installation thereof, from the plantsites or facilities of Metropolitan Wire Corp., Wilkes-Barre, Pa., and Berkely Heights, N.J., to points in Indiana, Illinois, Ohio, Michigan; and (b) *materials handling vehicles, including food serving carts, wagons or trays*, from the plantsite or facilities of Buckseo, Inc., a subsidiary of Metropolitan Wire Corp., at Quakertown, Pa., to points in Indiana, Illinois, Ohio, and Michigan.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Harrisburg, Pa.

No. MC 135684 (Sub-No. 47), filed July 22, 1977. Applicant: BASS TRANSPORTATION CO. INC., P.O. Box 391, Old Croton Road, Flemington, N.J. 08822. Applicant's representative: Herbert Alan Dubin, Federal Bar Building West, 1819 H Street NW., Suite 1030, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Laboratory, and hospital equipment, and chemicals*, except in bulk, between Bridgewater Township (Somerset County), N.J., and Chicago, Ill., St. Louis, Mo., Houston, Tex., and Rochester, N.Y.; (2) *materials, supplies, and equipment* used in the manufacture, distribution, or sale of laboratory and hospital equipment and chemicals from Boston, Mass., Philadelphia, Pa., Pittsburgh, Pa., Cleveland, Ohio, Cincinnati, Ohio, Chicago, Ill., St. Louis, Mo., Houston, Tex., Rochester, N.Y., Elmira, N.Y., Baltimore, Md., Detroit, Mich., and Washington, D.C., to Bridgwater Township (Somerset County), N.J.

NOTE.—Applicant holds motor contract authority in No. MC 87720 (Sub-No. 2) and other subs, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 135684 (Sub-No. 48), filed July 22, 1977. Applicant: BASS TRANSPORTATION CO. INC., P.O. Box 391, Old Croton Road, Flemington, N.J. 08822. Applicant's representative: Herbert Alan Dubin, Federal Bar Building West, 1819 H Street NW., Suite 1030, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Salt and salt products*, except in bulk, from the plantsite and warehouse facilities of Diamond Crystal Salt Co. at or near St. Clair, Mich., and Akron, Ohio, to points in Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, and Rhode Island; (2) *materials, supplies, and equipment* used in the manufacture, sale, and distribution of salt and salt products, except in bulk, from the above-described destination territory to St. Clair, Mich., and Akron, Ohio.

NOTE.—Applicant holds motor contract authority in No. MC 87720 (Sub-No. 2) and other subs, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 135797 (Sub-No. 78) (correction), filed June 22, 1977, published in the FEDERAL REGISTER issue of August 11, 1977, and republished as corrected this issue. Applicant: J. B. HUNT TRANSPORT, INC., Post Office Box 200, Lowell, Ark. 72745. Applicant's representative: Paul A. Maestri (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Non-alcoholic beverages* (except in bulk), (a) from Auburndale, Fla., to Plymouth and Trafalgar, Ind., and points in Texas; (b) from Plymouth, Ind., to points in Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Missouri, Ohio, and Wisconsin; (c) from Trafalgar, Ind., to points in Missouri; (d) from Dallas, Tex., to points in Arkansas, Kansas, Louisiana, Mississippi, Missouri, Oklahoma, Tennessee, and Texas; (e) from Weslaco, Tex., to points in Alabama, Arizona, Arkansas, California, Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Minnesota, Mississippi, Missouri, Nebraska, New Mexico, Oklahoma, Oregon, Tennessee, Texas Washington, and Wisconsin; and (2) *machinery materials* (except in bulk), *equipment and supplies* (except in bulk), used in or in connection with the manufacture, distribution, or use of the commodities named in (1) above, from points in the United States (except Alaska and Hawaii), to Plymouth and Trafalgar, Ind., and Dallas and Weslaco, Tex.

NOTE.—The purpose of this correction is to show the correct territory sought in part (2) above. Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C.

No. MC 235874 (Sub-No. 91), filed July 28, 1977. Applicant: LTL PERISHABLES, INC., 550 E. 5th Street South, South St. Paul, Minn. 55075. Applicant's representative: Kenneth O. Petrick, 550 E. 5th Street South, South St. Paul, Minn. 55075. Authority sought to operate as a *common carrier* by motor vehicle transporting: (1) *Frozen foodstuffs* (except commodities in bulk, in tank vehicles), and (2) *frozen meats and meat by-products*, unfit for human consumption (except commodities in bulk, in tank vehicles), from the facilities of Wiscold, Inc., at or near Beaver Dam and Milwaukee, Wis., to points in Kentucky, North Carolina, South Carolina, Virginia, and West Virginia.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Madison, Wis., or St. Paul, Minn.

No. MC 136968 (Sub-No. 1), filed August 4, 1977. Applicant: IRMAR TRUCKING, INC., 3701 National Road West, Richmond, Ind. 47374. Applicant's representative: Donald W. Smith, Suite 2465, One Indiana Square, Indianapolis, Ind. 46204. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Florist and decorators foam*, from Kent, Ohio, and Richmond, Ind., to points in Alabama, Florida, and Georgia, under a continuing contract, or contracts, with Hill Floral Products, Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Chicago, Ill., or Indianapolis, Ind.

MC 138054 (Sub-No. 17), filed July 22, 1977. Applicant: CONDOR CONTRACT CARRIERS, INC., P.O. Box 1354, Garden Grove, Calif. 92642. Applicant's representative: Bradford E. Kistler, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lockers, cabinets, storage cases, shelving, sheet metal products, and related parts and accessories*, from Cleveland, Ohio, to points in the United States (except Alaska and Hawaii); and (2) *materials, supplies, and equipment*, utilized in the manufacture, production, and distribution of commodities named in (1) above, from points in the United States (except Alaska and Hawaii), to Cleveland, Ohio. Restriction: Restricted against the transportation of commodities in bulk, in tank vehicles, and further restricted to a transportation service to be performed under a continuing contract, or contracts, with the Interior Steel Equipment Co.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Cleveland, Ohio.

No. MC 138104 (Sub-No. 43), filed July 26, 1977. Applicant: MOORE TRANSPORTATION CO., INC., 3509 N. Grove Street, Fort Worth, Tex. 76106. Applicant's representative: Bernard H. English, 6270 Firth Road, Fort Worth, Tex. 76116. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Soda ash*, in bulk, from Baton Rouge, La., to Decatur, Tex.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Fort Worth or Dallas, Tex.

No. MC 138235 (Sub-No. 16), filed August 1, 1977. Applicant: DECKER TRANSPORT CO., INC., 412 Route 23, Pompton Plains, N.J. 07444. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting (1) *Motor vehicles* (except new and used trucks, automobiles, motor homes, new tractors, and new chassis, in secondary movements, in driveaway service), *hardware, conveyors and conveyor equipment, furniture, lawn mowers, power equipment, wheel goods, and bicycles*, (2) *parts, attachments, and accessories* for the commodities in (1) above; and (3) *materials, equipment, and supplies* (except commodities in bulk), used in the manufacture and sale of the commodities in (1) and (2) above, between the facilities of MTD Products, Inc., located at or near Westfield, Mass., on the one hand, and, on the other, points in Colorado, Connecticut, Delaware, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, West Virginia, Virginia, Wisconsin, and the District of Columbia, under a continuing contract or contracts with MTD Products, Inc., Willard, Ohio.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Columbus, Ohio, or Indianapolis, Ind.

No. MC 138328, (Sub-No. 41), filed August 8, 1977. Applicant: CLARENCE L. WERNER, d.b.a. Werner Enterprises, I-80 and Hiway 50, P.O. Box 37308, Omaha, Nebr. 68137. Applicant's representative: Donna Ehrlich (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Calcium propionate, sodium propionate, and sodium diacetate* (except commodities in bulk), from Verona, Mo.; Dallas, Tex.; and Lodi, N.J., to points in Alabama, Arizona, Arkansas, California, Florida, Georgia, Illinois, Iowa, Maine, Massachusetts, Michigan, Minnesota, New York, North Carolina, Ohio, Oregon, Pennsylvania, South Carolina, Tennessee, Virginia, and Washington.

NOTE.—Applicant holds motor contract carrier authority in No. MC 133233 (Sub-No. 1) and other subs, therefore, dual operations may be involved. If a hearing is deemed necessary, applicant requests that it be held at New York, N.Y.

No. MC 138956 (Sub-No. 7), filed July 25, 1977. Applicant: ERGON TRUCKING, INC., 202 East Pearl Street, Jackson, Miss. 39201. Applicant's representative: Donald B. Morrison, 1500 Deposit Guaranty Plaza, P.O. Box 22628, Jackson, Miss. 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fuel oils*, in bulk, in tank vehicles, (1) from the facilities of Ergon, Inc., at or near Memphis, Tenn., to points in Alabama, Arkansas, Kentucky, Mississippi, and Missouri; (2) from the facilities of Ergon, Inc., at or near Barfield, Ark., to the facilities of Arkansas-Missouri Power Co. at or near Blytheville, Ark.; (3) from the facilities of Ergon, Inc., at or near Greenville, Miss., to points in Alabama, Arkansas, Louisiana, Mississippi, and Tennessee; (4) from the facilities of Ergon, Inc., at or near Vicksburg, Miss., to points in Alabama, Arkansas, Louisiana, and Mississippi; (5) from the facilities of Mobile Bulk Terminal, Inc., at or near Mobile, Ala., to points in Alabama, Florida, Louisiana, and Mississippi; (6) from the facilities of Ergon, Inc., at or near Chattanooga, Tenn., to points in Alabama, Georgia,

V 42 174 SEP 8 77 UMI

North Carolina, South Carolina, Tennessee, and Kentucky, restricted in (2) above to traffic having a prior movement by water.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Jackson, Miss., or Memphis, Tenn.

No. MC 139312 (Sub-No. 8), filed August 1, 1977. Applicant: JOE H. TIDWELL, doing business as Northeast Truck Brokers, P.O. Box 826, Pharr, Tex. 78577. Applicant's representative: Thomas R. Kingsley, 1819 H Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: *Used clothing, used rags, and used burlap*, (1) from points in Arizona, Arkansas, California, Colorado, Connecticut (except Bridgeport), Delaware, Idaho, Maine, Massachusetts, Minnesota, Montana, Nevada, New Hampshire, New Jersey (except points in Bergen County), New Mexico, New York (except points in New York, N.Y., and Nassau and Suffolk Counties), North Dakota, Oregon, Rhode Island, South Dakota, Texas, Utah, Vermont, Washington, Wyoming, and the District of Columbia to Nogales, Ariz., McAllen, Tex., and the ports of entry on the international boundary line between the United States and the Republic of Mexico located in Texas; and (2) from Nogales, Ariz., McAllen, Tex., and ports of entry on the international boundary line between the United States and the Republic of Mexico located in Texas to points in the United States (except points in Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either San Antonio, Tex., or Brownsville, Tex.

No. MC 139923 (Sub.No. 35), filed August 1, 1977. Applicant: MILLER TRUCKING CO., INC., P.O. Drawer D, Stroud, Okla. 74079. Applicant's representative: Max G. Morgan, 223 Ciudad Building, Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Quicklime, hydrated lime, and ground limestone*, from the facilities of St. Clair Lime Co. near Marble City and Sallisaw, Okla., to points in Columbia, Conway, Pulaski, and Union Counties, Ark.; and Barton, Butler, Cowley, Ellis, Ford, Graham, McPherson, Russel, Sedgwick, and Sumner Counties, Kans.

NOTE.—Applicant holds motor contract carrier authority in No. MC 139926 (Sub-No. 2), therefore, dual operations may be involved. If a hearing is deemed necessary, applicant requests that it be held at Oklahoma City, Okla., or Dallas, Tex.

No. MC 140022 (Sub-No. 4), filed July 28, 1977. Applicant: DONOVAN P. RODRIGUEZ, d.b.a. West Michigan Trucking Service, 4630 Benzie Highway, Benzonia, Mich. 49616. Applicant's representative: James R. Davis, 1018 Michigan National Tower, Lansing, Mich. 48933. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pallets and other shipping and storage devices* made of wood and materials used in the manufacture of the above between points in Michigan, Indiana, and Illinois.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held in Lansing, Mich., or as an alternate Detroit, Mich.

No. MC 140024 (Sub-No. 72), filed August 2, 1977. Applicant: J. B. MONTGOMERY, INC., 5565 East 52nd Avenue, Commerce City, Colo. 80022. Applicant's representative: John F. DeCock (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except frozen and except commodities in bulk), in vehicles equipped with mechanical refrigeration, from the plantsite and storage facilities of RJR Foods, Inc., at or near Plymouth, Ind., to Denver, Colo., restricted to traffic originating at the named origin and destined to the named destination.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 140033 (Sub-No. 26) (Correction), filed June 30, 1977, published in the FEDERAL REGISTER issued of August 18, 1977, and republished as corrected this issue. Applicant: COX REFRIGERATED EXPRESS, INC., 10606 Goodnight Lane, Dallas, Tex. 75220. Applicant's representative: Lawrence A. Winkle, Suite 1125, Exchange Park, P.O. Box 45538, Dallas, Tex. 75245. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Plastics and plastic products*, from Troup, Tex., to points in the United States (except Alaska and Hawaii); and (2) *plastics, plastic products, and rubber articles* (except sponge, foam or cellular); and (b) *games and toys*, from Jacksonville, Tex., to points in the United States (except Alaska and Hawaii).

NOTE.—The purpose of this republication is to indicate the correct MC No. as 140033 (Sub-No. 26), in lieu of MC No. 140033 (Sub-No. 263). If a hearing is deemed necessary, the applicant requests that it be held at either Dallas, Tex., or Washington, D.C.

No. MC 140037 (Sub-No. 4), filed August 4, 1977. Applicant's name: SUNFLOWER CARRIERS, INC., P.O. Box 355, York, Nebr. 68467. Applicant's representative: Scott E. Daniel, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Aluminum*, from Oswego, N.Y., Lancaster, Pa., Lewisport and Hawesville, Ky., Davenport, Iowa, Terre Haute, Ind., McCook, Ill., and Omal, Ohio, to Hastings, Nebr., and Powell, Wyo.; and (2) *irrigation pipe*, from Hastings, Nebr. and Powell, Wyo. to points in the United States (except Alaska and Hawaii). Restricted to a transportation service to be performed under a continuing contract or contracts in (1) and (2) with Hastings Irrigation Pipe Co.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Lincoln or Omaha, Nebr.

No. MC 140587 (Sub-No. 4), filed August 4, 1977. Applicant: CECIL CLAXTON TRUCKING, Box 7, Route 3, Wrightsville, Ga. 31096. Applicants' representative: Ronald K. Kolins, 1055 Thomas Jefferson Street NW., Washington, D.C. 20007. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, in containers, from Baltimore, Md., to points in Georgia and Alabama.

NOTE.—Applicant holds motor contract carrier authority in No. MC 133492 (Sub-No. 1) and other subs, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests that it be held at Atlanta, Ga., or Washington, D.C.

No. MC 140596 (Sub-No. 2), filed July 28, 1977. Applicant: NEWPORT AIR FREIGHT, INC., Airport Road, Newport, Vt. 05855. Applicant's representative: S. Arnold Smith, Craftsbury, Vt. 05826. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Electronic connectors and allied components required in the generation, transmission, and distribution of electricity for consumer and industrial consumption*, between the facilities of Burndy Corp. located at or near St. Johnsbury, Vt., on the one hand, and, on the other, points in Logan International Airport located at or near East Boston, Mass., with prior or subsequent movement by air, under a continuing contract or contracts with Burndy Corp. of St. Johnsbury, Vt.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Boston, Mass., or Montpelier, Vt.

No. MC 140612 (Sub-No. 26), filed July 28, 1977. Applicant: ROBERT P. KAZIMOUR, P.O. Box 2207, Cedar Rapids, Iowa 52406. Applicant's representative: A. J. Swanson, P.O. Box 81849, Lincoln, Neb. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Appliances, furnaces, and air-conditioners (except commodities which because of size or weight require the use of special equipment) and materials, parts, and supplies (except commodities in bulk) used in the manufacture, production, and distribution of the above*, between Fort Smith, Ark., on the one hand, and on the other, points in Iowa, Indiana, Ohio, Kentucky, and Tennessee.

NOTE.—Applicant holds motor contract carrier authority in MC 138003 and sub numbers thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at either Lincoln, Neb., or Fort Smith, Ark.

No. MC 140612 (Sub-No. 27), filed August 1, 1977. Applicant: ROBERT F. KAZIMOUR, P.O. Box 2207, Cedar Rapids, Iowa 52406. Applicant's representative: A. J. Swanson, P.O. Box 81849, Lincoln, Neb. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Appliances, furnaces, and air-conditioners (except commodities which because of size or weight require the use of special equipment) and materials, parts, and supplies (except commodities in bulk) used in the manufacture, production, and distribution of the above*, between the plantsite and warehouse facilities of Rheem Manufacturing Co. located in Baldwin County, Ga., on the one hand, and, on the other, points in and west of Ohio, Kentucky, Tennessee, and Mississippi (except Hawaii and Alaska).

NOTE.—Applicant holds motor contract carrier authority in MC 138003 and sub numbers thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests that it be held at either Lincoln, Neb., or Fort Smith, Ark.

No. MC 140829 (Sub-No. 55), filed July 25, 1977. Applicant: CARGO CONTRACT CARRIER CORP., P.O. Box 206, U.S. Highway 20, Sioux City, Iowa 51102. Applicant's representative: William J. Hanlon, 55 Madison Ave., Morristown, N.J. 07960. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Deodorants, disinfectants, breath fresheners, cleaning compounds, swimming pool treatment compounds, insecticides, and materials, supplies, and equipment* used by deodorant and cleaning compound manufacturers (except commodities in bulk, in tank vehicles) between the facilities of Airwick Industries, Inc. at Barberton, Ohio, on the one hand, and, on the other, Carlstadt, N.J., and points in Cook County, Ill.; Dallas, Tex.; Detroit, Mich.; Maple Heights, Ohio; Milwaukee, Wis.; Minneapolis, Minn.; Omaha, Nebr.; St. Peters, Mo.; and Stockton, Calif., restricted to the transportation of shipments originating at and destined to the named facilities of Airwick Industries, Inc.

NOTE.—Applicant holds contract carrier authority in MC 136408 and subs thereunder; therefore dual operations may be involved. If a hearing is deemed necessary the applicant requests it to be held in Washington, D.C.

No. MC 141426 (Sub-No. 8), filed July 25, 1977. Applicant: WHEATON CARTAGE CO., a corporation, Millville, N.J. 08332. Applicant's representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 11th Street NW., Washington, D.C. 20001. Authority sought to operate in interstate or foreign commerce, as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Glass, metal, plastic, paper, wax, clay, feldspar* and *wood articles* and *products, foodstuffs, antipollution* and *biochemical apparatus, products* used in radiological research, *organic chemistry kits, bottle coating systems, talc, feldspar, candles, pottery, chinaware, ceramics, gift items, molds* and *machinery, parts* and *accessories* for the above-described commodities, and *materials, equipment*, and *supplies* used in the coating, production, distribution, assembly, fabrication, manufacture or sale of the above-named commodities (except in bulk, in tank vehicles), between the plant site of and facilities utilized by Wheaton Industries at or near Syracuse, Nebr., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii), restricted to a transportation service to be performed under a continuing contract or contracts with Wheaton Industries of Millville, N.J.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C.

Applicant states that it is a commonly-controlled contract carrier for Wheaton Industries and that it holds authority already on the same commodities between other facilities of Wheaton Industries on the one hand, and, on the other, points in the Continental United States. The purpose of this application is to expand the contract carrier services to embrace the Wheaton facilities at or near Syracuse, Nebr.

No. MC 141426 (Sub.-No. 9), filed July 28, 1977. Applicant: WHEATON CARTAGE CO. (a corporation), Millville, N.J. 08332. Applicant's representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 11th Street NW., Washington, D.C. 20001. Authority sought by applicant to operate in interstate or foreign commerce, as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Glass, metal, plastic, paper, wax, clay, feldspar* and *wood articles* and *products, foodstuffs, antipollution* and *biochemical apparatus, products* used in radiological research, *organic chemistry kits, bottle coating systems, talc, feldspar, candles, pottery, chinaware, ceramics, gift items, molds* and *machinery, parts* and *accessories* for the above-described commodities, and *materials, equipment*, and *supplies* used in the coating, production, distribution, assembly, fabrication, manufacture or sale of the above-named commodities (except in bulk, in tank vehicles), between the plant site of and facilities utilized by Wheaton Industries at or near Easton, Md., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii). Restriction: The authority granted herein is limited to a transportation service to be performed under a continuing contract or contracts with Wheaton Industries of Millville, N.J.

NOTE.—If a hearing is deemed necessary, applicant requests that the hearing be held in Washington, D.C.

Applicant states that it is a commonly-controlled contract carrier for Wheaton Industries and that it holds authority already on the same commodities between other facilities of Wheaton Industries on the one hand, and, on the other, points in the Continental United States. The purpose of this application is to expand the contract carrier services to embrace the Wheaton facilities at or near Easton, Md.

Docket No. MC 141546 (Sub-No. 23), filed July 15, 1977. Applicant: BULK TRANSPORT SERVICE, INC., One Dundee Park, Andover, Mass. Applicant's representative: Kenneth B. Williams, 84 State St., Boston, Mass. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Cement, in bulk, in tank vehicles, from ports of entry on the International Boundary line between the United States and Canada located at points in Maine, New Hampshire, Vermont, and New York to points in Massachusetts, Rhode Island and Connecticut, restricted to traffic originating in the Province of Quebec, Canada.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Boston, Mass. Common control may be involved.

No. MC 141599 (Sub-No. 3), filed July 28, 1977. Applicant: MOUNTAIN PACIFIC TRANSPORT (EDMONTON), LTD., DOING BUSINESS AS SHADOW LINES, 241 Schoolhouse Rd., Coquitlam, British Columbia, Canada V3K 4X9. Applicant's representative: George LaBissoniere, 1100 Norton Building, Seattle, Wash. 98104. Authority sought to operate as a *common carrier* over irregular routes transporting lumber and wood products from ports of entry on the United States/Canada boundary line located in Washington, Idaho and Montana to points in Idaho, Montana, North Dakota, South Dakota, Wyoming, Minnesota, Colorado, and Utah; restricted to traffic moving in foreign commerce from the provinces of British Columbia, Alberta and Saskatchewan, Canada to the named destination states.

NOTE.—If a hearing is deemed necessary, the applicant reqeusts that it be held at Seattle, Wash.

No. MC 141776 (Sub-No. 13), filed July 28, 1977. Applicant: FOODTRAIN, INC., Spring and South Center Sts., Ringtown, Pa. 17967. Applicant's representative: L. Agnew Myers, Jr., 734 15th St. NW., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Foodstuffs and food products (except cold packed or frozen), candy and confectionery, and rack store displays, from Vineland, N.J., to points in Arkansas, Illinois, Indiana, points in Kansas on and east of Interstate Highway 35 and U.S. Highway 81, Kentucky, Louisiana, Michigan, Mississippi, Missouri, points in New York on and west of Interstate Highway 81 and Interstate Highway 481, Ohio, points in Pennsylvania on and west of U.S. Highway 220, Tennessee, points in Texas on and east of Interstate Highway 35, and Wisconsin.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Philadelphia, Pa. or Washington, D.C.

No. MC 141776 (Sub-No. 15), filed August 1, 1977. Applicant: FOODTRAIN, INC., Spring and South Center Sts., Ringtown, Pa. 17967. Applicant's representative: L. Agnew Myers, Jr., 734 15th Street NW., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Aluminum Sheet, Aluminum Plate, flat or in coils; Aluminum Blanks, flat*, from Lancaster, Pa., to

V 42 174 SEP 8 77 UMI

points in Indiana, Illinois, Michigan, Ohio, and Wisconsin.

NOTE.—If a hearing is deemed necessary, applicant request it be held at Philadelphia, Pa. or Washington, D.C.

No. MC 141804 (Sub-No. 72), filed August 8, 1977. Applicant: WESTERN EXPRESS, DIVISION OF INTERSTATE RENTAL, INC., P.O. Box 422, Goodlettsville, Tenn. 37072. Applicant's representative: Charles R. Parker, P.O. Box 422, Goodlettsville, Tenn. 37072. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Welders, welder parts* and *systems, welding compounds* and *materials* and *supplies* used in the manufacture, production and distribution thereof (except commodities in bulk and which because of size or weight require special handling or equipment), (1) from City of Industry and Whittier, Calif. to points in the United States in and east of Minnesota, Iowa, Missouri, Arkansas and Louisiana and (2) from points in the United States in and east of Minnesota, Iowa, Missouri, Arkansas and Louisiana to City of Industry and Whittier, Calif., restricted in parts (1) and (2) above to traffic originating at or destined to the plantsites or storage facilities utilized by Stoody International Co. and Stoody Co.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Los Angeles, Calif. or Memphis, Tenn.

No. MC 141914 (Sub-No. 12), filed July 26, 1977. Applicant: FRANKS & SON, INC., Route 1, Box 108A, Big Cabin, Okla. 74332. Applicant's representative: Gary Brasel, Mezzanine Floor, Beacon Building, Tulsa, Okla. 74103. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes transporting: *Maple syrup products* from the ports of entry located on the International Boundary Line between the United States and Canada, located at or near Trout River, N.Y., to Chicago, Ill., and Kansas City, Mo.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Buffalo or New York, N.Y.

No. MC 141914 (Sub-No. 14), field: August 2, 1977. Applicant: FRANKS & SON, INC., Box 108–A, Big Cabin, Okla. 74332. Applicant's representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street NW., Washington, D.C. 20001. Authority sought by applicant to operate as a *common carrier*, by motor vehicle, in interstate and foreign commerce, over irregular routes transporting: *rubber piping, tubing and hose, including rubber hose, reinforced with fabric or steel*, from the port of entry on the International Boundary line between the United States and Canada, located at or near Stanhope, Vt., to points in the United States (except Alaska and Hawaii), restricted to the transportation of traffic originating at the plant site of and facilities of IVG Rubber Canada Ltd., located at or near St. Alphonse de Granby, Quebec, Canada.

NOTE.—If a hearing is deemed necessary it is requested that it be held in Tulsa, Okla.

No. MC 142015 (Sub No. 1), filed July 28, 1977. Applicant: PERISHABLES TRANSPORT, INC., Route 2, Box 295, Chesterton, Ind. 46304. Applicant's representative: William P. Jackson, Jr., 3426 North Washington Blvd., Post Office Box 1267, Arlington, Va. 22210. Authority sought to operate as a *contract carrier* by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by wholesale, retail, and chain grocery and food business houses, and in connection therewith, *equipment, materials and supplies* used in the conduct of such business (except commodities in bulk), in vehicles equipped with mechanical refrigeration, from the facilities of the Kroger Co., at or near Salem, Va., to the facilities of the Kroger Co., in Greenville, N.C., restricted to the transportation of shipments originating at or destined to facilities of the Kroger Co.; and further restricted to the transportation of shipments under a continuing contract or contracts with the Kroger Co.

NOTE.—If an oral hearing is deemed necessary, applicant requests that it be held in Indianapolis, Ind.

No. MC 142277 (Sub-No. 3), filed: July 28, 1977. Applicant: CONSOLIDATED PARCEL SERVICE, INC., 9847 Page, St. Louis, Mo. 63132. Applicant's representative: Douglas E. Tonkinson (Same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: Such merchandise as is dealt in by Department Stores (including, but not limited to, uncrated furniture, loose hanging garments on rods and in cages, and bakery goods) between the department stores and warehouse facilities of the The May Department Stores Co., d.b.a. NOTE.—If an oral hearing is deemed necessary, applicant requests that it be held at Mt. Vernon, Ill. or St. Louis, Mo.

FINANCE APPLICATIONS

NOTICE

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or

acquire control through ownership of stock, or rail carriers or motor carriers pursuant to Sections 5(2) or 210a((b) of the Interstate Commerce Act.

An original and two copies of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 240(c) or 240(d) of the Commission's General Rules of Practice (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

Florida East Coast Railway Co., One Malaga Street, St. Augustine, Fla. 32084, represented by Mr. Charles B. Evans, General Counsel, Florida East Coast Railway Co., One Malaga Street, St. Augustine, Fla. 32084, hereby give notice that on the 12th day of May, 1977, as supplemented, August 16, 1977, it filed with the Interstate Commerce Commission at Washington, D.C., an application under Section 1(18) of the Interstate Commerce Act for an order approving and authorizing the acquisition and operation of a line of railroad owned by the Jacksonville Terminal Co., a distance of 1.3 miles located entirely in Duval County, Fla., which application is assigned Finance Docket No. 28474.

Applicant is proposed to acquire and operate a line of railroad presently owned and operated by the Jacksonville Terminal Co. which is the subject of an application for abandonment in docket No. AB–143 filed July 18, 1977.

The route of line proposed to be acquired is from the zero mile post of Florida East Coast Railway Co. on the north bank of the St. John River in Jacksonville, Fla., northwestward to interchange tracks between Seaboard Coast Line Railroad Co. and the Florida East Coast Railway Co.; and the Georgia Southern and Florida Railway Co. and Florida East Coast Railway Co., wholly within the city limits of Jacksonville, Fla.

In the opinion of the applicant, the granting of the authority sought will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

In accordance with the Commission's regulations (49 CFR 1108.12) in Ex Parte No. 55 (Sub-No. 4), *Implementation-National Environmental Policy Act, 1969*, 352 I.C.C. 451 (1976), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall indicate with specific data the exact nature and degree of the anticipated impact. See *Implementation-National Environmental Policy Act, 1969, supra* at p. 487.

Pursuant to the provisions of the Interstate Commerce Act, as amended, the proceeding will be handled without public hearings unless comments in support or opposition on such application are filed with the Secretary, Interstate Commerce Commission, 12th and Constitution Avenue NW., Washington, D.C. 20423, and the aforementioned counsel for applicant, within 30 days after date of first publication in a newspaper of general circulation. Any interested person is entitled to recommend to the Commission that it approve, disapprove, or take any other specified action with respect to such application.

Goodwin Railroad, Inc., P.O. Box 1423, Concord, N.H. 03301, represented by Mr. Herbert W. Goodwin, President, Goodwin Railroad Inc., P.O. Box 1423, Concord, N.H. 03301, hereby give notice that on the 8th day of August, 1977, it filed with the Interstate Commerce Commission at Washington, D.C., an application under section 1(18) of the Interstate Commerce Act for an order approving and authorizing the operation over a line of railroad owned by the State of New Hampshire from Concord to Lincoln, in Merrimack, Belknap, and Grafton Counties, N.H., a distance of 76.4 miles, which application is assigned Finance Docket No. 28531.

Applicant is operating a railroad line from Concord to Lincoln, N.H. owned by the State of New Hampshire connecting with the Boston and Maine Corp. at Concord, N.H. The above mentioned line was formerly owned by the Boston and Maine Corp.

In the opinion of the applicant, the granting of the authority sought will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. In accordance with the Commission's regulations (49 CFR 1108.12) in Ex Parte No. 55 (Sub-No. 4), *Implementation—National Environmental Policy Act 1969*, 352 I.C.C. 451 (1976), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall indicate with specific data the exact nature and degree of the anticipated impact. See *Implementation—National Environmental Policy Act, 1969, supra* at p. 487.

Pursuant to the provisions of the Interstate Commerce Act, as amended, the proceeding will be handled without public hearings unless comments in support or opposition on such application are filed with the Secretary, Interstate Commerce Commission, 12th and Constitution Avenue NW., Washington, D.C. 20423, and the aforementioned counsel for applicant, within 30 days after date of first publication in a newspaper of general circulation. Any interested person is entitled to recommend to the Commission that it approve, disapprove, or take any other specified action with respect to such application.

No. MC–F–13300. Authority sought to control and merge by STEVENS VAN LINES, INC., 121 So. Niagara Street, Saginaw, Mich., 48602, of AIRLINE VANS, INC., Dallas, Tex., and for acquisition by ARCHIBALD H. STEVENS, 1920 Kennedy, Saginaw, Mich., MORRISON M. STEVENS, 7818 Geddes, Saginaw, Mich., ARCHIE H. STEVENS, JR., 3810 N. Henlock Rd., Henlock, Mich., and JAMES R. STEVENS, 1920 Kennedy, Saginaw, Mich., of control of such rights through the transaction. Applicants' attorney: Robert J. Gallagher, 1000 Connecticut Ave., NW., Suite 1200, Washington, D.C. 20036. Operating rights sought to be controlled and merged: Household goods, as defined by the Commission, as a common carrier over irregular routes between points within 500 miles of Fort Worth, Tex., including Fort Worth. Between points within 500 miles of Fort Worth, Tex., including Fort Worth, on the one hand, and, on the other, points more than 500 miles from Fort Worth, in Alabama, Colorado, Connecticut, Georgia, Illinois, Indiana, Iowa, Kansas, Maryland, Massachusetts, Michgan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, Ohio, Pennsylvania, Tennessee, Virginia, and the District of Columbia. Vendee is authorized to operate as a common carrier in Arkansas, Colorado, Connecticut, Delaware, the District of Columbia, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Dakota, Tennessee, Texas, Virginia, Washington, West Virginia, and Wisconsin. Application has been filed for temporary authority under section 210a(b).

NOTE.—No. MC 74681 (Sub-No. 6) is a directly related matter.

No. MC–F–13308. Authority sought for purchase by RISS INTERNATIONAL CORPORATION, 903 Grand Ave., P.O. Box 2809, Kansas City, Mo., 64142, of the operating rights and certain properties of KOWALSKY'S EXPRESS SERVICE, a corporation, 2235 West Main St., Millville, N.J., 08332, and for acquisition by REPUBLIC INDUSTRIES INC., and, in turn, by ROBERT B. RISS, 903 Grand Ave., P.O. Box 2809, Kansas City, Mo., 64142, of control of the rights and property through the purchase. Applicants' attorneys: Alan Kahn, Suite 1920, Two Penn Center Plaza, Philadelphia, Pa., 19102, and Ivan E. Moody, P.O. Box 3809, Kansas City, Mo., 64142. Operating rights sought to be transferred: General commodities, with certain specified exceptions, as a common carrier over irregular routes, between points in defined portions of Delaware, Maryland, New Jersey, New York, and Pennsylvania, and of special commodities, as a common carrier over irregular routes, between points in Connecticut, Delaware, Maryland, New Jersey, New York, Pennsylvania, and Vir-

V 42 174 SEP 8 77 UMI

ginia, all of which are more fully described in Certificates Nos. MC 29919 and Subs thereunder. Vendee is authorized to operate as a common carrier in Colorado, Connecticut, Delaware, Iowa, Illinois, Indiana, Kansas, Kentucky, Maryland, Massachusetts, Missouri, Nebraska, New Jersey, New York, Ohio, Oklahoma, Pennsylvania, Rhode Island, Texas, Virginia, and West Virginia, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

NOTE.—MC 200 (Sub-No. 294) is a directly related matter.

No. MC-F-13311. Authority sought for purchase by WHITFIELD TRANSPORTATION, INC., 821 East Pasadena, P.O. Box 7676, Phoenix, Ariz. 85011, of the operating rights and property of IDAHO FALLS TRANSFER & STORAGE CO., Pocatello Industrial Park, P.O. Box 2618, Pocatello, Idaho 83201, and for acquisition by SUNDANCE TRANSPORTATION, INC., AND ALLAN D. MUSGROVE, of 821 East Pasadena, P.O. Box 7676, Phoenix, Ariz. 85011, of control of such rights and property through the purchase. Applicants' attorney: William S. Richards, P.O. Box 2465, Salt Lake City, Utah 84110. Operating rights sought to be transferred: *General commodities, household goods and petroleum products* as a *common carrier* over irregular routes within the entire State of Idaho. Vendee is authorized to operate as a *common carrier* in Arizona, California, Colorado, Idaho, Montana, New Mexico, Texas, and Utah. Application has been filed for temporary authority under section 210a(b).

NOTE.—The applicant has tendered a directly related gateway elimination application.

No. MC-F-13318. Authority sought for purchase by TRANSCON LINES, 101 Continental Boulevard, El Segundo, Calif. 90245, of a portion of the operating rights of M & M TRANSPORTATION COMPANY, 750 Third Avenue, New York, N.Y. 10017. Applicant's attorneys: Wentworth E. Griffin, 1221 Baltimore Avenue, Kansas City, Mo. 64105 and Herbert Burstein, One World Trade Center, New York, N.Y. 10048. Operating right sought to be transferred: *General commodities*, with the usual exceptions, as a *common carrier* over regular routes, between Scranton, Pa., and Syracuse, N.Y., serving all intermediate points in New York, and off-route points in Pennsylvania on and east of a line beginning at the Maryland-Pennsylvania State line and extending along U.S. Highway 15 to junction U.S. Highway 11, thence along U.S. Highway 11 to junction U.S. Highway 6, thence along U.S. Highway 6 to the Pennsylvania-New York State line, and those in Broome, Cayuga, Chemung, Chenango, Cortland, Madison, Onondaga, Schuyler and Tioga Counties, N.Y.; from Scranton over U.S. Highway 11 to Syracuse, and return over the same route, with restrictions. Applicant is authorized to operate as a *common carrier* in Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Mississippi, Missouri, Montana, Nebraska, Nevada, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Dakota, South Carolina, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, and Wyoming. In Docket No. MC 110325 (Sub-No. 42), Vendee has regular route authorities between Irwin and Harrisburg, Pa.; Buffalo and New York, N.Y.; Pittsburgh, Pa., and Baltimore, Md.; Elizabeth, N.J., and Harrisburg, Pa.; New York, N.Y., and Erie, Pa.; Harrisburg, Pa., and Buffalo, N.Y., among others, which authorize regular route operations through portions of the area sought herein. Application has been filed for temporary authority under section 210a(b).

No. MC-F-13321. Authority sought for control and merger by BENDER & LOUDON MOTOR FREIGHT LINES, INC., 3024 Brecksville Road, Richfield Ohio 44286, of RUSSOM TRANSFER, INC., 823 Carberry Road, Niles, Mich. 49120, and for acquisition by ELIZABETH L. BENDER and ROBERT C. BENDER, both of 3024 Brecksville, Richfield, Ohio 44286, GAIL B. MELL, 731 Delaware, Akron, Ohio 44303, and JEAN B. PRESTON, TRUSTEE, 1200 Yellow Creek Lane, Arkon, Ohio 44313, of control of such rights and properties through the transaction. Applicant's attorney: Rex Eames, 900 Guardian Building, Detroit, Mich 48226. Operating rights sought to be controlled and merged: *General commodities*, with exceptions, as a *common carrier* over regular routes, between Dowagiac, Mich., and South Bend, Ind., serving all intermediate points, and serving Diamond Lake, Mich. and the plantsite of Consolidated Die Cast Corp. of America, located approximately five miles north of Dowagiac, Mich., as off-route points. Transferee is authorized to operate as a *common carrier* in Ohio, Michigan, and Indiana. Application has been filed for temporary authority under section 210a(b).

OPERATING RIGHTS APPLICATION(S) DIRECTLY RELATED TO FINANCE PROCEEDINGS

NOTICE

The following operating rights application(s) are filed in connection with pending finance applications under section 5(2) of the Interstate Commerce Act, or seek tacking and/or gateway elimination in connection with transfer applications under section 212(b) of the Interstate Commerce Act.

An original and two copies of protests to the granting of the authorities must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 247(d) of the Commission's General Rules of Practice (49 CFR 1100.247) and include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon applicant's representative, or applicant if no representative is named.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 200 (Sub-No. 294), filed August 29, 1977. Applicant: RISS INTERNATIONAL CORP., 903 Grand Ave., P.O. Box 2809, Kansas City, Mo. 64142. Applicant's representative: Alan Kahn, 1920 Two Penn Center Plaza, Philadelphia, Pa. 19102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment) between Harrisburg, Pa., on the one hand, and, on the other, points in New Jersey within 30 miles of City Hall, New York, N.Y., and those in that part of Pennsylvania, Maryland, and Delaware bounded by a line beginning at Easton, Pa., and extending along U.S. Highway 22 to Allentown, Pa., thence along U.S. Highway 222 to Lancaster, Pa., thence along U.S. Highway 30 to the bank of the Susquehanna River, thence southeast along the east bank of the Susquehanna River to U.S. Highway 1 in Maryland, thence along U.S. Highway 1 to Baltimore, Md., thence southeast, across the Chesapeake Bay to Centreville, Md., thence through Carville and Ingleside, Md., to the Maryland-Delaware State line, at or near Marydel, Md., thence along Delaware Highway 8 to Dover, Del., and thence north along the Delaware River to point of beginning, including all points on the described line. Restriction: Service at Harrisburg, Pa., is restricted for the purpose of joinder only with carrier's presently authorized regular route service at that point.

NOTE.—This application is directly related to Section 5 purchase application captioned Riss International Corporation—Purchase—Kowalsky's Express Service, MC-F-13308. The sole purpose of this application is to change the point of joinder of the rights being purchased with those of the transferee from Philadelphia, Pa. to Harrisburg, Pa. No additional points will be served. If a hearing is deemed necessary, applicant requests that it be held at either Washington, D.C. or Philadelphia, Pa.

Notice of the application filing in MC-F-13308 appears in a prior section of this Federal Register issue.

No. MC 65880 (Sub-No. 22), filed August 24, 1977. Applicant: MUSHROOM TRANSPORTATION CO., INC., 845 East Hunting Park Avenue, Philadelphia, Pa. 19124. Applicant's representatives: A. David Millner, P.O. Box 1409, 167 Fairfield Road, Fairfield, N.J. 07006. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment); between Cleveland, Ohio on the one hand, and, on the other, points in Ohio.

NOTE.—The purpose of the application is to effectuate a conversion of a Registered Certificate to a Certificate of Public Convenience and Necessity and is directly related to a Section 5 proceeding in MC-F-13283 published in the FEDERAL REGISTER issue of August 4, 1977. If a hearing is deemed necessary, Applicant requests that it be held at Cleveland, Ohio.

No. MC 74661 (Sub-No. 6), filed August 19, 1977. Applicant: STEVENS VAN LINES, INC., 121 So. Niagara Street, Saginaw, Mich. 48602. Applicant's representative: Robert J. Gallagher, 1000 Connecticut Ave. NW., Suite 1200, Washington, D.C. 20036. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, in the transportation of *Household Goods* as defined by the Commission: (1) between points in Colorado, Connecticut, Illinois, Indiana, Iowa, Kentucky, Maryland, Michigan, Minnesota, Missouri, Nebraska, New Jersey, New York, North Dakota, Ohio, Pennsylvania, South Dakota, Tennessee, Virginia, Wisconsin, West Virginia, and the District of Columbia on the one hand, and, on the other, points within 500 miles of Fort Worth, Tex., including Fort Worth, Tex., and points in New Mexico and Louisiana; (2) between points in Colorado, Connecticut, Illinois, Indiana, Iowa, Kentucky, Maryland, Michigan, Minnesota, Missouri, Nebraska, New Jersey, New York, North Dakota, Ohio, Pennsylvania, South Dakota, Tennessee, Virginia, Wisconsin, West Virginia, and the District of Columbia on the one hand, and, on the other, points in Alabama, Colorado, Connecticut, Georgia, Illinois, Indiana, Iowa, Kansas, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, Ohio, Pennsylvania, Tennessee, Virginia, Wisconsin, West Virginia, and the District of Columbia on the one hand, and, on the other, points in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, Tennessee, Virginia, West Virginia, Wisconsin, and the District of Columbia. Removing the gateway of the state of Michigan, and points in Missouri, Nebraska, Tennessee, Iowa, and Colorado, which are within 500 miles of Fort Worth. (These movements would be made as follows: For example from Alabama to Arkansas, Paragraph A-1 to Michigan, Paragraph B-1 to Arkansas.)

NOTE.—This application is directly related to Purchase Application by Stevens Van Lines, Inc. of the operating authority or Airline Vans, Inc., by which Purchase Application Stevens Van Lines, Inc. is purchasing Certificate of Public Convenience and Necessity No. MC-107520. Basically, this is a gateway elimination application. If a hearing is deemed necessary, applicant requests that it be held in Saginaw, Michigan, however, modified procedure is requested. Notice of the finance application in MC-F-13300 appears in a prior section of this FEDERAL REGISTER issue.

No. MC 99623 (Sub-No. 4), filed July 12, 1977. Applicant: JAMES E. GRIFFIN & SONS, INC., 275 Circuit St., P.O. Box 1194, West Hanover, Mass. 02339. Applicant's representative: Frederick T. O'Sullivan, P.O. Box 2184, Peabody, Mass. 01960. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in Massachuetts to points in Allegany, Broom, Cattaraugus, Chautaugua, Erie, Genesee, Chemung, Livingston, Niagara, Orleans, Steuben, Tioga, and Wyoming Counties, N.Y.

NOTE.—The purpose of this filing is to eliminate the gateways of Concord and Acton, Mass. If a hearing is deemed necessary, applicant requests that it be held at Boston, Mass. This application will be processed on a consolidated record with MC-F-13218 which was noticed in the FEDERAL REGISTER issue of July 7, 1977.

No. MC 109533 (Sub-No. 93), filed July 19, 1977. Applicant: OVERNITE TRANSPORTATION CO., 1000 Semmes Avenue, Richmond, Va. 23224. Applicant's representative: E. T. Lilpfert, Suite 1000, 1660 L Street NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment):

(1) Between Elkton, Md., and Reading, Pa., serving all intermediate points in Delaware and Pennsylvania: From Elkton over Maryland Highway 7 to junction U.S. Highway 40, thence over U.S. Highway 40 to Wilmington, Del., thence over U.S. Highway 202 to West Chester, Pa., thence over Pennsylvania Highway 100 to Pottstown, Pa., thence over U.S. Highway 42 to Reading and return over same route:

(2) Between Lancaster, Pa., and Reading, Pa., serving all intermediate points in Berks County, Pa.: From Lancaster over U.S. Highway 222 to Reading and return over same route;

(3) Between Lancaster, Pa., and Lebanon, Pa., serving all intermediate points in Lebanon County, Pa.; From Lancaster, Pa., over Pennsylvania Highway 72 to Lebanon and return over the same route;

(4) Between Lancaster, Pa., and Carlisle, Pa., serving all intermediate points in Cumberland and York Counties, Pa.: From Lancaster over U.S. Highway 222 to junction Interstate Highway 76, thence over Interstate Highway 76 to Carlisle, Pa., and return over same route;

(5) Between Wilmington, Del., and Philadelphia, Pa., serving all intermediate points in Delaware and Pennsylvania: From Wilmington over Interstate Highway 95 to Philadelphia, and return over same route;

(6) Between Reading, Pa., and Carlisle, Pa., serving all intermediate points in Berks, Lebanon, York, and Cumberland Counties, Pa.: From Reading over U.S. Highway 422 to junction U.S. Highway 322, thence over U.S. Highway 322 to junction Interstate Highway 83, thence over Interstate Highway 83 to junction U.S. Highway 11, thence over U.S. Highway 11 to Carlisle, and return over the same route;

(7) Between Philadelphia, Pa., and Pottstown, Pa., serving all intermediate points: From Philadelphia over U.S. Highway 422 to Pottstown, and return over same route; and

(8) In connection with service routes (1) through (7) in Delaware, New Jersey, and Pennsylvania, or other regular routes of carrier, the carrier may serve the following off-route points:

(a) Delaware—all points on and north of the Chesapeake-Delaware Canal;

(b) New Jersey—Camden;

(C) Pennsylvania:

(i) Berks County—points on and south of U.S. Highway 22 from Berks-Lehigh County line to Berks-Lebanon County line; also, the points of Grimes and Schubert;

(ii) Bucks County—Argus, Chalfont, Eureka, Geryville, Hatboro, Line Lexington, Mount Pleasant, Milford Square, Neshaminy, Perkasie, Silverdale, Sellersville, Souderton, Spinners Town, Tradesville, Trumbauersville, Telford, Warrington, and Warminster;

(iii) Chester County—points on and north of Pennsylvania Highway 896;

(iv) Cumberland County—points on and east of Pennsylvaia Highway 34 from Perry-Cumberland County lines, thence along Pennsylvania Highway 34 to Carlisle, thence along Interstate Highway to junction Pennsylvania Highway 233, thence along Pennsylvania Highway 233 to the Cumberland-Adams County line; also the points of Greason, Hackersville, and Plainfield;

(v) Delaware County;

(vi) Lebanon County;

(vii) Lehigh County—Alburtis, Breinigsville, Hosensack, Old Zionsville, Shimerville, Weilersville, and Zettlemoyer;

(viii) Montgomery County;

(ix) Perry County—Cove, Duncannon, Keystone, Kenkora Heights, Marysville, Perdix, and Sterretts Gap;

(x) Philadelphia County—points on and south of Pennsylvania Highway 63;

(xi) Schuylkill County—Auburn, Brommerstown, Camp, Deturksville, Friedensburg, Lincoln, Lorberry June, Marstown, Orwin, Paradise, Pine Grove, Port Clinton (Ravine, Rock, Roedersville, Suedberg, and Summit Station;

V 42 174 SEP 8 77 UMI

(xii) York County;

Restriction: The operations requested in Routes (1) through (6) above are restricted to the transportation of traffic moving from, to, or through a point in Maryland.

Restriction: The authority sought herein shall not be severable, by sale or otherwise, from the authority contained in carrier's Sub-No. 63 authority.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C. This application is a matter directly related to a finance application in MC–F–12715 which appeared in the FEDERAL REGISTER issue of December 31, 1975, and which is presently pending on exceptions to the initial decision dated June 8, 1977, and served June 15, 1977.

No. MC 115331 (Sub-No. 427), filed July 19, 1977. Applicant: TRUCK TRANSPORT INC., 29 Clayton Hills Lane, St. Louis, Mo. 63131. Applicant's representative: Leonard A. Jaskiewicz, Suite 501, 1730 M Street NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lime*, in bulk (except lime used for agricultural purposes), from points in Shelby County, Ala., to points in Oklahoma, Missouri, Kentucky, Illinois, Texas (except Houston and points in Texas within 50 miles of Houston), Indiana, Michigan, Minnesota, Wisconsin, Ohio, Montana, North Dakota, South Dakota, and Wyoming. The purpose of this filing is to remove the gateways of Limedale, Ark.; Ste. Genevieve, Mo.; Pike County, Mo.; Adams County, Ill.; and Hannibal, Mo.; (2) *lime*, in bulk, from points in Shelby County, Ala., to points in Colorado, Kansas, Arizona, New Mexico, and Nebraska. The purpose of this filing is to remove the gateways of Limedale, Ark.; and Kansas City, Kans.; (3) *anhydrous ammonia*, in bulk, in tank vehicles, and *dry urea*, in bulk, from the plantsite of American Cyanamid at Avondale, La., to points in Illinois, Iowa, Indiana, Ohio, South Dakota, North Dakota, Wyoming, Minnesota, Nebraska, Wisconsin, and Michigan. The purpose of this filing is to remove the gateways of Selma, Mo.; St. Louis, Mo.; the Part Neal Industrial Complex, Woodbury County, Iowa; Fort Madison, Iowa; and Marseilles, Ill.

NOTE.—This application is directly related to Truck Transport Inc.—Purchase (Portion)—Ecoff Trucking, Inc., MC–F–13174, and seeks the elimination of certain gateways which would be created upon approval of the Section 5 application. The proceeding in No. MC–F–13174 was noticed in the FEDERAL REGISTER issue of April 7, 1977. If a hearing is deemed necessary, applicant requests that such hearing be held at St. Louis, Mo. Common control may be involved.

ABANDONMENT APPLICATIONS

NOTICE OF FINDINGS

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act that orders have been entered in the following abandonment applications which are administratively final and which found that subject to conditions the present and future public convenience and necessity permit abandonment.

A Certificate of Abandonment will be issued to the applicant carriers 30 days after this FEDERAL REGISTER publication unless the instructions set forth in the notices are followed.

[Docket No. AB–28 (Sub-No. 1)]

CENTRAL OF GEORGIA RAILROAD CO. ABANDONMENT OF OPERATIONS BETWEEN CLAYTON AND OZARK IN BARBOUR AND DALE COUNTIES, ALA.

NOTICE OF FINDINGS

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on March 28, 1977, and the decision and order of the Commission, Division 3, served July 27, 1977, which affirmed and adopted the initial decision of the Administrative Law Judge entered on March 28, 1977, a finding, which is administratively final, was made stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in Chicago, B. & Q. R. Co., Abandonment, 257 I.C.C. 700, the present and future public convenience and necessity permit the abandonment of operations by Central of Georgia Railroad Co. over that portion of its line of railroad extending from railroad milepost 355.1 near Clayton, Ala., to railroad milepost 394.1 at Ozark, Ala., consisting of 39 miles of main track and 3.43 miles of yard tracks and sidings, all in Barbour and Dale Counties, Ala. A certificate of abandonment will be issued to the Central of Georgia Railroad Co. based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

[Docket No. AB–42 (Sub-No. 20)]

ILLINOIS CENTRAL GULF RAILROAD CO.—ABANDONMENT BETWEEN SAXONY AND PONTIAC, IN LIVINGSTON COUNTY, ILL.

NOTICE OF FINDINGS

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on July 20, 1977, a finding, which is administratively final, was made by the Commission, Commissioner Brown, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in Chicago, B. & Q. R. Co., Abandonment, 257 I.C.C. 700, the present and future public convenience and necessity permit the abandonment by the Illinois Central Gulf Railroad Co. of a line 19.5 miles in length between Saxony, on the east, and Pontiac, on the west, in Livingston County, Ill., beginning at milepost 86 and ending at milepost 105.5. A certificate of abandonment will be issued to the Illinois Central Gulf Railroad Co. based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

[Docket No. AB–57 (Sub-No. 4)]

SOO LINE RAILROAD CO., ABANDONMENT NEAR A POINT IN DULUTH, ST. LOUIS COUNTY, MINN.

NOTICE OF FINDINGS

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on July 18, 1977, a finding, which is administratively final, was made by the Commission, Commissioner Brown, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in Chicago, B. & Q. R. Co., Abandonment, 257 I.C.C. 700, and for public use as set forth in said order, the present and future public convenience and necessary permit the abandonment by the Soo Line Railroad Co. of its Duluth Branch line of railroad extending northeasterly from a point in Duluth, Minn., at railroad milepost 467.93, to the end of the line in Duluth, Minn., at railroad milepost 468.20, a distance of .27 miles, and .71 miles of side track in St. Louis County, Minn. A certificate of abandonment will be issued to the Soo Line Railroad Co. based on the above-described finding of abandonment, 30 days after publication of this notice; unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

[Docket No. AB–69 (Sub-No. 3)]

WESTERN MARYLAND RAILWAY CO.—ABANDONMENT—HENRY, GRANT COUNTY, W. VA., TO END OF LINE-IN GARRETT COUNTY, MD.

NOTICE OF FINDINGS

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on July 6, 1977, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in Chicago, B. & Q. R. Co., Abandonment, 257 I.C.C. 700, and for public use as set forth in said order, the present and future public convenience and necessity permit the abandonment by the Western Maryland Railway Co., of a line of railroad constituting its Kempton Branch, extending between Valuation Station 0+00 at or near Henry, Grant County, W. Va., to end of line at Valuation Station 127+05 in Garrett County, Md., a distance of approximately 2.4 miles. A certificate of abandonment will be issued to the Western Maryland Railway Co. based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

[Docket No. AB–101 (Sub-No. 2)]

DULUTH, MISSABE AND IRON RANGE RAILWAY CO.—ABANDONMENT BETWEEN SAWBILL LANDING AND FOREST CENTER IN LAKE COUNTY, MINN.

NOTICE OF FINDINGS

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on July 15, 1977, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in Chicago, B. & Q. R. Co., Abandonment, 257 I.C.C. 700, as supplemented by those established pursuant to section 405 of the Rail Passenger Service Act, the present and future public convenience and necessity permit the abandonment by the Duluth, Missabe and Iron Range Railway Co., of a portion of the Wales Branch extending from milepost 42 north of and near Sawbill Landing, in a northerly direction to the end of the line near Forest Center, a distance of 7.34 miles, all in Lake County, Minn. A certificate of abandonment will be issued to the Duluth, Missabe and Iron Range Railway Co. based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter

V 42 174 SEP 8 77 UMI

into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the exception of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

[Docket No. AB-125]

NORFOLK SOUTHERN RAILWAY CO. ABANDONMENT OF OPERATIONS BETWEEN DICKERSON SPUR AND BAYBORO IN CRAVEN AND PAMLICO COUNTIES, N.C.

NOTICE OF FINDINGS

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on July 7, 1977, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Chicago, B. & Q. R. Co., Abandonment*, 257 I.C.C. 700, the present and future public convenience and necessity permit the abandonment of operations over that portion of its line between Dickerson spur, milepost BB-3.0 (near Bridgeton) and Bayboro, N.C., milepost BB-17.0 (the branch line), a distance of 14 miles in Craven and Pamlico Counties, N.C. A certificate of abandonment will be issued to the Norfolk Southern Railway Company based on the above-described finding of abandonment; 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

MOTOR CARRIER ALTERNATE ROUTES DEVIATIONS

NOTICE

The following letter notices to operate over deviation routes for operating convenience only have been filed with the Commission under the Deviation Rules—Motor Carrier of Property (49 CFR 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of this FEDERAL REGISTER notice.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its request.

MOTOR CARRIERS OF PROPERTY

No. MC 2202 (Deviation No. 162), ROADWAY EXPRESS, INC., P.O. Box 471, 1077 Gorge Blvd., Akron, Ohio 44309, filed August 19, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From Marion, Ill., over Interstate Highway 57 to junction Interstate Highway 24, thence over Interstate Highway 24 to Nashville, Tenn., and (2) from Anna, Ill., over Illinois Highway 146 to junction Interstate Highway 24, thence over Interstate Highway 24 to Nashville, Tenn., and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over pertinent service routes as follows: (1) From Marion, Ill., over Illinois Highway 13 to junction U.S. Highway 51, thence over U.S. Highway 51 to junction U.S. Highway 50, thence over U.S. Highway 50 to Seymour, Ind., thence over U.S. Highway 31E or 31W to Louisville, Ky., thence over U.S. Highway 31W to Nashville, Tenn., and (2) from Anna, Ill., over U.S. Highway 51 to Centralia, Ill., thence over the above-specified routes to Nashville, Tenn., and return over the same routes.

No. MC 29555 (Deviation No. 20), BRIGGS TRANSPORTATION CO., North 400, Griggs-Midway Bldg., St. Paul, Minn. 55104, filed August 26, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Des Moines, Iowa, over Interstate Highway 80 to junction U.S. Highway 59, thence over U.S. Highway 59 to junction Interstate Highway 29, thence over Interstate Highway 29 to junction U.S. Highway 71, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Des Moines, Iowa, over U.S. Highway 6 to junction U.S. Highway 275 near Council Bluffs, Iowa, thence over U.S. Highway 275 to junction Iowa Highway 2, thence over Iowa Highway 2 to junction U.S. Highway 71 near Clarinda, Iowa, thence over U.S. Highway 71 to Kansas City, Mo., and return over the same route.

No. MC 41432 (Deviation No. 30), EAST TEXAS MOTOR FREIGHT LINES, INC., 2355 Stemmons Freeway, P.O. Box 10125, Dallas, Tex. 75207, filed August 12, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From junction U.S. Highway 67 and U.S. Highway 290 over U.S. Highway 290 to Comfort, Tex., thence over U.S. Highway 87 to Stockdale, Tex., thence over Texas Highway 123 to Seguin, Tex.; (2) from junction U.S. Highway 67 and U.S. Highway 290 over U.S. Highway 290 to Comfort, Tex., thence over U.S. Highway 87 to Stockdale, Tex., thence over Texas Highway 123 to Seguin, Tex., thence over Texas Highway 46 to New Braunfels, Tex.; and (3) from junction U.S. Highway 67 and U.S. Highway 290 over U.S. Highway 290 to Comfort, Tex., thence over U.S. Highway 87 to Stockdale, Tex., thence over Texas Highway 123 to San Marcos, Tex., and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over pertinent service routes as follows: (1) From junction U.S. Highway 67 and U.S. Highway 290 over U.S. Highway 67 to San Angelo, Tex., thence over U.S. Highway 87 to Fredericksburg, Tex., thence over U.S. Highway 290 to Austin, Tex., thence over U.S. Highway 81 to San Antonio, Tex., thence over U.S. Highway 90 to Seguin, Tex.; (2) from junction U.S. Highway 67 and U.S. Highway 290 over U.S. Highway 67 to San Angelo, Tex., thence over U.S. Highway 87 to Fredericksburg, Tex., thence over U.S. Highway 290 to Austin, Tex., thence over U.S. Highway 81 to New Braunfels, Tex.; and (3) from junction U.S. Highway 67 and U.S. Highway 290 over U.S. Highway 67 to San Angelo, Tex., thence over U.S. Highway 87 to Fredericksburg, Tex., thence over U.S. Highway 290 to Austin, Tex., thence over U.S. Highway 81 to San Marcos, Tex., and return over the same routes.

No. MC 42487 (Deviation No. 113), CONSOLIDATED FREIGHTWAYS CORP. OF DELAWARE, P.O. Box 5138, Chicago, Ill. 60680, filed August 15, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Marion, Ohio, over Ohio Highway 4 to junction Interstate Highway 70 near Springfield, Ohio, thence over Interstate Highway 70 to Indianapolis, Ind., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Marion, Ohio, over U.S. Highway 30S (now Ohio Highway 309) to Kenton, Ohio, thence over U.S. Highway 68 to Springfield, Ohio, thence over Ohio Highway 440 (formerly portion U.S. Highway 40) via Donnellsville, Phoneton, Vandalia, and Englewood, Ohio, to junction U.S. Highway 40 (near Clayton, Ohio), thence over U.S. Highway 40 to Indianapolis, Ind., and return over the same route.

No. MC 108835 (Deviation No. 8), HYMAN FREIGHTWAYS, INC., 1745 University Ave., St. Paul, Minn. 55104, filed August 26, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Minneapolis, Minn., over Interstate Highway 35E to junction Interstate Highway 94, thence over Interstate Highway 94 to junction Minnesota Highway 56, thence over Minnesota Highway 56 to junction U.S. Highway 52, thence over U.S. Highway 52 to junction U.S. Highway 63, thence over U.S. Highway 63 to Waterloo, Iowa, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Minneapolis, Minn., over U.S. Highway 169 to Fort Dodge, Iowa, thence over U.S. Highway 20 to Waterloo, Iowa, and return over the same route.

No. MC 111231 (Deviation No. 62), JONES TRUCK LINES, INC., 610 E. Emma Ave., Springdale, Ark. 72764, filed August 17, 1977. Carrier's representative: Kim Mann, Suite 1010, 7101 Wisconsin Ave., Washington, D.C. 20014. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Oklahoma City, Okla., over Interstate Highway 35 to junction Interstate Highway 35W, thence over Interstate Highway 35W to junction U.S. Highway 81, thence over U.S. Highway 81 to Belleville, Kans., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Oklahoma City, Okla., over U.S. Highway 66 to junction U.S. Highway 69, thence over U.S. Highway 69 to junction U.S. Highway 24, thence over U.S. Highway 24 to junction U.S. Highway 81, thence over U.S. Highway 81 to Belleville, Kans., and return over the same route.

MOTOR CARRIER ALTERNATE ROUTE DEVIATIONS

NOTICE

The following letter notices to operate over deviation routes for operating convenience only have been filed with the Commission under the Deviation Rules—Motor Carrier of Passengers (49 CFR 1042.(c)(9)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of this FEDERAL REGISTER notice.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its request.

MOTOR CARRIERS OF PASSENGERS

No. MC 1515 (Deviation No. 731) (Cancels Deviation No. 722), GREYHOUND LINES, INC., Greyhound Tower, Phoenix, Ariz. 85077, filed August 23, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passenger and their baggage*, and *express* and *newspapers* in the same vehicle with passengers, over deviation routes as follows: From Hillsville, Va., over U.S. Highway 58 to junction Interstate Highway 77, thence over Interstate Highway 77 to Charlotte, N.C., with the following access route: (1) From Mount Airy, N.C., over North Carolina Highway 89 to junction Interstate Highway 77 and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From Hillsville, Va., over U.S. Highway 52 via Mount Airy, N.C., to Winston-Salem, N.C., thence over U.S. Highway 158 to Mocksville, N.C., thence over U.S. Highway 64 to Statesville, N.C., thence over North Carolina Highway 115 via Shepherd, Mooresville, Davidson, and Huntersville to junction U.S. Highway 21, thence over U.S. Highway 21 to Charlotte, N.C., and return over the same route.

No. MC 74761 (Deviation No. 11), TAMIAMI TRAIL TOURS, INC., 525 Madison St., Tampa, Fla. 33602, filed August 23, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage*, and *express* and *newspapers* in the same vehicle with passengers, and a deviation route as follows: From Woodbury, Ga., over Georgia Highway 85E to Manchester, Ga., thence over U.S. Highway Alternate 27 to junction U.S. Highway 80, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From Woodbury, Ga., over Georgia Highway 85W to Warm Springs, Ga., thence over Georgia Highway 41 to Talbotton, Ga., thence over U.S. Highway 80 to junction U.S. Highway Alternate 27, and return over the same route.

MOTOR CARRIER INTRASTATE APPLICATION(S)

NOTICE

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 206(a)(6) of the Interstate Commerce Act. These applications are governed by Special Rule 245 of the Commission's General Rules of Practice (49 CFR 1100.245), which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall not be addressed to or filed with the Interstate Commerce Commission.

Alaska Docket No. 77-269-MF-O, filed August 3, 1977. Applicant: CHUGIAK ENTERPRISES, INC., Lee Road, Box 44, Eagle River, Alaska 99577. Applicant's representative: John M. Stern, Jr., P.O. Box 1672, Anchorage, Alaska 99510. Certificate of Public Convenience and Necessity sought to operate a freight service in *contract carrier* operations transporting: *Dairy and bakery products*, between points in Alaska.

NOTE.—Some of the products transpbrted may be classified as interstate from time to time.

Hearing: Date, time, and place not yet fixed. Requests for procedural information should be addressed to the Alaska Public Utilities Commission, 1000 Mackay Building, 338 Denali St., Anchorage, Alaska 99501, and should not be directed to the Interstate Commerce Commission.

Montana Docket No. 3387, filed August 15, 1977. Applicant: RIMROCK STAGES INC., 1225 Dublin St., Billings, Mont. 59101. Applicant's representative: Hugh Sweeney, 175 N. 27th St., Suite 1201, Billings, Mont. 59101. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *Passengers, baggage and express*, between Helena and Missoula, Mont., via Elliston, Avon, Garrison, and Drummond, Mont., as a Class A (scheduled) intrastate carrier, interstate and foreign commerce authority also sought. Hearing: Date, time, and place set for October 11, 1977, in Helena,

V 42 174 SEP 8 77 UMI

Mont., at a time and address to be assigned later. Requests for procedural information should be addressed to the Montana Public Service Commission, 1227 11th Avenue, Helena, Mont. 59601, and should not be directed to the Interstate Commerce Commission.

South Carolina Docket No. 77-473-T, filed August 15, 1977. Applicant: SMITH & WATERS, INC., Nation Rd., Ware Shoals, S.C. 29692. Applicant's representative: William B. Patrick, Jr., P.O. Drawer 1207, Greenwood, S.C. 29646. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *Commodities in general* over irregular routes (except any commodities or products in bulk in tank trucks; Classes A and B explosives and Classes A, C and D poisons as defined under explosives and other dangerous articles in American Trucking Association, Inc., Agent, tariff No. 10, MF-ICC No. 11, PSCSC No. 11, supplements thereto or reissues thereof: and household goods and related articles, as defined in Motor Truck Rate Bureau, Agent, household goods tariff, Motor Freight tariff No. 8-C, SCPSC-MF No. 79, supplements thereto or reissues thereof); between points and places in Abbeville, Aiken, Anderson, Edgefield, Greenwood, Laurens, McCormick, Newberry, Oconee, Pickens, and Saluda Counties, S.C.; and between points and places in these counties and points and places in South Carolina and between points and places in Greenville County for the purpose of interchange only, and between points and places in Greenville County for the purpose of interchange only and points and places in South Carolina (except that no commodities in bulk in dump vehicles may be transported between points and places in Laurens, Newberry, Oconee and Pickens Counties, and between points and places in these counties and points and places in South Carolina, not including that area within a five mile radius of the post office at Ware Shoals); *cotton in bales, cotton waste, cotton bagging and cotton ties; and, fertilizer and fertilizer materials:* Between points and places in South Carolina; *fruits and vegetables:* Between points and places in Edgefield and Saluda Counties, S.C., and between points and places in Edgefield and Saluda Counties and points and places in South Carolina; *Brick, tile, terra cotta pipe, concrete blocks, pipe and slabs:* Between points and places in Aiken, Fairfield, Greenwood, Lexington, and Richland Counties, S.C., and from points and places in these counties to points and places in South Carolina, *grain:* Between points and places in Aiken, Edgefield, and Saluda Counties, S.C., and between points and places in these counties and points and places in South Carolina; *and petroleum products* in drums and packages: From Charleston, S.C., to points and places in Edgefield County, S.C. No other change is sought. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to the South Carolina Public Service Commission, 8th Floor, Owens Building, P.O. Box 11649, Columbia, S.C. 29211 and should not be directed to the Interstate Commerce Commission.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

FEDERAL REGISTER CITATIONS OF PREVIOUS ANNOUNCEMENTS: 10:30 a.m.—42 FR 44111; 10:45 a.m. and 11 a.m.—FR 44112 and 42 FR 44113, September 1, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETINGS: 10:30 a.m., 10:45 a.m., and 11 a.m., September 6, 1977.

CHANGES IN THE MEETING: The three above entitled meetings are cancelled.

CONTACT PERSON FOR MORE INFORMATION:

Alan R. Miller, Executive Secretary (202-389-4446).

[S-1257-77 Filed 9-6-77;10:59 am]

2

FEDERAL TRADE COMMISSION.

TIME AND DATE: 10 a.m., Monday, September 12, 1977.

PLACE: Room 432, Federal Trade Commission Building, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

STATUS. Closed.

MATTERS TO BE CONSIDERED:

NONADJUDICATIVE MATTER

(1) Approval of minutes of nonadjudicative matters considered at meetings of July 22, 26, and 28, 1977.

(2) Consideration of issuance of complaint in (non-public) part II matter.

(3) Consideration of Maroor, et al. (Docket 9092): Motion by respondent to dismiss complaint and recommendation by staff to amend complaint.

(4) Consideration of issuance of proposed resolution authorizing compulsory process in (nonpublic) part 2 matter.

ADJUDICATIVE MATTERS UNDER PART 3 OF THE RULES OF PRACTICE

(1) Approval of minutes of adjudicative matters considered at meeting of July 26, 1977.

CONTACT PERSON FOR MORE INFORMATION:

Leonard J. McEnnis, Jr., Office of Public Information, 202-523-3830; recorded message, 202-523-3806.

PART II

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

NATIONAL FLOOD INSURANCE PROGRAM

Proposed and Final Flood Elevation Determinations for Various Communities

V 42 174
SEP 8 77
UMI

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-3288]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

City of Macon, Mo.; Final Flood Elevation Determination

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the City of Macon, Mo.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the City of Macon, Mo.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Macon are available for review at City Hall, Macon, Mo.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh St. SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the city of Macon, Missouri.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Dock Creek, tributary No. 1.	Rustic Dr.	285
Salt River, tributary No. 3.	U.S. Highway 63 (upstream side).	825
	5th St.	832
	6th St.	836
Salt River, tributary No. 4.	Main St.	832
Salt River, tributary No. 5.	Riggs St.	833
Salt River, tributary No. 6.	Walnut St.	814
	Hilldale Dr.	824
Salt River, tributary No. 7.	Vine St.	807
	Walnut St.	835

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-3292]

CITY OF PLATTE CITY, MO.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Platte City, Mo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, Main Street, Platte City, Mo.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Truman Glenn, P.O. Box 716, Platte City, Mo. 64079.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Platte City, Mo., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Platte River	Highway M-92	786
	Corporate limits	785
	do.	780
	do.	777

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128) and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

CITY OF WILLCOX, COCHISE COUNTY, ARIZ.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Willcox, Cochise County, Ariz. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the bulletin board in City Hall, 151 West Maley St., Willcox, Ariz.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable Wayman Hopkins, Mayor of Willcox, 151 West Maley St., Willcox, Ariz. 85643.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Willcox, Cochise County, Ariz., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will

V 42 174 SEP 8 77 UMI

also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year-flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Sales Barn Diversion Channel.	Haskell Ave	4,173
	Wood St	4,169
	Railroad	4,166
	Downstream corporate limit.	4,163
Shallow flooding west of I-10.	North corporate limit.	4,180
	South corporate limit.	4,177
Shallow flooding west of Sales Barn Diversion Channel.	Rex Allen Dr.	4,172
	Wood Street Dike	4,170
	Intersection of Curtis Ave. and Fremont St.	4,168
	Intersection of McCourt St. and Railroad Ave.	4,166
	South corporate limit.	4,164

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-3276]

SACRAMENTO COUNTY, CALIF.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in Sacramento County, Calif. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the County Administration Building, 827 7th St., Sacramento County, Calif.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Fred Wade, Chairman, Board of County Supervisors, Sacramento County, County Administration Building, 827 7th St., Sacramento County, Calif. 95814.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh St., SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for Sacramento County, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

[FR Doc.77-25173 Filed 9-7-77;8:45 am]

[24 CFR Part 1917]

[Docket No. FI-3277]

TOWN OF GLEN RIDGE, FLA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Glen Ridge, Fla. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Town Hall, 1300 Glen Rd., West Palm Beach, Fla.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Anita G. Yount, Town Hall, 1300 Glen Rd., West Palm Beach, Fla. 33406.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh St. SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Glen Ridge, Fla.,

V 42 174 SEP 8 77 UMI

in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
West Palm Beach Canal.	South end of Glen Rd.	12
Rainfall and Ponding.	Intersection of Glen Lake Dr. to Island Rd.	12

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[24 CFR Part 1917]

[Docket No. FI-3284]

VILLAGE OF PENTWATER, MICH.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Village of Pentwater, Mich. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Village Hall, 327 Hancock Street, Pentwater, Mich.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Edward A. Schimke, Village Hall, 327 Hancock Street, Pentwater, Mich. 49449.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line (800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Pentwater, Mich., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordiances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Pentwater Lake	1 Lake Rd., starting 105 ft east of Bean Rd. and extending west to the lake.	584
	On 6th St., starting at its intersection with Hancock extending to 150 ft east of Wythe St.	584

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

HEAVY-DUTY ENGINES FOR 1979 AND LATER MODEL YEARS

Certification and Test Procedures

V 42 — 174
SEP 8 77
UMI

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 767-7]

PART 86—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND MOTOR VEHICLE ENGINES: CERTIFICATION AND TEST PROCEDURES

Certification and Test Procedures for Heavy-Duty Engines for 1979 and Later Model Years

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule prescribes more stringent gaseous emission standards for heavy-duty gasoline-fueled and Diesel engines for the 1979 and later model years, and revises parts of the current instrument requirements and test procedures. Although there have been gains in control of air pollution, there are many air quality control regions which will not be able to meet ambient air quality standards with currently implemented control strategies. Heavy-duty vehicles contribute a significant percentage of the total hydrocarbons (HC), carbon monoxide (CO), and oxides of nitrogen (NO_x) in the air. This regulatory action will result in significant reductions in gaseous emissions from heavy-duty vehicles.

This action is forecast to result in a reduction by 1990 in nationwide emissions of .18 to .30 million tons of HC, up to .80 million tons of CO, and .12 to .22 million tons of NO_x. These reductions correspond to urban air quality improvements of 2 to 5 percent for oxidants, 1 percent for carbon monoxide and 1 to 2 percent for nitrogen dioxide.

EFFECTIVE DATE: October 18, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert Smith, Regulatory Management Staff, Office of Mobile Source Air Pollution Control (AW-455), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460 (202-755-0596).

SUPPLEMENTARY INFORMATION: The Environmental Protection Agency (EPA) published a Notice of Proposed Rulemaking (NPRM) on May 24, 1976, proposing to revise the heavy-duty engine (HDE) emission regulations for 1979 and later model years (41 FR 21292). EPA proposed to lower the current gaseous emission standards of 16 grams/brake horsepower-hour[1] (g/BHP-hr) hydrocarbons plus oxides of nitrogen ($HC+NO_x$) and 40 g/BHP-hr carbon monoxide (CO) to 1.5 g/BHP-hr, HC, 25 g/BHP-hr CO, and 10 g/BHP-hr $HC+NO_x$. Also, a more stringent peak smoke opacity standard for Diesel engines was proposed. The current peak smoke opacity is 50 percent and the proposed level was 35 percent.

Other proposed changes included test procedure and instrumentation revisions. Several significant changes for both gasoline-fueled and Diesel engine sampling and analytical systems were proposed. Hydrocarbons (HC) would be measured by a heated flame ionization detector (HFID), replacing the present non-dispersive infrared (NDIR) analyzer used in testing gasoline-fueled engines. The Diesel test procedure already uses an HFID. Oxides of nitrogen would be measured by a chemiluminescence (CL) analyzer instead of the current NDIR instruments. The CL analyzer, when coupled with a reducing converter, would measure total oxides of nitrogen ($NO+NO_2$) and not just nitric oxide (NO) as is the case with the current NDIR analyzers.

Concurrent with the change in exhaust gas analyzers, changes to the exhaust sample conditioning and transport system were proposed. These revisions in sample line length, sample transit time, arrangements, heating requirements, etc. were considered necessary to insure accurate results. Calibration procedures and instrument checks were revised accordingly.

Air-flow measurement of gasoline-fueled engines was also proposed in order to provide a basis for calculating the wet to dry sample correction factor (Kw), and also to compute a measured air-fuel ratio. The measured air-fuel ratio could then be compared to the air-fuel ratio calculated from the exhaust gas constituents. This would serve as the only overall system quality control check. Measured and calculated values were to agree within 10 percent for a valid test.

Several changes were also proposed to the test cycle for both gasoline-fueled and Diesel engines. For gasoline-fueled engines a change to engine torque to define the various operating modes (instead of engine manifold vacuum) for the 9-mode test was most significant. Two other related changes in the 9-mode test procedures were proposed. First, time in mode was increased to a uniform 60 seconds for each mode. Second, the number of cycles per test was reduced from 4 to 2.

Only one significant change was made in the Diesel 13-mode test cycle. The time in mode was reduced from 10 minutes per mode to 5 minutes per mode to significantly reduced the time required to complete an entire test.

The 90-day comment period on the proposed rules ended August 23, 1976. Twenty-two (22) commenters responded to the request for comments. The bulk of the comments received were from the heavy-duty engine manufacturers. After analyzing the comments, EPA identified several major issues associated with the proposed action. They are: (1) lead time, (2) need for revised test procedures and instrument changes, (3) gasoline emission test cycle percent torque values, (4) emission standards, (5) technological impact, (6) fuel economy, (7) performance, (8) engine and vehicle costs, (9) certification and testing costs, (10) cost effectiveness, and (11) medium-duty Diesel engine test procedures. Each of these issues is discussed in this preamble.

In response to the comments, EPA in this final rulemaking has made 6 significant revisions to the regulations initially proposed:

1. For 1979 only, optional use of the existing test procedures and instrumentation will be allowed. Standards generally equivalent in stringency to these newly promulgated standards will be required to be met for 1979 when using these optional procedures. In addition, optional compliance with a standard of 5 g/BHP-hr $HC+NO_x$ and 25 g/BH-hr CO may be demonstrated using either the existing or new test procedures. All subsequent emission testing (1980 and later) will be by the new test procedures, with the exception of small volume manufacturers, who will afford the option of continuing to use the existing test procedures. For 1980 and subsequent model years compliance may be demonstrated to the originally proposed emission standards (1.5 g/BHP-hr HC, 25 g/BHP-hr CO, and 10 g/BHP-hr $+NO_x$ or the more stringent (5 g/BHP-hr $HC+NO_x$ and 25 g/BHP-hr CO) levels at the option of the manufacturer.

2. EPA has decided not to promulgate the proposed 35 percent peak smoke opacity standard for Diesel engines. The current 50 percent peak smoke opacity standard will remain in effect.

3. The requirement for compliance, without deviation, with a specified analysis system schematic has been deleted. Instead, minimum requirements and performance specifications are substituted. The detailed schematic remains to provide guidance only.

4. The requirement for intake air-flow measurement for gasoline-fueled engines was deleted.

5. A chemiluminescence analyzer was specified for NO_x measurement in the NPRM. In the final rule a chemiluminescence analyzer or a high performance NDIR analyzer with an NO_2 to NO converter is specified for NO_x measurement. An option to allow the use of current NDIR analyzers with an NO_2 to NO converter is also included.

6. The CO_2 measurement for Diesel engines, required in the NPRM, is made optional in the final rule.

Discussion of Major Issues

LEAD TIME

The commenters claimed that there is insufficient lead time to comply with the regulations as proposed for the 1979 model year. EPA's analysis supports the manufacturers' claim that lead time for implementing the new instrumentation and test procedures is tight for the 1979 model year. Consequently, EPA is promulgating the emission standards for 1979 and subsequent model years, but is allowing the continued use of the existing test procedures and instrumentation to demonstrate compliance for 1979. All subsequent demonstrations of compliance (1980 and later) will be only by the new test procedures (with the exception of small volume manufacturers), and compliance may be demonstrated to the originally proposed standards (1.5 HC, 25 CO, 10 $HC+NO_x$ or the more stringent levels (5.0 HC $+NO_x$, 25 CO) at the option of the manufacturer.

Heavy-duty engine test data submitted prior to the 1980 model year may be used in subsequent model years' certification without regard to the test procedure used to generate the data. Any heavy-duty engine that is certified in the 1979 model year may be certified for 1980 and later model years on a carryover basis if no changes in the engine are made to the 1979 certified configuration that would require a new demonstration of compliance. If a new demonstration of compliance is required because of design or calibration changes on the 1980 or later model year engine and/or emission control systems, the new test procedures and standards will apply.

The following chart lists the optional combinations of emission standards and test procedures applicable beginning in 1979. These optional standards are not considered to be absolutely equivalent in stringency to the primary standards but are being allowed to ease the tight lead time situation.

	Engine type	Test procedures and instrumentation	Emission standards (grams per brake horsepower-hour)		
			Hydrocarbons[1]	Carbon monoxide	Hydrocarbons plus oxides of nitrogen
Primary standards applicable to 1979 and later.	Gasoline and diesel.	New	1.5	25	10.0
				25	5.0
Optional standards applicable to 1979 model year only.	Diesel	Current	1.5	25	10.0
	Gasoline and diesel.	do		25	5.0
	Gasoline	do	1.0	25	9.5

[1] The current regulations for gasoline engines specify hydrocarbon measurement by nondispersive infrared. However, the new procedures require heated flame ionization detector (HFID). The empirical HFID to NDIR ratio is about 1.5. The current procedures for diesel engines already require a HFID for HC measurement.

Test Procedure and Instrumentation Changes

EPA proposed in the heavy-duty NPRM various equipment specifications and equipment operational procedures to insure that the emission levels are measured accurately and precisely. Among the equipment specifications proposed were chemiluminescence for NO_x measurement (currently measured by NDIR), heated flame ionization detector for gasoline engine HC measurement (currently measured by NDIR), intake air-flow measurement for gasoline-fueled engines, and CO_2 measurement for Diesel engines. The operational procedures proposed included analytical system leak checks, HC hang-up checks, and response-time checks. More detailed analyzer checkout, optimization, and calibration and test procedures were also proposed.

The commenters questioned the need for the extensive test procedure and instrumentation changes proposed. After analyzing the manufacturers' comments and re-evaluating the need for the proposed test procedure and instrumentation changes, EPA has made the following major revisions to the heavy-duty NPRM:

(a) The requirement for use of a specified analysis system designed without deviation in accordance with EPA's schematic diagram has been deleted. Instead, minimum requirements and performance specifications are substituted. The detailed schematic diagram remains to provide guidance only.

(b) The requirement for intake air-flow measurement for gasoline-fueled engines was deleted.

(c) A chemiluminescence analyzer or high performance NDIR analyzer with an NO_2 to NO converter is specified for NO_x measurement. An option to allow the use of current NDIR analyzers with an NO_2 to NO converter is also included.

(d) The CO_2 measurement is made optional for Diesel engines.

Other minor changes in specifications, tolerances, and procedures were made to provide greater flexibility in complying with the regulations. Detailed discussions of these changes can be found in Appendix I of the "Summary and Analysis of Comments to the NPRM: Revised Heavy-Duty Engine Regulations for 1979 and Later Model Years".

Additionally, variations from the test procedure requirement are permitted if equivalency is proven.

Recent investigations related to the HC measurement system for light-duty Diesels have indicated that the current procedure, which is designed to measure essentially all HC emissions, may result in the measurement of some hydrocarbons that do not contribute to the formation of photochemical smog. It has been suggested that the heated sample system, since it is maintained at high temperature (375° F), measures HC compounds in the vapor state that might normally condense as aerosols in the atmosphere without contributing to smog formation.

The standards now being finalized for heavy-duty engines include the requirement for measurement of HC by means of a heated flame ionization detector (HFID). While this has always been the procedure for heavy-duty Diesel engines, the use of an HFID for gasoline engines is a new requirement. The requirement for such a procedure is being retained for the following reasons even though the issue regarding the appropriateness of measuring HC aerosols is not yet fully resolved:

1. The new heavy-duty engine standards are interim standards which were based on technology limitations and not ultimate air quality needs. Air quality needs would have dictated even more stringent standards. These technology-based standards were developed by considering the lowest emission levels achievable with currently available technology and with measurements being made with an HFID. Until more stringent long term standards are adopted based on air quality needs, there is no need to address further the issue regarding what HC compounds should or should not be regulated.

2. The HC standards was developed by considering the lowest level currently achievable with gasoline engines. This was determined to be 1.0 g/BHP-hr on a "cold basis" using a non-dispersive infrared analyzer. The new standards were adjusted upward to 1.5 g/BHP-hr to account for the fact that the new procedure using an HFID results in higher amounts of HC being recorded. This approach was taken to allow the use of an HFID which avoids HC hang-up problems and provides for a more reliable and repeatable test.

3. Diesel engines certified under current regulations, on the average, have had HC levels well below the 1.5 g/BHP-hr standard being adopted for 1979. The average HC level for 1974 Diesel certification engines was 0.92 g/BHP-hr. These measurements were on a total HC basis using an HFID. Thus, the new regulations will not have caused any undue hardship on Diesel engine manufacturers regardless of the outcome of the total HC measurement issue.

4. If a new test procedure would be developed which eliminated the measurement of any HC compounds that should not be counted, these interim standards would have to be readjusted to reflect the change. At least in the case of Diesel engines if less HC was going to be measured, the combined HC plus NO_x standard would have to be lowered to retain the desired level of NO_x control. That is, without changing the $HC+NO_x$ standard, a new procedure recording less HC would allow a manufacturer a greater margin in the effective NO_x standard. The result would be to require less than the maximum control of NO_x achievable with current technology. This would be a severe compromise, since in the case of Diesel engines, additional NO_x control is the only significant impact of the regulations.

Gasoline Emission Test Cycle Percent Torque Values

EPA proposed to replace the 19, 16, 10 and 3 in-Hg (manifold vacuum) load levels in the 9-mode gasoline Federal Test Procedure (FTP) with percent torque values of 10, 25, 55, and 90, respectively. In general, the gasoline engine manufacturers disagreed with the 90 percent and 55 percent torque equivalents to replace the 3 in-Hg and 10 in-Hg power levels. EPA re-examined its data base and incorporated into it data sup-

[1] Grams per brake horsepower-hour (g/BHP-hr) is the method of choice for expressing engine emission standards since engine emissions must be expressed in terms of units of work performed rather than in terms of grams per mile as is the case with vehicles.

V 42 174 SEP 8 77 UMI

plied by the commenters. The data analysis indicates that the 90 percent and 55 percent torque values were correct. Most importantly, the latest truck operational data available to EPA (CAPE–21) clearly demonstrated that a substantial amount of truck operation was above 90 percent. EPA has therefore retained the proposed percent torque values in the final regulation.

Emission Standards

In general, the comments submitted indicated that the proposed heavy-duty standards could be met by all of the manufacturers with the use of currently available emission control technology. The majority of the commenters did not object to the proposed gaseous emission standards. EPA has retained the proposed gaseous emission standards in the final regulation.

Several commenters questioned EPA's rationale for proposing to reduce the Diesel smoke opacity from 50 percent to 35 percent and projected losses in acceleration performance to achieve compliance. Based on EPA's analysis, it appears that the Diesel manufacturers can meet the proposed peak smoke standard with a low level of effort and little or no cost. Nearly all Diesel engine families already meet a peak smoke level of 35 percent. On the other hand, an air quality benefit obtained by reducing the current peak smoke level is not readily identifiable. Moreover, if the claimed losses in acceleration in fact occur, and in the face of major technical difficulties in enforcing in the field the difference between a 35 percent and 50 percent opacity standard, widespread misadjustment in the field to regain a performance feature important to the driver might be common. In light of the above facts, EPA deleted the proposed 35 percent peak smoke opacity in the final rule. The current 50 percent peak smoke opacity remains in effect.

Technological Impact of the Proposed Emission Standards

All the manufacturers indicated that the proposed heavy-duty emission standards for 1979 could be met with the use of currently available emission control technology. Thus, the manufacturers did not take issue with EPA's premise that the technology to meet the proposed standards is available. Rather, the commenters summarized the technological impact of the proposed standards. Also, several manufacturers pointed out areas of disagreement in the supporting documents to this regulatory action. The most important issues raised by the manufacturers are:

1. Catalyst technology may be necessary for gasoline engines to meet the proposed standards; and,

2. The proposed standards will force discontinuance of naturally aspirated Diesel engines and require the use of intercoolers and turbochargers.

On the first point, EPA maintains that the proposed emission standards are achievable with currently available control technology. Further, EPA believes that the standards are obtainable without the use of catalysts or of costly and unproven technology. (The General Motors statements support EPA's position on this). However, EPA recognizes that catalyst technology may be an alternative for some manufacturers, especially if fuel economy needs to be maximized without using sophisticated engine improvements.

On the second point, EPA believes that the existing trend toward Diesel engines that use intercoolers and turbochargers is only marginally related to the emission standards. The trend toward constant speed (55 mph) heavy-duty vehicles equipped with an engine with significant torque backup is in response to the desire for improved fuel economy, not emission control. The manufacturers did not submit data that would demonstrate that turbochargers and intercoolers are required to meet the emission standards. Most importantly, a maximum increase of only 4 percent in the use of turbocharges may occur. Therefore, EPA views the costs of intercoolers and turbochargers as not being properly chargeable to the emission control standards.

Fuel Economy

The major Diesel engine manufacturers stated that, when compared to fuel efficiency of existing engines, no fuel economy penalty will result in complying with the proposed emission standards though some potential fuel economy gains may be foregone. On the other hand, the gasoline engine manufacturers have claimed fuel economy penalties ranging from zero to 20 percent. After evaluating the manufacturers' comments, EPA concluded that Diesel engines will not suffer any real fuel economy penalty as a result of the proposed action. However, gasoline engines may have an industry-wide fuel economy penalty anywhere from zero to 5 percent. (The 5 percent figure represents a projection of a sales weighted average fuel economy penalty based on the data submitted by the industry and assumes very limited use of catalyst control technology.) EPA views the 5 percent limit as a worst-case temporary penalty for several reasons. One manufacturer, accounting for over 30 percent of the market, has indicated that he will be able to produce in model year 1979 engines equipped with non-catalyst technology that will not experience a fuel penalty. Over time, other manufacturers should be able to develop similar technologies for use on their engines. Manufacturers could also elect to perfect the use of catalyst technology on heavy-duty gasoline engines to optimize fuel economy.

In general, utilization of fuel efficient emission control technologies by all manufacturers by the 1979 model year is probably precluded at this time, though in one to three years after that manufacturers should have been able to perfect these systems. Certainly the current operating environment for heavy-duty engines is such that the need to conserve energy and limit operating expenses are recognized, and should provide engine manufacturers an incentive to develop fuel efficient technologies. Thus, any fuel penalty which does occur in 1979 should disappear in one to three years' time.

Performance

One gasoline-fueled engine manufacturer claimed that the imposition of the more stringent gaseous emission standards would have a deleterious effect on vehicle performance. Based on evaluation of the comments, EPA agrees that some loss in acceleration for gasoline-fueled vehicles could occur in meeting the proposed emission standards. The magnitude of these possible losses and the associated impacts could not be quantified. On the other hand, competitive market pressures should cause manufacturers to maintain more than acceptable levels of vehicle performance in their products.

Engine and Vehicle Costs

EPA stated in the preamble to the NPRM that the retail price increase per engine would be approximately $110 for gasoline and $120 for Diesel. Except for International Harvester Corp. and General Motors, the gasoline engine manufacturers agreed fairly closely with EPA's estimate. Averaging Ford's, Chrysler's and EPA's estimates results in a cost increase of $120 for gasoline vehicles. This cost increase projection ($120) will replace EPA's original estimate of $110.

The Diesel manufacturers claimed the need for turbochargers to meet the proposed regulations. As explained in the issue on technological impact, EPA has concluded that turbochargers are used primarily to improve fuel economy. A side effect may be lower emissions, but EPA estimates that to meet the 1979 standards improved fuel systems and EGR (exhaust gas recirculation) will suffice, at a total projected cost of $130.

Over a five-year period it will cost the industry approximately $350 million to comply with this regulation assuming no fuel penalty occurs. Approximately $5 million of this is the cost for modifying industry emission test cells to comply with the new regulations and $6 to $8 million for recertification of engines. If a five percent fuel penalty occurs for gasoline-fueled engines, the five-year costs of compliance increases between $200 to $560 million depending upon whether the fuel penalty is incurred for one year only or all five.

Certification and Testing Costs

Several manufacturers commented that EPA's estimates of the costs to certify heavy-duty engines were too low. The expense of running a certification program for heavy-duty engines is not the primary cost passed on to the vehicle purchaser. The emission control system hardware is the major factor. But, if the manufacturers' most pessimistic estimates were used, the overall cost effectiveness of this regulation would not be appreciably affected. Based on conversations with independent laboratories and experience with EPA contracts, it is estimated that certification costs per test engine will be approximately the same as stated in the draft Environmental and Inflationary Impact Statement:

	Durability	Emission data
Diesel	$50,000	$15,000
Gasoline	55,000	10,000

For the typical Diesel engine family with 3000 sales/year and a 3-year certification life, the straight-line amortized cost is about $10 per engine. Gasoline engine families will have lower unit costs due to larger sale volumes.

Cost Effectiveness

Based on the re-evaluation of baseline emission and fuel economy impacts, the cost effectiveness of the standards was recalculated.

From the comments, it appears that a fuel economy penalty (for gasoline engines) of zero to 5 percent may result from imposing the proposed regulation (refer to discussion of the Fuel Economy Issue above). This possible fuel economy impact was factored into the cost effectiveness analysis. For purposes of comparison with other programs, a mid-range value of 2.5 percent fuel economy penalty was assumed for gasoline engines. A zero percent fuel economy penalty was assumed for Diesel engines. The following costs effectiveness figures were obtained:

	Dollars ($) per ton		
	Hydrocarbon	Carbon monoxide	Oxides of nitrogen
Gasoline	154	71	347
Diesel			129

The results indicated that at moderate levels of fuel economy penalty, this action remains cost effective. EPA has used the above values for the cost effectiveness of this regulation. EPA anticipates that any fuel economy penalty which may initially occur will most likely disappear, as stated previously. This will improve the cost effectiveness for subsequent model years.

Diesel Engine Test Procedures for Medium-Duty Application

Currently, the vast majority of all Diesel truck engines are used in vehicles over 26,000 pounds GVWR. The present Diesel engine test procedure was designed specifically for these heavy-duty applications. With increased fuel prices, there is a trend toward installing Diesels in lighter trucks for medium-duty (approximately 8,500–26,000 pounds GVWR) applications. EPA solicited comments on changes to the test procedure to accommodate this trend.

In response to EPA's request, the commenters recommended the following changes in the Diesel test procedure: (1) Optional, less severe certification for trucks up to 26,000 pounds GVWR, (2) revised durability and emission test cycles, and (3) useful life reduced to 5 years/50,000 miles. The commenters did not provide any substantial information or data that could be relied upon as a basis for developing a new class, test procedures, or a redefinition of useful life for a Diesel engine in medium-duty applications. Data available to EPA indicate to EPA that the recommended changes are not called for.

EPA has made no changes in the Diesel engine class definition, test procedures, or useful life at this time. However, if the manufacturers want to certify and build a Diesel engine for medium-duty application, they are encouraged to submit data that demonstrate that the current Diesel test procedures are unreasonable or unrealistic for emission testing. They are also encouraged to submit data and recommendations for an alternative test procedure that would be appropriate for the engine in question. Section 86.079–27, Special Test Procedures (corresponds to § 86.077–27 of existing regulations) of the regulations provides the means for the manufacturers to request special test procedures for emissions testing. If the test procedures specified in Subparts D and J can be shown to be unsatisfactory for testing of a particular power plant, the Administrator has the authority to prescribe alternate procedures. Since it does not appear that there is an urgent requirement for such modified Diesel engine test procedures, § 86.079–27 should serve as an adequate interim means of dealing with this issue until a formal test procedure for medium-duty application can be promulgated, should the need arise.

Additional Information

Comments which were received in response to the NPRM are available for inspection and copying during normal business hours at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 M St. SW., Washington, D.C. 20460. As provided for in 40 CFR Part 2, a reasonable fee may be charged for copying services.

Single copies of EPA's detailed analysis of comments received, entitled "Summary and Analysis of Comments to the NPRM: Revised Heavy-Duty Engine Regulations for 1979 and Later Model Years," dated July 1977, as well as copies of the Final Environmental Impact Statement, entitled "Environmental Impact Statement: Emission Standards for New Heavy-Duty Engines," dated August 4, 1977, are available upon request from the Printing Management Section (PM–215), U.S. Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460.

Readers are alerted that, due to enactment of the Clean Air Act Amendments of 1977 on August 7, 1977, certain provisions of the regulations applicable to light-duty motor vehicles intended for sale at high-altitude locations which are being reprinted herein are no longer in effect. In order not to delay the issuance of this regulation, these provisions have not been removed from this document. EPA intends to modify its high-altitude certification regulations in the near future in order to conform those regulations to the recently enacted law.

Note:—The Environmental Protection Agency has determined that this document contains a major regulation requiring preparation of an Economic Impact Analysis under Executive Orders 11821 and 11949, and OMB Circular A–107 and certifies that an Economic Impact Analysis has been prepared.

Dated: August 22, 1977.

DOUGLAS M. COSTLE,
Administrator.

40 CFR Part 86 is amended as follows:

Subpart A—General Provisions for Emission Regulations for 1977 and Later Model Year New Light-Duty Vehicles, 1977 and Later Model Year New Light-Duty Trucks, and for 1977 and Later Model Year New Heavy-Duty Engines

1. Paragraph (a) of § 86.077–2 is revised to read as follows:

§ 86.077–2 Definitions.

(a) The definitions in this section apply to this subpart and also to Subparts B, D, H, I, and J of this part.

* * * * * * *

2. Paragraph (a) of § 86.078–3 is revised to read as follows:

§ 86.078–3 Abbreviations.

(a) The abbreviations in this section apply to this subpart and also to Subparts B, D, H, I, and J of this part and have the following meanings:

* * * * * * *

3. Section 86.079–2 is revised by adding the following definitions interspersed among the existing definitions in alphabetical order.

§ 86.079–2 Definitions.

* * * * * * *

"Curb-idle" for manual transmission code heavy-duty engines means the manufacturer's recommended engine speed with the transmission in neutral or with the clutch disengaged. For automatic transmission code heavy-duty engines, curb-idle means the manufacturer's recommended engine speed with the automatic transmission in gear and the output shaft stalled.

* * * * * * *

"Dynamometer-idle" for automatic transmission code heavy-duty engines means the manufacturer's recommended engine speed without a transmission that simulates the recommended engine speed with a transmission and with the transmission in neutral.

* * * * * * *

"Gross vehicle weight rating" (GVWR) means the value specified by the manufacturer as the maximum design loaded weight of a single vehicle.

"Hang-up" refers to the process of hydrocarbon molecules being absorbed, adsorbed, condensed, or by any other method removed from the sample flow prior to reaching the instrument detector. It also refers to any subsquent desorption of the molecules into the sample flow when they are assumed to be absent.

V 42 174 SEP 8 77 UMI

"Intermediate speed" means peak torque speed if peak torque speed occurs between 60 and 75 percent of rated speed. If the peak torque speed is less than 60 percent of rated speed, intermediate speed means 60 percent of rated speed. If the peak torque speed is greater than 75 percent of rated speed, intermediate speed means 75 percent of rated speed.

• • • • • •

4. A new § 86.079–10 is added and reads as follows:

§ 86.079–10 Emission standards for 1979 gasoline-fueled heavy-duty engines.

(a) Exhaust emissions from new 1979 model year gasoline-fueled heavy-duty engines shall not exceed one of the three following standards, to be selected at the manufacturer's option:

(1) As measured in Subpart D of this part:

(i) *Hydrocarbons.* 1.5 grams per brake horsepower hour.

(ii) *Carbon monoxide.* 25 grams per brake horsepower hour.

(iii) *Hydrocarbons plus oxides of nitrogen.* 10 grams per brake horsepower hour.

(2) As measured in Subpart H of this part:

(i) *Hydrocarbons.* 1.10 gram per brake horsepower hour.

(ii) *Carbon monoxide.* 25 grams per brake horsepower hour.

(iii) *Hydrocarbons plus oxides of nitrogen.* 9.5 grams per brake horsepower hour.

(3) As measured in Subparts D or H of this part:

(i) *Hydrocarbons plus oxides of nitrogen.* 5 grams per brake horsepower hour.

(ii) *Carbon monoxide.* 25 grams per brake horsepower hour.

(b) [Reserved].

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any new 1979 and later model year gasoline-fueled heavy-duty engine.

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this section shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with applicable procedures in Subparts D or H of this part to ascertain that such test engines meet the requirements of paragraphs (a) and (c) of this section.

5. A new § 86.079–11 is added and reads as follows:

§ 86.079–11 Emission standards for 1979 Diesel heavy-duty engines.

(a) Exhaust emissions from new 1979 model year Diesel heavy-duty engines shall not exceed one of the two following standards, to be selected at the manufacturer's option:

(1) As measured in Subparts D or J of this part:

(i) *Hydrocarbons.* 1.5 grams per brake horsepower hour.

(ii) *Carbon monoxide.* 25 grams per brake horsepower hour.

(iii) *Hydrocarbons plus oxides of nitrogen.* 10 grams per brake horsepower hour.

(2) As measured in Subpart D or J of this part:

(i) *Hydrocarbons plus oxides of nitrogen.* 5 grams per brake horsepower hour.

(ii) *Carbon monoxide.* 25 grams per brake horsepower hour.

(b) (1) The opacity of smoke emissions from new 1979 and later model year Diesel heavy-duty engines shall not exceed:

(i) 20 percent during the engine acceleration mode.

(ii) 15 percent during the engine lugging mode.

(iii) 50 percent during the peaks in either mode.

(2) The standards set forth in paragraph (b)(1) of this section refer to exhaust smoke emissions generated under the conditions set forth in Subpart I of this part and measured and calculated in accordance with those procedures.

(c) [Reserved]

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this section shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with applicable procedures in Subpart D, I, or J of this part to ascertain that such test engines meet the requirements of paragraphs (a) and (b) of this section.

6. Section 86.079–21 is amended to read as follows:

§ 86.079–21 Application for certification.

(a) A separate application for a certificate of conformity shall be made for each set of standards and each class of new motor vehicles or new motor vehicle engines. Such application shall be made to the Administrator by the manufacturer and shall be updated and corrected by amendment.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the vehicle (or engines) covered by the application and a description of their engine (vehicles only), emission control system, and fuel system components. This shall include a detailed description of each AECD to be installed in or on any certification test vehicle (or certification test engine).

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the vehicles (or engines) for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) (i) A description of the proposed mileage (or service) accumulation procedure for durability testing.

(ii) A description of the test procedures to be used to establish the evaporative emission deterioration factors required to be determined and supplied in § 86.079–23(a)(2).

(5) A statement of recommended maintenance and procedures necessary to assure that the vehicles (or engines) covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission-data and durability-data test fleet.

(c) Complete copies of the application and of any amendments thereto, and all notifications under §§ 86.079–32, 86.079–33, and 86.079–34 shall be submitted in such multiple copies as the Administrator may require.

(d) Incomplete light duty trucks shall have a maximum completed curb weight and maximum completed frontal area specified by the manufacturer.

7. New §§ 86.079–22 through 86.079–25 are added and read as follows:

§ 86.079–22 Approval of application for certification; test fleet selections.

(a) After a review of the application for certification and any other information which the Administrator may require, the Administrator may approve the application and select a test fleet in accordance with § 86.079–24.

(b) The Administrator may disapprove in whole or in part an application for certification for reasons including incompleteness, inaccuracy, inappropriate proposed mileage (or service) accumulation procedures, test equipment, or fuel, and incorporation of defeat devices in vehicles (or on engines) described by the application.

(c) Where any part of an application is rejected, the Administrator shall notify the manufacturer in writing and set forth the reasons for such rejection. Within 30 days following receipt of such notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determinations, and data in support of such objections. If, after the review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 86.078–6 with respect to such issue.

(d) The Administrator does not approve the test procedures for establishing the evaporative emission deterioration factors. The manufacturer shall submit the procedures as required in § 86.079–21(b)(4)(ii) prior to the Administrator's selection of the test fleet under § 86.079–24(b)(1) and if such procedures will involve testing of durability-data vehicles selected by the Administrator or elected by the manufacturer under § 86.079–24(c)(1), prior to initiation of such testing.

§ 86.079–23 Required data.

(a) The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information: *Provided, however,* That:

(1) If requested by the manufacturer, the Administrator may waive any requirement of this section for testing of vehicles (or engines) for which emission data are available, or will be made available, under the provisions of § 86.079–29, or

(2) If requested by the manufacturer, the Administrator may waive any requirement of this section for testing of vehicles at zero kilometers of operation.

(b) (1) Exhaust emission durability data on such vehicles (or engines) tested in accordance with applicable test procedures and in such numbers as specified, which will show the performance of the systems installed on or incorporated in the vehicle (or engine) for extended mileage (or extended operation), as well as a record of all pertinent maintenance (all maintenance and servicing for heavy-duty engines) performed on the test vehicles (or test engines). Records of maintenance and servicing of heavy-duty engines performed prior to the zero-hour point do not need to be submitted but must be maintained.

(2) Evaporative emission deterioration factors for each evaporative emission family—evaporative emission control system combination and all test data that are derived from testing described under § 86.079–21(b)(4)(ii) designed and conducted in accordance with good engineering practice to assure that the vehicles covered by a certificate issued under § 86.079–30 will meet the evaporative emission standards in § 86.078–8 or § 86.079–9, as appropriate, for the useful life of the vehicle.

(c) Emission data.

(1) *Certification vehicles.* (i) Emission data on such vehicles tested in accordance with applicable test procedures and in such numbers as specified, which will show their emissions after zero kilometers (zero miles) and 6,436 kilometers (4,000 miles) of operation.

(ii) Emission data on those vehicles selected under § 86.079–24(b)(1)(v) and § 86.079–24(b)(1)(vii)(D) and tested in accordance with the applicable test procedures of this subpart and in such numbers as therein specified, which shall be tested at zero kilometers (zero miles) at any altitude, and under high-altitude conditions after 6,436 kilometers (4,000 miles) of operation at any altitude.

(2) *Certification engines.* Emission data on such engines tested in accordance with applicable emission test procedures and in such numbers as specified, which will show their emissions after 125 hours of operation. A zero-hour test may be performed after the engine has been approved by the Administrator to begin service accumulation.

(d) A statement that the vehicles (or engines) for which certification is requested conform to the requirements in § 86.078–5(b), and that the descriptions of tests performed to ascertain compliance with the general standards in § 86.078–5(b), and the data derived from such tests, are available to the Administrator upon request.

(e) (1) A statement that the test vehicles (or test engines) with respect to which data are submitted to demonstrate compliance with §§ 86.078–8, 86.079–9, 86.079–10, 86.079–11, 86.080–10, or 86.080–11, as applicable, are in all material respects as described in the manufacturer's application for certification, have been tested in accordance with the applicable test procedures utilizing the fuels and equipment described in the application for certification and that on the basis of such tests the vehicles (or engines) conform to the requirements of the regulations in this part. If such statements cannot be made with respect to any vehicle (or engine) tested, the vehicle (or engine) shall be identified, and all pertinent data relating thereto shall be supplied to the Administrator. If, on the basis of the data supplied and any additional data as required by the Administrator, the Administrator determines that the test vehicle (or test engine) was not as described in the application for certification or was not tested in accordance with the applicable test procedures utilizing the fuels and equipment as described in the application for certification, the Administrator may make the determination that the vehicle (or engine) does not meet the applicable standards. The provisions of § 86.079–30(b) shall then be followed.

(2) For evaporative emission durability, the statement of compliance with paragraph (b)(2) of this section.

§ 86.079–24 Test vehicles and engines.

(a) (1) The vehicles or engines covered by an application for certification will be divided into groupings of engines which are expected to have similar emission characteristics throughout their useful life. Each group of engines with similar emission characteristics shall be defined as a separate engine family.

(2) To be classed in the same engine family, engines must be identical in all the following respects:

(i) The cylinder bore center-to-center dimensions.

(ii) The dimension from the centerline of the crankshaft to the centerline of the camshaft.

(iii) The dimension from the centerline of the crankshaft to the top of the cylinder block head face.

(iv) The cylinder block configuration (air cooled or water cooled; L–6, 90° V–8, etc.).

(v) The location of intake and exhaust valves, (or ports) and the valve (or port) sizes (within a ¼-inch range on the valve head diameter or within 10 percent on the port area).

(vi) The method of air aspiration.

(vii) The combustion cycle.

(viii) Catalytic converter characteristics.

(ix) Thermal reactor characteristics.

(x) Type of air inlet cooler (e.g., intercoolers and after-coolers) for Diesel heavy-duty engines.

(3) Engines identical in all the respects listed in paragraph (a)(2) of this section may be further divided into different engine families if the Administrator determines that they may be expected to have different emission characteristics. This determination will be based upon a consideration of the following features of each engine.

(i) The bore and stroke.

(ii) The surface-to-volume ratio of the nominally dimensioned cylinder at the top dead center position.

(iii) The intake manifold induction port size and configuration.

(iv) The exhaust manifold port size and configuration.

(v) The intake and exhaust valve sizes.

(vi) The fuel system.

(vii) The camshaft timing and ignition or injection timing characteristics.

(4) Where engines are of a type which cannot be divided into engine families based upon the criteria listed in paragraphs (a)(2) and (3) of this section, the Administrator will establish families for those engines based upon the features most related to their emission characteristics.

(5) The gasoline-fueled vehicles covered by an application for certification will be divided into groupings which are expected to have similar evaporative emission characteristics throughout their useful life. Each group of vehicles with similar evaporative emission characteristics shall be defined as a separate evaporative emission family.

(6) To be classed in the same evaporative emission family, vehicles must be identical in all of the following respects:

(i) Type of vapor storage device (e.g., canister, air cleaner, crankcase).

(ii) Basic canister design.

(iii) Fuel system.

(7) Where vehicles are of a type which cannot be divided into evaporative emission families based on the criteria listed above, the Administrator will establish families for those vehicles based upon the features most related to their evaporative emission characteristics.

(b) Emission data: (1) *Emission-data vehicles.* Paragraph (b)(1) of this section applies to light-duty vehicle and light-duty truck emission-data vehicles.

(i) Vehicles will be chosen to be operated and tested for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Vehicles of each engine family will be divided into engine displacement-exhaust emission control system combinations as applicable. A projected sales volume will be established for each combination for the model year for which certification is sought. One vehicle of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of vehicles of that engine family is represented, or until a maximum of four vehicles is selected. If any single combination represents over 70 percent, then two vehicles of that combination may be selected. The vehicle selected for each combination will be specified by the Administrator as to such features as engine code, transmission type, fuel system, and inertia weight class.

V 42 174 SEP 8 77 UMI

(iii) The Administrator may select a maximum of four additional vehicles within each engine family based upon features indicating that they may have the highest emission levels of the vehicles in that engine family. In selecting these vehicles, the Administrator will consider such features as the emission control system combination, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, compression ratio, inertia weight class, transmission options, and axle ratios.

(iv) If the vehicles selected in accordance with paragraphs (b)(1) (ii) and (iii) of this section do not represent each engine-system combination, then one vehicle of each engine-system combination not represented will be selected by the Administrator. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with the control system combination in the engine family and will be designated by the Administrator as to such features as transmission type, fuel system, and inertia weight class.

(v) The Administrator will also select one vehicle for each engine-system combination within an engine family for which vehicles are to be sold to ultimate purchasers at high altitude.

(vi) The Administrator may combine testing requirements for any vehicle selected under paragraph (b)(1)(v) or (b)(1)(vii)(D) of this section with the testing requirements for any similar vehicle in the same engine-system combination selected under paragraph (b)(1)(ii), (iii), or (iv) of this section or any similar vehicle in the same engine-system, evaporative emission family, evaporative emission control system combination selected under paragraph (b)(1)(vii)(A) or (B) of this section. The testing requirements may be combined by the Administrator requiring a vehicle selected for testing under paragraphs (b)(1)(ii), (iii), (iv), (vii)(A), or (vii)(B) of this section to be modified (if necessary) after mileage accumulation and emission testing for the purpose of demonstrating compliance with § 86.079-23(b)(1)(ii).

(vii) (A) Vehicles of each evaporative emission family will be divided into evaporative emission control systems. One vehicle of each evaporative emission control system within the evaporative emission family will be selected.

(B) The Administrator may select a maximum of four (4) additional vehicles within each evaporative emission family based upon features indicating that they may have the highest evaporative emission levels of vehicles in that family.

(C) The Administrator may determine that the vehicles selected under paragraph (b)(1)(ii) through (iv) of this section may be used to satisfy the requirements of paragraph (b)(1)(vii)(A) and (B) of this section.

(D) The Administrator will also select one vehicle for each evaporative emission control system within each evaporative family for which vehicles are to be sold at high altitude.

(E) Vehicles selected under paragraph (b)(1)(v) of this section may be used to satisfy the requirements of paragraph (b)(1)(vii)(D) of this section.

(2) *Gasoline-fueled heavy-duty emission-data engines.* Paragraph (b)(2) of this section applies to gasoline-fueled heavy-duty emission-data engines.

(i) Engines will be chosen to be run for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Engines of each engine family will be divided into engine displacement-exhaust emission control system combinations. A projected sales volume will be established for each combination for the applicable model year. One engine of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of engines of that family is represented, or until a maximum of four engines is selected. The engines selected for each combination will be specified by the Administrator as to fuel system.

(iii) The Administrator may select a maximum of two additional engines within each engine family based upon features indicating that they may have the highest emission levels of the engines in that engine family. In selecting these engines, the Administrator will consider such features as the exhaust emission control system, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, and compression ratio.

(iv) If the engines selected in accordance with paragraphs (b)(2) (ii) and (iii) of this section do not represent each engine displacement-exhaust emission control system combination, then one engine of each engine displacement-exhaust emission control system combination not represented shall be selected by the Administrator.

(3) *Diesel heavy-duty emission-data engines.* Paragraph (b)(3) of this section applies to Diesel heavy-duty emission-data engines.

(i) Engines will be chosen to be run for emission data based upon engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Engines of each engine family will be divided into groups based upon their exhaust emission control systems. One engine of each engine-system combination shall be run for smoke emission data and gaseous emission data as prescribed in § 86.079-26(c)(3). Either the complete gaseous emission test or the complete smoke test may be conducted first. Within each combination, the engine that features the highest fuel feed per stroke, primarily at the speed of maximum rated torque and secondarily at rated speed, will usually be selected. If there are military engines with higher fuel rates than other engines in the same engine system combinations, then one military engine shall be also selected. The engine with the highest fuel feed per stroke will usually be selected.

(iii) The Administrator may select a maximum of one additional engine within each engine-system combination based upon features indicating that it may have the highest emission levels of the engines of that combination. In selecting this engine, the Administrator will consider such features as the injection system, fuel system, compression ratio, rated speed, rated horsepower, peak torque speed, and peak torque.

(c) Durability data: (1) *Durability-data vehicles.* Paragraph (c)(1) of this section applies to light-duty vehicle and light-duty truck durability-data vehicles.

(i) A durability-data vehicle will be selected by the Administrator to represent each engine-system combination. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with that control-system combination in that engine family and will be designated by the Administrator as to transmission type, fuel system, and inertia weight class.

(ii) A manufacturer may elect to operate and test additional vehicles to represent any engine-system combination. The additional vehicles must be of the same engine displacement, transmission type, fuel system, and inertia weight class as the vehicle selected for that engine-system combination in accordance with the provisions of paragraph (c)(1)(i) of this section. Notice of an intent to operate and test additional vehicles will be given to the Administrator not later than 30 days following notification of the test fleet selection.

(2) *Gasoline-fueled heavy-duty durability-data engines.* Paragraph (c)(2) of this section applies to gasoline-fueled heavy-duty durability-data engines.

(i) A durability-data engine will be selected by the Administrator to represent each engine-system combination.

(ii) [Reserved]

(iii) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same engine displacement and fuel systems as the engine selected for that combination in accordance with the provisions of paragraph (c)(2)(i) of this section. Notice of an intent to run additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection. Deterioration factors calculated for each engine-system combination shall be applied separately to military and nonmilitary engines within the same engine-system combination.

(3) *Diesel heavy-duty durability-data engines.* Paragraph (c)(3) of this section applies to Diesel heavy-duty durability-data engines.

(i) One engine from each engine-system combination shall be tested as prescribed in § 86.079-26(c)(3)(ii). At each test point, either the complete gaseous emission test or the complete smoke test may be conducted first. Within each combination, the engine which features the highest fuel feed per stroke, primarily at rated speed and secondarily at the speed of maximum rated torque, will usually be selected for durability testing. In the case where more than one engine in an engine-system combination has the highest fuel feed per stroke, the engine with the highest maximum rated horsepower will usually be selected for durability testing. If an engine system combination includes both military and nonmilitary engines, then the nonmilitary engine with the highest maximum rated horsepower will usually be selected for durability testing.

(ii) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same model and fuel system as the engine selected in accordance with the provisions of paragraph (c)(3)(i) of this section. Notice of an intent to test additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection. Deterioration factors calculated for each engine-system combination shall be applied separately to military and non-military engines within the same engine system combination.

(d) For purposes of testing under § 86.079-26 (a)(9), (b)(9), or (c)(11), the Administrator may require additional emission-data vehicles (or emission-data engines) and durability-data vehicles (or durability-data engines) identical in all material respects to vehicles (or engines) selected in accordance with paragraphs (b) and (c) of this section: *Provided*, That the number of vehicles (or engines) selected shall not increase the size of either the emission-data fleet or the durability-data fleet by more than 20 percent or one vehicle (or engine), whichever is greater.

(e) Any manufacturer whose projected sales for the model year in which certification is sought is less than

(1) 2000 gasoline-fueled light-duty vehicles, or

(2) 2000 Diesel light-duty vehicles, or

(3) 2000 gasoline-fueled light-duty trucks, or

(4) 2000 Diesel light-duty trucks, or

(5) 2000 gasoline-fueled heavy-duty engines, or

(6) 200 Diesel heavy-duty engines,

may request a reduction in the number of test vehicles (or engines) determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines would meet the objectives of this procedure.

(f) In lieu of testing an emission-data or durability-data vehicle (or engine) selected under paragraph (b) or (c) of this section, and submitting data therefore, a manufacturer may, with the prior written approval of the Administrator, submit exhaust emission data and/or fuel evaporative emission data, as applicable, on a similar vehicle (or engine) for which certification has previously been obtained or for which all applicable data required under § 86.079-23 have previously been submitted.

(g)(1) This paragraph (g) applies to light-duty vehicles and light-duty trucks.

(2) Where it is expected that more than 33 percent of an engine family will be equipped with an optional item, the full estimated weight of that item shall be included, unless excluded by the Administrator, in the curb weight computation for each vehicle available with that option in the engine family. Where it is expected that 33 percent or less of the vehicles in an engine family will be equipped with an item of optional equipment, no weight for that item will be added in computing curb weight. In the case of mutually exclusive options, only the weight of the heavier option will be added in computing curb weight. Optional equipment weighing less than 3 pounds per item need not be considered.

(3) Where it is expected that more than 33 percent of an engine family will be equipped with an item of optional equipment that can reasonably be expected to influence emissions, then such items of optional equipment shall actually be installed, unless specifically excluded by the Administrator, on all emission-data and durability-data vehicles in the engine family on which the option is intended to be offered in production. Optional equipment that can reasonably be expected to influence emissions are the air conditioner, power steering, power brakes, and other items determined by the Administrator.

(4) Optional equipment that can reasonably be expected to influence emissions and which is utilized on 33 percent or less of the vehicles in the engine family shall not be installed on any vehicle in that engine family unless specifically required under this section.

§ 86.079-25 Maintenance.

(a) *Light-duty vehicles and light-duty trucks.* Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(1) Scheduled maintenance on the engine, emission control system, and fuel system of durability-data vehicles, selected by the Administrator or elected by the manufacturer under § 86.079-24(c)(1), shall be scheduled for performance during durability testing at the same mileage intervals that will be specified in the manufacturer's maintenance instructions furnished to the ultimate purchaser of the motor vehicle. Such maintenance shall be performed, except as provided in paragraph (a)(5)(iii) of this section, only under the following provisions:

(i) Scheduled major engine tuneups to manufacturer's specifications may be performed no more frequently than every 12,500 miles of scheduled driving: *Provided*, That no tuneup may be performed after 45,000 miles of scheduled driving. A scheduled major engine tuneup shall be restricted to paragraph (a)(1)(i)(A) or (B) of this section, and shall be conducted in a manner consistent with service instructions and specifications provided by the manufacturer for use by customer service personnel.

(A) *For gasoline-fueled vehicles*, the following items may be inspected, replaced, cleaned, adjusted, and/or serviced as required:

(1) Ignition system.

(2) Cold starting enrichment system (includes fast idle speed setting).

(3) Curb idle speed and air/fuel mixture.

(4) Drive belt tension on engine accessories.

(5) Valve lash.

(6) Inlet air and exhaust gas control valves.

(7) Engine bolt torque.

(8) Spark plugs.

(9) Fuel filter and air filter.

(10) Crankcase emission control system.

(11) Fuel evaporative emission control system.

(B) *For Diesel vehicles*, a major engine tuneup shall be restricted to the following:

(1) Adjust low idle speed.

(2) Adjust valve lash if required.

(3) Adjust injector timing.

(4) Adjust governor.

(5) Clean and service injector tips.

(6) Adjust drive belt tension on engine accessories.

(7) Check engine bolt torque and tighten as required.

(ii) Change of engine and transmission oil, and change or service of oil filter will be allowed at the same mileage intervals that will be specified in the manufacturer's maintenance instructions.

(iii) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to adjustment during scheduled major engine tuneups, once during the first 5,000 miles of vehicle operation.

(2) (i) *For gasoline-fueled vehicles*, unscheduled maintenance on the engine, emission control system, and fuel system of durability vehicles may be performed, except as provided in paragraph (a)(5)(i) of this section, only under the following provisions:

(A) Any persistently misfiring spark plug may be replaced, in addition to replacement at scheduled major engine tuneup points.

(B) Readjustment of the engine cold starting enrichment system may be performed if there is a problem of stalling or if there is visible black smoke.

(C) Readjustment of the engine idle-speed (curb idle and fast idle) may be performed, in addition to that performed as scheduled maintenance under paragraph (a)(1) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(D) The idle mixture may be reset, other than during scheduled major engine tuneups, only with the advance approval of the Administrator.

(ii) *For Diesel vehicles*, unscheduled maintenance on the engine emission control system, and fuel system of durability-data vehicles may be performed except as provided in paragraph (a)(5)(i) of this section, only under the following provisions:

(A) Injectors may be changed if a persistent misfire is detected.

V 42 I 174 SEP 8 77 UMI

(B) Readjustment of the engine idle speed (curb idle and fast idle) may be performed in addition to that performed as scheduled maintenance under paragraph (a)(1) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(3) An exhaust gas recirculation (EGR) system may be serviced during durability testing only under one of the following provisions:

(i) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneups if an audible and/or visual signal approved by the Administrator alerts the vehicle operator to the need for EGR system maintenance at each of those mileage points. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of vehicles in use.

(ii) Manufacturers may service the EGR system as unscheduled maintenance a maximum of three times during the 50,000 miles if failure of the EGR system activates an audible and/or visual signal approved by the Administrator which alerts the vehicle operator to the need for EGR system maintenance. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of vehicles in use.

(iii) Manufacturers may service the EGR system a maximum of three times during the 50,000 miles either at a scheduled major engine tuneup point or as unscheduled maintenance, if an audible and/or visual signal approved by the Administrator alerts the vehicle operator to the need for EGR system maintenance. The signal may be activated either by EGR system failure (unscheduled maintenance) or need for scheduled periodic maintenance. If maintenance is performed, the signal for scheduled periodic maintenance shall be reset. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of vehicles in use.

(iv) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneup(s) if failure to perform EGR system maintenance is not likely, as determined by the Administrator, to result in an improvement in vehicle performance. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of vehicles in use.

(4) The catalytic converter may be serviced once during 50,000 miles if an audible and/or visual signal approved by the Administrator alerts the vehicle operator to the need for maintenance. The signal may be activated either by component failure or need for maintenance at a scheduled point.

(5) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on durability-data vehicles shall be performed only with the advance approval of the Administrator.

(i) In the case of unscheduled maintenance, such approval will be given if the Administrator:

(A) Has made a preliminary determination that part failure or system malfunction, or the repair of such failure or malfunction, does not render the vehicle unrepresentative of vehicles in use, and does not require direct access to the combustion chamber, except for spark plug, fuel injection component, or removable prechamber removal or replacement; and

(B) Has made a determination that the need for maintenance or repairs is indicated by an overt indication of malfunction such as persistent misfiring, vehicle stalling, overheating, fluid leakage, loss of oil pressure, or charge indicator warning. For the evaporative emission control system this overt indication may be indicated by such items as fuel odor or fluid leakage.

(ii) Emission measurements may not be used as a means of determining the need for unscheduled maintenance under paragraph (a)(5)(i)(A) of this section.

(iii) Requests for authorization of scheduled maintenance of emission control-related components not specifically authorized to be maintained by these regulations must be made prior to the beginning of durability testing. The Administrator will approve the performance of such maintenance if the manufacturer makes a satisfactory showing that the maintenance will be performed on vehicles in use.

(6) If the Administrator determines that part failure or system malfunction occurrence and/or repair rendered the vehicle unrepresentative of vehicles in use, the vehicle shall not be used as a durability-data vehicle.

(7) Where the Administrator agrees under § 86.079–26 to a mileage accumulation of less than 50,000 miles for durability testing, he may modify the requirements of this paragraph.

(8) (i) Adjustment of engine idle speed on emission-data vehicles may be performed once before the 6,436-kilometer (4,000-mile) test point. Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on emission-data vehicles shall be performed only with the advance approval of the Administrator.

(ii) Maintenance on emission-data vehicles selected under § 86.079–24 (b)(1)(v) or (b)(1)(vii)(D) and permitted to be tested for purposes of § 86.079–23 (b)(1)(ii) under the provisions of § 86.079–24(b)(1)(vi) may be performed in conjunction with emission control system modifications at the 6,436-kilometer (4,000-mile) test point, and shall be performed in accordance with the maintenance instructions to be provided to the ultimate purchaser required under § 86.079–38.

(iii) Maintenance on those emission-data vehicles selected under § 86.079–24(b)(1)(v) which are not capable of being modified in the field for the purpose of complying with emission standards at an altitude other than intended by the original design may be performed in conjunction with the emission control system modifications at the 6,436-kilometer (4,000-mile) test point, and shall be approved in advance by the Administrator.

(9) Repairs to vehicle components of the durability-data or emission-data vehicle, other than the engine, emission control system, or fuel system, shall be performed only as a result of part failure, vehicle system malfunction, or with the advance approval of the Administrator.

(10) Complete emission tests (see §§ 86.106 through 86.145) are required, unless waived by the Administrator, before and after any vehicle maintenance which may reasonably be expected to affect emissions. These test data shall be air posted to the Administrator within 24 hours (or delivered within 3 working days), after the tests, along with a complete record of all pertinent maintenance, including a preliminary engineering report of any malfunction diagnosis and the corrective action taken. A complete engineering report shall be delivered or air posted to the Administrator within 10 working days after the tests. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 86.079–23.

(11) The Administrator shall be given the opportunity to verify the existence of an overt indication of part failure and/or vehicle malfunction (e.g., misfiring, stalling, black smoke), or an activation of an audible and/or visual signal, prior to the performance of any maintenance to which such overt indication or signal is relevant under the provisions of this section.

(12) Equipment, instruments, or tools may not be used to identify malfunctioning, maladjusted, or defective engine components unless the same or equivalent equipment, instruments, or tools will be available to dealerships and other service outlets and

(i) Are used in conjunction with scheduled maintenance on such components,

(ii) Are used subsequent to the identification of a vehicle or engine malfunction, as provided in paragraph (a)(5)(i) of this section for durability-data vehicles or paragraph (a)(8)(i) of this section for emission-data vehicles, or

(iii) Unless specifically authorized by the Administrator.

(b) [Reserved]

(c) (1) *Heavy-duty engines.* Paragraph (c) of this section applies to heavy-duty engines.

(2) (i) The scheduled maintenance described in this section may be performed on a durability-data engine provided the maintenance is requested in the application for certification. Such scheduled maintenance must be specified at the same intervals in the maintenance instructions furnished to the ultimate purchaser of the vehicle in which the engine, represented by the test engine, is installed. (For equivalent dynamometer hours, engine hours, and mileage intervals, see § 86.079–2.) A scheduled major engine servicing shall be restricted to items listed in this subparagraph and shall be conducted in a manner consistent with service instructions and specifications provided by the manufacturer for use by the customer service personnel.

(A) For gasoline-fueled engines, major engine tuneups to manufacturer's specifications may be performed no more frequently than every 375 hours of scheduled dynamometer operation: *Provided*, No tuneups are performed after 1375 hours of scheduled dynamometer operation. The following items may be inspected, replaced, cleaned, adjusted, and/or serviced as required:

(*1*) Ignition system.

(*2*) Cold starting enrichment system (includes fast idle speed setting).

(*3*) Curb idle speed and air/fuel mixture.

(*4*) Drive belt tension on engine accessories.

(*5*) Valve lash.

(*6*) Inlet air and exhaust gas control valves.

(*7*) Engine bolt torque.

(*8*) Spark plugs.

(*9*) Fuel filter and air filter.

(*10*) Crankcase emission control system.

(*11*) Fuel evaporative emission control system.

(B) For Diesel engines one major engine servicing to the manufacturer's specifications may be performed prior to 875 hours (±8 hours) of scheduled dynamometer operation. The following items may be inspected, replaced, cleaned, adjusted, and/or serviced as required:

(*1*) Low idle speed.

(*2*) Drive belt tension.

(*3*) Engine bolt torque.

(*4*) Valve lash.

(*5*) Injection timing.

(*6*) Injector assemblies.

(*7*) Governor settings.

(C) Normal engine servicing such as engine oil change, and oil filter, fuel filter, and air filter cleaning or replacement will be allowed at manufacturer's recommended intervals. If approved in advance by the Administrator, the maintenance for these items may differ from that specified in the manufacturer's maintenance instructions.

(D) Readjustment of the engine low idle speed may be performed once during the first 125 hours of engine operation.

(ii) Unscheduled maintenance may be performed on durability-data engines, except as provided in paragraph (c)(2)(v)(A) of this section, only under the following provisions:

(A) An injector or spark plug may be changed if a persistent misfire is detected.

(B) Readjustment of a gasoline-fueled engine cold-start enrichment system may be performed if there is a problem of stalling or if there is visible black smoke.

(C) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to that performed as scheduled maintenance under paragraph (c)(2)(i) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(D) The idle mixture may be reset, other than during scheduled major engine tuneups, only with the advance approval of the Administrator.

(iii) Any exhaust gas recirculation (EGR) system may be serviced during durability testing only under one of the following provisions:

(A) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneup if an audible and/or visual signal approved by the Administrator alerts the engine operator to the need for EGR system maintenance at the service point. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test engine unrepresentative of engines in use.

(B) Manufacturers may service the EGR system as unscheduled maintenance a maximum of one time during durability testing (1500 hours for gasoline-fuel engines or 1000 hours for Diesel engines) if failure of the EGR system activates an audible and/or visual signal approved by the Administrator which alerts the engine operator to the need for EGR system maintenance. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test engine unrepresentative of engines in use.

(C) Manufacturers may service the EGR system a maximum of three times during durability testing (1500 hours for gasoline-fueled engines or 1000 hours for Diesel engines) either at a scheduled major engine tuneup point or as unscheduled maintenance, if an audible and/or visual signal approved by the Administrator alerts the engine operator to the need for EGR system maintenance. The signal may be activated either by EGR system failure (unscheduled maintenance) or need for scheduled periodic maintenance. If maintenance is performed, the signal for scheduled periodic maintenance shall be reset. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test engine unrepresentative of engines in use.

(D) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneup(s) if failure to perform EGR system maintenance is not likely, as determined by the Administrator, to result in an improvement in engine performance. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test engine unrepresentative of engines in use.

(iv) The catalytic converter may be serviced once during durability testing (1500 hours for gasoline-fueled engines or 1000 hours for Diesel engines) if an audible and/or visual signal approved by the Administrator alerts the engine operator to the need for maintenance. The signal may be activated either by component failure or need for maintenance at a scheduled point.

(v) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on durability-data engines shall be performed only with the advance approval of the Administrator.

(A) In the case of unscheduled maintenance such approval will be given if the Administrator:

(*1*) Has made a preliminary determination that part failure or system malfunction, or the repair of such failure or malfunction, does not render the engine unrepresentative of engines in use, and does not require direct access to the combustion chamber, except for spark plug, fuel injection component, or removable prechamber removal or replacement; and,

(*2*) Has made a determination that the need for maintenance or repairs is indicated by an overt indication of malfunction such as persistent misfiring, engine stalling, overheating, fluid leakage, loss of oil pressure, excessive fuel consumption or excessive power loss.

(B) Emission measurements may not be used as a means of determining the need for unscheduled maintenance under paragraph (c)(2)(v)(A)(*1*) of this section.

(C) Requests for authorization of scheduled maintenance of emission-control related components not specifically authorized to be maintained by these regulations must be made prior to the beginning of durability testing. The Administrator will approve the performance of such maintenance if the manufacturer makes a satisfactory showing that the maintenance will be performed on engines in use.

(vi) If the Administrator determines that part failure or system malfunction occurrence and/or repair rendered the engine unrepresentative of engines in use, the engine shall not be used as a durability-data engine.

(3)(i) Scheduled maintenance on emission-data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(4) [Reserved]

V 42 174 SEP 8 77 UMI

(5) (i) Complete emission tests (see Subparts D or H of this part for gasoline-fueled engines and Subparts D and I, or I and J of this part for Diesel engines) are required, unless waived by the Administrator, before and after:

(A) Scheduled maintenance approved for durability-data engines, except maintenance performed under § 86.079–25(c)(2)(i)(c);

(B) Unscheduled maintenance which may reasonably be expected to affect emissions.

(ii) The tests before and after scheduled maintenance, which are performed on durability-data engines prior to 117 hours, are waived. The test before scheduled maintenance, which is performed on durability-data engines after 117 hours and prior to 133 hours, is waived. The after-maintenance test must be run and the results used in the deterioration factor calculation in accordance with § 86.079–28.

(iii) The idle speed reset and any scheduled maintenance on the emission-data engine shall be performed prior to the 125-hour test. The before-maintenance and after-maintenance tests associated with idle speed reset and scheduled maintenance on the emission-data engine are waived.

(iv) Test data required by this paragraph shall be air posted to the Administrator within 72 hours of test completion (or delivered within 5 working days), along with a complete record of all pertinent maintenance.

(v) When unscheduled maintenance is approved, a preliminary engineering report, unless waived by the Administrator, shall be air posted within 72 hours (or delivered within 5 working days). A final engineering report shall be delivered or air posted within 10 working days after the completion of the emission tests. The Administrator may approve an extension of the time requirements for the final engineering report.

(vi) All test data, maintenance reports, and required engineering reports shall be compiled and provided to the Administrator in accordance with § 86.079–23.

(6) The Administrator shall be given the opportunity to verify the existence of an overt indication of part failure and/or engine malfunction (e.g., misfiring, stalling).

(7) Equipment, instruments, or tools may not be used to identify malfunctioning, maladjusted, or defective engine components unless the same or equivalent equipment, instruments, or tools will be available to dealerships and other service outlets, and:

(i) Are used in conjunction with scheduled maintenance on such components;

(ii) Are used subsequent to the identification of an engine failure or malfunction, as provided in paragraph (c)(2)(v)(A) of this section for durability-data engines or paragraph (c)(3) of this section for emission-data engines; or,

(iii) Unless specifically authorized by the Administrator.

8. Section 86.079–26 is revised to read as follows:

§ 86.079–26 Mileage and service accumulation; emission measurements.

(a) (1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The procedure for mileage accumulation will be the Durability Driving Schedule as specified in Appendix IV to this part. A modified procedure may also be used if approved in advance by the Administrator. Except with the advance approval of the Administrator, all vehicles will accumulate mileage at a measured curb weight which is within 100 pounds of the estimated curb weight. If the loaded vehicle weight is within 100 pounds of being included in the next higher inertia weight class as specified in § 86.125, the manufacturer may elect to conduct the respective emission tests at the higher loaded vehicle weight. Mileage will be accumulated on four-wheel drive vehicles in their normal on-highway mode of operation.

(3) Emission-data vehicles.

(i) *Gasoline-fueled.* (A) Each gasoline-fueled emission-data vehicle shall be driven 4000 miles with all emission control systems installed and operating. Complete exhaust emission tests shall be conducted at zero miles and 4000 miles on those vehicles selected under § 86.079–24(b)(1)(ii) through (b)(1)(v). Complete exhaust and evaporative emission tests shall be conducted at zero miles and 4000 miles on those vehicles selected under § 86.079–24(b)(1)(vii). The manufacturer may at his option test the vehicles selected under § 86.079–29(b)(1)(vii) up to three times at the 4000-mile test point as long as the ±250-mile test tolerance is adhered to. The Administrator may determine under § 86.079–24(f) that no testing is required.

(B) The emission-data vehicle(s) selected for testing under § 86.079–24(b)(1)(v) or (b)(1)(vii)(D) shall be driven 6436 kilometers (4000 miles) at any altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and 6436 kilometers (4000 miles) under high altitude conditions.

(C) The emission-data vehicle(s) selected for testing under § 86.079–24(b)(1)(v) or (b)(1)(vii)(D) and permitted to be tested for purposes of § 86.079–23(b)(1)(ii) under the provisions of § 86.079–24(b)(1)(vi) shall be driven 6436 kilometers (4000 miles) at low altitude. Emission tests shall be conducted at zero kilometers (zero miles) at low altitude and 6436 kilometers (4000 miles) under both low and high altitude conditions. For the purposes of this subparagraph, low altitude means any elevation less than 549 meters (1800 feet).

(ii) *Diesel.* (A) Each Diesel emission-data vehicle shall be driven 6436 kilometers (4000 miles) with all emission control systems installed and operating. Emission tests shall be conducted at zero kilometers (zero miles) and 6436 kilometers (4000 miles).

(B) The emission-data vehicle(s) selected for testing under § 86.079–24(b)(1)(v) shall be driven 6436 kilometers (4000 miles) at any altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and 6436 kilometers (4000 miles) under high altitude conditions.

(C) The emission-data vehicle(s) selected for testing under § 86.079–24(b)(1)(v) and permitted to be tested for purposes of § 86.079–23(b)(1)(ii) under the provisions of § 86.079–24(b)(1)(vi) shall be driven 6436 kilometers (4000 miles) at low altitude. Emission tests shall be conducted at zero kilometers (zero miles) at low altitude and 6436 kilometers (4000 miles) under both low and high altitude conditions. For the purpose of this subparagraph low altitude means any elevation less than 549 meters (1800 feet).

(4) Durability-data vehicles.

(i) *Gasoline-fueled.* Each gasoline-fueled durability-data vehicle selected by the Administrator or elected by the manufacturer under § 86.079–24(c)(1) shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objective of this procedure. Complete exhaust emission tests shall be made on all durability-data vehicles selected by the Administrator or elected by the manufacturer under § 86.079–24(c) at the following mileage points: 0; 5000; 10,000; 15,000; 20,000; 25,000; 30,000; 35,000; 40,000; 45,000; 50,000. The Administrator may determine under § 86.079–24(f) that no testing is required.

(ii) *Diesel.* Each Diesel durability-data vehicle shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objectives of this procedure. Complete emission tests (see §§ 86.106 through 86.145) shall be made at the following mileage points: 0; 5,000; 10,000; 15,000; 20,000; 25,000; 30,000; 35,000; 40,000; 45,000; and 50,000.

(5) All tests required by this subpart to be conducted after every 5,000 miles of driving of durability-data vehicles and 4,000 miles for emission-data vehicles must be conducted at any accumulated mileage within 250 miles of each of those test points.

(6) (i) The results of each emission test shall be supplied to the Administrator immediately after the test. The manufacturer shall furnish to the Administrator explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests at any test point at which the data are intended to be used in the calculation of the deterioration factor, the number of tests must be the same at each point and may not exceed three valid tests. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 24 hours (or delivered within 3 working days). In addition, all test data

shall be compiled and provided to the Administrator in accordance with § 86.079–23. Where the Administrator conducts a test on durability-data vehicle at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be rounded, using the "Rounding Off Method" specified in ASTM E 29–67, to the number of places to the right of the decimal point indicated by expressing the emission standards of this subpart to three significant figures.

(7) Whenever the manufacturer proposes to operate and test a vehicle which may be used for emission or durability data, he shall provide the zero-mile test data to the Administrator and make the vehicle available for such testing under § 86.079–29 as the Administrator may require before beginning to accumulate mileage on the vehicle. Failure to comply with this requirement will invalidate all test data submitted for this vehicle.

(8) Once a manufacturer begins to operate an emission-data or durability-data vehicle, as indicated by compliance with paragraph (a)(7) of this section, he shall continue to run the vehicle to 4,000 miles or 50,000 miles, respectively, and the data from the vehicle will be used in the calculations under § 86.079–28. Discontinuation of a vehicle shall be allowed only with the written consent of the Administrator.

(9) (i) The Administrator may elect to operate and test any test vehicle during all or any part of the mileage accumulation and testing procedure. In such cases, the manufacturer shall provide the vehicle(s) to the Administrator with all information necessary to conduct this testing.

(ii) The test procedures in §§ 86.106 through 86.145 will be followed by the Administrator. The Administrator will test the vehicles at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other vehicles of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(10) Emission testing of any type with respect to any certification vehicle other than that specified in this subpart is not allowed except as such testing may be specifically authorized by the Administrator.

(11) This section does not apply to testing conducted to meet the requirements of § 86.079–23(b)(2).

(b) (1) Paragraph (b) of this section applies to heavy-duty engines.

(2) (i) For gasoline-fueled engines, the dynamometer service accumulation schedule will consist of several operating conditions which give the percent loads and the modes as specified in the following chart. The percentage of time in each mode must be held within the limits specified. The maximum observed torque for each mode in the service accumulation cycle must be determined at the rpm at which the mode is being conducted. The percent load for that mode will be determined from the maximum torque at the rpm at which the mode is being conducted.

Mode	Observed torque (percentage of maximum observed)	Percentage of time
Idle	Idle	23 (22 to 24).
CT	CT	14 (13 to 15).
PTO	10	6 (5 to 7).
Cruise	25	31 (30 to 32).
PTA	55	15 (14 to 16).
FL	90	11 (10 to 12).

(ii) The equivalent control parameter for engine loading will be manifold vacuum, manifold pressure, or torque. Usage of one of the three parameters will require approval in advance by the Administrator. The control parameter values that correspond to the appropriate percent loads as specified in the emission test cycle will be initially determined at the zero-hour point or after an appropriate break-in procedure. The control parameter values determined initially will be used for the entire service accumulation schedule. If at any time during the service accumulation, the 90 percent torque value cannot be attained, the engine shall be operated at wide-open throttle.

(iii) The average speed shall be between 1,650 and 1,700 rpm. Subject to the requirements as to average speed, there must be operation at speeds in excess of 3,200 rpm (but not in excess of governed speed for governed engines or rated speed for non-governed engines) for a cumulative maximum of 0.5 percent of the actual cycle time, excluding time in transient conditions. Maximum cycle time shall be 15 minutes. A cycle approved in advance by the Administrator shall be used.

(3) (i) For Diesel engines, the following criteria must be met before service accumulation can begin. Failure to comply with these requirements shall invalidate all test data submitted for an engine.

(A) Each engine shall produce at least 95 percent of the maximum horsepower, corrected to rating conditions, at 95 to 100 percent of the rated speed.

(B) The fuel rate at maximum horsepower shall be within manufacturer's specifications.

(ii) During service accumulation, hours can be credited toward the required service accumulation hours when the following criteria are met. If these criteria cannot be met, engine operation shall be discontinued and the Administrator shall be notified immediately. (Adjustments to the fuel rate can be approved under the provisions of § 86.079–25.)

(A) Each engine shall produce at least 95 percent of the maximum horsepower, at 95 to 100 percent of the rated speed, observed at the zero-hour point. Horsepower values shall be corrected to the rating conditions.

(B) The engine shall be operated at 75 percent of the inlet and exhaust restrictions specified in § 86.879–8 except that the tolerance will be ±3 inches of water and ±0.5 inch of Hg respectively.

(C) During each emission test the inlet and exhaust restrictions shall be as specified in § 86.879–8.

(4) If a break-in procedure is used the procedure must be the same as recommended to the ultimate purchaser. Prior approval by the Administrator is required for use of any break-in procedure. The hours accumulated during the break-in procedure will not be counted as part of the service accumulation.

(5) Emission-data engines: Each emission-data engine shall be operated for 125 hours with all emission control systems installed and operating. An emission test shall be conducted at 125 hours. A zero-hour emission may be performed after the engine has been approved by the Administrator to begin service accumulation. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

(6) Durability-data engines: Each gasoline-fueled durability-data engine shall be operated, with all emission control systems installed and operating, for 1,500 hours. Each Diesel durability-data engine shall be operated for 1,000 hours. Emission measurement, as prescribed, shall be made at 125-hour intervals beginning at 125 hours of operation. A zero-hour emission test may be performed after the engine has been approved by the Administrator to begin service accumulation. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

(7) All tests required by this subpart to be conducted after 125 hours of operation or at any multiple of 125 hours may be conducted at any accumulated number of hours within 8 hours of 125 hours or the appropriate multiple of 125 hours respectively.

(8) (i) Daata from all emission tests (including voided tests) shall be air posted to the Administrator within 72 hours (or delivered within 5 working days). The manufacturer shall furnish to the Administrator an explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests at any test point at which the data are intended to be used in the calculation of the deterioration factor, the number of tests must be the same at each point and may not exceed 3 valid tests. Tests between test points may be conducted as required by the Administrator. In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.079–23. Where the Administrator conducts a test on a durability-data engine at a prescribed test point, the results of that test will

V 42 174 SEP 8 77 UMI

be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be recorded and reported to the Administrator using two places to the right of the decimal point. These numbers shall be rounded in accordance with the "Rounding Off Method" specified in ASTM E 29–67.

(9) Whenever the manufacturer proposes to operate and test an engine which may be used for emission or durability data, he shall provide such information concerning components used on the engine as the Administrator may require and make the engine available for such testing under § 86.079–29 as the Administrator may require, before beginning to accumulate hours on the engine. Failure to comply with this requirement will invalidate all test data later submitted for this engine.

(10) Once a manufacturer begins to operate an emission-data or durability-data engine, as indicated by compliance with paragraph (b) (9) of this section, he shall continue to run any emission-data engine to 125 hours, any gasoline-fueled durability-data engine to 1,500 hours, and any Diesel durability-data engine to 1000 hours. The data from the engine will be used in the calculations under § 86.345. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(11) (i) The Administrator may elect to operate and test any test engine during all or any part of the service accumulation and testing procedure. In such cases the manufacturer shall provide the engine(s) to the Administrator with all information necessary to conduct the testing.

(ii) The test procedures (Subparts D or H of this part for gasoline-fueled engines, and Subparts D, I, or J of this part for Diesel engines) will be followed by the Administrator. The Administrator will test the engines at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other engines of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(12) Emission testing of any type with respect to any certification engine other than that specified in this subpart is not allowed except as such testing may be specifically authorized by the Administrator.

9. New §§ 86.079–27 through 86.079–29 are added and read as follows:

§ 86.079–27 Special test procedures.

(a) For light-duty vehicles and light-duty trucks the Administrator may, on the basis of a written application therefore by a manufacturer, prescribe test procedures, other than those set forth in this part, for any motor vehicle which he determines is not susceptible to satisfactory testing by the procedures set forth herein or in Subpart B of this part.

(b) For heavy-duty engines:

(1) The Administrator, may on the basis of a written application therefore by a manufacturer, prescribe test procedures, other than those set forth in this subpart, for any motor-vehicle engine which he determines is not susceptible to satisfactory testing by the procedures set forth herein or in Subparts D and I of this part.

(2) If the manufacturer does not submit a written application for use of special test procedures but the Administrator determines that a motor-vehicle engine is not susceptible to satisfactory testing by the procedures set forth herein, the Administrator will reject the applicable portions of the application. The Administrator shall notify the manufacturer in writing and set forth the reasons for such rejection in accordance with the provisions of § 86.079–22(c).

§ 86.079–28 Compliance with emission standards.

(a) (1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The applicable exhaust and fuel evaporative emission standards of this subpart apply to the emissions of vehicles for their useful life.

(3) Since it is expected that emission control efficiency will change with mileage accumulation on the vehicle, the emission level of a vehicle which has accumulated 50,000 miles will be used as the basis for determining compliance with the standards.

(4) The procedure for determining compliance of a new motor vehicle with exhaust emission standards is as follows:

(i) Separate emission deterioration factors shall be determined from the exhaust emission results of the durability-data vehicle(s) for each engine-system combination. A separate factor shall be established for exhaust HC, exhaust CO, and exhaust NO_x for each engine-system combination. A separate evaporative emission deterioration factor shall be determined for each evaporative emission family-evaporative emission control system combination from the testing conducted by the manufacturer.

(A) The applicable results to be used in determining the exhaust emission deterioration factors for each engine-system combination shall be:

(1) All valid exhaust emission data from the tests required under § 86.079–26(a)(4) except the zero-mile tests. These shall include the official test results, as determined in § 86.079–29 for all tests conducted on all durability-data vehicles of the combination selected under § 86.079–24(c) (including all vehicles elected to be operated by the manufacturer under § 86.079–24(c)(1)(ii)).

(2) All exhaust emission data from the tests conducted before and after the scheduled maintenance provided in § 86.079–25.

(3) All exhaust emission data from tests required by maintenance approved under § 86.079–25, in those cases where the Administrator conditioned his approval for the performance of such maintenance on the inclusion of such data in the deterioration factor calculation.

(B) All applicable exhaust emission results shall be plotted as a function of the mileage on the system, rounded to the nearest mile, and the best fit straight lines, fitted by the method of least squares, shall be drawn through all these data points. The interpolated 4,000- and 50,000-mile points on this line must be within the standards provided in § 86.078–8 or § 86.079–9, as applicable, or the data will not be acceptable for use in calculation of a deterioration factor, unless no applicable data point exceeded the standard. An exhaust emission deterioration factor shall be calculated for each engine-system combination as follows:

Factor = Exhaust emissions interpolated to 50,000 miles ÷ exhaust emissions interpolated to 4,000 miles.

These interpolated values shall be carried out to a minimum of four places to the right of the decimal point before dividing one by the other to determine the deterioration factor. The results shall be rounded to three places to the right of the decimal point in accordance with ASTM E 29–67.

(C) An evaporative emissions deterioration factor shall be determined from the testing conducted as described in § 86.079–21(b)(4)(ii), for each evaporative emission family-evaporative emission control system combination to indicate the evaporative emission level at 50,000 miles relative to the evaporative emission level at 4,000 miles as follows:

Factor = Evaporative emission level at 50,000 miles minus the evaporative emission level at 4,000 miles.

The factor shall be established to a minimum of two places to the right of the decimal.

(ii) (A) The official exhaust emission test results for each emission-data vehicle at the 4,000-mile test point shall be multiplied by the appropriate deterioration factor: *Provided*, That if a deterioration factor as computed in paragraph (a)(4)(i)(B) of this section is less than one, that deterioration factor shall be one for the purposes of this paragraph.

(B) The official evaporative emission test results for each evaporative emission-data vehicle at the 4,000-mile test point shall be adjusted by addition of the appropriate deterioration factor: *Provided*, That if a deterioration factor as computed in paragraph (a)(4)(i)(C) of this section is less than zero, that deterioration factor shall be zero for the purposes of this paragraph.

(iii) The emissions to compare with the standard shall be the adjusted emissions of paragraph (a)(4)(ii) (A) and (B) of this section for each emission-data vehicle. Before any emission value is compared with the standard, it shall be rounded, in accordance with ASTM E 29–67, to two significant figures. The rounded emission values may not exceed the standard.

(iv) Every test vehicle of an engine family must comply with the exhaust emission standards, as determined in paragraph (a)(4)(iii) of this section, before any vehicle in that family may be certified.

(v) Every test vehicle of an evaporative emission family must comply with the evaporative emission standards, as determined in paragraph (a)(4)(iii) of this section, before any vehicle in that family may be certified.

(b) (1) Paragraph (b) of this section applies to heavy-duty engines.

(2) The exhaust emission standards for gasoline-fueled engines in § 86.079–10 or for Diesel engines in § 86.079–11 apply to the emissions of engines for their useful life.

(3) Since emission control efficiency decreases with the accumulation of hours on the engine, the emission level of a gasoline-fueled engine which has accumulated 1,500 hours of dynamometer operation or a Diesel engine which has accumulated 1,000 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(4) The procedure for determining compliance of a new engine with exhaust emission standards is as follows:

(i) Separate emission deterioration factors shall be determined from the emission results of the durability-data engines for each engine-system combination. Separate factors shall be established for HC, CO, and for the combined emissions of HC and NOx. For Diesel engines, separate factors shall also be established for the acceleration mode (designated as "A"), the lugging mode (designated as "B") and the peak opacity (designated as "C").

(A) The applicable results to be used in determining the deterioration factors for each combination shall be:

(*1*) All valid emission data from the tests required under § 86.079–26(b). These shall include the official test results, as determined in § 86.079–29, for all tests conducted on all gasoline-fueled durability-data engines of the combination selected under § 86.079–24(c)(2) or on all Diesel durability-data engines of the combination selected under § 86.079–24(c)(3) (including all engines elected to be operated by the manufacturer under § 86.079–24(c)(2)(iii) for gasoline-fueled engines or under § 86.079–24(c)(3)(ii) for Diesel engines).

(*2*) All emission data from the tests conducted before and after maintenance provided in § 86.079–25(c)(2)(i)(A) for gasoline-fueled engines or in § 86.079–25(c)(2)(i)(B) for Diesel engines.

(*3*) All emission data from the tests conducted before and after maintenance provided in § 86.079–25(c)(2)(v)(C) for Diesel engines if emission tests were conducted.

(B) All applicable emission results for (1) HC, (2) CO, (3) HC+NOx, (4) acceleration smoke ("A"), (5) lugging smoke ("B"), and (6) peak smoke ("C") shall be plotted as a function of durability hours which shall be consistently rounded to the nearest hour. Emission data shall have two figures to the right of the decimal. The best fit straight lines, fitted by the method of least squares, shall be drawn through these data points. The interpolated 125-hour and 1,500-hour points for gasoline-fueled engines or the 1,000-hour point for Diesel engines on each line, rounded to whole numbers in accordance with ASTM E 29–67, must be within the standards specified in § 86.079–10 for gasoline-fueled engines or in § 86.079–11 for Diesel engines or the data shall not be used in the calculation of a deterioration factor, unless no applicable data points exceed the standards.

(C) The interpolated values shall be used to calculate a deterioration factor as follows:

Factor = Exhaust emissions interpolated to 1,500 hours for gasoline-fueled engines or to 1,000 hours for Diesel engines minus the exhaust emissions interpolated to 125 hours. (Negative deterioration factors shall be considered zero.)

(ii) The appropriate deterioration factor, carried out to two places to the right of the decimal point, shall be added to the exhaust emission test results, carried out to two places to the right of the decimal point, for each emission-data engine.

(iii) The emission values to compare with the standards shall be the adjusted emission values of paragraph (b)(4)(ii) of this section rounded to two significant figures in accordance with ASTM E 29–67 for each emission-data engine.

(iv) Every test engine of engine family must comply with all applicable standards, as determined in paragraph (b)(4)(iii) of this section, before any engine in that family will be certified.

§ 86.079–29 Testing by the Administrator.

(a) (1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The Administrator may require that any one or more of the test vehicles be submitted to him, at such place or places as he may designate, for the purposes of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(3) (i) Whenever the Administrator conducts a test on a test vehicle, the results of that test shall, unless subsequently invalidated by the Administrator, comprise the official data for the vehicle at the prescribed test point and the manufacturer's data for that prescribed test point shall not be used in determining compliance with emission standards.

(ii) Whenever the Administrator does not conduct a test on a test vehicle at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided*, That if the Administrator makes a determination based on testing under paragraph (a)(2) of this section that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer: *And further provided*, That if the Administrator has reasonable basis to believe that any test data submitted by the manufacturer is not accurate or has been obtained in violation of any provisions of this part, the Administrator may refuse to accept that data as the official data pending retesting or submission of further information. If the manufacturer conducts more than one test on a vehicle, as authorized under § 86.079–26(a)(3)(i)(A), the data from the last test in that series of tests on that vehicle will constitute the official data.

(iii) (A) The emission-data vehicle presented to the Administrator for testing shall be calibrated within the production tolerances applicable to the manufacturer's specifications to be shown on the vehicle label (see § 86.079–35(a)(1)(iii)(D)) as specified in the application for certification. If the Administrator determines that a vehicle is not within such tolerances, the vehicle shall be adjusted at the facility designated by the Administrator prior to the test and an engineering report shall be submitted to the Administrator describing the corrective action taken. Based on the engineering report, the Administrator will determine if the vehicle shall be used as an emission-data vehicle.

(B) If the Administrator determines that the test data developed on an emission-data vehicle under paragraph (a)(3)(i) of this section would cause that vehicle to fail due to excessive 4,000 mile emissions or by application of the appropriate deterioration factor, then the following procedure shall be observed:

(*1*) The manufacturer may request a retest. Before the retest, the vehicle may be readjusted to manufacturer's specifications, if these adjustments were made incorrectly prior to the first test, and other maintenance or repairs may be performed in accordance with § 85.079–25. All work on the vehicle shall be done at such location and under such conditions as the Administrator may prescribe.

(*2*) The vehicle will be retested by the Administrator and the results of this test shall comprise the official data for the emission-data vehicle.

(iv) If sufficient durability data are not available at the time of any emission test conducted under paragraph (a)(2) of this section to enable the Administrator to determine whether an

V 42 174 SEP 8 77 UMI

emission-data vehicle would fail, the manufacturer may request a retest in accordance with the provisions of paragraphs (a)(3)(iii) (A) and (B) of this section. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the vehicle from the test premises.

(b) (1) Paragraph (b) of this section applies to heavy-duty engines.

(2) The Administrator may require that any one or more of the test engines be submitted to him, at such place or places as he may designate, for the purpose of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(3) (i) Whenever the Administrator conducts a test on a test engine the results of that test, unless subsequently invalidated by the Administrator, shall comprise the official data for the engine at that prescribed test point and the manufacturer's data for that prescribed test point shall not be used in determining compliance with emission standards.

(ii) Whenever the Administrator does not conduct a test on a test engine at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided*, That if the Administrator makes a determination based on testing under paragraph (b)(2) of this section that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer: *And further provided*, That if the Administrator has reasonable basis to believe that any test data submitted by the manufacturer is not accurate or has been obtained in violation of any provision of this part, the Administrator may refuse to accept that data as the official data pending retesting or submission of further information.

(iii) (A) The emission-data engine presented to the Administrator for testing shall be calibrated within the production tolerances applicable to the manufacturer's specifications to be shown on the engine label (see § 86.079-35(a)(2)(iii)) as specified in the application for certification. If the Administrator determines that an engine is not within such tolerances, the engine shall be adjusted at the facility designated by the Administrator prior to the test and an engineering report shall be submitted to the Administrator describing the corrective action taken. Based on the engineering report the Administrator will determine if the engine shall be used as an emission-data engine.

(B) If the Administrator determines that the test data developed under paragraph (b)(3)(iii)(A) of this section would cause the emission-data engine to fail due to excessive 125-hour emission values or by the application of the appropriate deterioration factor, then the following procedure shall be observed.

(*1*) The manufacturer may request a retest. Before the retest, the engine may be readjusted to manufacturer's specifications if these adjustments were made incorrectly prior to the first test, and other maintenance or repairs may be performed in accordance with § 86.079-25. All work on the engine shall be done at such location and under such conditions as the Administrator may prescribe.

(*2*) The engine will be retested by the Administrator and the results of this test shall comprise the official data for the emission-data engine.

(iv) If sufficient durability data are not available at the time of any emission test conducted under paragraph (b)(2) of this section to enable the Administrator to determine whether an emission-data engine would fail, the manufacturer may request a retest in accordance with the provisions of paragraphs (b)(3)(iii)(B) (*1*) and (2) of this section. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the engine from the test premises.

10. Section 86.079-30 is revised to read as follows:

§ 86.079-30 Certification.

(a) (1) If, after a review of the test reports and data submitted by the manufacturer, data derived from any inspection carried out under § 86.078-7(c) and any other pertinent data or information, the Administrator determines that a test vehicle(s) (or test engine(s)) meets the requirements of the Act and of this subpart, he will issue a certificate of conformity with respect to such vehicle(s) (or engine(s)) except in cases covered by paragraph (c) of this section. If applicable, the certificate will state which vehicles are certified for sale at high altitude.

(2) Such certificate will be issued for such period not to exceed one model year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle (or new motor vehicle engine) covered by the certificate will meet the requirements of the Act and of this part. Each such certificate shall contain the following language:

This certificate covers only those new motor vehicles (or new motor vehicle engines) which conform, in all material respects, to the design specifications that applied to those vehicles (or engines) described in the application for certification and which are produced during the ----- model year production period of the said manufacturer, as defined in 40 CFR 86.079-2.

It is a term of this certificate that the manufacturer shall consent to all inspections described in 40 CFR 86.078-7(c) which concern either the vehicle (or engine) certified, or any production vehicle (or production engine) covered by this certificate, or any production vehicle (or production engine) which when completed will be claimed to be covered by this certificate. Failure to comply with all the requirements of § 86.078-7(c) with respect to any such vehicle (or engine) may lead to revocation or suspension of this certificate as specified in 40 CFR § 86.079-30(c). It is also a term of this certificate that this certificate may be revoked or suspended for the other reasons stated in § 86.079-30 (c) or (d).

(3) One such certificate will be issued for each engine family and will certify compliance with no more than one set of applicable standards except that for gasoline-fueled light-duty vehicles and light-duty trucks, one such certificate will be issued for each engine family-evaporative emission family combination and will certify compliance with no more than one set of applicable standards.

(4) A violation of section 203(a)(1) of the Clean Air Act occurs when any manufacturer sells, offers for sale, introduces or delivers for introduction into commerce any light-duty vehicle or light-duty truck, subject to the regulations under the Act, which is not covered by a certificate of conformity at high altitude issued under this part:

(i) At a designated high-altitude location, unless such manufacturer has substantial reason to believe that such motor vehicle will not be sold to an ultimate purchaser for principal use at a designated high-altitude location; or,

(ii) At an other than designated high-altitude location, when such manufacturer has reason to believe that such motor vehicle is intended by the ultimate purchaser to be used principally at a designated high-altitude location.

(5) For the purpose of paragraph (a) of this section, "designated high-altitude location" is any county which has substantially all of its area located above 1,219 meters (4,000 feet) and which is identified below.

COUNTIES LOCATED SUBSTANTIALLY ABOVE 1,219 METERS (4,000 FEET) IN ELEVATION

(6) The provisions of paragraph (a)(4) of this section shall not apply to any light-duty vehicle or light-duty truck, sold, offered for sale, introduced, or delivered for introduction into commerce in California, provided that the vehicle is covered by a certificate of conformity with emission standards in effect in California.

(7) Certificates issued for light-duty vehicles or light-duty trucks certified with catalytic converters shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "Catalyst-equipped vehicles, otherwise covered by this certificate, which are driven outside the United States, Canada, and Mexico will be presumed to have been operated on leaded gasoline resulting in deactivation of the catalysts. If these vehicles are imported or offered for the importation without retrofit of the catalyst, they will be considered not to be within the coverage of this certificate unless included in a catalyst control program operated by a manufacturer or a United States Government Agency and approved by the Administrator."

(8) Certificates issued for incomplete light-duty trucks shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "For incomplete light-duty trucks, this certificate covers only those new motor vehicles which when completed by having the primary load-carrying device or container attached, conform to the maximum curb weight and frontal area limitations described in the application for certification as required in 40 CFR 86.079-21(d)."

(9) Certificates issued for heavy-duty engines shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "For heavy-duty engines, this certificate covers only those new motor vehicle engines installed in heavy-duty vehicles which conform to the minimum gross vehicle weight rating, curb weight, or frontal area limitations for heavy-duty vehicles described in 40 CFR 86.079-2."

(b) (1) The Administrator will determine whether a vehicle (or engine) covered by the application complies with applicable standards by observing the following relationships:

(i) *Light-duty vehicles and light-duty trucks.* (A) The durability-data vehicle(s) selected under § 86.079-24(c)(1)(i) shall represent all vehicles of the same engine-system combination.

(B) The emission-data vehicle(s) selected under § 86.079-24(b)(1)(ii), (b)(1)(iii), and (b)(1)(iv) shall represent all vehicles of the same engine-system combination as applicable to be sold below 4,000 ft.

(C) The emission-data vehicle(s) selected under § 86.079-24(b)(1)(vii)(A) and (b)(i)(vii)(B) shall represent all vehicles of the same evaporative control system within the evaporative family, as applicable, to be sold below 4,000 ft.

(D) The emission-data vehicle(s) selected under § 86.079-24(b)(1)(v) shall represent all vehicles of the same engine-system combination to be sold at high altitude.

(E) The emission-data vehicle(s) selected under § 86.079-24(b)(1)(vii)(D) shall represent all vehicles of the same evaporative control system within the evaporative family sold at high altitude.

(ii) *Gasoline-fueled heavy-duty engines.* (A) A test engine selected under § 86.079-24(b)(2)(ii) and (iv) shall represent all engines in the same engine family of the same engine displacement-exhaust emission controll system combination.

(B) A test engine selected under § 86.079-24(b)(2)(iii) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(C) A test engine selected under § 86.079-24(c)(2)(i) shall represent all engines of the same engine-system combination.

(iii) *Diesel heavy-duty engines.* (A) A test engine selected under § 86.079-24(b)(3)(ii) shall represent all engines in the same engine-system combination.

(B) A test engine selected under § 86.079-24(b)(3)(iii) shall represent all engines of that emission control system at the rated fuel delivery of the test engines.

(C) A test engine selected under § 86.078-24(c)(3)(i) shall represent all engines of the same engine-system combination.

(2) The administrator will proceed as in paragraph (a) of this section with respect to the vehicles (or engines) belonging to an engine family or engine family-evaporative emission family combination (as applicable), all of which comply with all applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer, data derived from any additional testing conducted pursuant to § 86.079-29, data or information derived from any inspection carried out under § 86.078-7(c) or any other pertinent data or information, the Administrator determines that one or more test vehicles (or test engines) of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 86.078-6 with respect to such issue.

(4) For light-duty vehicles and light-duty trucks the manufacturer may, at his option, proceed with any of the following alternatives with respect to an emission-data vehicle determined not in compliance with all applicable standards for which it was tested:

(i) Request a hearing under § 86.078-6; or

(ii) Remove the vehicle configuration (or evaporative vehicle configuration, as applicable) which failed, from his application;

(A) If the failed vehicle was tested for compliance with exhaust emission standards only: The Administrator may select, in place of the failed vehicle, in

V 42 174 SEP 8 77 UMI

accordance with the selection criteria employed in selecting the failed vehicle, a new emission-data vehicle to be tested for exhaust emission compliance only.

(B) If the failed vehicle was tested for compliance with both exhaust and evaporative emission standards: The Administrator may select, in place of the failed vehicle, in accordance with the selection criteria employed in selecting the failed vehicle, a new emission-data vehicle which will be tested for compliance with both exhaust and evaporative emission standards. If one vehicle cannot be selected in accordance with the selection criteria employed in selecting the failed vehicle, then two vehicles may be selected (i.e., one vehicle to satisfy the exhaust emission vehicle selection criteria and one vehicle to satisfy the evaporative emission vehicle selection criteria). The vehicle selected to satisfy the exhaust emission vehicle selection criteria will be tested for compliance with exhaust emission standards only. The vehicle selected to satisfy the evaporative emission vehicle selection criteria will be tested for compliance with both exhaust and evaporative emission standards; or

(iii) Remove the vehicle configuration (or evaporative vehicle configuration, as applicable) which failed from the application and add a vehicle configuration(s) (or evaporative vehicle configuration(s), as applicable) not previously listed. The Administrator may require, if applicable, that the failed vehicle be modified to the new engine code (or evaporative emission code, as applicable) and demonstrate by testing that it meets applicable standards for which it was originally tested. In addition, the Administrator may select, in accordance with the vehicle selection criteria given in § 86.079–24(b), a new emission-data vehicle or vehicles. The vehicles selected to satisfy the exhaust emission vehicle selection criteria will be tested for compliance with exhaust emission standards only. The vehicles selected to satisfy the evaporative emission vehicle selection criteria will be tested for compliance with both exhaust and evaporative mission standards; or

(iv) Correct a component or system malfunction and show that with a correctly functioning system or component the failed vehicle meets applicable standards for which it was originally tested. The Administrator may require a new emission-data vehicle, of identical vehicle configuration (or evaporative vehicle configuration, as applicable) to the failed vehicle, to be operated and tested for compliance with the applicable standards for which the failed vehicle was originally tested.

(5) For heavy-duty engines the manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test engine(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 86.078–6; or

(ii) Delete from the application for certification the engines represented by the failing test engine. (Engines so deleted may be included in a later request for certification under § 86.079–32.) The Administrator will then select in place of each failing engine an alternate engine chosen in accordance with selection criteria employed in selecting the engine that failed; or

(iii) Modify the test engine and demonstrate by testing that it meets applicable standards. Another engine which is in all material respects the same as the first engine, as modified, shall then be operated and tested in accordance with applicable test procedures.

(6) If the manufacturer does not request a hearing or present the required data under paragraphs (b)(4) or (b)(5) (as applicable) of this section, the Administrator will deny certification.

(c) (1) Notwithstanding the fact that any certification vehicle(s) (or certification engine(s)) may comply with other provisions of this subpart, the Administrator may withhold or deny the issuance of a certificate of conformity (or suspend or revoke any such certificate which has been issued) with respect to any such vehicle(s) (or engine(s)) if:

(i) The manufacturer submits false or incomplete information in his application for certification thereof;

(ii) The manufacturer renders inaccurate or invalid any test data which he submits pertaining thereto or otherwise circumvents the intent of the Act or of this part with respect to such vehicle (or engine);

(iii) Any EPA Enforcement Officer is denied access on the terms specified in § 86.078–7(c) to any facility or portion thereof which contains any of the following:

(A) The vehicle (or engine);

(B) Any components used or considered for use in its modification or build-up into a certification vehicle (or certification engine);

(C) Any production vehicle (or production engine) which is or will be claimed by the manufacturer to be covered by the certificate;

(D) Any step in the construction of a vehicle (or engine) described in (C) of this subdivision;

(E) Any records, documents, reports, or histories required by this part to be kept concerning any of the above;

(iv) Any EPA Enforcement Officer is denied "reasonable assistance" (as defined in § 86.078–7(c)) in examining any of the items listed in paragraph (c)(1)(iii) of this section.

(2) The sanctions of withholding, denying, revoking, or suspending of a certificate may be imposed for the reasons in paragraphs (c)(1)(i), (ii), (iii), or (iv) of this section only when the infraction is substantial.

(3) In any case in which a manufacturer knowingly submits false or inaccurate information or knowingly renders inaccurate or invalid any test data or commits any other fraudulent acts and such acts contribute substantially to the Administrator's decision to issue a certificate of conformity, the Administrator may deem such certificate void ab initio.

(4) In any case in which certification of a vehicle (or engine) is proposed to be withheld, denied, revoked, or suspended under paragraph (c)(1)(iii) or (c)(1)(iv) of this section, and in which the Administrator has presented to the manufacturer involved reasonable evidence that a violation of § 86.078–7(c) in fact occurred, the manufacturer, if he wishes to contend that, even though the violation occurred, the vehicle (or engine) in question was not involved in the violation to a degree that would warrant withholding denial, revocation, or suspension of certification under either paragraph (c)(1)(iii) or (c)(1)(iv) of this section, shall have the burden of establishing that contention to the satisfaction of the Administrator.

(5) Any revocation or suspension of certification under paragraph (c)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.078–6 hereof.

(ii) Extend no further than to forbid the introduction into commerce of vehicles (or engines) previously covered by the certification which are still in the hands of the manufacturer, except in cases of such fraud or other misconduct as makes the certification invalid ab initio.

(6) The manufacturer may request in the form and manner specified in paragraph (b)(3) of this section that any determination made by the Administrator under paragraph (c)(1) of this section to withhold or deny certification be reviewed in a hearing conducted in accordance with § 86.078–6. If the Administrator finds, after a review of the request and supporting data, that the request raises a substantial factual issue he will grant the request with respect to such issue.

(d) (1) Notwithstanding the fact that any vehicle configuration or engine family may be covered by a valid outstanding certificate of conformity, the Administrator may suspend such outstanding certificate of conformity in whole or in part with respect to such vehicle configuration or engine family if:

(i) The manufacturer refuses to comply with the provisions of a test order issued by the Administrator pursuant to § 86.603; or

(ii) The manufacturer refuses to comply with any of the requirements of § 86.603; or

(iii) The manufacturer submits false or incomplete information in any report or information provided pursuant to the requirements of § 86.609; or

(iv) The manufacturer renders inaccurate any test data which he submits pursuant to § 86.609; or

(v) Any EPA Enforcement Officer is denied access to a facility on the terms specified in § 86.606; or

(vi) Any EPA Enforcement Officer is denied the opportunity on the terms specified in § 86.606 to:

(A) Monitor vehicle selection pursuant to § 86.607, or

(B) Select vehicles for testing pursuant to § 86.607, or

(C) Monitor vehicle testing performed to satisfy any of the requirements of this part; or

(vii) Any EPA Enforcement Officer is denied "reasonable assistance" as defined in § 86.606 in examining any of the items listed in that section; or

(viii) The manufacturer refuses to comply with the requirements of §§ 86.604(a), 86.605, and 86,607, 86.608, 86.610, or 86.611.

(2) The sanction of suspending a certificate may not be imposed for the reasons in paragraphs (d)(1)(i), (ii), or (viii) of this section where such refusal is caused by conditions and circumstances outside the control of the manufacturer which renders it impossible to comply with those requirements. Such conditions and circumstances shall include, but not be limited to, any uncontrollable factors which result in the temporary unavailability of equipment and personnel needed to conduct the required tests, such as equipment breakdown or failure or illness of personnel, but shall not include failure of the manufacturer to adequately plan for and provide the equipment and personnel needed to conduct the tests. The manufacturer will bear the burden of establishing the presence of the conditions and circumstances required by this paragraph.

(3) The sanctions of suspending a certificate may be imposed for the reasons in paragraphs (d)(1)(iii), (iv), (v), (vi), or (vii) of this section only when the infraction is substantial.

(4) In any case in which a manufacturer knowingly submitted false or inaccurate information or knowingly rendered inaccurate any test data or committed any other fraudulent acts, and such acts contributed substantially to the Administrator's original decision not to suspend or revoke a certificate of conformity in whole or in part, the Administrator may deem such certificate void from the date of such fraudulent act.

(5) In any case in which certification of a vehicle is proposed to be suspended under paragraph (d)(1)(v), (d)(1)(vi), or (d)(1)(vii) of this section, and in which the Administrator has presented to the manufacturer involved reasonable evidence that a violation of § 86.608 in fact occurred, the manufacturer, if he wishes to contend that even though the violation occurred, the vehicle configuration or engine family in question was not involved in the violation to the degree that would warrant suspension of certification under either paragraph (d)(1)(v), (d)(1)(vi), or (d)(1)(vii) of this section, shall have the burden of establishing that contention to the satisfaction of the Administrator.

(6) Any suspension of certification under paragraph (d)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.613 hereof, and

(ii) Not apply to vehicles no longer in the hands of the manufacturer.

11. New §§ 86.079–31 through 86.079–34 are added and read as follows:

§ 86.079–31 Separate certification.

Where possible a manufacturer should include in a single application for certification all vehicles (or engines) for which certification is required. A manufacturer may, however, choose to apply separately for certification of part of his product line. The selection of test vehicles (or test engines) and the computation of test results will be determined separately for each application.

§ 86.078–32 Addition of a vehicle or engine after certification.

(a) If a manufacturer proposes to add to his product line a vehicle (or engine) of the same engine-system combination as vehicles (or engines) previously certified but which was not described in the application for certification when the test vehicle(s) (or test engine(s)) representing other vehicles (or engines) of that combination was certified, he shall notify the Administrator. Such notification shall be in advance of the addition unless the manufacturer elects to follow the procedure described in § 86.079–34. This notification shall include a full description of the vehicle (or engine) to be added.

(b) The Administrator may require the manufacturer to perform such tests on the test vehicle(s) (or test engine(s)) representing the vehicle (or engine) to be added which would have been required if the vehicle (or engine) had been included in the original application for certification.

(c) If, after a review of the test reports and data submitted by the manufacturer, and data derived from any testing conducted under § 86.079–29, the Administrator determines that the test vehicle(s) or test engine(s) meets all applicable standards, the appropriate certificate will be amended accordingly. If the Administrator determines that the test vehicle(s) (or test engine(s)) does not meet applicable standards, he will proceed under § 86.079–30(b).

§ 86.079–33 Changes to a vehicle or engine covered by certification.

(a) The manufacturer shall notify the Administrator of any change in production vehicles (or production engines) in respect to any of the parameters listed in § 86.079–24(a)(3), § 86.079–24(b)(1)(iii), § 86.079–24(b)(2)(iii) or § 86.079–24(b)(3)(iii) as applicable, giving a full description of the change. Such notification shall be in advance of the change unless the manufacturer elects to follow the procedure described in § 86.079–34.

(b) Based upon the description of the change, and data derived from such testing as the Administrator may require or conduct, the Administrator will determine whether the vehicle (or engine), as modified, would still be covered by the certificate of conformity then in effect.

(c) If the Administrator determines that the outstanding certificate would cover the modified vehicles (or engines) he will notify the manufacturer in writing. Except as provided in § 86.079–34 the change may not be put into effect prior to the manufacturer's receiving this notification. If the Administrator determines that the modified vehicles (or engines) would not be covered by the certificate then in effect, the modified vehicles (or engines) shall be treated as additions to the product line subject to § 86.079–32.

§ 86.079–34 Alternative procedure for notification of additions and changes.

(a) A manufacturer may, in lieu of notifying the Administrator in advance of an addition of a vehicle (or engine) under § 86.079–32 or a change in a vehicle (or engine) under § 86.079–33 notify him concurrently with the making of the change if the manufacturer believes the addition or change will not require any testing under the appropriate section. Upon notification to the Administrator, the manufacturer may proceed to put the addition or change into effect.

(b) The manufacturer may continue to produce vehicles (or engines) as described in the notification to the Administrator for a maximum of 30 days, unless the Administrator grants an extension in writing. This period may be shortened by a notification in accordance with paragraph (c) of this section.

(c) If the Administrator determines, based upon a description of the addition or change, that no test data will be required, he will notify the manufacturer in writing of the acceptability of the addition or change. If the Administrator determines that test data will be required, he will notify the manufacturer to rescind the change within 5 days of receipt of the notification. The Administrator will then proceed as in § 86.079–32 (b) and (c), or § 86.079–33 (b) and (c), as appropriate.

(d) Election to produce vehicles (or engines) under this section will be deemed to be a consent to recall all vehicles (or engines) which the Administrator determines under § 86.079–32(c) do not meet applicable standards, and to cause such nonconformity to be remedied at no expense to the owner.

12. Section 86.079–35 is revised to read as follows:

§ 86.079–35 Labeling.

(a) The manufacturer of any motor vehicle (or motor vehicle engine) subject to the applicable emission standards of this subpart, shall, at the time of manufacture, affix a permanent legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such vehicles (or engines) available for sale to the public and covered by a certificate of conformity under § 86.079–30(a).

(1) *Light-duty vehicles and light-duty trucks.* (i) A permanent, legible label shall be affixed in a readily visible position in the engine compartment.

(ii) The label shall be affixed by the vehicle manufacturer who has been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label. The label shall not

V 42 174 SEP 8 77 UMI

be affixed to any equipment which is easily detached from such vehicle.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label:

(A) The label heading: Vehicle Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches), engine, family identification and evaporative family identification;

(D) Engine tuneup specifications and adjustments, as recommended by the manufacturer in accordance with the altitude at which the vehicle is to be sold to the ultimate purchaser, including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable) as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air-conditioner), if any, should be in operation;

(E) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations which apply to light-duty vehicles or light-duty trucks;

(F) The altitude at which the vehicle is intended for sale to the public as specified by a certificate of conformity under § 86.079–30.

(2) *Heavy-duty engines.* (i) A permanent legible label shall be affixed to the engine in a position in which it will be readily visible after installation in the vehicle.

(ii) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(A) The label heading: Engine Exhaust Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches) and engine family and model designations;

(D) Date of engine manufacture (month and year);

(E) Engine specifications and adjustments as recommended by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(F) For gasoline-fueled engines the label should include the idle speed, ignition timing, and the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), and valve lash.

(G) For Diesel engines the label should include the advertised hp. at rpm, fuel rate at advertised hp. in mm³/stroke, valve lash, initial injection timing, and idle speed.

(H) An unconditional statement of compliance with the appropriate model year (e.g., 1979) U.S. Environmental Protection Agency regulations applicable to heavy-duty engines.

(iv) The label may be made up of one or more pieces: *Provided*, That all pieces are permanently attached to the same engine or vehicle part as applicable.

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such vehicle (or engine) conforms to any applicable State emission standards for new motor vehicles (or new motor vehicle engines) or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the vehicle (or engine).

(c)(1) The manufacturer of any light-duty vehicle or light-duty truck subject to the emission standards of this subpart, shall, in addition and subsequent to setting forth those statements on the label required by the Department of Transportation (DOT) pursuant to 49 CFR 567.4, set forth, on the DOT label or on an additional label located in proximity to the DOT label and affixed as described in 49 CFR 567.4(b), the following information in the English language, lettered in block letters and numerals not less than three thirty-seconds of an inch high, of a color that contrasts with the background of the label:

(i) The heading: "Vehicle Emission Control Information";

(ii) The statement: "This Vehicle Conforms to U.S. EPA Regulations Applicable to 1979 Model Year New Motor Vehicles".

(iii) One of the following statements, as applicable, in letters and numerals not less than six thirty-seconds of an inch high and of a color that contrasts with the background of the label:

(A) For all vehicles certified as non-catalyst-equipped: "NON-CATALYST";

(B) For all vehicles certified as catalyst-equipped which are included in a manufacturer's catalyst control program for which approval has been given by the Administrator: "CATALYST-APPROVED FOR IMPORT";

(C) For all vehicles certified as catalyst-equipped which are not included in a manufacturer's catalyst control program for which prior approval has been given by the Administrator: "CATALYST".

(2) In lieu of selecting either of the labeling options of paragraph (c)(1) of this section, the manufacturer may add the information required by paragraph (c)(1)(iii) of this section to the label required by paragraph (a) of this section. The required information will be set forth in the manner prescribed by paragraph (c)(1)(iii) of this section.

(d) Incomplete light-duty trucks or incomplete heavy-duty vehicles optionally certified as light-duty trucks shall have the following statement printed on the label required in paragraph (a)(1) of this section in lieu of the statement required by paragraph (a)(1)(iii)(E) of this section: "This vehicle conforms to U.S. EPA regulations applicable to 19— Model Year New Motor Vehicles when completed at a maximum curb weight of _____ pounds and a maximum frontal area of _____ square feet."

(e) Incomplete heavy-duty vehicles having an 8,500 pound gross vehicle weight rating or less shall have the following statement printed on the label required in paragraph (a)(2) or (a)(3) of this section in lieu of the statement required by paragraph (a)(2)(iii)(F) or (a)(3)(iii)(F) of this section: "This engine conforms to U.S. EPA regulations applicable to 19— Model Year New Heavy-Duty Engines when installed in a vehicle completed at a curb weight of more than 6,000 pounds or with a frontal area greater than 46 square feet."

(f) The manufacturer of any incomplete vehicle shall notify the purchaser of such vehicle of any curb weight, frontal area, or gross vehicle weight rating limitations affecting the emissions certificate applicable to that vehicle. This notification shall be transmitted in a manner consistent with National Highway Traffic Safety Administration safety notification requirements published in 40 CFR Part 568.

13. New §§ 86.079–36 through 86.079–39 are added and read as follows:

§ 86.079–36 Submission of vehicle identification numbers.

(a) The manufacturer of any light-duty vehicle or light-duty truck covered by a certificate of conformity under § 86.079–30(a) shall, not later than 60 days after its manufacture, submit to the Administrator the vehicle identification number of such vehicle: *Provided*, That this requirement shall not apply with respect to any vehicle manufactured within any State, as defined in section 302(d) of the Act.

(b) The requirements of this section may be waived with respect to any manufacturer who provides information satisfactory to the Administrator which will enable the Administrator to identify those vehicles which are covered by a certificate of conformity.

§ 86.079–37 Production vehicles and engines.

(a) Any manufacturer obtaining certification under this part shall supply to the Administrator, upon his request, a reasonable number of production vehicles (or engines) selected by the Administrator which are representative of the engines, emission control systems, fuel systems, and transmissions offered and typical of production models available for sale under the certificate. These vehicles (or engines) shall be supplied for testing at such time and place and for such reasonable periods as the Administrator may require. Heavy-duty engines supplied under this paragraph may be required to be mounted in chassis and

appropriately equipped for operation on a chassis dynamometer.

(b)(1) Any manufacturer of light-duty vehicles or light-duty trucks obtaining certification under this part shall notify the Administrator, on a quarterly basis, of the number of vehicles domestically produced for sale in the United States and the number of vehicles produced and imported for sale in the United States during the preceding quarter. A manufacturer may elect to provide this information every 60 days instead of quarterly, to combine it with the notification required under § 86.079–36. The notification must be submitted 30 days after the close of the reporting period. The vehicle production information required shall be submitted as follows:

(i) Total production volume expressed in terms of units produced;

(ii) Model type production volume, expressed for each model type in terms of units produced and as a percentage of total production;

(iii) Base level production volume, expressed for each base level in terms of units produced and as a percentage of:

(A) Total production of its respective model type(s), and

(B) Total production; and

(iv) Vehicle configuration production volume, expressed for each vehicle configuration in terms of units produced, and as a percentage of the total production of its respective base level. In addition, each vehicle configuration shall be identified by its appropriate engine-system combination.

(2) All light-duty vehicles and light-duty trucks covered by a certificate of conformity under § 86.079–30(a) shall be adjusted by the manufacturer to the ignition or injection timing specification detailed in § 86.079–36(a)(1)(iii)(D).

(c) Any heavy-duty engine manufacturer obtaining certification under this part shall notify the Administrator, on a quarterly basis, of the number of engines of such engine family-engine displacement-exhaust emission control system-fuel system combination produced for sale in the United States during the preceding quarter.

(d) The following definitions apply to this section:

(1) "Model type" means a unique combination of car line, basic engine, and transmission class.

(2) "Base level" means a unique combination of basic engine, inertia weight, and transmission class.

(3) "Vehicle configuration" means a unique combination of basic engine, engine code, inertia weight, transmission configuration, and axle ratio within a base level.

§ 86.079–38 Maintenance instructions.

(a) The manufacturer shall furnish or cause to be furnished to the purchaser of each new motor vehicle (or motor vehicle engine) subject to the standards prescribed in §§ 86.078–8, 86.079–9, 86.079–10, or 86.079–11, as applicable, written instructions for the maintenance and use of the vehicle (or engine) by the purchaser as may be reasonable and necessary to assure the proper functioning of emission control systems.

(1) Such instructions shall be provided for those vehicle and engine components listed in Appendix VI to this part (and for any other components) to the extent that maintenance of these components is necessary to assure the proper functioning of emission control systems.

(2) Such instructions shall be in clear, and to the extent practicable, nontechnical language.

(b) The maintenance instructions required by this section shall contain a general description of the documentation which the manufacturer will require from the ultimate purchaser or any subsequent purchaser as evidence of compliance with the instructions.

(c) *For gasoline-fuel light-duty vehicles and light-duty trucks.* (1) Such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.079–25(a)(2) or § 86.079–25(b)(2) as applicable, and shall explain the conditions under which EGR system and catalytic converter maintenance are to be performed (e.g., what type of warning device is being employed and whether the device is activated by component failure or the need for periodic maintenance).

(2) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at low altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at high altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at high altitude.

(3) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at high altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at low altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at low altitude.

(d) *For Diesel light-duty vehicles and light-duty trucks.* (1) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at low altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at high altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at high altitude.

(2) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at high altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at low altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at low altitude.

(e) For gasoline-fueled heavy-duty engines, such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.079–25(c)(2). Scheduled maintenance in addition to that performed on the durability-data engine under § 86.079–25(c)(2) may be recommended for reasons such as to offset the effects of operating conditions which differ from the dynamometer durability cycle or to increase the life of the engine beyond 1500 hours (or the equivalent). The instructions may schedule maintenance on a calendar time basis and/or mileage basis in addition to the engine service time basis that was followed by the manufacturer under § 86.079–25(c)(2).

(f) For Diesel heavy-duty engines, such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.079–25(c)(2). Scheduled maintenance in addition to that performed on the durability-data engine under § 86.079–25(c)(2) may be recommended for reasons such as to offset the effects of operating conditions which differ from the dynamometer durability cycle or to increase the life of the engine beyond 1,000 hours (or the equivalent). The instructions may schedule maintenance on a calendar time basis, mileage basis, engine service time basis, or combinations of each.

§ 86.079–39 Submission of maintenance instructions.

(a) The manufacturer shall provide to the Administrator, no later than the time of the submission required by § 86.079–23, a copy of the maintenance instructions which the manufacturer proposes to supply to the ultimate purchaser in accordance with § 86.079–38(a). The Administrator will review such instructions to determine whether they are reasonable and necessary to assure the proper functioning of the vehicle's (or engine's) emission control systems. The Administrator will notify the manufacturer of his determination whether such instructions are reasonable and necessary to assure the proper functioning of the emission control systems.

(b) Any revision to the maintenance instructions which will affect emissions shall be supplied to the Administrator at least 30 days before being supplied to the ultimate purchaser unless the Administrator consents to a lesser period of time.

14. A new § 86.080–10 is added and reads as follows:

§ 86.080–10 Emission standards for 1980 gasoline-fueled heavy-duty engines.

(a)(1) Exhaust emissions from new 1980 model year gasoline-fueled heavy-duty engines shall not exceed one of the two following standards, to be selected at the manufacturer's option:

V 42 I 174 SEP 8 77 UMI

(1) (A) *Hydrocarbons.* 1.5 grams per brake horsepower hour.

(B) *Carbon monoxide.* 25 grams per brake horsepower hour.

(C) *Hydrocarbons plus oxides of nitrogen.* 10 grams per brake horsepower hour.

(ii) (A) *Hydrocarbons plus oxides of nitrogen.* 5.0 grams per brake horsepower hour.

(B) *Carbon monoxide.* 25 grams per brake horsepower hour.

(2) The standards set forth in paragraph (a) (1) of this section refer to exhaust gaseous emissions generated under the conditions set forth in Subpart D of this part and measured in accordance with those procedures. For low-volume manufacturers, as defined in § 86.080–24(e), the test procedure in either Subpart D or Subpart H of this part may be used; however, standards (a) (1) (i) (A) and (a) (1) (i) (C) shall be reduced by 0.5 gram per brake horsepower hour if Subpart H of this part is used.

(b) [Reserved]

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any new 1980 and later model year gasoline-fueled heavy-duty engine.

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this section shall, prior to taking any of the actions specified in section 203(a) (1) of the Act, test or cause to be tested motor vehicle engines in accordance with applicable procedures to ascertain that such test engines meet the requirements of paragraphs (a) and (c) of this section.

15. A new § 86.080–11 is added and reads as follows:

§ 86.080–11 Emissions standards for 1980 Diesel heavy-duty engines.

(a) (1) Exhaust emissions from new 1980 model year Diesel heavy-duty engines shall not exceed one of the two following standards, to be selected at the manufacturer's option:

(i) (A) *Hydrocarbons.* 1.5 grams per brake horsepower hour.

(B) *Carbon monoxide.* 25 grams per brake horsepower hour.

(C) *Hydrocarbon plus oxides of nitrogen.* 10 grams per brake horsepower hour.

(ii) (A) *Hydrocarbons plus oxides of nitrogen.* 5 grams per brake horsepower hour.

(B) *Carbon monoxide.* 25 grams per brake horsepower hour.

(2) The standards set forth in paragraph (a) (1) of this section refer to exhaust gaseous emissions generated under the conditions set forth in Subpart D of this part and measured in accordance with those procedures. For low volume manufacturers, as defined in § 86.080–24 (e), the test procedure in either Subpart D or Subpart J of this part may be used.

(b) (1) The opacity of smoke emissions from new 1980 and later model year Diesel heavy-duty engines shall not exceed:

(i) 20 percent during the engine acceleration mode.

(ii) 15 percent during the engine lugging mode.

(iii) 50 percent during the peaks in either mode.

(2) The standards set forth in paragraph (b) (1) of this section refer to exhaust smoke emissions generated under the conditions set forth in Subpart I and measured and calculated in accordance with those procedures.

(c) [Reserved]

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this section shall, prior to taking any of the actions specified in section 203(a) (1) of the Act, test or cause to be tested motor vehicle engines in accordance with applicable procedures to ascertain that such test engines meet the requirements of paragraphs (a) and (b) of this section.

15. A new § 86.080–24 is added and reads as follows:

§ 86.080–24 Test vehicles and engines.

(a) (1) The vehicles or engines covered by an application for certification will be divided into groupings of engines which are expected to have similar emission characteristics throughout their useful life. Each group of engines with similar emission characteristics shall be defined as a separate engine family.

(2) To be classed in the same engine family, engines must be identical in all the following respects:

(i) The cylinder bore center-to-center dimensions.

(ii) The dimension from the centerline of the crankshaft to the centerline of the camshaft.

(iii) The dimension from the centerline of the crankshaft to the top of the cylinder block head face.

(iv) The cylinder block configuration (air cooled or water cooled; L–6, 90° V–8, etc.).

(v) The location of intake and exhaust valves (or ports) and the valve (or port) sizes (within a ⅛-inch range on the valve head diameter).

(vi) The method of air aspiration.

(vii) The combustion cycle.

(viii) Catalytic converter characteristics.

(ix) Thermal reactor characteristics.

(x) Type of air inlet cooler (e.g., inter-coolers and after-coolers) for Diesel heavy-duty engines.

(3) Engines identical in all the respects listed in paragraph (a) (2) of this section may be further divided into different engine families if the Administrator determines that they may be expected to have different emission characteristics. This determination will be based upon a consideration of the following features of each engine.

(i) The bore and stroke.

(ii) The surface-to-volume ratio of the nominally dimensioned cylinder at the top dead center position.

(iii) The intake manifold induction port size and configuration.

(iv) The exhaust manifold port size and configuration.

(v) The intake and exhaust valve sizes.

(vi) The fuel system.

(vii) The camshaft timing and ignition or injection timing characteristics.

(4) Where engines are of a type which cannot be divided into engine families based upon the criteria listed in paragraphs (a) (2) and (3) of this section, the Administrator will establish families for those engines based upon the features most related to their emission characteristics.

(5) The gasoline-fueled vehicles covered by an application for certification will be divided into groupings which are expected to have similar evaporative emission characteristics throughout their useful life. Each group of vehicles with similar evaporative emission characteristics shall be defined as a separate evaporative emission family.

(6) To be classed in the same evaporative emission family, vehicles must be identical in all of the following respects:

(i) Type of vapor storage device (e.g., canister, air cleaner, crankcase).

(ii) Basic canister design.

(iii) Fuel system.

(7) Where vehicles are of a type which cannot be divided into evaporative emission families based on the criteria listed above, the Administrator will establish families for those vehicles based upon the features most related to their evaporative emission characteristics.

(b) Emission data:

(1) *Emission-data vehicles.* Paragraph (b) (1) of this section applies to light-duty vehicle and light-duty truck emission-data vehicles.

(i) Vehicles will be chosen to be operated and tested for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Vehicles of each engine family will be divided into engine displacement-exhaust emission control system combinations as applicable. A projected sales volume will be established for each combination for the model year for which certification is sought. One vehicle of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of the manufacturer's total production of vehicles of that engine family is represented, or until a maximum of four vehicles is selected. If any single combination represents over 70 percent, then two vehicles of that combination may be selected. The vehicle selected for each combination will be specified by the Administrator as to such features as engine code, transmission type, fuel system, and inertia weight class.

(iii) The Administrator may select a maximum of four additional vehicles within each engine family based upon features indicating that they may have the highest emission levels of vehicles in that engine family. In selecting these vehicles, the Administrator will consider such features as the emission control system combination, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, compression ratio,

inertia weight class, transmission options, and axle ratios.

(iv) If the vehicles selected in accordance with paragraphs (b) (1) (ii) and (iii) of this section do not represent each engine-system combination, then one vehicle of each engine-system combination not represented will be selected by the Administrator. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with the control system combination in the engine family and will be designated by the Administrator as to such features as transmission type, fuel system, and inertia weight class.

(v) The Administrator will also select one vehicle for each engine-system combination within an engine family for which vehicles are to be sold to ultimate purchasers at high altitude.

(vi) The Administrator may combine testing requirements for any vehicle selected under paragraph (b) (1) (v) or (b) (1) (vii) (D) of this section with the testing requirements for any similar vehicle in the same engine-system combination selected under paragraph (b) (1) (ii), (iii), or (iv) of this section or any similar vehicle in the same engine-system, evaporative emission family, evaporative emission control system combination selected under paragraph (b) (1) (vii) (A) or (B) of this section. The testing requirements may be combined by the Administrator requiring a vehicle selected for testing under paragraphs (b) (1) (ii), (iii), (iv), (vii) (A), or (vii) (B) of this section to be modified (if necessary) after mileage accumulation and emission testing for the purpose of demonstrating compliance with § 86.080–23(b) (1) (ii).

(vii) (A) Vehicles of each evaporative emission family will be divided into evaporative emission control systems. One vehicle of each evaporative emission control system within the evaporative emission family will be selected.

(B) The Administrator may select a maximum of four (4) additional vehicles within each evaporative emission family based upon features indicating that they may have the highest evaporative emission levels of vehicles in that family.

(C) The Administrator may determine that the vehicles selected under paragraph (b) (1) (ii) through (iv) of this section may be used to satisfy the requirements of paragraph (b) (1) (vii) (A) and (B) of this section.

(D) The Administrator will also select one vehicle for each evaporative emission control system within each evaporative family for which vehicles are to be sold at high altitude.

(E) Vehicles selected under paragraph (b) (1) (v) of this section may be used to satisfy the requirements of paragraph (b) (1) (vii) (D) of this section.

(2) *Gasoline-fueled heavy-duty emission-data engines.* Paragraph (b) (2) of this section applies to gasoline-fueled heavy-duty emission-data engines.

(i) Engines will be chosen to be run for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Engines of each engine family will be divided into engine displacement-exhaust emission control system combinations. A projected sales volume will be established for each combination for the applicable model year. One engine of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of engines of that family is represented, or until a maximum of four engines is selected. The engines selected for each combination will be specified by the Administrator as to fuel system.

(iii) The Administrator may select a maximum of two additional engines within each engine family based upon features indicating that they may have the highest emission levels of the engines in that engine family. In selecting these engines, the Administrator will consider such features as the exhaust emission control system, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, and compression ratio.

(iv) If the engines selected in accordance with pargaraphs (b) (2) (ii) and (iii) of this section do not represent each engine displacement-exhaust emission control system combination, then one engine of each engine displacement-exhaust emission control system combination not represented shall be selected by the Administrator.

(3) *Diesel heavy-duty emission-data engines.* Paragraph (b) (3) of this section applies to Diesel heavy-duty emission-data engines.

(i) Engines will be chosen to be run for emission data based upon engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Engines of each engine family will be divided into groups based upon their exhaust emission control systems. One engine of each engine-system combination shall be run for smoke emission data and gaseous emission data as prescribed in § 86.079–26(c) (3). Either the complete gaseous emission test or the complete smoke test may be conducted first. Within each combination, the engine that features the highest fuel feed per stroke, primarily at the speed of maximum rated torque and secondarily at rated speed, will usually be selected. If there are military engines with higher fuel rates than other engines in the same engine system combinations, then one military engine shall be also selected. The engine with the highest fuel feed per stroke will usually be selected.

(iii) The Administrator may select a maximum of one additional engine within each engine-system combination based upon features indicating that it may have the highest emission levels of the engines of that combination. In selecting this engine, the Administrator will consider such features as the injection system, fuel system, compression ratio, rated speed, rated horsepower, peak torque speed, and peak torque.

(c) Durability data: (1) *Durability-data vehicles.* Paragraph (c) (1) of this section applies to light-duty vehicle and light-duty truck durability-data vehicles.

(i) A durability-data vehicle will be selected by the Administrator to represent each engine-system combination. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with that control-system combination in that engine family and will be designated by the Administrator as to transmission type, fuel system, and inertia weight class.

(ii) A manufacturer may elect to operate and test additional vehicles to represent any engine-system combination. The additional vehicles must be of the same engine displacement, transmission type, fuel system, and inertia weight class as the vehicle selected for that engine-system combination in accordance with the provisions of paragraph (c) (1) (i) of this section. Notice of an intent to operate and test additional vehicles shall be given to the Administrator not later than 30 days following notification of the test fleet selection.

(2) *Gasoline-fueled heavy-duty durability-data engines.* Paragraph (c) (2) of this section applies to gasoline-fueled heavy-duty durability-data engines.

(i) A durability-data engine will be selected by the Administrator to represent each engine-system combination. The engine selected shall be of the displacement with the largest projected sales volume of engines with that exhaust emission control system in that engine family and will be designated by the Administrator as to fuel system.

(ii) [Reserved]

(iii) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same engine displacement and fuel system as the engine selected for that combination in accordance with the provisions of paragraph (c) (2) (i) of this section. Notice of an intent to run additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection. Deterioration factors calculated for each engine-system combination shall be applied separately to military and nonmilitary engines within the same engine-system combination.

(3) *Diesel heavy-duty durability-data engines.* Paragraph (c) (3) of this section applies to Diesel heavy-duty durability-data engines.

(i) One engine from each engine-system combination shall be tested as prescribed in § 86.079–26(c) (3) (ii). At each test point, either the complete gaseous emission test or the complete smoke test may be conducted first. Within each combination, the engine which features the highest fuel feed per stroke, primarily at rated speed and secondarily at the speed of maximum rated torque, will usually be selected for durability testing. In the case where more than one engine in an engine-system combination has the highest fuel feed per stroke, the engine with the highest maximum rated horsepower will usually be selected for durability testing. If an engine-system combination

V 42 174 SEP 8 77 UMI

includes both military and nonmilitary engines, then the nonmilitary engine with the highest maximum rated horsepower will usually be selected for durability testing.

(ii) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same model and fuel system as the engine selected in accordance with the provisions of paragraph (c)(3)(i) of this section. Notice of an intent to test additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection. Deterioration factors calculated for each engine-system combination shall be applied separately to military and nonmilitary engines within the same engine system combination.

(d) For purposes of testing under § 86.079–26 (a)(9), (b)(9), or (c)(11), the Administrator may require additional emission-data vehicles (or emission-data engines) and durability-data vehicles (or durability-data engines) identical in all material respects to vehicles (or engines) selected in accordance with paragraphs (b) and (c) of this section: *Provided*, That the number of vehicles (or engines) selected shall not increase the size of either the emission-data fleet or the durability-data fleet by more than 20 percent or one vehicle (or engine), whichever is greater.

(e) Any manufacturer whose projected sales for the model year in which certification is sought is less than

(1) 2,000 gasoline-fueled light-duty vehicles, or (2) 2,000 Diesel light-duty vehicles, or (3) 2,000 gasoline-fueled light-duty trucks, or (4) 2,000 Diesel light-duty trucks, or (5) 2,000 gasoline-fueled heavy-duty engines, or (6) 2,000 Diesel heavy-duty engines,

may request a reduction in the number of test vehicles (or engines) determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines would meet the objectives of this procedure.

(f) (1) In lieu of testing an emission-data or durability-data vehicle (or engine) selected under paragraph (b) or (c) of this section, and submitting data therefore, a manufacturer may, with the prior written approval of the Administrator, submit exhaust emission data and/or fuel evaporative emission data, as applicable on a similar vehicle (or engine) for which certification has previously been obtained or for which all applicable data required under § 86.079–23 has previously been submitted.

(2) Heavy-duty engine test data submitted prior to the 1980 model year and which complies with paragraph (f)(1) of this section, can be used in subsequent model years, without regard to the test procedure. Any heavy-duty engine certified in the 1979 model year will be certified for 1980 and subsequent model years if requested by the manufacturers.

(g) (1) This paragraph applies to light-duty vehicles and light-duty trucks.

(2) Where it is expected that more than 33 percent of an engine family will be equipped with an optional item, the full estimated weight of that item shall be included, unless excluded by the Administrator, in the curb weight computation for each vehicle available with that option in the engine family. Where it is expected that 33 percent or less of the vehicles in an engine family will be equipped with an item of optional equipment, no weight for that item will be added in computing curb weight. In the case of mutually exclusive options, only the weight of the heavier option will be added in computing curb weight. Optional equipment weighing less than 3 pounds per item need not be considered.

(3) Where it is expected that more than 33 percent of an engine family will be equipped with an item of optional equipment that can reasonably be expected to influence emissions, then such items of optional equipment shall actually be installed, unless specifically excluded by the Administrator, on all emission-data and durability-data vehicles in the engine family on which the option is intended to be offered in production. Optional equipment that can reasonably be expected to influence emissions are the air conditioner, power steering, power brakes, and other items determined by the Administrator.

(4) Optional equipment that can reasonably be expected to influence emissions and which is utilized on 33 percent or less of the vehicles in the engine family shall not be installed on any vehicle in that engine family unless specifically required under this section.

18. A new Subpart D is added to Part 86 and reads as follows:

Subpart D—Emission Regulations for New Gasoline—Fueled and Diesel Heavy-Duty Engines; Gaseous Exhaust Test Procedure

AUTHORITY: Secs. 202, 206, 207, 208, 301(a), Clean Air Act, as amended (42 U.S.C. 1857f–1, 1857f–5, 1857f–5a, 1857f–6, 1857g(a))

Subpart D—Emission Regulations for New Gasoline-Fueled and Diesel Heavy-Duty Engines; Gaseous Exhaust Test Procedures.

§ 86.301–79 Scope; applicability.

This subpart contains gaseous emission test procedures for gasoline-fueled and Diesel heavy-duty engines. It applies to 1979 and later model years.

§ 86.302–79 Definitions.

The definitions in § 86.077–2, § 86.078–2, and § 86.079–2 apply to this subpart.

§ 86.303–79 Abbreviations.

The abbreviations in § 86.078–3 apply to this subpart.

§ 86.304–79 Section numbering; construction.

(a) The model year of initial applicability is indicated by the section number. The two digits following the hyphen designate the first model year for which a section is effective. A section remains effective until superseded.

Example: Section § 86.311–79 applies to the 1979 and subsequent model years until superseded. If a section § 86.311–81 is promulgated it would take effect beginning with the 1981 model year; § 86.311–79 would apply to model years 1979 and 1980.

(b) A section reference without a model year suffix refers to the section applicable for the appropriate model year.

(c) Unless indicated, all provisions in this subpart apply to both gasoline-fueled and Diesel heavy-duty engines.

§ 86.305–79 Introduction; structure of subpart.

(a) This subpart describes the equipment required and the procedures to follow in order to perform exhaust emission tests on gasoline-fueled and Diesel heavy-duty engines. Subpart A sets forth the testing requirements and test intervals necessary to comply with EPA certification procedures.

(b) Four topics are addressed in this subpart. Sections 86.306 through 86.318 set forth specifications and equipment requirements; §§ 86.319 through 86.333 discuss calibration methods and frequency; test procedures and data requirements are listed (in approximately chronological order) in §§ 86.334 through 86.343; and calculation formulas are found in §§ 86.344 and 86.345. Alternative procedures and calculations are set forth in §§ 86.346 and 86.347.

§ 86.306–79 Equipment required and specifications; overview.

(a) This subpart contains procedures for both gasoline-fueled and Diesel engine gaseous emission tests. Generally, the equipment required is identical for both types of engines. Equipment required and specifications are found in §§ 86.307 through 86.318.

(b) Some analyzer specifications refer to calibration checks found in §§ 86.320 through 86.332.

§ 86.307–79 Fuel specifications.

(a) *Gasoline.* (1) Gasoline having the following specifications will be used by the Administrator in exhaust emission testing. Gasoline having the following specifications or substantially equivalent specifications approved by the Administrator shall be used by the manufacturer in exhaust testing, except that the lead and octane specifications do not apply.

Item	ASTM	Leaded	Unleaded
Octane, research, minimum	D2699	100	96.
Pb, (organic), grams/U.S. gallon		1.4 [1]	0.00 to 0.05.
Distillation range:			
IBP, °F	D86	75 to 95	75 to 95.
10 pct point, °F	D86	120 to 135	120 to 135.
50 pct point, °F	D86	200 to 230	200 to 230.
90 pct point, °F	D86	300 to 325	300 to 325.
EP, °F (maximum)	D86	415	415.
Sulfur, weight percent, maximum	D1266	0.10	0.10.
Phosphorus, grams/U.S. gallon, maximum		0.01	0.005.
RVP, pounds	D323	8.0 to 9.2	8.0 to 9.2.
Hydrocarbon composition—Olefins, percent, maximum	D1319	10	10.
Aromatics, percent, maximum	D1319	35	35.
Saturates	D1319	Remainder	Remainder.

[1] Minimum.

(2) Gasoline representative of commercial gasoline which will be generally available through retail outlets shall be used in service accumulation. For leaded gasoline, the minimum lead content shall be 1.4 grams per U.S. gallon, except that where the Administrator determines that engines represented by a test engine will be operated using gasoline of different lead content from that prescribed in this paragraph, he may consent in writing to use of a gasoline with a different lead content. The octane rating of the gasoline used shall be no higher than 4.0 research octane numbers above the minimum recommended by the manufacturer and have a minimum sensitivity of 5.0 octane numbers for unleaded fuel and 7.0 octane numbers for leaded fuel, where sensitivity is defined as research octane number minus motor octane number.

(b) *Diesel fuel.* (1) The Diesel fuels employed for testing shall be clean and bright, with pour and cloud points adequate for operability. The Diesel fuel may contain nonmetallic additives as follows: Cetane improver, metal deactivator, antioxidant, dehazer, antirust, pour depressant, dye, and dispersant.

(2) Diesel fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in exhaust emissions testing. The grade of Diesel fuel recommended by the engine manufacturer commercially designated as "Type 1–D" or "Type 2–D", shall be used.

Item	ASTM test Method No.	Type 1-D	Type 2-D
Cetane	D613	45 to 54	42 to 50.
Distillation range	D86		
IBP, °F		330 to 390	340 to 400.
10 pct point, °F		370 to 430	400 to 460.
50 pct point, °F		410 to 480	470 to 540.
90 pct point, °F		460 to 520	550 to 610.
EP, °F		500 to 560	580 to 660.
Gravity, °API	D287	40 to 44	33 to 37.
Total sulfur, percent	D129 or D2622	0.05 to 0.20	0.2 to 0.5.
Hydrocarbon composition	D1319		
Aromatics, percent		8 (minimum)	27 (minimum).
Paraffins, naphthenes, olefins		Remainder	Remainder.
Flash point, °F, (minimum)	D93	120	130.
Viscosity, centistokes	D445	1.8 to 2.0	2.0 to 3.2.

V 42 174 SEP 8 77 UMI

(3) Diesel fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in service accumulation. The grade of Diesel fuel recommended by the engine manufacturer, commercially designated as "Type 1-D" or "Type 2-D", shall be used.

Item	ASTM test method No.	Type 1-D	Type 2-D
	ASTM test method number		
Cetane (minimum)	D613	42 to 56	38 to 58.
Distillation range 90 pct point, °F	D86	440 to 530	540 to 630.
Gravity, °API	D287	38 to 45	30 to 42.
Total sulfur, percent	D129 or D2622	0.05 (minimum)	0.2 (minimum).
Flash point, °F (minimum)	D56	120	130.
Viscosity, centistokes	D445	1.2 to 2.2	1.5 to 4.5.

(4) Other petroleum distillate fuels may be used for testing and service accumulation provided:

(i) They are commercially available;

(ii) Information, acceptable to the Administrator, is provided to show that only the designated fuel would be used in customer service;

(iii) Use of a fuel listed under paragraphs (b)(2) and (b)(3) of this section would have a detrimental effect on emissions or durability; and,

(iv) Written approval from the Administrator of the fuel specifications was provided prior to the start of testing.

(5) The specification range of the fuels to be used under subparagraphs (b)(2), (b)(3), and (b)(4) of this section shall be reported in accordance with § 86.079-21(b)(3).

§ 86.308-79 Gas specifications.

(a) *Analyzer gases.* (1) Calibration or span gases for the CO and CO_2 analyzers shall have zero-grade nitrogen as a diluent.

(2) Calibration or span gases for the hydrocarbon analyzer shall be propane with zero-grade nitrogen as a diluent when testing gasoline-fueled engines. For Diesel engine tests the diluent shall be zero-grade air.

(3) Calibration or span gases for the NO_x analyzer shall be NO named as NO_x with a maximum NO_2 concentration of 5 percent of the nominal value. Zero-grade nitrogen shall be the diluent.

(4) Zero-grade gases for hydrocarbon analyzers shall be nitrogen when testing gasoline-fueled engines and air when testing Diesel engines.

(5) Zero-grade gases for the carbon monoxide, carbon dioxide and oxides of nitrogen analyzers shall be either zero-grade air or zero-grade nitrogen.

(6) The allowable zero grade gas (air or nitrogen) impurity concentrations shall not exceed 2 ppmC hydrocarbon, 10 ppm carbon monoxide, 400 ppm carbon dioxide and 1 ppm nitric oxide.

(7) "Zero-grade air" includes artificial "air" consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18 and 21 mole percent.

(b) *Calibration gas.* Calibration gas values are to be derived from NBS "Standard Reference Materials" (SRM's) or other gas standards approved by the Administrator. The uncertainty of the assigned calibration gas values shall not exceed 2.0 percent of the assigned value. The uncertainly is defined as the sum of the precision errors (at the 90 percent confidence level) and the bias errors. Precision and bias errors apply to both the equipment and the derivation procedures.

(c) *Span gas.* Span gas values are to be derived from NBS "Standard Reference Materials" (SRM's) or other gas standards approved by the Administrator. The uncertainty of the assigned calibration gas values shall not exceed 3.0 percent of the assigned value. The uncertainty is defined as the sum of the precision errors (at the 90 percent confidence level) and the bias errors. Precision and bias errors apply to both the equipment and the derivation procedures.

(d) *Hydrocarbon analyzer fuel*—(1) *The fuel shall contain 40±2 percent hydrogen.* The balance shall be helium. The mixture shall contain less than 2 ppmC hydrocarbon.

(2) *Alternate pure hydrogen fuel.* Some HFID's are designed to operate on pure hydrogen. Generally the HFID fuel is incompatible with good relative hydrocarbon response.

(i) For Diesel engines this fuel is not recommended. However, this fuel may be used if the engine manufacturer demonstrates, on each basic combustion system (i.e., 4 cycle DI, 2 cycle DI, 4 cycle pre-cup, etc.) that an HFID using this fuel produces comparable results to an HFID using 40% H_2/60% He fuel. These data must be submitted to and approved by the Administrator prior to testing. Pure H_2 fuel, that may be allowed for testing, must contain at least 99.0 percent hydrogen and contain less than 2 ppmC hydrocarbon.

(ii) For gasoline-fueled engines, pure hydrogen fuel for the HFID is not allowed.

(e) *Hydrocarbon analyzer burner air.* The concentration of oxygen must be within 1 mole percent of the oxygen concentration of the burner air used in the latest oxygen interference check ($\%O_2I$). If the difference in oxygen concentration is greater than 1 mole percent, then the oxygen interference must be checked and the analyzer adjusted, if necessary, to meet the $\%O_2I$ requirements. The burner air must contain less than 2 ppmC hydrocarbon.

(f) Oxygen interference check gases shall contain propane with 350 ppmC ±75 ppmC hydrocarbon. The concentration value shall be determined to calibration gas tolerances by chromatographic analysis of total hydrocarbons plus impurities or by dynamic blending. Nitrogen shall be the predominant diluent with the balance oxygen. Blends required for gasoline-fueled and Diesel engine testing are as follows:

Applicability	O_2 concentration (percent)	Balance
Diesel	21 (20 to 22)	N_2
Diesel and gasoline	10 (9 to 11)	N_2
Do	5 (4 to 6)	N_2
Gasoline	0 (0 to 1)	N_2

§ 86.309-79 Sampling and analytical system; schematic drawing.

(a) Any variation from the specifications in this subpart including performance specifications and emission detection methods may be used only with prior approval by the Administrator.

(b) Schematic drawing.

(1) An example of a sampling and analytical system which may be used for testing under this subpart is shown in Figure D79-1. All components or parts of components that are wetted by the sample or corrosive calibration gases shall be either chemically cleaned stainless steel or inert material, e.g. polytetrafluoroethylene resin. The use of "gauge savers" or "protectors" with nonreactive diaphragms to reduce dead volumes is permitted. The specific detection methods to be used for each exhaust component can be found in § 86.316 for CO, § 86.317 for HC, and § 86.318 for NO. Additional components such as instruments, valves, solenoids, pumps, switches, etc. may be employed to provide additional information and coordinate the functions of the component systems.

(2) The following requirements must be incorporated in each system used for testing under this subpart.

(i) All analyzers must obtain the sample to be analyzed from the same sample line.

(ii) The sample transport system from the engine exhaust pipe to the HC analyzer and the NO_x analyzer must be heated as is indicated in Figure D79-1.

(iii) Carbon monoxide and carbon dioxide measurements must be made on a dry basis. Specific requirements for the means of drying the sample can be found in § 86.309(b)(5) and § 86.311(e).

(iv) All NDIR analyzers must have a pressure gauge immediately downstream of the analyzer. The gauge tap must be within 2 inches of the analyzer exit port. Gauge specifications can be found in § 86.309(b)(3).

(v) All bypass and analyzer flows exiting the analysis system must be measured. Capillary flows such as in HFID and CL analyzers are excluded. For each NDIR analyzer with a flow meter located upstream of the analyzer, an upstream pressure gauge must be used. The gauge tap must be within 2 inches of the analyzer entrance port.

(vi) Calibration or span gases for the NO_x measurement system must pass through the NO_2 to NO converter.

(vii) The temperature of the NO_2 to NO converter must be displayed continuously.

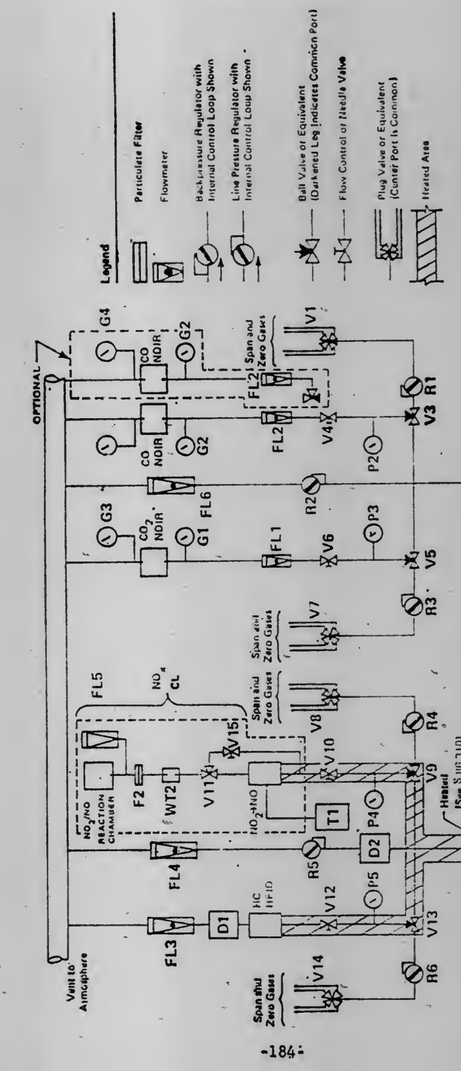

Figure D79-1 HEAVY-DUTY EXHAUST GAS SAMPLING AND ANALYTICAL TRAIN

V 42 174 SEP 8 77 UMI

(c) *System components list.* The following is a list of components shown in Fig. D79–1 by numeric identifier.

(1) *Filters.* Glass fiber filter paper is permitted for F1, F2, and F3. Optional filter F4 is a coarse filter for large particulates.

(i) F1—Fine particulate filter.

(ii) F2—Fine particulate filter.

(iii) F3—Fine heated particulate filter.

(iv) F4—Coarse heated particulate filter.

(2) *Flowmeters.* (i) Flowmeters FL 1 and FL 2 indicate sample flow rates through the CO and CO_2 analyzers.

(ii) Flowmeters FL 3, FL 4, FL 5, and FL 6 indicate bypass flow rates.

(3) *Gauges.* Downstream gauges are required for any system used for testing under this subpart. Upstream gauges may be required under this subpart per § 86.309(b)(2)(v).

(i) Upstream gauges G1 and G2 measure the input pressure to the CO and CO_2 analyzers.

(ii) Downstream gauges G3 and G4 measure the exit pressure of the CO and CO_2 analyzers. If the normal operating range of the downstream gauges is less than 3 inches of water, then the downstream gauge must be capable of reading both pressure and vacuum.

(4) *Pressure gauges.* (i) P1—bypass pressure.

(ii) P2, P3, P4 and P5—sample or span pressure at inlet to flow control valves.

(5) *Water traps.* Water traps WT1, and WT2 to remove water from the sample. A water trap performing the function of WT1 and meeting the specifications in § 86.311(e) is required for any system used for testing under this subpart. Chemical dryers are not an acceptable method of removing the water. Water removal by condensation is acceptable. Means other than condensation may be used only with prior approval from the Administrator.

(6) *Regulators.* (i) R1, R3, R4, and R6—line pressure regulators to control span pressure at inlet to flow control valves.

(ii) R2 and R5—back pressure regulators to control sample pressure at inlet to flow control valves.

(7) *Valves.* (i) V1, V7, V8, and V14—selector valves to select zero or calibration gases.

(ii) V2—optional heated selector valve to purge the sample probe, perform leak checks, or to perform hang-up checks.

(iii) V3 and V5—Selector valves to select sample or span gases.

(iv) V4, V6, and V15—flow control valves.

(v) V9 and V13—heated selector valve to select sample or span gases.

(vi) V10 and V12—heated flow control valves.

(vii) VII—Selector valve to select NO_x or bypass mode in the chemiluminescence analyzer.

(viii) V16—heated selector valve to perform leak checks.

(8) *Pump.* Sample transfer pump to transport sample to analyzers.

(9) *Temperature sensor.* A temperature sensor (T1) to measure the NO_2 to NO converter temperature is required for any system used for testing under this subpart.

(10) *Dryer.* Dryers D1 and D2 to remove the water from the bypass flows to prevent condensation in flowmeters FL3, FL4, and FL6.

§ 86.310–79 Sampling and analytical system; component specifications.

(a) *Temperature.* (1) For gasoline-fueled engines any heated component;

(i) in the HC sample path must be maintained above 110°C (230°F) and shall not exceed 230°C (446°F),

(ii) in the NO_x sample path must be maintained above 95°C (203°F) and shall not exceed 230°C (446°F).

(2) For Diesel engines any heated component;

(i) in the HC sample path must be maintained above 180°C (356°F) and shall not exceed 230°C (446°F),

(ii) in the NO_x sample path must be maintained above 95°C (203°F) and shall not exceed 230°C (446°F).

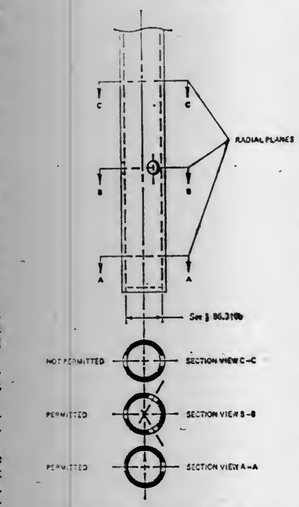

Figure D79–2 SAMPLE PROBE AND TYPICAL HOLE SPACINGS

(3) The sample line outside wall temperature must be maintained at the temperature specified in this paragraph. An exception is made for the first 4 feet of sample line from the exhaust duct. The upper temperature tolerance for this 4 foot section is waived and only the minimum temperature specification applies.

(b) *Sample probe.* (1) The sample probe shall be a straight, closed end, stainless steel, multi-hole probe. The Inside Diameter (I.D.) shall not be greater than the I.D. of the sample line (+.010 in.). The wall thickness of the probe shall not be greater than .040 inch. The fitting that attaches the probe to the exhaust pipe shall be as small as practical in order to minimize heat loss from the probe.

(2) There shall be a minimum of three holes in the probe. The spacing of the radial planes for each hole in the probe must be such that they cover approximately equal cross-sectional areas of the exhaust duct. The angular spacing of the holes must be approximately equal. The angular spacing of any two holes in one plane may not be 180°±20° (i.e., section C–C of Figure D79–2). The holes should be sized such that each has approximately the same flow. If only three holes are used, they may not all be in the same radial plane. See Figure D79–2.

(3) The probe shall extend radially across the exhaust duct. The probe must pass through the approximate center and must extend across at least 80 percent of the diameter of the duct.

(c) *Sample transfer.* (1) The maximum I.D. of the sample line shall not exceed 0.52 inch.

(2) If valve V2 is used, the sample probe must connect directly to valve V2. The location of optional valve V2 may not be greater than 4 feet from the exhaust duct.

(3) The location of optional valve V16 may not be greater than 24 inches from the sample pump. The leakage rate for this section on the pressure side of the sample pump may not exceed the leakage rate specification for the vacuum side of the pump.

(d) *Venting.* All vents including analyzer vents, bypass flows, and pressure relief vents of regulators should be vented in such a manner to avoid endangering personnel in the immediate area.

§ 86.311–79 Miscellaneous equipment; specifications.

(a) *Chart recorders.* (1) The minimum chart speed allowed is 3 inches per minute for gasoline-fueled engines and 0.5 inches per minute for Diesel engines.

(2) When testing gasoline-fueled engines all chart recorders (analyzers, torque, rpm, etc.) shall be provided with Automatic markers which indicate one second intervals. Preprinted chart paper (one second intervals) may be used in lieu of the automatic markers provided the correct chart speed is used.

(b) *Accuracy of temperature measurements.* (1) The following temperature measurements shall be accurate to within 1.2° C:

(i) temperature measurements used in calculating the engine intake humidity;

(ii) the temperature of the fuel in volume measuring flow rate devices;

(iii) The temperature of the sample within the water trap(s).

(2) All other temperature measurements shall be accurate within 2.5° C.

(c) *Intake air humidity and temperature measurements.* (1) Humidity conditioned air supply. Air that has had its absolute humidity altered is considered humidity-conditioned air. For this type of intake air supply, the humidity measurement must be made within the intake air supply system, and after the humidity conditioning has taken place.

(2) Nonconditioned air supply. Humidity measurements in non-conditioned intake air supply systems must be made in the intake air stream entering the supply system. Alternatively, the humidity measurements can be measured within the intake air supply stream.

(3) Engine intake air temperature measurement must be made within 48 inches of the engine. The measurement location must be made either in the supply system or in the air stream entering the supply system.

(d) *Sample component surface temperature.* For each component (pump, sample line section, filters, etc.) in the heated portion of the sampling system that has a separate source of power or heating element, use engineering judgment to locate the coolest portion of that component and monitor the temperature at that location. If several components are within an oven, then only the surface temperature of the component with the largest thermal mass and the oven temperature need be measured.

(e) If water is removed by condensation the sample gas temperature within the water trap must be monitored and may not exceed 7° C (45° F).

§ 86.312–79 Dynamometer and engine equipment specifications.

(a) *Dynamometer.* (1) The dynamometer test stand and other instruments for measurement of power output shall be accurate to within 2 percent of point at all power settings above 10 percent of full-scale. Below 10 percent of full-scale the accuracy shall be within 5 percent of point. The dynamometer must be capable of performing the test cycle described in § 86.335 or § 86.336. Dynamometers used for testing gasoline-fueled engines must have sufficient motoring capability to meet the test requirements. A 60-tooth wheel in combination with a frequency counter shall be considered an absolute standard for engine speed.

(2) *Dynamometer calibration weights.* A minimum of 6 calibration weights for each range used are required. The weights must be equally spaced and traceable to within 0.5 percent of NBS weights. Laboratories located in foreign countries may certify calibration weights to local government bureau standards.

(b) *Engine cooling.* Means of engine cooling which will maintain the engine operating temperatures (e.g., intake air, oil, water, etc.) at approximately the same temperature as specified by the manufacturer shall be used. Auxiliary fan(s) may be used to maintain engine cooling during operation on the dynamometer.

(c) *Exhaust system.* (1) When testing gasoline-fueled engines:

(i) A chassis-type single exhaust pipe shall be used. Standard or specially fabricated "Y" pipes may be used on engines designed for dual exhaust systems.

(ii) For all catalyst systems, the distance from the exhaust manifold flange(s) to the catalyst shall be the same as in the vehicle configuration unless the manufacturer provides temperature data showing equivalent performance at another location.

(iii) For catalyst systems, the probe shall be located in the single exhaust pipe and from 2 to 10 feet downstream of the catalyst(s).

(iv) For noncatalyst systems, the probe shall be located in the single exhaust pipe and from 3 to 20 feet downstream from the exhaust manifold flange or turbocharger exit flange.

(v) For all exhaust systems, the probe shall be located at least 24 inches from the end of the tail pipe. Additional exhaust pipe may be added to the tail pipe to meet the specification.

(2) When testing Diesel engines, a noninsulated exhaust system extending 15±5 feet from the exhaust manifold, or the crossover junction in the case of Vee engines, shall be used. The exhaust back pressure must be within 0.2 inch Hg. of the upper limit at maximum rated horsepower, as established by the engine manufacturer in his sales and service literature for vehicle application. A conventional automotive muffler of a size and type commonly used with the engine being tested shall be employed in the exhaust system during smoke emission testing. The terminal 2 feet of the exhaust pipe shall be a circular cross section and be free of elbows and bends. The end of the pipe shall be cut off squarely. The terminal 2 feet of the exhaust pipe shall have a nominal inside diameter in accordance with the engine being tested, as specified below:

Maximum rated horsepower:	*Exhaust pipe inside diameter (inches)*
Less than 101	2
101 to 200	3
201 to 300	4
301 or more	5

§ 86.313–79 Air flow measurement specifications; Diesel engines.

(a) The air flow measurement method used must have a range large enough to accurately measure the air flow over the engine operating range during the test. Overall measurement accuracy must be ±2 percent of full-scale value of the measurement device for all modes except the idle and 2-percent modes. For the idle and 2-percent modes, the measurement accuracy shall be ±5 percent or less of the full-scale value. The Administrator must be advised of the method used prior to testing.

(b) Corrections to the measured air mass-flow-rate shall be made when an engine system incorporates devices that add or subtract air mass (air injection, bleed air, etc.). The method used to determine the air mass from these devices shall be approved by the Administrator.

(c) An engine air inlet system presenting an air inlet restriction within 1 inch of water of the upper limit for the engine operating condition which results in maximum air flow, as established by the engine manufacturer in his sales and service literature, for the Diesel engine being tested shall be used.

§ 86.314–79 Fuel flow measurement specifications.

(a) The fuel flow rate measurement instrument must have a minimum accuracy of ±1 percent of full-scale flow rate for each measurement range used. An exception for Diesel engines is allowed at the idle and 2-percent power points. For these modes, the minimum accuracy is ±2 percent of full-scale flow rate for each measurement range used. The controlling parameters are the elapsed time measurement of the event and the weight or volume measurement. Restrictions on these parameters are:

(1) The error in the elapsed time measurement of the event must not be greater than 1 percent of the absolute event time. This includes errors in starting and stopping the clock as well as the period of the clock.

(2) For Diesel engines only, if the mass of fuel consumed is measured by discrete weights, then the error in the actual weight of the fuel consumed must not be greater than ±1 percent of the measuring weight. An exception for Diesel engines is allowed at the idle and 2-percent power points. For these modes the error in the actual weight of the fuel consumed must not be greater than ±2 percent of the measuring weight.

(3) If the mass of fuel consumed is measured electronically (load cell, load beam, etc.), the error in the actual weight of fuel consumed must not be greater than ±1 percent of the full-scale value of the electronic device.

(4) If the mass of fuel consumed is measured by volume flow and density, the error in the actual volume consumed must not be greater than ±1 percent of the full-scale value of the volume measuring device.

(b) For devices that have varying mass scales (electronic weight, volume, density, etc.), measurements may not be used for calculations if the measurement is less than 20 percent of full scale.

(c) *Option.* Complete flow-rate measurement systems may be used below 20 percent of full-scale measurement as long as the combination of mass and time measurements indicate a flow rate that has an error of less than 5 percent of the absolute flow rate.

§ 86.315–79 General analyzer specifications.

(a) *Analyzer response time.* The analyzer must respond to an instantaneous step change at the entrance to the analyzer with a response equal to 95 percent of that step change in 6.0 seconds or less on all ranges used. The step change shall be at least 60 percent of full-scale chart deflection. For NO_x analyzers using a water trap, the response time increase due to the water trap and associated plumbing need not be included in the analyzer response time.

(b) *Precision.* The precision of the analyzer must be no greater than ±1 percent of full-scale concentration for each range used. The precision is defined as 2.5 times the standard deviation(s) of 10 repetitive responses to a given calibration or span gas.

V 42 174 SEP 8 77 UMI

(c) *Noise.* The analyzer peak-to-peak response to zero and calibration or span gases over any 10-second period shall not exceed 2 percent of full-scale chart deflection on all ranges used.

(d) *Zero drift.* The analyzer zero-response drift during a 1-hour period shall be less than 2 percent of full-scale chart deflection on the lowest range used. The zero-response is defined as the mean response including noise to a zero-gas during a 30-second time interval.

(e) *Span drift.* The analyzer span drift during a 1-hour period shall be less than 2 percent of full-scale chart deflection on the lowest range used. The analyzer span is defined as the difference between the span-response and the zero-response. The span-response is defined as the mean response including noise to a span gas during a 30-second time interval.

§ 86.316–79 Carbon monoxide and carbon dioxide analyzer specifications.

(a) Carbon monoxide and carbon dioxide measurements are to be made with nondispersive infrared (NDIR) analyzers.

(b) The use of linearizing circuits is permitted.

(c) The minimum water rejection ratio (maximum CO_2 interference) as measured by § 86.321 shall be:

(i) For CO analyzers, 1000:1.

(ii) For CO_2 analyzers, 100:1.

(d) The minimum CO_2 rejection ratio (maximum CO_2 interference) as measured by § 86.322 for CO analyzers shall be 5000:1.

(e) *Zero suppression.* Various techniques of zero suppression may be used to increase readability, but only with prior approval by the Administrator.

§ 86.317–79 Hydrocarbon analyzer specifications.

(a) Hydrocarbon measurements are to be made with a heated flame ionization detector (HFID) analyzer.

(b) *Option.* A non-heated flame ionization detector (FID) that measures hydrocarbon emissions on a dry basis is permitted for gasoline-fueled testing: *Provided,* That equivalency is demonstrated to the Administrator. With the exception of temperatures, all specifications contained in Subpart D apply to the optional system.

(c) The analyzer shall be fitted with a constant temperature oven housing the detector and sample-handling components. It shall maintain temperature within 2° C of the set point. The detector, oven, and sample-handling components within the oven shall be suitable for continuous operation at temperatures to 200° C.

(d) Fuel and burner air shall conform to the specifications in § 86.308.

(e) The percent of oxygen interference must be less than 3 percent, as specified in § 86.331(d)(7).

(f) Premixed burner air:

(1) For Diesel engines, premixing a small amount of air with the HFID fuel prior to combustion within the HFID burner is not recommended as a means of improving oxygen interference ($\%O_2I$). However, this procedure may be used if the engine manufacturer demonstrates on each basic combustion system (i.e., 4 cycle DI, 2 cycle DI, 4 cycle precup, etc.) that an HFID using this procedure produces comparable results to an HFID not using this procedure. These data must be submitted to the Administrator for his approval prior to testing.

(2) For gasoline-fueled engines, premixing burner air with the HFID fuel is not allowed.

§ 86.318–79 Oxides of nitrogen analyzer specifications.

(a) Oxides of nitrogen are to be measured with a chemiluminescence analyzer.

(1) The NO_x sample must be heated per § 86.309(a) and § 86.310(a) up to the NO_x to NO converter.

(2) For high vacuum CL analyzers with heated capillary modules, supplying a heated sample to the capillary module is sufficient.

(3) The NO_x to NO convertor efficiency shall be at least 90 percent.

(4) The quench interference must be less than 3.0 percent as measured in § 86.327.

(b) *Option.* The oxides of nitrogen may be measured with an NDIR analyzer system that meets the following specifications:

(1) The system shall include an NO_x to NO converter, a water trap, and an NDIR analyzer in that order.

(2) The NO_x to NO converter shall obtain a sample directly from the heated sample line.

(3) The water trap shall meet the specifications in § 86.311(e).

(4) The NO NDIR analyzer shall be calibrated per § 86.330.

(5) The minimum water rejection ratio (maximum water interference) for the NO NDIR analyzer shall be 5,000:1 (see § 86.321).

(6) The minimum CO_2 rejection ratio (maximum CO_2 interference) for the NO NDIR analyzer shall be 30,000:1 (see § 86.322).

§ 86.319–79 Analyzer checks and calibrations; frequency and overview.

(a) Prior to initial use and after major repairs bench check each analyzer (see § 86.320).

(b) At least once every 7 days during testing check the NO_x converter efficiency (see § 86.332).

(c) At least once every 30 days during testing perform the following:

(1) Leak check the pressure side of the system (see § 86.328). If the option described in § 86.328(b)(2) is used, a pressure leak check is not required.

(2) Calibate all analyzers (see §§ 86.330 through 86.332).

(3) Check the analysis system response time (see § 86.329). If the option described in § 86.329(b) is used, a response time check is not required.

(4) Verify that the automatic data collection system (if used) meets the chart reading requirements found in § 86.343.

(5) Check the fuel flow measurement instrument to insure that the specifications in § 86.314 are met. Flow meters of the tapered tube and float design (rotometers) or the balance beam principle need be checked only every 90 days.

(d) At least once every 90 days during testing check the water rejection ratio and the CO_2 rejection ratio on all NDIR analyzers (see §§ 86.321 and 86.322).

(e) At least once every 180 days during testing check the dynamometer test stand and power-output instrumentation (see § 86.333).

§ 86.320–79 Analyzer bench check.

(a) Prior to initial use and after major repairs verify that each analyzer complies with the following specifications:

(1) Response time (see § 86.315(a)).
(2) Precision (see § 86.315(b)).
(3) Noise (see § 86.315(c)).
(4) Zero drift (see § 86.315(d)).
(5) Span drift (see § 86.315(e)).
(6) Water rejection ratio, NDIR analyzers only (see §§ 86.316(c) and 86.318(b)(5)).
(7) CO_2 rejection ratio, NDIR analyzers only (see §§ 86.316(d) and 86.318(b)(6)).
(8) Quench check, CL analyzers only (see § 86.327).

(b) If a stainless steel NO_x to NO converter is used, condition all new or replacement converters. The conditioning consists of either purging the converter with air for a minimum of 4 hours or until the converter efficiency is greater than 90 percent. The converter must be at operational temperature while purging. Do not use this procedure prior to checking converter efficiency on in-use converters.

§ 86.321–79 NDIR water rejection ratio check.

(a) Zero and span the analyzer on the lowest range that will be used.

(b) Introduce a saturated mixture of water and zero gas at room temperature directly to the analyzer.

(c) Determine and record the analyzer operating pressure (*GP*) in absolute units in pascals. Gauges G3 and G4 may be used if the values are converted to the correct units.

(d) Determine and record the temperature of the zero-gas mixture.

(e) Record the analyzers' response (*AR*) in ppm to the saturated zero-gas mixture.

(f) For the temperature recorded in step (d), determine the saturation vapor pressure (P_{WS}) from § 86.344(d).

(g) Calculate the water concentration (*Z*) in the mixture from:

$$Z=(P_{WS}/GP)(10^6)$$

(h) Calculate the water rejection ratio (*WRR*) from:

$$WRR=(Z/AR)$$

§ 86.322–79 NDIR CO_2 rejection ratio check.

(a) Zero and span the analyzer on the lowest range that will be used.

(b) Introduce a CO_2 calibration gas of at least 10 percent CO_2 or greater to the analyzer.

(c) Record the CO_2 calibration gas concentration in *ppm*.

(d) Record the analyzers' response (*AR*) in *ppm* to the CO_2 calibration gas.

(e) Calculate the CO_2 rejection ratio CO_2RR) from:

$$CO_2RR=(ppm\ CO_2)/AR.$$

§ 86.323 through § 86.326 [Reserved]

§ 86.327–79 Quench checks; NOx analyzer.

(a) Perform the reaction chamber quench check for each model of high vacuum reaction chamber analyzer prior to initial use.

(b) Perform the reaction chamber quench check for each new analyzer that has an ambient pressure or "soft vacuum" reaction chamber prior to initial use. Additionally, perform this check prior to reusing an analyzer of this type any time any repairs could potentially alter any flow rate into the reaction chamber. This includes, but is not limited to, sample capillary, ozone capillary, and if used, dilution capillary.

(c) Quench check as follows:

(1) Calibrate the NO_x analyzer on the lowest range that will be used for testing.

(2) Introduce a mixture of CO_2 calibration gas and NO_x calibration gas to the CL analyzer. Dynamic blending may be used to provide this mixture. Dynamic blending may be accomplished by analyzing the CO_2 in the mixture. The change in the CO_2 value due to blending may then be used to determine the true concentration of the NO_x in the mixture. The CO_2 concentration of the mixture shall be approximately equal to the highest concentration experienced during testing. Record the response.

(3) Recheck the calibration. If it has changed more than ±1 percent of full scale, recalibrate and repeat the quench check.

(4) Prior to testing, the difference between the calculated NO_x response and the response of NO_x in the presence of CO_2 (step 2) must not be greater than 3.0 percent. The calculated NO_x response is based on the calibration performed in step (1).

§ 86.328–79 Leak checks.

(a) *Vacuum side leak check.* (1) Any location within the analysis system where a vacuum leak could affect the test results must be checked.

(2) The maximum allowable leakage rate on the vacuum side is 0.5 percent of the in-use flow rate for the portion of the system being checked. The analyzer flows and bypass flows may be used to estimate the in-use flow rates.

(3) The sample probe and the connection between the sample probe and valve V2 (Figure D79–1) may be excluded from the leak check.

(b) *Pressure side leak check.* (1) The maximum allowable leakage rate on the pressure side is 5 percent of the in-use flow rate.

(2) Option: If the flow rate for each flow meter is equal to or greater than the flow rate recorded in § 86.329(b)(1)(ii), then a pressure side leak check is not required.

§ 86.329–79 System response time; check procedure.

(a) Check the system response time by the following procedure:

(1) Stabilize the operating temperature of the sample line, sample pump, and heated filters.

(2) Introduce an HC span gas into the sampling system at the sample probe or valve V2 at atmospheric pressure. Simultaneously, start the time measurement.

(3) When the HC instrument response is 95 percent of the span gas concentration used, stop the time measurement.

(4) If the elapsed time is more than 20.0 seconds, make necessary adjustments.

(5) Repeat with the CO, CO_2, and NO_x instruments and span gases.

(b) Option. If the following parameters are determined, the initial system response time may be generally applied to future checks.

(1) Analyzer and bypass flow rates:

(i) Determine by experimentation the minimum analyzer and bypass flow rates individually and in combination that will produce a response time as close as possible to 20.0 seconds per paragraph (a) of this section.

(ii) Record the highest minimum flow rate for each flow meter as determined in step (i).

(2) Capillary flow analyzers. This procedure is applicable only to analyzers that have sample capillaries such as the HFID and CL analyzers. It is also assumed that the system has sample/span valves that perform the function of valves V9 and V13 in Figure D79–1.

(i) Operate the analyzer(s) at the in-use capillary pressure.

(ii) Adjust the bypass flow rate to the flow rate recorded in paragraph (b)(1)(ii) of this section.

(iii) Measure and record the response time from the sample/span valve(s) per paragraph (a) of this section.

(iv) The response time (step (iii)) can be determined by switching from the "sample" position to the "span" position of the sample/span valve and observing the analyzer response on a chart recorder. Normally, the "sample" position would select a "room air" sample and the "span" position would select a span gas.

(v) Adjust the bypass flow rate to the normal in-use value.

(vi) Measure and record the response time from the sample/span valve(s) per paragraph (a) of this section.

(vii) Determine the slowest response time (step (iii) or step (iv)) and add 2 seconds to it.

§ 86.330–79 NDIR analyzer calibration.

(a) *Detector optimization.* If necessary, follow the manufacturer's instructions for initial start-up and basic operating adjustments.

(b) *Calibration curve.* Develop a calibration curve for each range used as follows:

(1) Zero the analyzer.

(2) Span the analyzer to give a response of approximately 90 percent of full-scale chart deflection.

(3) Recheck the zero response. If it has changed more than 0.5 percent of full scale, repeat steps (1) and (2).

(4) Record the response of calibration gases having nominal concentrations of 15, 30, 45, 60, 75, and 90 percent of full-scale concentration.

(5) Generate a calibration curve. The calibration curve shall be of fourth order or less, have five or fewer coefficients, and be of the form of equation (1) or (2). Include zero as a data point. Compensation for known impurities in the zero gas can be made to the zero-data point. The calibration curve must fit the data points within 2 percent of point or 1 percent of full scale, whichever is less.

$$y=Ax^4+Bx^3+Cx^2+Dx+E \quad (1)$$

$$y=\frac{x}{Ax^4+Bx^3+Cx^2+Dx+E} \quad (2)$$

where:
y = concentration
x = chart deflection

(6) *Option.* A new calibration curve need not be generated if: (i) A calibration curve conforming to step (5) exists; (ii) The responses generated in step (4) are within 1 percent of full scale or 2 percent of point, whichever is less, of the responses predicted by the calibration curve for the gases used in step (4).

(c) If any range is within 2 percent of being linear, a linear calibration may be used. To determine if this criterion is met:

(1) Perform a linear least-square regression on the data generated. Use an equation of the form $y = mx$, where x is the actual chart deflection and y is the concentration.

(2) Use the equation $z = y/m$ to find the linear chart deflection (z) for each calibration gas concentration (y).

(3) Determine the linearity ($\%L$) for each calibration gas by:

$$\text{Percent } L=\frac{(z-x)}{\text{Full-scale linear chart deflection}}(100)$$

(4) The linearity criterion is met if the $\%L$ is less than ±2 percent for each data point generated. For each emission test, a calibration curve of the form $y=mx$ is to be used. The slope (m) is defined for each range by the spanning process.

§ 86.331–79 Hydrocarbon analyzer calibration.

The following steps are followed in sequence to calibrate the hydrocarbon analyzer. It is suggested, but not required, that efforts be made to minimize relative response variations.

(a) If necessary, follow manufacturer's instructions for instrument start-up and basic operating adjustments.

(b) Set the oven temperature 5°C hotter than the required sample-line temperature. Allow at least one-half hour after the oven has reached temperature for the system to equilibrate.

(c) Initial fuel flow adjustment. With the fuel and air-flow rates set at the

V 42 174 SEP 8 77 UMI

manufacturer's recommendations, introduce a 350 ppmC ± 75 ppmC span gas to the detector. Determine the response at a given fuel flow from the difference between the span-gas response and the zero-gas response. Incrementally adjust the fuel flow above and below the manufacturer's specification. Record the span and zero response at these fuel flows. A plot of the difference between the span and zero response versus fuel flow will be similar to the one shown in Fig. D79–3. Adjust the fuel-flow rate to the rich side of the curve, as shown. This is initial flow-rate setting and may not be the final optimized flow rate.

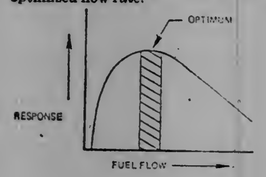

Figure D79-3 RESPONSE VS. FUEL FLOW

$$\text{Percent } O_2 I = \frac{B - \text{Analyser response } (ppmC)}{B} (100)$$

$$\text{Analyser response} = \frac{}{\text{Percent of full-scale analyzer response due to } A} \times (\text{Percent of full-scale analyser response due to } B)$$

A=hydrocarbon concentration (*ppmC*) of the span gas used in step (2).

B=hydrocarbon concentration (*ppmC*) of the oxygen interference check gases used in step (4).

(7) The percent of oxygen interference (%O_2I) must be less than ±3.0 percent for all required oxygen interference check gases prior to testing.

(8) If the oxygen interference is greater than the specifications, incrementally adjust the air flow above and below the manufacturer's specifications, repeating subparagraphs (1) through (7) of this paragraph for each flow.

(9) If the oxygen interference is greater than the specification after adjusting the air flow, vary the fuel flow and thereafter the sample flow, repeating subparagraphs (1) through (7) of this paragraph for each new setting.

(10) If the oxygen interference is still greater than the specifications, repair or replace the analyzer, FID fuel, or burner air prior to testing. Repeat this section with the repaired or replaced equipment or gases.

(d) Oxygen interference optimization. Choose a range where the oxygen interference check gases (see § 86.308) will fall in the upper 50 percent. Conduct this test with the oven temperature set as required. Oxygen interference check gas specifications are found in § 86.308.

(1) Zero the analyzer.

(2) Span the analyzer with the zero-percent oxygen blend for gasoline-fueled engines. Diesel engine instruments shall be spanned with the 21-percent oxygen blend.

(3) Recheck zero response. If it has changed more than 0.5 percent of full scale repeat subparagraphs (1) and (2) of this paragraph.

(4) Introduce the 5 percent and 10 percent oxygen interference check gases.

(5) Recheck the zero response. If it has changed more ±1 percent of full scale, repeat the test.

(6) Calculate the percent of oxygen interference (%O_2I) for each mixture in step (4).

$$\text{Percent } L = \frac{(z-x)}{\text{Full-scale linear chart deflection}} (100)$$

(e) Linearity check. For each range used, check linearity as follows:

(1) With the fuel flow, air flow and sample flow adjust to meet the oxygen interference specification, zero the analyzer.

(2) Span the analyzer using a calibration gas that will provide a response of approximately 90 percent of full-scale concentration.

(3) Recheck the zero response. If it has changed more than 0.5 percent of full scale, repeat steps (1) and (2).

(4) Record the response of calibration gases having nominal concentrations of 30, 60, and 90 percent of full-scale concentration. It is permitted to use additional concentrations.

(5) Perform a linear least square regression on the data generated. Use an equation of the form $y=mx$, where x is the actual chart deflection and y is the concentration.

(6) Use the equation $z=y/m$ to find the linear chart deflection (z) for each calibration gas concentration (y).

(7) Determine the linearity (%L) for each calibration gas by:

(8) The linearity criterion is met if the %L is less than ±2 percent for each data point generated. Below 40 *ppmC* the linearity criterion may be expanded to ±4 percent. For each emission test, a calibration curve of the form $y=mx$ is to be used. The slope (m) is defined for each range by the spanning process.

(9) If the %L for any point exceeds the specifications in step (8), the air, fuel, and sample-flow rates may be varied within the boundaries of the oxygen interference specifications.

(10) If the %L for any data point still exceeds the specifications, repair or replace the analyzer, FID fuel, burner air, or calibration bottles prior to testing. Repeat the procedures of this section with the repaired or replaced equipment or gases.

(f) Optimized flow rates. The fuel-flow rate, air-flow rate and sample-flow rate are defined as "optimized" at this point.

§ 86.332–79 Oxides of nitrogen analyzer calibration.

(a) Perform a converter-efficiency check, (see paragraph (b) of this section), every 7 days. Every 30 days perform a linearity check, (see paragraph (c) of this section), which must be followed by a converter-efficiency check.

(b) *Converter-efficiency check.* The apparatus described and illustrated in Figure D79–4 is to be used to determine the conversion efficiency of devices that convert NO_2 to NO. The following procedure is to be used in determining the values to be used in the equation below:

(1) Follow the manufacturer's instructions for instrument startup and operation.

(2) Zero the oxides of nitrogen analyzer.

(3) Connect the outlet of the NO_x generator (see Figure D79–4) to the sample inlet of the oxides of nitrogen analyzer which has been set to the most common operating range.

(4) Introduce into the NO_x generator-analyzer system a span gas with a NO concentration equal to approximately 80 percent of the most common operating range.

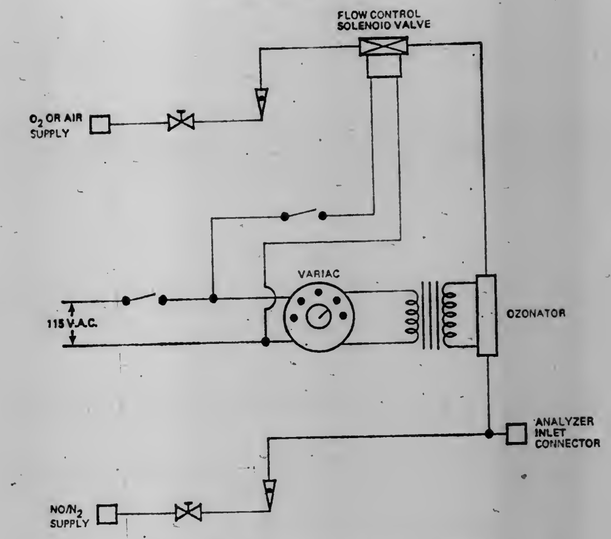

FIGURE D79-4 NO_x CONVERTER EFFICIENCY DETECTOR

(5) With the oxides of nitrogen analyzer in the NO mode, record the concentration of NO indicated by the analyzer.

(6) Turn on the NO generator O_3 (or air) supply and adjust the O_3 (or air) flow rate so that the NO indicated by the analyzer is about 10 percent less than indicated in step (5). Record the concentration of NO in this NO+O_2 mixture.

(7) Switch the NO_x generator to the generation mode and adjust the generation rate so that the NO measured on the analyzer is 20 percent of that measured in step (5). There must be at least 10 percent unreacted NO at this point. Record the concentration of residual NO.

(8) Switch the oxides of nitrogen analyzer to the NO_x mode and measure total NO_x. Record this value.

(9) Switch off the NO_x generation, but maintain gas flow through the system. The oxides of nitrogen analyzer will indicate the total NO_x in the NO+O_2 mixture. Record this value.

(10) Turn off the NO_x generator O_2 (or air) supply. The analyzer will now indicate the total NO_x in the original NO in N_2 mixture. This value should be no more than 5 percent above the value indicated in step (4).

(11) Calculate the efficiency of the NO_x converter by substituting the concentrations obtained into the following equation:

$$\text{Percent efficient} = 1 + \frac{a-b}{c-d} \times 100$$

where:
a=concentration obtained in step (8).
b=concentration obtained in step (9).
c=concentration obtained in step (6).
d=concentration obtained in step (7).

The efficiency of the converter shall be greater than 90 percent. Adjustment of the converter temperature may be necessary to maximize the efficiency. If the converter does not meet the conversion-efficiency specifications, repair or replace the unit prior to testing. Repeat the procedures of this section with the repaired or new converter.

(c) *Linearity check.* For each range used, check linearity as follows:

(1) With the operating parameters adjusted to meet the converter efficiency

V 42 174 SEP 8 77 UMI

check and the quench checks, zero the analyzer.

(2) Span the analyzer using a calibration gas that will give a response of approximately 90 percent of full-scale concentration.

(3) Recheck the zero response. If it has changed more than 0.5 percent of full scale, repeat steps (1) and (2).

(4) Record the response of calibration gases having nominal concentrations of 30, 60 and 90 percent of full-scale concentration. It is permitted to use additional concentrations.

(5) Perform a linear least-square regression on the data generated. Use an equation of the form $y=mx$, where x is the actual chart deflection and y is the concentration.

(6) Use the equation $z=y/m$ to find the linear chart deflection (z) for each calibration gas concentration (y).

(7) Determine the linearity ($\%L$) for each calibration gas by:

$$\text{Percent } L = \frac{\text{Absolute value } (z-x)}{\text{Full-scale linear chart deflection}} \times 100$$

(8) The linearity criterion is met if the $\%L$ is less than ± 2 percent for each data point generated. For each emission test, a calibration curve of the form $y=mx$ is to be used. The slope (m) is defined for each range by the spanning process.

(9) If the $\%L$ exceeds ± 2 percent for any data point generated, repair or replace the analyzer or calibration bottles prior to testing. Repeat the procedures of this section with the repaired or replaced equipment or gases.

(10) Perform a converter-efficiency check (see paragraph (b) of this section).

(11) The operating parameters are defined as "optimized" at this point.

§ 86.333–79 Dynamometer calibration.

(a) If necessary, follow the manufacturer's instructions for initial start-up and basic operating adjustments.

(b) Check the dynamometer torque measurement for each range used by the following:

(1) Warm up the dynamometer following the equipment manufacturer's specifications.

(2) Determine the dynamometer calibration moment arm. Equipment manufacturer's data, actual measurement, or the value recorded from the previous calibration used for this subpart may be used.

(3) Calculate the indicated torque (*IT*) for each calibration weight to be used by:

IT=calibration weight (lb) x calibration moment arm (ft)

(4) Attach each calibration weight specified in § 86.312 to the moment arm at the calibration distance determined in step (2). Record the power measurement equipment response (ft-lb) to each weight.

(5) For each calibration weight, compare the torque value measured in step (4) to the calculated torque determined in step (3).

(6) The measured torque must be within 2 percent of the calculated torque.

(7) If the measured torque is not within 2 percent of the calculated torque, adjust or repair the system. Repeat steps (1) through (6) with the adjusted or repaired system.

(c) *Option.* A master load-cell or transfer standard may be used to verify the in-use torque measurement system.

(1) The master load-cell and read out system must be calibrated with weights at each test weight specified in § 86.312–79. The calibration weights must be traceable to within 0.1 percent of NBS weights.

(2) Warm up the dynamometer following the equipment manufacturer's specifications.

(3) Attach the master load-cell and loading system.

(4) Load the dynamometer to a minimum of 6 equally spaced torque values as indicated by the master load-cell for each in-use range used.

(5) The in-use torque measurement must be within 2 percent of the torque measured by the master system for each load used.

(6) If the in-use torque is not within 2 percent of the master torque, adjust or repair the system. Repeat step (2) through step (5) with the adjusted or repaired system.

(d) The dynamometer calibration must be completed within 2 hours from the completion of the dynamometer warm-up.

§ 86.334–79 Test procedure overview.

(a) The test consists of prescribed sequences of engine operating conditions to be conducted on an engine dynamometer. The exhaust gases generated during engine operation are sampled for specific component analysis through the analytical train. The test is applicable to engines equipped with catalytic or direct-flame afterburners, induction system modifications, or other systems, or to uncontrolled engines.

(b) The tests are designed to determine the brake-specific emissions of hydrocarbons, carbon monoxide, and oxides of nitrogen. The gasoline-fueled engine test consists of 1 warm-up cycle and 1 hot cycle. The Diesel engine test consists of 3 idle modes and 5 power modes at each of 2 speeds which span the typical operating range of Diesel engines. These procedures require the determination of the concentration of each pollutant, the fuel flow and the power output during each mode. The measured values are weighted and used to calculate the grams of each pollutant emitted per brake-horsepower hour.

(c) (1) When an engine is tested for exhaust emissions or is operated for service accumulation on an engine dynamometer, the complete engine shall be tested, with all emission control devices installed and functioning.

(2) Evaporative emission controls need not be connected if data are provided to show that normal operating conditions are maintained in the engine induction system.

(3) On air cooled engines, the fan shall be installed.

(4) Additional accessories (e.g., oil cooler, alternators, air compressors, etc.) may be installed with advance approval by the Administrator.

(d) All emission control systems installed on or incorporated in a new motor vehicle engine shall be functioning during all procedures in this subpart. In cases of component malfunction or failure, maintenance to correct component failure or malfunction shall be authorized in accordance with § 86.-079–25.

§ 86.335–79 Gasoline-fueled engine test cycle.

(a) The following test sequence shall be followed in dynamometer operation tests of gasoline-fueled heavy-duty engines. Diesel engines are covered in § 86.-336.

Cycle No.	Mode No.	Mode	Observed torque (percent of maximum observed)	Time in mode-seconds	Cumulative time-seconds	Weighting factors
1	1	Idle		60	60	0.232
1	2	Cruise	25	60	120	.077
1	3	PTA	55	60	180	.147
1	4	Cruise	25	60	240	.077
1	5	PTD	10	60	300	.057
1	6	Cruise	25	60	360	.077
1	7	FL	90	60	420	.113
1	8	Cruise	25	60	480	.077
1	9	CT		60	540	.143
2	10	Cruise	25	60	600	.077
2	11	PTA	55	60	660	.147
2	12	Cruise	25	60	720	.077
2	13	PTD	10	60	780	.057
2	14	Cruise	25	60	840	.077
2	15	FL	90	60	900	.113
2	16	Cruise	25	60	960	.077
2	17	CT		60	1,020	.143
2	18	Idle		60	1,080	.232

(b) Except for idles, the engine dynamometer shall be operated at a constant speed of 2000 rpm±100 rpm. Speed deviations, not to exceed 200 rpm, will be allowed during the first 10 seconds of each mode.

(c) The times in-mode specified in paragraph (a) for the CT modes are ±2 seconds. All other times in-mode are ±4 seconds.

(d) Torque for each mode must be held at the specified value ±2 percent of the maximum torque observed except for the first 20 seconds of each mode. For example, mode 3 torques shall be held between 53 and 57 percent of maximum torque (55 ±2%).

(e) The idle operating mode shall be carried out at the manufacturer's recommended curb-idle engine speed. Arrive at the last idle mode by closing the throttle, braking the dynamometer to the engine idle speed, and unloading the dynamometer.

(f) The CT operating mode shall be carried out at the same engine speed as specified in paragraph (b) of this section.

(g) If the Administrator determines that an engine shall be tested as an automatic transmission code engine, then a load shall be applied by the dynamometer during the idle modes (1 and 18) such that the engine speed is decreased from the recommended dynamometer-idle speed to the recommended curb-idle speed. The engine idle torque recorded for the calculations in § 86.345 shall be zero.

(h) If the operating conditions specified in paragraph (a) of this section for modes 2 through 8, and 10 through 16 cannot be maintained, the Administrator may authorize deviations from the specified load conditions. Such deviations shall not exceed 5 percent of the maximum torque at the test speed. The minimum deviations, above and below the specified load, necessary for stable operation shall be determined by the manufacturer and approved by the Administrator prior to the test run. Emission tests shall be performed by operating the engine at the higher approved load setting during cycle 1 and at the lower approved load setting during cycle 2. The weighting factors shall be as specified in paragraph (a) of this section.

§ 86.336–79 Diesel engine test cycle.

(a) The following 13-mode cycle shall be followed in dynamometer operation tests of heavy-duty Diesel engines. Gasoline-fueled engines are covered in § 86.-335.

V 42 174 SEP 8 77 S UMI

Test Segment	Mode No.	Engine Speed	Observed torque (percent of maximum observed)	Time in mode (minutes) Minimum	Maximum	Maximum cumulative time (minutes)
1	1	Curb-idle		4.5	6.0	42
1	2	Intermediate	2	4.5	6.0	
1	3	do	25	4.5	6.0	
1	4	do	50	4.5	6.0	
1	5	do	75	4.5	6.0	
1	6	do	100	4.5	6.0	
1	7	Curb-idle		4.5	6.0	
2	8	Rated	100	4.5	6.0	36
2	9	do	75	4.5	6.0	
2	10	do	50	4.5	6.0	
2	11	do	25	4.5	6.0	
2	12	do	2	4.5	6.0	
2	13	Curb-idle		4.5	6.0	

(b) During each mode the specified speed shall be held to within 50 rpm. Torque for each mode must be held at the specified value ±2 percent of the maximum torque observed. For example, mode 4 torque shall be held between 48 and 52 percent of maximum torque (50 ±2%).

(c) If the operating conditions specified in paragraph (b) of this section for modes 3, 4, 5, 9, 10, and 11 cannot be maintained, the Administrator may authorize deviations from the specified load conditions. Such deviations shall not exceed 10 percent of the maximum torque at the test speed. The minimum deviations, above and below the specified load, necessary for stable operation shall be determined by the manufacturer and approved by the Administrator prior to the test run. Emission tests shall be performed at each of the approved load settings, one above and one below the operating conditions specified in paragraph (a) of this section. The emission values obtained shall be calculated in accordance with § 86.345 except that the weighting factor shall be 0.04.

(d) If the Administrator determines that an engine shall be tested as an automatic transmission code engine, then a load shall be applied by the dynamometer during the idle modes (1, 7, and 13) such that the engine speed is decreased from the recommended dynamometer-idle speed to the recommended curb-idle speed. The engine-idle torque recorded for the calculations in § 86.345 shall be zero.

§ 86.337–79 Information.

The following information, as applicable, shall be recorded for each test:

(a) ***Engine description and specification.*** **A copy of the information specified in this paragraph must accompany each** engine sent to the Administrator for compliance testing. The manufacturer need not record the information specified in this paragraph for each test if the information, with the exception of subparagraphs (3), (12), and (13), is included in the manufacturer's Part I.

(1) Engine-system combination.

(2) Engine identification numbers.

(3) Number of hours of operation accumulated on engine.

(4) Rated maximum horsepower and torque.

(5) Maximum horsepower and torque speeds.

(6) Engine displacement.

(7) Governed speed.

(8) Manufacturer's start-up and warm-up reference, gasoline-fueled engines only).

(9) Curb-idle rpm.

(10) Dynamometer-idle rpm (automatic transmission code engines only).

(11) Maximum horsepower at 2000 rpm (gasoline-fueled engines only).

(12) Fuel consumption and maximum torque at 2000 rpm (gasoline-fueled engines only).

(13) Fuel consumption at maximum power and torque (Diesel engines only).

(14) Maximum air flow (Diesel engines only).

(15) Air inlet restriction (Diesel engines only).

(16) Exhaust pipe diameter(s) (Diesel engines only).

(17) Maximum exhaust system back pressure (Diesel engines only).

(18) Maximum exhaust system back pressure at 2000 rpm, if applicable (gasoline-fueled engines only).

(b) *Test data; general.* This information may be recorded at any time between 4 hours prior to the test and 4 hours after the test.

(1) Engine-system combination.

(2) Engine identification number.

(3) Instrument operator.

(4) Engine operator.

(5) Number of hours of operation accumulated on the engine prior to beginning the warm-up portion of the test.

(6) Fuel identification, including H/C ratio.

(7) Date of most recent analytical assembly calibration.

(8) All pertinent instrument information such as tuning, gain, serial numbers, detector number, calibration curve numbers, etc. As long as this information is traceable, it may be summarized by system number or analyzer identification numbers.

(c) *Test data; pre-test.* (1) Date and time of day.

(2) Test number.

(3) Ambient temperature in dynamometer testing room (gasoline-fueled engines only).

(4) Barometric pressure, pre-test for gasoline-fueled engines, pre-test segment for Diesel engines.

(5) Engine intake humidity, pre-test for gasoline-fueled engines, pre-test segment for Diesel engines with nonconditioned air supply systems.

(6) Maximum observed torque for intermediate and rated speeds (Diesel engines only).

(7) Maximum observed torque at 2000 rpm (gasoline-fueled engines only).

(8) Recorder chart or equivalent. Identify for each test (test segment for Diesel engines) zero traces for each range used, and span traces for each range used.

(d) *Test data; modal.* (1) Recorder chart or equivalent. Identify for each test mode the emission concentration traces and the associated analyzer range(s). The start and finish of each test.

(2) Observed engine torque.

(3) Observed engine rpm.

(4) Record engine torque and engine rpm continuously with a chart recorder or equivalent recording device.

(5) Intake air flow and depression for each mode (Diesel engines only).

(6) Engine intake air temperature for each mode (Diesel engines only).

(7) Fuel flow for each mode. If the fuel flow measurement is a volume measurement system, record the fuel temperature in the measurement system for fuel density corrections to the mass flow rate. If the fuel temperature is within 3°C (5.4° F) of the calibration temperature, no density correction is required.

(8) Engine intake humidity (only for Diesel engines with humidity conditioned air supply).

(e) *Test data; post-test.* (1) Recorder chart or equivalent. Identify the hang-up check.

(2) Recorder chart or equivalent. Identify the zero traces for each range used and the span traces for each range used.

(3) Ambient temperature in the dynamometer testing room (gasoline-fueled engines only).

(4) Total number of hours of operation accumulated on the engine.

§ 86.338–79 Exhaust measurement accuracy.

(a) The analyzers must be operated between 15 percent and 100 percent of full-scale chart deflection during the measurement of the emissions for each mode. The exceptions to the lower limit of this operating rule are:

(1) The analyzer's response may be less than 15 percent of full scale if the full-scale value is 120 ppm (or ppmC) or less.

(2) *Option.* For CO analysis the analyzer's response may be less than 15 percent of full scale if the full-scale value is 5500 ppm or less.

(3) The analyzer's response may be less than 15 percent of full scale if the emissions from the engine are erratic and the average chart-deflection value is greater than 15 percent of full scale.

(4) For gasoline-fueled engines, the analyzer's response may be less than 15 percent of full scale during the initial part of the CT mode provided that the average chart-deflection value is greater than 15 percent of full scale.

(5) The analyzer's response may be less than 15 percent of full scale if the contribution of all modes read below the 15 percent level is less than 10 percent by mass of the final test results.

§ 86.339–79 Pre-test procedures.

(a) Allow a minimum of 30 minutes warm-up in the stand-by or operating mode prior to spanning the analyzers.

(b) Replace or clean the filter elements and then vacuum leak check the system, §86.328(a). A pressure leak check is also permitted per §86.328(b). Allow the heated sample line, filters, and pumps to reach operating temperature.

(c) Perform the following system checks:

(1) If a stainless steel NO_2 to NO converter is used, prior to gasoline-fueled engine tests, purge the converter with air (zero-grade air, room air, or O_2) for a minimum of 30 minutes. The converter must be at operational temperature while purging.

(2) Check the sample-line temperature (see §86.310).

(3) Check the system response time (see §86.329). System response time may be applied from the most recent check of response time if all of the following are met:

(i) The flow rate for each flow meter is equal to or greater than the flow rate recorded in §86.329(b)(1)(ii).

(ii) For analyzers with capillaries, the response time from the sample/span valve is measured using in-use pressures and bypass flows (see § 86.329(b)(2)).

(iii) The response time measured in step (ii) is equal to or less than the response time determined in § 86.329(b)(2)(vii).

(4) A hang-up check is permitted.

(5) A converter-efficiency check is permitted. The check need not conform to § 86.332(b). The test procedure may be aborted at this point in the procedure in order to repair the NO_2 to NO converter. If the test is aborted, the converter must pass the efficiency check described in § 86.332(b) prior to starting the dynamometer test run.

(d) Introduce the zero-grade gases at the same flow rates and pressures used to calibrate the analyzers and zero the analyzers on the lowest anticipated range that will be used during the test. Immediately prior to each test (segment, for Diesel engines), obtain a stable zero for each anticipated range that will be used during the test.

(e) Introduce span gases to the instruments under the same flow conditions as were used for the zero gases. Adjust the instrument gains on the lowest range that will be used to give the desired value. Span gases should have a concentration greater than 70 percent of full scale for each range used. Immediately prior to each test and also prior to each segment of the Diesel test, record the response to the span gas and the span-gas concentration for each range that will be used during the test.

(f) Check the zero responses. If they have changed more than 0.5 percent of full scale, repeat paragraphs (d) and (e) of this section.

(g) Check system flow rates and pressures. Note the values of gauges G3 and G4 for reference during the test.

§ 86.340–79 Gasoline-fueled engine dynamometer test run.

(a) This section applies to gasoline-fueled engines only. Diesel engines are covered in § 86.341.

(b) (1) Mount test engine on the engine dynamometer.

(2) Install instrumentation and sample probe.

(3) Read and record the general test data as specified in § 86.337(b).

(c) Precondition the engine by the following continuous steps:

(1) The engine shall be started and operated at:

(i) Zero load in accordance with the manufacturer's start-up and warm-up procedures for 1 minute ±30 sec;

(ii) A torque equivalent to 10±3 percent of the most recent determination of maximum torque for 4 minutes ±30 sec at 2000 rpm;

(iii) A torque equivalent to 55±5 percent of the most recent determination of maximum torque for 35 minutes ±1 minute at 2000 rpm;

(iv) Option. If the engine has been operating on service accumulation for a minimum of 40 minutes, the service accumulation may be substituted for steps (i) through (iii).

(2) If tested under the provisions of § 86.079–29, check specifications as required. This check must be performed within 10 minutes after completion of engine preconditioning;

(3) Determine the maximum torque of the engine at 2000 rpm ±100 rpm;

(i) Operate the engine with the throttle fully opened for a maximum of three minutes. During the second minute of operation, record the high and low torque readings. The average of these two readings will be the maximum torque value at 2000 rpm.

(ii) Calculate the torque corresponding to 10, 25, 55, and 90 percent of the observed maximum torque value.

(4) Determine the analyzer ranges required for each mode specified in § 86.335 to meet the range specifications of § 86.338. The engine must not be operated for more than 10 minutes. Cycle 1, specified in § 86.335, may be used for this purpose;

(5) The engine shall be turned off and allowed to stand for at least 1 hour, but not more than 2 hours, at an average ambient temperature of 25° C±5° C (77° F±9° F).

(d) The following steps shall be taken for each test:

(1) Maintain dynamometer test cell average ambient temperature at 25° C± 5° C (77°F±9°F);

(2) Observe pre-test procedures; § 86.339;

(3) Start cooling system;

(4) Start engine and operate in accordance with manufacturer's start-up and warm-up procedures. The duration of the warm-up procedure shall be 5 minutes ±30 seconds. Sample flow may begin during the warm-up;

(5) Read and record all pre-test data specified in § 86.337(c) during the 5-minute warm-up;

(6) Release the choke idle-stop (if necessary) and return the engine throttle control to the curb-idle position, start sample flow and recorders if not already started, and begin test sequence of § 86.335;

(7) Should it be determined that the test must be rerun, then only the soak specified in paragraph (c)(5) of this section need be performed prior to paragraph (d) of this section;

(8) Perform the test cycle, § 86.335, and continuously record exhaust gas concentrations;

(9) Read and record all modal data specified in § 86.337(d) during the test cycle;

(10) The engine speed and load must be maintained within the requirements of § 86.343;

(11) If at any time during a test, the test equipment malfunctions or the specifications in paragraph (d)(10) of this section are not met, the test is void, and may be aborted. The test sequence may be restarted under the provisions of paragraph (c)(5) of this section.

(e) *Exhaust gas measurements.* (1) Measure HC, CO, CO_2, and NOx volume concentration in the exhaust sample. Should the analyzer response exceed 100 percent of full scale or respond less than 15 percent of full scale, the next higher or lower analyzer range shall be used per § 86.338. For exceptions to the lower limit see § 86.338. Should the fuel flow instrument read below 20 percent of the full-scale value, a flow measurement unit with a lower scale must be used unless the option in § 86.314 is desired.

(2) For each analyzer, each range that may be used during a test must have the zero and span responses recorded prior to the execution of that test. Only the range(s) used to measure the emissions during a test are required to have their

V 42 174 SEP 8 77 UMI

zero and span recorded after the completion of the test.

(3) If during an emission test the value of gauges downstream of the NDIR analyzer(s) (G3 or G4) differs by more than ±2 inches of water from the pre-test value, the test is void.

§ 86.341–79 Diesel engine dynamometer test run.

(a) This section applies to Diesel engines only. Gasoline-fueled engines are covered in § 86.340.

(b) The temperature of the air supplied to the engine shall be between 68° F and 86° F. The fuel temperature at the pump inlet shall be 100° F±10° F. The observed barometric pressure shall be between 28.5 inches and 31 inches Hg. Higher air temperature or lower barometric pressure may be used, if desired, but no allowance shall be made for increased emissions because of such conditions.

(c) The governor and fuel system shall have been adjusted to provide engine performance at the levels in the application for certification required under § 86.079–21. These adjustments are only permitted under the provisions of § 86.-079–25.

(d) The following steps shall be taken for each test:

(1) Install instrumentation and sample probes as required;

(2) Observe pre-test procedure, § 86.-339;

(3) Read and record the general test data as specified in § 86.337(b);

(4) Start cooling system;

(5) Precondition the engine in the following manner:

(i) Operate the engine at idle for 2 to 3 minutes;

(ii) Operate the engine at approximately 50 percent power at the peak torque speed for 5 to 7 minutes;

(iii) Operate the engine at rated speed and maximum horsepower for 25 to 30 minutes;

(iv) *Option.* It is permitted to precondition the engine at rated speed and maximum horsepower until the oil and water temperatures are stabilized. The temperatures are defined as stabilized if they are maintained within 2 percent of point for 2 minutes. The engine must be operated a minimum of 10 minutes for this option. This optional procedure may be subsituted for step (iii);

(v) *Option.* If the engine has been operating on service accumulation for a minimum of 40 minutes, the service accumulation may be substituted for steps (i) through (iii);

(vi) Longer preconditioning times may be used only if prior approval is obtained from the Administrator.

(6) Within a total elapsed time of 10 minutes or less, determine by experimentation the maximum torque at the rated and intermediate speeds;

(7) Calculate the torque corresponding to 2, 25, 50, 75, and 100 percent of the maximum observed torque for the rated and intermediate speeds;

(8) Read and record all pre-test data specified in § 86.337(c);

(9) Start the test cycle, § 86.336, within 10 minutes, after determining test load using the torque values determined in paragraph (d)(6) of this section;

(10) Read and record all modal data specified in § 86.337(d) during the last 2 minutes of each mode;

(11) Continuously record the analyzer's response to the exhaust gas during each test segment;

(12) Test segments may be repeated;

(13) If a delay of more than 20 minutes occurs between the end of one segment and the beginning of another segment the test is void. The test may be restarted at paragraph (d)(8) of this section. If the delay exceeds 4 hours, the test shall be restarted at paragraph (d)(2) of this section;

(14) The engine speed and load must be maintained within the requirements of § 86.336 during the last 2 minutes of each mode. If the requirement is not met for all modes during a test segment, that segment of the test is void. The test segment may be restarted beginning with paragraph (d)(8) of this section;

(15) If at any time during a test segment, the test equipment malfunctions or the specifications in paragraph (d)(14) of this section are not met, the test segment is void, and may be aborted. The test segment may be restarted beginning with paragraph (d)(8) of this section;

(16) Fuel flow and air flow during the idle or 2-percent load conditions may be determined just prior to or immediately following the dynamometer sequence, if longer times are required for accurate measurements.

(e) *Exhaust gas measurements.* (1) Measure HC, CO, CO_2, and NO_x volume concentration in the exhaust sample. Should the analyzer response exceed 100 percent of full scale or respond less than 15 percent of full scale, the next higher or lower analyzer range shall be used per § 86.338. For exceptions to the lower limit see § 86.338. Should the fuel flow instrument read below 20 percent of full-scale value, a smaller flow measurement unit must be used unless the option in § 86.314 is desired.

(2) Each analyzer range that may be used during a test segment must have the zero and span responses recorded prior to the execution of that test segment. Only the range(s) used to measure the emissions during a test segment are required to have their zero and span recorded after the completion of the test segment.

(3) It is permitted to change filter elements between test segments.

(4) A leak check is permitted between test segments.

(5) A hang-up check is permitted between test segments.

(6) If, during the emission measurement portion of a test segment, the value of the gauges downstream of the NDIR analyzer(s) G3 or G4 differs by more than ±2 inches of water from the pre-test value, the test segment is void.

§ 86.342–79 Post-test procedures.

(a) Begin a hang-up check within 30 seconds of the completion of the last mode in the test. Use the following procedure:

(1) Introduce a zero-grade gas into the sample probe or valve V2 to check the "hang-up zero" response. Simultaneously start a time measurement;

(2) Select the lowest HC range used during the test;

(3) The difference between the span-zero response and the hang-up zero response shall not be greater than 5.0 percent of full scale or 10 ppmC whichever is greater, within:

(i) 50 seconds for gasoline-fueled engine tests, or

(ii) 4 minutes for Diesel engine tests;

(b) Begin the analyzer span checks within 6 minutes after the completion of the last mode in the test. Record for each analyzer the zero and span response for each range used during the preceding test or test segment.

(c) If during the test, the filter element(s) were replaced or cleaned, a vacuum check must be performed per § 86.328 immediately after the span checks. If the vacuum side leak check does not meet the requirements of § 86.328 the test is void.

(d) Read and record the post-test data specified in § 86.337(e).

(e) For a valid test, the analyzer drift between the before-test and after-test (before-segment and after-segment for Diesels) span checks for each analyzer must meet the following requirements:

(1) The span drift (defined as the change in the difference between the zero response and the span response) must not exceed 2.0 percent of full-scale chart deflection for each range used;

(2) The zero response drift must not exceed 2.0 percent of full-scale chart deflection for each range used.

§ 86.343–79 Chart reading.

(a) A computer or any other automatic data processing device(s) may be used as long as the system meets the requirements of this subpart.

(b) Determine the location on the chart of the analyzer responses corresponding to the end of each mode.

(c) For gasoline-fueled engines, determine whether the test cycle was run in accordance with § 86.335 by observing either chart event marks, speed trace, torque trace, or concentration traces. The test will be invalidated if there is a deviation of more than:

(1) 2 seconds from the specified time for each CT mode, and 4 seconds for all other modes; or,

(2) 2 percent of maximum torque during each mode excluding the first 20 seconds of each mode; or,

(3) 200 rpm during the first 10 seconds of each mode, or 100 rpm during the remainder of each mode.

(d) Determine chart deflections.

(1) Locate the last 10 seconds of each gasoline-fueled engine mode except CT. Locate the last 50 seconds of each gasoline-fueled engine CT mode. For all Diesel engine modes locate the last 60 seconds.

(2) (i) Divide the last 10 seconds or 60 seconds, whichever is applicable, into a minimum of 10 equally spaced increments. Determine the chart deflection of each increment for the CO_x, CO, HC, and NO_x analyzers.

(ii) Option for Diesel engine modes. If the deviation from a straight line (other than instrument noise) during this 60 seconds is less than ±5 percent of full-scale, the average chart deflection may be determined by eye. The average value (one number) may then be used in lieu of the 10 values required by paragraph (d)(2)(i) of this section.

(3) Other methods of determining the chart deflection of the analyzers may be used only with prior approval by the Administrator.

(e) Determine CO_x, CO, HC, and NO_x concentrations for each mode.

(1) If the option in paragraph (d)(2)(ii) of this section is employed, then those chart deflections for both linear and non-linear analyzers may be substituted for the average chart deflection in step (e)(2).

(2) For linear instruments, average the chart deflections determined in paragraph (d)(2)(i) of this section. Determine the concentration for this average chart deflection using calibration data.

(3) For non-linear instruments, calculate concentrations for each chart deflection determined in paragraph (d)(2)(i) of this section. Take the average of these concentrations for each mode.

$$P_V = P'_{WB} - 0.000660\,(T_{DB} - T_{WB})\,BARO\,[1 + 0.00115\,(T_{WB} - 273.15)] \quad (2)$$

(4) For purposes of this paragraph, calibration data includes calibration curves, linearity curves, span-gas responses, and zero-gas responses.

§ 86.344–79 Humidity calculations.

(a) The following abbreviations (and units) are used in this section:

$BARO$ = barometric pressure (Pa)
H = specific humidity, (gm H_2O/gm of dry air)
K = 0.6220 gm H_2O/gm dry air
M_{air} = Molecular weight of air = 28.9645
M_{H_2O} = Molecular weight of water = 18.01534
P_{DB} = Saturation vapor pressure of water at the dry bulb temperature (Pa)
P_{DP} = saturation vapor pressure of water at the dew-point temperature (Pa)
P_v = partial pressure of water vapor (Pa)
P_{WB} = saturation vapor pressure of water at the wet bulb temperature (Pa)
T_{DB} = Dry bulb temperature (°K)
T_{WB} = Wet bulb temperature (°K)
Y = Water-vapor volume concentration

(b) The specific humidity on a dry basis of the intake air (H) is defined by equation (1).

$$H = \frac{(K)\,(P_V)}{BARO - P_V} \quad (1)$$

(c) The partial pressure of water vapor may be determined in two manners:

(1) A dew point device may be used. In that case:

$$P_v = P_{DP}$$

(2) A wet-bulb, dry-bulb method may be used. In that case "Ferrels equation" (eq. (2)) is used.

(d)(1) The saturation vapor pressure (P_{WB}) of water at the wet-bulb temperature is defined by equation (3) (Ref. Wexler and Greenspan, equation (23), National Bureau of Standards).

$$P_{WB} = \exp\left[B \ln T_{WB} + \sum_{i=0}^{9} F_i T_{WB}^{i}\right] \quad (3)$$

where:
P_{WB} is in Pascals (Pa)
T_{WB} = Wet-bulb temperature (°K)
$B = -12.150799$
$F_0 = -8.49922(10)^3$
$F_1 = -7.4231865(10)^1$
$F_2 = 96.1638147$
$F_3 = 2.4017646(10)^{-2}$
$F_4 = -1.2360119(10)^{-4}$
$F_5 = -1.1400454(10)^{-6}$
$F_6 = 2.1701209(10)^{-11}$
$F_7 = -3.610258(10)^{-13}$
$F_8 = 3.8504819(10)^{-16}$
$F_9 = -1.4317(10)^{-18}$

(2) The table in Figure D79–5 may be used in lieu of equation (3).

(e) The saturated vapor pressure of water at the dry-bulb temperature (P_{DB}) is found (if required) by using dry-bulb absolute termperature (°K) in equation (3).

(f) The percent of relative humidity (RH) (if required) is defined by equation (4).

$$RH = \frac{P_v}{P_{DB}}\,(100) \quad (4)$$

(g) The water-vapor volume concentration on a dry basis of the engine intake air (Y) is defined by equation (5).

$$Y = \frac{(H)\,(M_{air})}{(M_{H_2O})} = \frac{P_v}{BARO - P_v} \quad (5)$$

§ 86.345–79 Emission calculations.

(a) The following abbreviations (and units) are used in this section.

c = atomic hydrogen/carbon ratio of the fuel
ϕ = dry fuel-air ratio (measured/fuel-air ratio (stoichiometric))
$BARO$ = Barometric pressure (in. Hg-A)
BHP = Brake horsepower
$BSCO$ = Brake specific carbon monoxide emissions, (gm/BHP-HR)
$BSFC$ = Brake specific fuel consumption (lb/BHP-HR)
$BSHC$ = Brake specific hydrocarbon emissions (gm/BHP-HR)
$BSNO_x$ = Brake specific oxides of nitrogen emissions (gm/BHP-HR)
DCO = CO volume concentration in exhaust, ppm (dry)
DCO_2 = CO_2 volume concentration in exhaust, percent (dry)
DHC = HC volume carbon concentration in exhaust, ppmC (dry)
$DKNO$ = NO volume concentration in exhaust, in ppm (dry and humidity corrected)
EIP = engine intake pressure (in. HgA) = $BARO$ – inlet depression
f/a = measured dry fuel-air ratio
G = humidity of the inlet air in grains of water per pound of dry air = (453.59/0.0648) H, (see § 86.344)
K = water–gas equilibrium constant = 3.5
K_{NO_x} = Humidity correction factor for oxides of nitrogen
K_w = Wet to dry correction factor
M_C = Atomic weight of carbon
$(M_C + M_H)$ = mean molecular weight of the fuel per carbon atom
M_{CO} = Molecular weight of CO
M_f = Mass flow-rate of fuel used in the engine in lb/hr = W_f/453.59
M_H = Atomic weight of hydrogen
M_{NO_2} = Molecular weight of nitrogen dioxide (NO_2)
T = Temperature of inlet air (°F)
W_{CO} = Mass rate of CO in exhaust, grams/hr
W_f = Mass flow-rate of fuel used in the engine, in grams/hr = (453.59) x (W_f lbs/hr)
WHC = HC volume concentration in exhaust, ppm C (wet)
W_{HC} = Mass rate of HC in exhaust, grams/hr
W_{NO_x} = Mass rate of NO_x in exhaust, grams/hr
Y = H_2O volume concentration of intake air (See § 86.344)

(b) Determine the exhaust species volume concentration for each mode.

(c) (1) Convert wet basis measurements to a dry basis by the following:

Dry concentrations = 1/K_w x wet concentrations. K_w is defined by the equation in Figure D79–6.

(2) For Diesel engines, for each mode use the measured engine (f/a) entering the combustion chamber when calculating ϕ. If applicable bleed air, etc. must be subtracted from the measured air flow (see § 86.313).

(3) For gasoline-fueled engines, optional for Diesel engines, calculate ϕ for each mode by substituting WHC for DHC in the (f/a) equations in paragraph (d) of this section.

(4) Calculate a Y value for each gasoline-fueled engine test from the pre-test data. Apply the Y value to the K_W equation for the entire test.

(5) Calculate a separate Y value for each Diesel test segment from the pre-test-segment data. Apply the Y value to the K_W equation for the entire test-segment.

$$K_w = \frac{1}{\left[\alpha\left(\frac{DCO_2}{10^2}+\frac{DCO}{10^6}\right)+\frac{2Y}{4}\left(\frac{DCO_2}{10^2}+\frac{DCO}{10^6}+\frac{WHC}{10^6}\right)\left(1+\frac{\alpha}{4}\right)\right]\left[1+\frac{2\left(1+\frac{DCO}{10^6}\right)K}{\left(\frac{DCO_2}{10^2}\right)K}\right]\phi}$$

Figure D79–6 K_w – WET TO DRY CORRECTION FACTOR

(d) Compute the dry (f/a) if required as follows:

$$(f/a) = \frac{1}{X}-\left(\frac{DCO}{2X(10)^4}\right)-\left(\frac{DHC}{X10^4}\right)+\frac{\alpha}{4}\left(1-\frac{DHC}{X(10^4)}\right)-\frac{.75\alpha}{\left(\frac{K}{\frac{DCO}{X(10)^4}}\right)+\left(\frac{(1-K)}{1-\frac{DHC}{X(10)^4}}\right)}$$

$$(f/a)_{stoich} = \frac{4.77\ (1+\alpha/4)\ (f/a)\ \text{stoich}}{138.18\ (1+\alpha/4)}$$

where

$$X = DCO_2/10^2 + DCO/10^6 + DHC/10^6$$

(e) *Data validation*—(1) *Diesel engines only.* Compare the calculated dry (f/a) with the measured fuel and air flow. For a valid test the emission calculated (f/a) must agree within 10 percent of the measured (f/a) for each mode. Diesel engine idle and 2 percent modes do not have to meet this requirement.

(2) *Fuel/Air ratio comparison.* When comparing measured (f/a) ratio to an emissions calculated (f/a) ratio, the measured air flow (in terms of mass) is the total mass of air entering the exhaust pipe. This may include additions of air mass to the exhaust pipe by an air injection system.

(3) Other methods of data validation may be used if prior approval is obtained from the Administrator.

(4) Data validation techniques that have obtained prior approval from the Administrator for use on gasoline-fueled engines may be used to determine void tests.

(f) Multiply the dry nitric oxide volume concentrations by the following humidity correction factor to obtain $DKNO$:

(1) Gasoline-fueled engines:

$$K_{NO_x} = 0.6272 + 0.00629G - 0.0000176G^2$$

(2) Diesel engines:

$$K_{NO_x} = \frac{1}{1+A(G-75)+B(T-85)}$$

where:

$A = 0.044\ (f/a) - 0.0038$
$B = -0.116(f/a) + 0.0053$
T = Temperature of inlet air, °F.

(g) Calculate the mass emissions of each species in grams per hour for each mode as follows:

(1) $$\text{HC grams/hr} = W_{HC} = \frac{(DHC/10^4)\,W_f}{(DCO/10^4)+DCO_2+(DHC/10^4)}$$

(2) $$\text{CO grams/hr} = W_{CO} = \frac{M_{CO}(DCO/10^4)\,W_f}{(M_C+\alpha M_H)[(DCO/10^4)+DCO_2+(DHC/10^4)]}$$

(3) $$\text{NO}_x \text{ grams/hr} = W_{NO_x} = \frac{M_{NO_2}(DKNO/10^4)\,W_f}{(M_C+\alpha M_H)[(DCO/10^4)+DCO_2+(DHC/10^4)]}$$

(h) (1) For gasoline-fueled engines, weight the mass values of BHP, W_{HC}, W_{CO}, M_f, and W_{NO_x} for each mode by multiplying the modal mass values by the appropriate modal weighting factor prescribed by § 86.335.

(2) For Diesel engines, weight the values of BHP, W_{HC}, W_{CO}, W_{NO_x}, and M_f as follows:

(i) Weight the values from each idle mode by multiplying the values by (0.067);

(ii) Weight the remaining modes by multiplying the values by 0.08.

(i) Calculate the brake specific emissions for:

(1) Each gasoline-fueled engine test cycle, and

(2) Each Diesel engine test by summing the weighted values (BHP, W_{HC}, W_{CO}, and W_{NO_x}) from each mode as follows:

$$BSHC(t) = \frac{\sum \text{weighted } W_{HC}}{\sum \text{weighted } BHP}$$

$$BSCO(t) = \frac{\sum \text{weighted } W_{CO}}{\sum \text{weighted } BHP}$$

$$BSNOx(t) = \frac{\sum \text{weighted } W_{NO_x}}{\sum \text{weighted } BHP}$$

(t)=Test cycle number (t=1, 2) (gasoline-fueled engines only).

(j) (1) Calculate the brake-specific fuel consumption ($BSFC$) from the non-weighted BHP and M_f for each mode. Gasoline-fueled engine idle and CT modes, and Diesel idle modes are excluded.

(2) For gasoline-fuel engines use:

$$BSFC = \frac{M_f}{BHP}$$

(3) For Diesel engines use:

$$CBSFC = \frac{M_f}{CBHP}$$

where:

$$CBHP = BHP\left[\frac{29.00}{EIP}\right]\left[\frac{T+459.69}{85+459.69}\right]^{0.7}$$

(4) Other methods of correcting power to determine $BSFC$ may be used only with prior approval of the Administrator.

(k) Calculate the weighted brake-specific fuel consumption ($WBSFC$) for (1) each gasoline engine test cycle by:

$$WBSFC(t) = \frac{\sum \text{weighted } M_f}{\sum \text{weighted } BHP}$$

where:
t=Test cycle number (t=1,2)

(2) each Diesel engine test by:

$$WCBSFC = \frac{\sum \text{weighted } M_f}{\sum \text{weighted } CBHP}$$

(l) For gasoline-fueled engines, calculate the brake-specific emissions and fuel consumption for the complete test as follows:

$BSHC(T) = 0.35\ BSHC(1) + 0.65\ BSHC(2)$
$BSCO(T) = 0.35\ BSCO(1) + 0.65\ BSCO(2)$
$BSNO_x(T) = 0.35\ \ BSNO_x(1) + 0.65\ \ BSNO_x$ (2)
$WBSFC(T) = 0.35\ WBSFC(1) + 0.65\ WBSFC$ (2)

§ 86.346–79 Alternative NO_x measurement technique.

(a) Oxides of nitrogen (NO_x) may be measured with the following "alternative instrumentation" for both Diesel and gasoline-fueled engines. The "alternative instrumentation" shall consist of:

(1) A heated sample line maintained above the dew point;

(2) An NO, to NO converter obtaining a sample directly from the heated sample line; and

(3) A combination per 40 CFR 86.777 or 40 CFR 86.977, whichever is applicable, of a water trap, dryer, flow controls, and an NO NDIR analyzer obtaining a sample from the converter.

(b) The provisions of 40 CFR 86 Subpart D shall apply to the "alternative instrumentation", where applicable, with the following exceptions:

(1) Analyzer specifications found in §§ 86.315, 86.321, and 86.322 do not apply to the "alternative instrumentation".

(2) For the purposes of this section, the full-scale value specified in § 86.338 (a) (1) shall be 1,500 ppm for Diesel engines and 2,500 ppm for gasoline-fueled engines.

(c) The "alternative instrumentation" shall be calibrated per § 86.330.

(d) The NO NDIR analyzer shall meet the performance and interference specifications contained in 40 CFR 86.777 or 40 CFR 86.977, whichever is applicable.

(e) The operation of the dryer shall follow good engineering practice such that the test results are not altered. Proper preconditioning of the dryer is allowed.

§ 86.347–79 Alternative calculations for Diesel engines.

(a) This section applies to Diesel engines only. Gasoline-fueled engines must use the calculations in § 86.345.

(b) For Diesel engines, the calculations specified in 40 CFR 86.977–15 may be substituted for § 86.345.

(c) The modal $BSFC$ and weighted $BSFC$ shall be calculated per § 86.345.

(d) If the provisions of this section are used, a CO_2 measurement is not required.

(e) Both 40 CFR 86.977–15(a) and § 86.313 shall apply to air-flow measurements. For the purposes of this section, the air-flow measurement accuracy specified in § 86.313 shall be ±1 percent.

17. The title to Subpart H is revised to read as follows:

Subpart H—Emission Regulations for New 1977 and 1978 Model Year Gasoline-Fueled Heavy-Duty Engines; Test Procedures

18. Section 86.777–1 is revised to read as follows:

§ 86.777–1 General applicability.

The provisions of this subpart apply to new 1977 and 1978 model year gasoline-fueled heavy-duty engines.

19. New §§ 86.879–5 through 86.879–14 are added to Subpart I and read as follows:

§ 86.879–5 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of engines with the standard set forth in § 86.079–11(a).

(a) The test consists of a prescribed sequence of engine operating conditions on an engine dynamometer with continuous examination of the exhaust gases. The test is applicable equally to controlled engines equipped with means for preventing, controlling, or eliminating smoke emissions and to uncontrolled engines.

(b) The test is designed to determine the opacity of smoke in exhaust emissions during those engine operating conditions which tend to promote smoke from Diesel vehicles.

(c) The test procedure begins with a preconditioned engine which is then run through preloading and preconditioning operations. After an idling period, the engine is operated through acceleration and lugging modes during which smoke emission measurements are made to compare with the standards. The engine is then returned to the idle condition and the acceleration and lugging modes are repeated. Three consecutive sequences of acceleration and lugging constitutes the full set of operating conditions for smoke emission measurement.

(d) Except in cases of component malfunction or failure, all emission control systems installed on or incorporated in a new motor vehicle engine shall be functioning during all procedures in this subpart. Maintenance to correct component malfunction or failure shall be authorized in accordance with § 86.079–24.

§ 86.879–6 Diesel fuel specifications.

The requirements of this section are set forth in § 86.307.

§ 86.879–7 Dynamometer operation cycle for smoke emission tests.

(a) The following sequence of operations shall be performed during engine dynamometer testing of smoke emissions, starting with the dynamometer preloading determined and the engine preconditioned (§ 86.879–12(c)).

(1) *Idle mode.* The engine is caused to idle for 5 to 5.5 minutes at the manufacturer's recommended curb-idle speed. The dynamometer controls shall be set to provide minimum load by turning the load switch to the "off" position or by adjusting the controls to the minimum load position.

(2) *Acceleration mode.* (i) The engine speed shall be increased to 200±50 rpm above the manufacturer's recommended curb-idle speed within 3 seconds.

(ii) Immediately upon completion of the mode specified in paragraph (a) (2) (i) of this section, the throttle shall be moved rapidly to, and held in, the fully-open position. The inertia of the engine and the dynamometer, or alternately a preselected dynamometer load, shall be used to control the acceleration of the engine so that the speed increases to 85

V 42 174 SEP 8 77 UMI

percent of the rated speed in 5±1.5 seconds. This acceleration shall be linear within 100 rpm as specified in § 86.879-13(c).

(iii) After the engine reaches the speed required in paragraph (a)(2)(ii) of this section, the throttle shall be moved rapidly to, and held in, the fully-closed position. Immediately after the throttle is closed, the preselected load required to perform the acceleration in paragraph (a)(2)(iv) of this section shall be applied.

(iv) When the engine decelerates to the intermediate speed (within 50 rpm), the throttle shall be moved rapidly to, and held in, the fully-open position. The preselected dynamometer load which was applied during the preceding transition period shall be used to control the acceleration of the engine so that the speed increases to at least 95 percent of the rated speed in 10±2 seconds.

(3) *Lugging mode.* (i) Immediately upon completion of the preceding acceleration mode, the dynamometer controls shall be adjusted to permit the engine to develop maximum horsepower at rated speed. This transition period shall be 50 to 60 seconds in duration. During the last 10 seconds of this period, the engine speed shall be maintained within 50 rpm of the rated speed, and the power (corrected, if necessary, to rating conditions) shall be no less than 95 percent of the maximum horsepower developed at the zero-hour point.

(ii) With the throttle remaining in the fully-open position, the dynamometer controls shall be adjusted gradually so that the engine speed is reduced to the intermediate speed (within 50 rpm). This lugging operation shall be performed smoothly over a period of 35±5 seconds. The rate of slowing of the engine shall be linear, within 100 rpm, as specified in § 86.879-13(c).

(4) *Engine unloading.* Immediately upon completion of the preceding lugging mode, the dynamometer and engine controls shall be returned to the idle position described in paragraph (a)(1) of this section. The engine must be at the curb-idle condition within one minute after completion of the lugging mode.

(b) The procedures described in paragraphs (a)(1) through (a)(4) of this section shall be repeated until 3 consecutive valid cycles have been completed. If 3 valid cycles have not been completed after a total of 6 consecutive cycles have been run, the engine shall be preconditioned by operation at maximum horsepower at rated speed for 10 minutes before the test sequence is repeated.

§ 86.879-8 Dynamometer and engine equipment.

The following equipment shall be used for smoke emission testing of engines on engine dynamometers.

(a) An engine dynamometer with adequate characteristics to perform the test cycle described in § 86.879-7.

(b) An engine cooling system having sufficient capacity to maintain the engine at normal operating temperatures during conduct of the prescribed engine tests.

(c) A noninsulated exhaust system extending 15±5 feet from the exhaust manifold, or the crossover junction in the case of Vee engines, and presenting an exhaust back pressure within ±0.2 inch Hg of the upper limit at maximum rated horsepower, as established by the engine manufacturer in his sales and service literature for vehicle application. A conventional automotive muffler of a size and type commonly used with the engine being tested shall be employed in the exhaust system during smoke emission testing. The terminal 2 feet of the exhaust pipe shall be circular cross section and be free of elbows and bends. The end of the pipe shall be cut off squarely. The terminal 2 feet of the exhaust pipe shall have a nominal inside diameter in accordance with the engine being tested, as specified below:

Maximum rated horsepower:	*Exhaust pipe inside diameter*
Less than 101	inches 2
101-200	do 3
201-300	do 4
301 or more	do 5

(d) An engine air inlet system presenting an air inlet restriction within 1 inch of water of the upper limit for the engine operating condition which results in maximum air flow, as established by the engine manufacturer in his sales and service literature, for the engine being tested.

§ 86.879-9 Smoke measurement system.

(a) *Schematic drawing.* The Figure I79-1 is a schematic drawing of the optical system of the light extinction meter.

(b) *Equipment.* The following equipment shall be used in the system:

(1) Adapter—the smokemeter optical unit may be mounted on a fixed or movable frame. The normal unrestricted shape of the exhaust plume shall not be modified by the adaptor, the meter, or any ventilator system used to remove the exhaust from the test site.

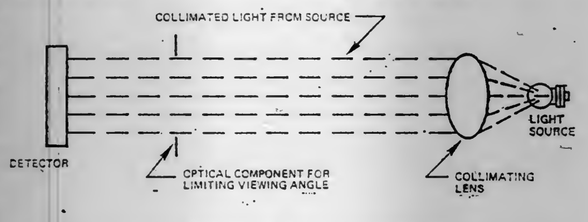

Figure I79-1 SMOKEMETER OPTICAL SYSTEM (SCHEMATIC)

(2) Smokemeter (light extinction meter)—continuous recording, full-flow light obscuration meter. It shall be positioned near the end of the exhaust pipe so that a built-in light beam traverses the exhaust smoke plume which issues from the pipe at right angles to the axis of the plume. The light source is an incandescent lamp operated at a constant voltage of not less than 15 percent of the manufacturer's specified voltage. The lamp output is collimated to a beam with a nominal diameter of 1.125 inches. The angle of divergence of the collimated beam shall be within 4° included angle. A light detector, directly opposed to the light source, measures the amount of light blocked by the smoke in the exhaust. The detector sensitivity is restricted to the visual range and comparable to that of the human eye. A collimating tube with apertures equal to the beam diameter is attached to the detector. It restricts the viewing angle of the detector to within 16° included angle. An amplified signal corresponding to the amount of light blocked is recorded continuously on a remote recorder. An air curtain across the light source and detector window assemblies may be used to minimize deposition of smoke particles on those surfaces provided that it does not measurably affect the opacity of the plume. The meter consists of two units, an optical unit and a remote control unit. Light extinction meters employing substantially identical measurement principles and producing substantially equivalent results but which employ other electronic and optical techniques may be used only after having been approved in advance by the Administrator.

(3) Recorder—a continuous recorder, with variable chart speed over a minimal range of 0.5 to 8.0 inch per minute (or equivalent) and an automatic marker indicating 1-second intervals shall be used for continuously recording the exhaust gas opacity, engine rpm and throttle position. The recorder shall be equipped to indicate only when the throttle is in the fully-open or fully-closed position. The recorder scale for opacity shall be linear and calibrated to read from 0 to 100 percent opacity full scale. The opacity trace shall have a resolution within 1-percent opacity. The recorder scale for engine rpm shall be linear and have a resolution of 30 rpm. The throttle position trace must clearly indicate when the throttle is in the fully-open and fully-closed positions. Any means other than a strip-chart recorder may be used provided it produces a permanent visual data record of quality equal to or better than that described above.

(4) The recorder used with the smokemeter shall be capable of full-scale deflection in 0.5 second or less. The smokemeter-recorder combination may be damped so that signals with a frequency higher than 10 cycles per second are attenuated. A separate low-pass electronic filter with the following performance characteristics may be installed between the smokemeter and the recorder to achieve the high-frequency attenuation.

(i) 3 decibel point—10 cycles per second.

(ii) Insertion loss—zero ± 0.5 decible.

(iii) Selectivity—12 decibles per octave above 10 cycles per second.

(iv) Attenuation—27 decibels down at 40 cycles per second minimum.

(c) *Assembling equipment.* (1) The optical unit of the smokemeter shall be mounted radially to the exhaust pipe so that the measurement will be made at right angles to the axis of the exhaust plume. The distance from the optical centerline to the exhaust pipe outlet shall be 5±1 inch. The full flow of the exhaust stream shall be centered between the source and detector apertures (or windows and lenses) and on the axis of the light beam.

(2) Power shall be supplied to the control unit of the smokemeter in time to allow at least 15 minutes for stabilization prior to testing.

§ 86.879-10 Information.

The following information, as applicable, shall be recorded for each test:

(a) Engine description and specifications. A copy of the information specified in this paragraph must accompany each engine sent to the Administrator for compliance testing. If the engine is submitted to the Administrator for testing under Subpart D, only the information specified in § 86.337 need accompany the engine. The manufacturer need not record the information specified in this paragraph for each test if the information, with the exception of subparagraphs (3); (12), and (13) of this paragraph, is included in the manufacturer's Part I.

(1) Engine-system combination.

(2) Engine identification numbers.

(3) Number of hours of operation accumulated on engine.

(4) Rated maximum horsepower and torque.

(5) Maximum horsepower and torque speeds.

(6) Engine displacement.

(7) Governed speed.

(8) Curb-idle rpm.

(9) Fuel consumption at maximum power and torque.

(10) Maximum air flow.

(11) Air inlet restriction.

(12) Exhaust pipe diameter(s).

(13) Maximum exhaust system back pressure.

(b) Test data; general. This information may be recorded at any time between 4 hours prior to the test and 4 hours after the test.

(1) Engine-system combination.

(2) Engine identification numbers.

(3) Instrument operator.

(4) Engine operator.

(5) Number of hours of operation accumulated on the engine prior to beginning the warm-up portion of the test.

(6) Calibration date(s) of neutral density filters used to calibrate the smokemeter.

(c) Test data; pre-test.

(1) Date and time of day.

(2) Test number.

(3) Barometric pressure.

(4) Smokemeter: Number-zero control setting—calibration control setting—gain.

(5) Intake air humidity and temperature:

(i) Humidity-conditioned air supply. Air that has had its absolute humidity altered is considered humidity-conditioned air. For this type of intake air supply, the humidity measurement must be made within the intake air supply system, and after the humidity conditioning has taken place.

(ii) Non-conditioned air supply. Humidity measurements in non-conditioned intake air supply systems must be made in the intake air stream entering the supply system and within 18 inches of the inlet for supply system. Alternatively, the humidity measurements can be measured within the intake air supply stream.

(iii) Engine intake air temperature measurement must be made within 48 inches of the engine. The measurement location must be made either in the supply system or in the air stream entering the supply system.

(d) Test data; modal.

(1) Observed engine torque and speed during the steady-state test conditions specified in § 86.879-7(a)(3)(i).

(2) Recorder chart: Identify zero traces—calibration traces—idle traces—closed-throttle trace—open-throttle trace—acceleration and lugdown test traces—start and finish of each test.

§ 86.879-11 Instrument checks.

(a) The smokemeter shall be checked according to the following procedure prior to each test:

(1) The optical surfaces of the optical section shall be visually checked to verify that they are clean and free of foreign material and fingerprints;

(2) The zero control shall be adjusted under conditions of "no smoke" to give a recorder trace of zero;

(3) Calibrated neutral density filters having approximately 10, 20, and 40 percent opacity shall be employed to check the linearity of the instrument. The filter(s) shall be inserted in the light path perpendicular to the axis of the beam and adjacent to the opening from which the beam of light from the light source emanates, and the recorder response shall be noted. The nominal opacity value of the filter shall be confirmed by the Administrator semi-annually. Deviations in excess of 1 percent of the nominal opacity shall be corrected.

(b) The instruments for measuring and recording engine rpm, engine torque, air inlet restrictions, exhaust system back pressure, throttle position, etc., which are used in the tests prescribed herein, shall be calibrated in accordance with good engineering practice.

§ 86.879-12 Test run.

(a) The temperature of the air supplied to the engine shall be between 68° F and 86° F. The fuel temperature at the pump inlet shall be 100° F±10° F. The observed barometric pressure shall be between 28.5 inches and 31 inches Hg. Higher air temperature or lower barometric pressure may be used, if desired, but no allowance will be made for possible increased smoke emissions because of such conditions.

(b) The governor and fuel system shall have been adjusted to provide engine performance at the levels in the application for certification required under § 86.079-21.

(c) The following steps shall be taken for each test:

(1) Start cooling system;

(2) Warm-up the engine by the procedure described in § 86.341(d)(5);

(3) Determine by experimentation the dynamometer inertia and dynamometer load required to perform the acceleration in the dynamometer cycle for smoke emission tests (§ 86.879-7(a)(2)). In a manner appropriate for the dynamometer and controls being used, arrange to conduct the acceleration mode;

(4) Install smokemeter optical unit and connect it to the recorder. Connect the engine rpm and throttle position sensing devices to the recorder;

(5) Turn on purge air to the optical unit of the smokemeter, if purge air is used;

(6) Check and record zero and span settings of the smokemeter recorder at a chart speed of approximately 1 inch per minute. (The optical unit shall be retracted from its position about the exhaust stream if the engine is left running.);

(7) Precondition the engine by operating it for 10 minutes at maximum rated horsepower;

(8) Proceed with the sequence of smoke emission measurements on the engine dynamometer as prescribed in § 86.879-7;

(9) During the test sequence of § 86.879-7, continuously record smoke measurements, engine rpm, and throttle position at a minimum chart speed of 1 inch per minute during the idle mode and transitional periods and 8 inches per minute during the acceleration and lugging modes. The smokemeter zero and full-scale recorder deflections may be rechecked during the idle mode of each test sequence. If either zero or full-scale drift is in excess of 2 percent opacity, the smokemeter controls must be readjusted and the test must be repeated;

V 42 174 SEP 8 77 UMI

(10) Turn off engine;

(11) Check zero and reset if necessary and check span of the smokemeter recorder by inserting neutral density filters. If either zero or span drift is in excess of 2 percent opacity, the test results shall be invalidated.

§ 86.879–13 Chart reading.

The following procedure shall be used to analyze the recorder chart:

(a) Locate the modes specified in § 86.879–7 (a) (1) through (a) (4) by applying the following starting and ending criteria:

(1) The idle mode specified in § 86.879–7(a) (1) starts when engine preconditioning or the lugging mode of a preceding cycle has been completed and ends when the engine speed is raised above the idle speed.

(2) The acceleration mode specified in § 86.879–7(a) (2) (i) starts when the preceding idle mode has been completed and ends when the throttle is in the fully-open position as indicated by the throttle position trace.

(3) The acceleration mode specified in § 86.879–7(a) (2) (ii) starts when the preceding acceleration mode has been completed and ends when the engine speed reaches 85 percent of the rated speed.

(4) The transition period specified in § 86.879–7(a) (2) (iii) starts when the preceding acceleration mode has been completed and ends when the throttle is in the fully-open position as indicated by the throttle position trace.

(5) The acceleration mode specified in § 86.879–7(a) (2) (iv) starts when the preceding transition period has been completed and ends when the engine speed reaches 95 percent of the rated speed.

(6) The transition period specified in § 86.879–7(a) (3) (i) starts when the preceding acceleration mode has been completed and ends when the engine speed is 50 rpm below the rated speed and the provisions of § 86.879–7(a) (3) (i) are met.

(7) The lugging mode specified in § 86.879–7(a) (3) (ii) starts when the preceding transition period has been completed and ends when the engine speed is at the intermediate speed.

(b) Determine if the test requirements of § 86.879–7 are met by applying the following modal criteria:

(1) Idle mode as specified in § 86.879–7 (a) (1):

(i) Duration: 5 to 5.5 minutes.

(ii) Speed: Within specifications during the last 4 minutes of the mode.

(2) Acceleration mode as specified in § 86.879–7(a) (2) (i).

(i) Duration: 3 seconds or less.

(ii) Speed increase: 200±50 rpm.

(3) Acceleration made as specified in § 86.879–7(a) (2) (ii):

(i) Linearity: ±100 rpm as specified in paragraph (c) of this section.

(ii) Duration: 3.5 to 6.5 seconds.

(iii) Throttle position: Fully-open until speed is at least 95 percent of the rated speed.

(4) Transition period as specified in § 86.879–7(a) (2) (iii):

(i) Throttle position: Moved rapidly to, and held in the fully-closed position.

(5) Acceleration mode as specified in § 86.879–7(a) (2) (iv):

(i) Duration: 8 to 12 seconds.

(ii) Throttle position: Fully-open when speed is at intermediate speed.

(6) Transition period as specified in § 86.879–7(a) (3) (i):

(i) Duration: 50 to 60 seconds.

(ii) Speed during last 10 seconds within ±50 rpm of rated speed.

(iii) Corrected power during last 10 seconds: At least 95 percent of horsepower developed during zero-hour testing.

(7) Lugging mode as specified in § 86.879–7 (a) (3) (ii):

(i) Linearity: ±100 rpm as specified in paragraph (c) of this section.

(ii) Duration: 30 to 40 seconds.

(iii) Speed at end: Intermediate speed.

(c) Determine if the linearity requirements of § 86.879–7 were met by means of the following procedure:

(1) For the acceleration mode specified in § 86.879–7(a) (2) (ii), note the maximum deflection of the rpm trace from a straight line drawn between the starting and ending points specified in paragraph (a) (3) of this section.

(2) For the lugging mode specified in § 86.879–7(a) (3) (ii), note the maximum deflection of the rpm trace from a straight line drawn from the starting and ending points specified in paragraph (a) (7) of this section.

(3) The test results will be invalid if any deflection is greater than 100 rpm.

(d) Analyze the smoke trace by means of the following procedure:

(1) Starting at the beginning of the first acceleration, as defined in paragraph (a) (2) of this section, and stopping at the end of the second acceleration, as defined in paragraph (a) (3) of this section, divide the smoke trace into ½-second intervals. Similarly, subdivide into ½-second intervals the third acceleration mode and the lugging mode as defined by paragraphs (a) (5) and (7) respectively, of this section.

(2) Determine the average smoke reading during each ½-second interval.

(3) Locate and record the 15 highest ½-second readings during the acceleration mode of each dynamometer cycle.

(4) Locate and record the five highest ½-second readings during the lugging mode of each dynamometer cycle.

(5) Examine the average ½-second values which were determined in subparagraphs (3) and (4) of this paragraph and record the 3 highest values for each dynamometer cycle.

§ 86.879–14 Calculations.

(a) Average the 45 readings in § 86.879–13(d) (3) and designate the value as "A".

(b) Average the 15 readings in § 86.879–13(d) (4) and designate the value as "B".

(c) Average the 9 readings in § 86.879–13(d) (5) and designate the value as "C".

20. The title to Subpart J is revised to read as follows:

Subpart J—Emission Regulations for New 1977 and 1978 Model Year Diesel Heavy-Duty Engines; Gaseous Exhaust Test Procedure

21. Section 86.977–1 is revised to read as follows:

§ 86.977–1 General applicability.

The provisions of this subpart apply to new 1977 and 1978 model year Diesel heavy-duty engines.

(Secs. 202, 206, 207, 208, 301(a), Clean Air Act, as amended (42 U.S.C. 7521, 7525, 7541, 7542, 7601, formerly 42 U.S.C. 1857f–1, 1857f–5, 1857f–5a, 1857f–6, 1877g(a) which was reclassified by 91 Stat. 685 (August 7, 1977)).)

PART IV

DEPARTMENT OF TRANSPORTATION

PROCUREMENT REGULATIONS

Revision

V 42 174 SEP 8 77 UMI V

Title 41—Public Contracts and Property Management

CHAPTER 12—DEPARTMENT OF TRANSPORTATION

[OST Docket No. 19]

PROCUREMENT REGULATIONS

Revision

AGENCY: Department of Transportation.

ACTION: Final rule.

SUMMARY: The purposes of this document are to: (1) revise and update the Department of Transportation Procurement Regulations (DOTPR) to bring them into line with the Federal Procurement Regulations (FPR), no substantive change being intended; and (2) add a new Part and a Supplement, both concerning Government Property, which, in the absence of comparable FPR coverage, constitute DOT supplementation of the FPR.

EFFECTIVE DATE: September 8, 1977.

FOR FURTHER INFORMATION CONTACT:

H. E. Tetirick, Chief, Procurement Management Division, Office of Installations and Logistics, Department of Transportation, Washington, D.C. 20590 (202–426–4237).

SUPPLEMENTARY INFORMATION: With the exception of the new Part 12–70 and the new supplement 1, discussed below, this update of the DOTPR consists primarily of editorial and administrative additions and deletions to bring the DOTPR into consonance with current FPR coverage; hence, this revision does not promulgate new substantive policy. Where coverage of any subject may now be found in the FPR, previous DOTPR coverage has simply been revoked. Coverage on the subjects of Value Engineering and Classified Material has been updated to current Armed Services Procurement Regulation coverage. For these reasons, and for the additional reason that this material concerns public property and contracts, it is being published without notice and opportunity for public comment and being made effective upon publication in the FEDERAL REGISTER.

The new Part 12–70 and the new Supplement 1 on which public comment was invited (42 FR 5324, January 27, 1977) and received established for the Department a uniform system for the provision, use, control, accounting and disposition of Government property used by contractors in connection with the performance of work under DOT contracts. The regulations prescribe policies, procedures, authorities, and responsibilities as necessary to effectuate such a system, with respect to both the preaward and postaward phases of contracting. Part 12–70 contains directive material applicable to DOT contracting personnel, whereas Supplement 1 is applicable to those DOT contractors that are provided Government property.

The regulations were developed in response to a demonstrated need for such directives within the Department. In the absence of a prescribed Departmental system, the contractual and administrative aspects associated with Government-provided property have not been accorded uniform treatment by the various procurement activities of the Department. By the same token, there has been a lack of consistency in the requirements levied on DOT contractors with respect to the control and accountability of Government property. With regard to the matter of consistency, it is recognized that many contractors presently utilize Government property procedures established by other Federal agencies, particularly the Department of Defense (DOD), the National Aeronautics and Space Administration (NASA), and the Department of Health, Education, and Welfare.

Accordingly, in developing these regulations the existing procurement regulations of such agencies were used as guidelines. In some subject areas the DOTPR coverage is identical to that found in the regulations just cited, while in other areas the coverage of a particular subject is modified or condensed to accommodate DOT's specific needs. Additionally, pertinent provisions of the FPR and the Federal Property Management Regulations have been referenced where appropriate.

As previously indicated, the new Part 12–70 provides direction to DOT contracting personnel. Within this part are set forth policies, procedures, authorities, and responsibilities relative to the following general subjects:

(1) Furnishing Government material to contractors;

(2) Providing Government facilities to contractors;

(3) Use of Government facilities in the possession of contractors or subcontractors;

(4) Property administration;

(5) Vesting of title to equipment under research contracts; and

(6) Disposition of excess and residual contract inventory. Supplement 1 (the manual) sets forth the basic requirements to be followed by contractors in establishing and maintaining control over Government property. It will be incorporated by reference in all contracts under which Government property is provided to contractors, and be made available to each such contractor. Within this manual are contained procedures and responsibilities relative to the following general subjects:

(1) Contractor's assumption of, and relief from, responsibility for Government property;

(2) Records of Government property to be maintained by the contractor;

(3) Identification of Government property;

(4) Conduct of physical inventories;

(5) Care, maintenance, and utilization of Government property;

(6) Passage of title to equipment under research contracts; and

(7) Reports to be provided to the Government.

In response to the notice of proposed rulemaking (42 FR 5324, January 27, 1977), a number of substantive comments were received. After careful consideration, the Department believes none of them should be adopted for the reasons stated below. The proposal, therefore, is being adopted without change, except as explained below:

1. *Comment.* The regulations as written are contrary to the principles established by Office of Management and Budget (OMB) Circular A–21 (Federal Management Circular (FMC) 73–8), OMB Circular A–110, and Cost Accounting Standards.

Response. There is no conflict between the regulations cited in this comment and the DOTPR's. FMC 73–8 and the Cost Accounting Standards pertain solely to cost principles and contractor cost accounting standards, and the DOTPR's do not affect or have an impact on such principles and standards. With respect to OMB Circular A–110, contracts which are awarded and administered under Federal procurement laws and regulations are specifically exempted from the requirements of OMB Circular A–110.

2. *Comment.* Proposed regulations would increase record keeping costs far more than any benefits derived by maintaining detailed records of items costing between $50 and $200.

Response. This comment implies that items under $200 should not be included in the contractor's property records. Exclusion of such items would be inconsistent with the general requirement that accountability be maintained for Government property. In the case of contractor-held property, this requirement is satisfied by having the necessary property records maintained by the contractor rather than by the Government. The standard Government Property clause, which is required to be included in contracts involving Government property, makes the contractor responsible for and accountable for all Government property in his possession and obligates him to maintain records of all such property. The record keeping requirements set forth in the DOTPR are consistent with generally accepted practices and we feel they are not unreasonable.

3. *Comment.* The definition for Materials in § 12–70.101 and Supplement S–101 also includes nonexpendable items with a unit cost of less than $50 unless the Government designates any such items to be classified as plant equipment.

Recommendation. The inclusion of nonexpendable items is at variance with the definitions established by DOD, NASA, and other Government agencies. This variance causes contractors engaged in work for these other agencies to set up different criteria and classification for such items under DOT contracts. It is recommended this be stricken from the definition.

Response. Not adopted. While DOT's definition of Materials is slightly different from that of DOD/NASA, it is not a different or additional "classification" of property. The purpose of the $50 figure in the DOT definition is to prescribe an amount below which items of a nonexpendable nature may be accounted for by the contractor as material (i.e., consumable) rather than as equipment. This provides for a more precise definition, which we believe to be an improvement over the DOD/NASA definition. In practice, this definition works to the advantage of the contractor in that it simplifies record keeping by reducing the number of items that have to be accounted for as equipment.

4. *Comment.* Section 12–70.503(d) provides that only the Contracting Officer is permitted to relieve a contractor of responsibility for loss, damage, destruction, etc. This section and § 12–70.505 (Responsibilities of the Property Administrator) and S1–502 (Reporting Results of Annual Inventories) do not give the Property Administrator any authority to approve "losses." Physical inventories of materials consisting of any significant number of line items and/or units will very likely require record adjustments to shortages as well as overages disclosed by the inventory. Inventory shortages do not necessarily represent a true "loss" of property. In most cases it is only a variance between the record and the count at a point in time by reason of a cause such as a clerical error or a missing document.

Recommendation. Give the Property Administrator authority to relieve the contractor of responsibility for normal inventory shortages and for other losses which are not due to any negligence.

Response. Not adopted. The Property Administrator is responsible for determining whether an inventory shortage represents a true "loss" of property. However, once a true loss has been established, it is our judgment that only the Contracting Officer should have the authority formally to relieve the contractor of responsibility for such a loss. We believe that determinations of contractor liability are of sufficient importance and complexity as to require action by the Contracting Officer. It should also be pointed out that this is an internal procedural matter which poses no additional burden on the contractor.

5. *Comment.* Definitions in Supplement S–101 include the following property categories which are peculiar to DOT and not compatible with agencies such as DOD and NASA:

(c) Capital property.

(d) Capitalized equipment—Nonexpendable items with a unit acquisition cost of $200 or more.

(k) Noncapitalized equipment—Nonexpendable items with a unit acquisition cost of $50 to $199.

(j) Material—Includes noncapitalized equipment with a unit cost of less than $50.

These differences in categorization cause contractors engaged in work with various Government agencies to establish multiple categories and so add to administrative costs.

Recommendation. Establish definitions and categories which are consistent with the Armed Services Procurement Regulation (ASPR) and that the terms "capital" and "capitalized" be changed to some other designation.

Response. Not adopted. While these DOT property categories are titled differently from comparable DOD/NASA categories, they are not incompatible and do not constitute additional or different categories. The basic difference is that we have included dollar limitations within each definition, which provides for a more precise definition and which we feel is an improvement over DOD/NASA.

6. *Comment.* Supplement S1–202 requires the transmittal of receipted Government transfer documents to the Property Administrator.

Recommendation. This should not be a requirement except only in those instances when needed by the Property Administrator since records maintained by the contractor are utilized as the official contract records.

Response. Not adopted. Existing Federal regulations require that the value of contractor-held property be reflected in the Government's financial property accounts. While the records maintained by the contractor are considered to be the official contract property records, these records do not satisfy the requirement for Government-maintained financial accounts. In order to maintain these accounts on a current basis, it is essential that pertinent transaction documents be provided to the DOT accounting offices. Since these documents are already available to the contractor, it does not impose an unreasonable burden on the contractor to furnish them to the Government.

7. *Comment.* The requirement in Supplement S1–203 to submit itemized reports of purchases or fabrications of capital property is impractical and burdensome to a contractor. Since records established and maintained by a contractor are designated and utilized as the official contract records, it should not be necessary to itemize along with application for payment. An approved system would support acquisitions with appropriate records and files of acquisition documents.

Recommendation. The paragraph should be changed to read that the contractor shall maintain records and documents which support his application for payment.

Response. Not adopted. Response made to preceding comment applies.

8. *Comment.* Supplement S1–501 requires an annual inventory of capital property and of noncapitalized equipment.

Recommendation. This part should be revised to require a periodic inventory of these classes in accordance with the frequency determined necessary by the Property Administrator. That frequency should be the same as that approved by other Government agencies having prime cognizance over the contractor's property control system.

Response. Not adopted. We feel that annual physical inventories are necessary to maintain proper control and accounting of contractor-held Government property, and are not an unreasonable requirement. Establishment of a uniform policy assures consistent treatment of all DOT contracts and contractors, and relieves Property Administrators of the burden of making judgmental decisions on a case-by-case basis.

9. *Comment.* Supplement S1–503 requires a final inventory submission within 30 days after completion or termination. This is unrealistic.

Recommendation. Change the requirement to 90 days after completion or termination.

Response. Not adopted. If a contractor has consistently complied with the property administration requirements of the contract, then submission of final inventory reports within 30 days is generally realistic. However, if unusual circumstances exist, the DOTPR specifically provides for an extension of this time upon request.
